PONY

Maths

By: Mohamed Nasreldin

4th

Primary
First Term

2022

Contents

Theme 1: Number Sense and Operations

Unit 1: Place Value

Unit 2: Addition and Subtraction Strategies

Unit 3 Concepts of Measurement

Unit 4: Area and Perimeter

Theme 2: Mathematical Operations and Algebraic Thinking

Unit 5 Multiplication as a Relationship

Unit 6: Understanding Factors and Multiples

Unit 7: Multiplication and Division: Computation and Relationships

Unit 8 Order of Operations

Theme 1 Number Sense and Operations

Unit 1 Place Value

Lesson 1
Digit, Numeral and Number

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the difference between Digit, Numeral and Number.
- Discuss how the place value of a number can change.

Lesson 2
Really Big Numbers!

Learning Objectives:

By the end of this lesson, the student will be able to:
- Recognize all place values of integers up to one billions.
- Explain how the value of a number changes based on its place within the number.

Lesson 3
Changing Values

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain how the value of a digit changes when it moves to the left in the integer.
- Describe the patterns he noticed when values change.

Lesson 4
Comparing Values

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the relationship between the place value of a certain number and the place value of another number to the left of it.
- Use multiplication to compare place values.

Lesson 5
Many Ways to Write

Learning Objectives:

By the end of this lesson, the student will be able to:
- Write the Numerical Form in Standard Form, Word Form and Expanded Form.

Lesson 6
Composing and Decomposing

Learning Objectives:

By the end of this lesson, the student will be able to:
- Compose and decompose numerals into multiple formats.

Lesson 7
Comparing Really Big Numbers

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use place value to compare large numerical formulas.
- Use symbols to express numerical comparisons.

Lesson 8
Comparing Numbers in Multiple Forms

Learning Objectives:

By the end of this lesson, the student will be able to:
- Compare numbers in different forms.
- Describe strategies for comparing numbers in different forms.

Lesson 9
Descending and Ascending Numbers

Learning Objectives:

By the end of this lesson, the student will be able to:
- Arrange the numbers in different formats.
- Describe strategies for arranging numbers in different formats.

Lesson 10
Predicting the Unpredictable

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explains Front-end Estimation Strategy.
- Uses Front-end Estimation Strategy to round large numbers.

Lesson 11
Rounding Rules

Learning Objectives:

By the end of this lesson, the student will be able to:
- Apply different strategies for rounding numbers.
- Discuss which estimation is more accurate, the Front-end or Rounding Estimation.

Concept 1.1 Reinforcing Place Value

Lesson 1

Digit, Numeral and Number

Digit

It is a single symbol used to make numerals. Digits are limited, starting from the digit 0 and ending with the digit 9 (Ten digits: 0, 1, 2, 3, 4, 5, 6, 7, 8 or 9).

Number

It is an amount related to the numeral and consists of one or more digits. The numbers are unlimited and endless.

Numeral

It is a symbol or name that stands for a number. Examples: 3, 49 and twelve are all numerals.
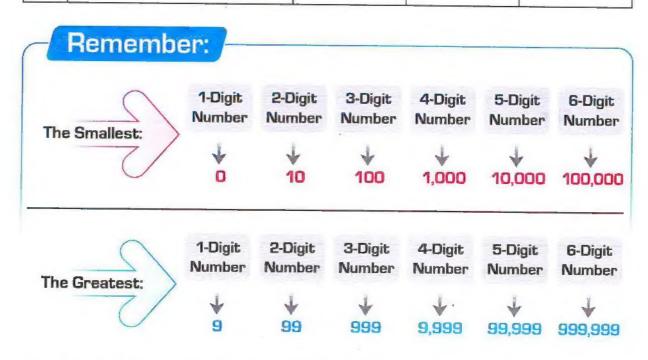

- The following table shows examples of Digits, Numbers and Numerals:

	Digit	Number	Numeral
7	✓	✓	✓
25		✓	✓
Five			✓
3	✓	✓	✓
256		✓	✓
Seventy three			✓

So, – The number is an idea, the numeral is how we write it.

– All digits are numbers (a 1-digit-number), not all numbers are digits.

– All digits and numbers can be called numerals.

1 Write each number in the appropriate column. (Some numbers may belong to more than one column).

		Digit	Number	Numeral
a	369			
b	24			
c	9			
d	Forty six			
e	2,000			
f	6,330,265			
g	Eight			
h	7			
i	88			
j	0			
k	Three hundred seventeen			
l	Ninety			

Remember:

	1-Digit Number	2-Digit Number	3-Digit Number	4-Digit Number	5-Digit Number	6-Digit Number
The Smallest:	0	10	100	1,000	10,000	100,000

	1-Digit Number	2-Digit Number	3-Digit Number	4-Digit Number	5-Digit Number	6-Digit Number
The Greatest:	9	99	999	9,999	99,999	999,999

The Place Value

• In the following number: 372,865

Thousands			Ones		
Hundreds	Tens	Ones	Hundreds	Tens	Ones
3	7	2	8	6	5

	Hundred-thousands	Ten-thousands	Thousands	Hundreds	Tens	Ones
The Place Value:	↑	↑	↑	↑	↑	↑
	3	7	2	8	6	5
	↓	↓	↓	↓	↓	↓
The Value:	300,000	70,000	2,000	800	60	5

2 Write the greatest and the smallest numbers that can be formed from the digits (5, 7, 9, 0 and 4).

– The **greatest** number: ....

– The **smallest** number: ....

3 Write the Place value of the digit (4) in each of the following:

ⓐ 5<u>4</u>5,222 : ....   ⓑ <u>4</u>23,500 : ....

ⓒ 12,0<u>4</u>5 : ....   ⓓ 23,<u>4</u>66 : ....

ⓔ 25,12<u>4</u> : ....

4 Circle the appropriate symbol to compare the numbers:

	First Number	Comparison Symbol	Second Number
ⓐ	54,336	< = >	45,336
ⓑ	900,900	< = >	99,000
ⓒ	56,002	< = >	50,602
ⓓ	4,500	< = >	4,500

Lesson **2**

Really Big Numbers!

We Previously know that:

- The **largest 6-digit-number** is 999,999.

- **It is read as:** Nine hundred ninety-nine thousand, nine hundred ninety-nine.

- We can find the number that comes **just after** it by adding the number "1", as follows:

	Numerical period			Numerical period		
Millions	**Thousands**			**Ones**		
	Hundreds	**Tens**	**Ones**	**Hundreds**	**Tens**	**Ones**
	9	9	9	9	9	9
						1 +
1	0	0	0	0	0	0

- The **resulting number** is 1,000,000 and is read as **"One million"**.

So, We know that there is a numerical period called **Millions**, followed by another numerical period called **Billions**, as follows:

Numerical period	Numerical period			Numerical period			Numerical period		
Billions (Milliards)	**Millions**			**Thousands**			**Ones**		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones

Example (1):

Use the following Place Value table to read the shown number:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
		3	5	8	9	1	4	5	5
	35 Millions			891 Thousands			455		

- The previous number is read **from left to right** so that **each number** is followed by **the name of the period**:

Thirty-five **million**, eight hundred ninety-one **thousand**, four hundred fifty-five.

Example (2):

Use the following Place Value table to read the shown number:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
	8	1	5	5	2	0	0	2	1
	815 Millions			520 Thousands			21		

- The previous number is read as:

Eight hundred fifteen **million**, five hundred twenty **thousand**, twenty one.

Example (3):

Use the following Place Value table to read the shown number:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
3	9	9	0	7	0	2	5	7	1
3 Billions	990 Millions			702 Thousands			571		

- The previous number is read as:

Three **billion**, nine hundred ninety **million**, seven hundred and two **thousand**, five hundred seventy-one.

1 Use the following Place Value table to read the shown number:

ⓐ

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
		2	7	2	5	4	9	8	5

– The previous number is read as: ....
....

ⓑ

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
1	3	9	0	4	0	2	6	5	0

– The previous number is read as: .. ..
....

2 Write the following numbers: **(In Standard Form):**

ⓐ 45 Millions + 120 Thousands + 123 = ...

ⓑ 259 Millions + 24 Thousands = ...

ⓒ 275 Millions + 299 = ...

ⓓ 9 Billions + 109 Millions + 56 Thousands + 2 = ...

ⓔ 3 Billions + 215 Thousands + 28 = ...

3 Complete the following:

ⓐ 9,445,325 = ... Millions + ... Thousands + ...

ⓑ 925,023,007 = ... Millions + ... Thousands + ...

24,000,305 = ... Millions + ... Thousands + ...

6,025,007,000 = ... Billions + ... Millions

+ .... Thousands + ...

8,029,000,028 = ... Billions + ... Millions

+ .... Thousands + ...

In each of the following numbers, find the Place Value of the digit 7:

ⓐ In the number 35,785,692, the digit 7 is in the .... place.

ⓑ In the number 2,522,573, the digit 7 is in the .... place.

ⓒ In the number 7,325,864 125, the digit 7 is in the .... place.

ⓓ In the number 125,000,347, the digit 7 is in the .... place.

ⓔ In the number 27,000,210, the digit 7 is in the .... place.

ⓕ In the number 2,700,200,300, the digit 7 is in the .... place.

Underline the digit in the Ten-millions place:

ⓐ 2,587,924,388.   ⓑ 25,348,975.

ⓒ 962,525,252.

Underline the digit in the Thousands place:

ⓐ 345,823,622.   ⓑ 9,909,909.

ⓒ 253,332.

Lesson 3

Changing Values

Remember:

When Multiplying by 10:

– We can simply add "**0**" to the number to find the product:
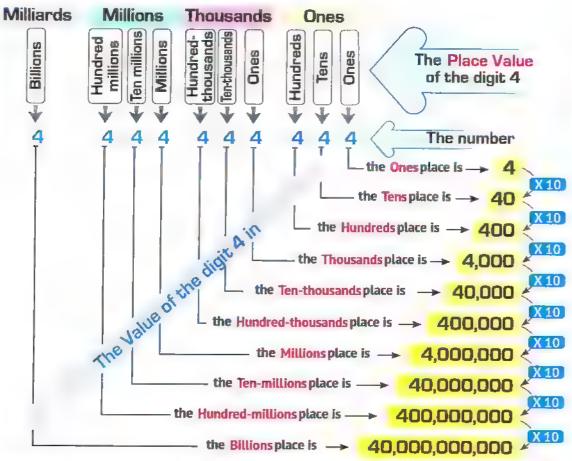

3 X 10 = 30	12 X 10 = 120
30 X 10 = 300	120 X 10 = 1,200
300 X 10 = 3,000	1,200 X 10 = 12,000
3,000 X 10 = 30,000	12,000 X 10 = 120,000

– The **value** of the number changes depending on **where it is located,** as in the following example:

Milliards		Millions			Thousands			Ones		
Billions		Hundred millions	Ten millions	Millions	Hundred-thousands	Ten-thousands	Ones	Hundreds	Tens	Ones
4		4	4	4	4	4	4	4	4	4

The Place Value of the digit 4

The number

The Value of the digit 4 in

the Ones place is →	**4**	
the Tens place is →	**40**	X 10
the Hundreds place is →	**400**	X 10
the Thousands place is →	**4,000**	X 10
the Ten-thousands place is →	**40,000**	X 10
the Hundred-thousands place is →	**400,000**	X 10
the Millions place is →	**4,000,000**	X 10
the Ten-millions place is →	**40,000,000**	X 10
the Hundred-millions place is →	**400,000,000**	X 10
the Billions place is →	**40,000,000,000**	X 10

We notice that, the **value** of the digit **(4)** increases by **10** times when it moves to the **left.**

- 1 Ten = 10 Ones.
- 1 Hundred = 10 Tens.
- 1 Thousand = 10 Hundreds.
  1 Ten-thousand = 10 Thousands.
- 1 Hundred-thousand = 10 Ten-thousands.

- 1 Million = 10 Hundred-thousands.
- 1 Ten-million = 10 Millions.
- 1 Hundred-millions = 10 Ten-millions.
- 1 Billions = 10 Hundred-millions.

Billions (Milliards)	Millions			Thousands					
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones

X 10   X 10   X 10   X 10   X 10   X 10   X 10   X 10   X 10

1 Find the ____ and the Place Value of the underlined digit in the following:

	Number	Value	Place Value
ⓐ	252,987,65**4**		
ⓑ	9,126,63**2**,486		
ⓒ	1,91**7**,371,394		
ⓓ	2,790,004,**5**21		
ⓔ	7,698,**0**56,107		
ⓕ	**9**,126,632,509		

2 Complete the following:

ⓐ The value of the digit 3 in the Hundreds place is _____.

ⓑ The value of the digit 7 in the Ten-millions place is _____.

ⓒ 50 Tens = _____.

ⓓ 60 Ten-thousands = _____.

ⓔ 50 Hundreds = _____ Tens.

ⓕ 800 Hundreds = _____ Thousands.

Lesson ④

Comparing Values

Notes

- **10** = 1 Tens.
- **100** = 1 Hundred = 10 Tens.
- **1,000** = 1 Thousand = 10 Hundreds = 100 Tens.
- **10,000** = 10 Thousands = 100 Hundreds = 1,000 Tens.
- **100,0000** = 100 Thousands = 1,000 Hundreds = 10,000 Tens.
- **1,000,000** = 1 Million = 1,000 Thousands = 10,000 Hundreds = 100,000 Tens.
- **10,000,000** = 10 Millions = 10,000 Thousands = 100,000 Hundreds = 1,000,000 Tens.
- **100,000,000** = 100 Millions = 100,000 Thousands = 1,000,000 Hundreds
  = 10,000,000 Tens.
- **1,000,000,000** = 1 Billion = 1,000 Millions = 1,000,000 Thousands.
  = 10,000,000 Hundreds = 100,000,000 Tens.

1 **Complete the following:**

ⓐ 50,000 = ... **Hundreds.**

ⓑ 6,000,000 = ... **Thousands.**

ⓒ 8,000 **Millions** = ... **Billions.**

ⓓ 1,000 **Thousands** = ... **Hundreds.**

ⓔ The **place** in which the digit 3 is located with a value equal to 10 times the digit 3 in the Ten-thousands place is ....

ⓕ The **place** in which the digit 4 is located with a value equal to 100 times the digit 4 in the Ones place is ....

ⓖ The **value** of the digit in the Thousands place is equal to .... times the digit in the Tens place.

ⓗ The **value** of the digit in the Millions place is equal to .... times the digit in the Ten-thousands place.

Complete the following (as in the example):

(3 Hundreds, 5 Ones) X 100 = 305 X 100 = 30,500.

ⓐ (4 Tens, 3 Ones) X 10 = ...

ⓑ (2 Hundreds, 3 Tens) X 100 = ...

ⓒ (5 Thousands, 6 Hundreds) X 1,000 = ...

ⓓ (9 Ten-thousands, 8 Hundreds, 5 Ones) X 10 = ...

ⓔ 9 Hundreds X 1,000 = ...

ⓕ 24 Thousands X 100 = ...

ⓖ 25 Millions X 10 = ...

3 Complete the following:

ⓐ The smallest 8-digit-number is ....

ⓑ Million is the smallest number formed from .... digits.

ⓒ The largest 10-digit-number is ....

ⓓ The largest 7-different-digit-number is ....

ⓔ The number that is equal to 100 times the number 5.. is ....

ⓕ The .... number formed from the digits 3, 7, 0, 0, 1, 1, . is

....

ⓖ The .... number consisting of the digits 5, 9, 0, 5, 1, 1, .. is

....

ⓗ The largest even number formed from 7 digits is . ...

ⓘ The .... of the digit 6 in the number 24,687,922 is ....

ⓙ The .... of the digit 4 in the number 892,546,317 is

....

Lesson 5

Many Ways to Write

•Standard Form:

It is a way of using **digits** to write a number.

Ex. 35,254

•Expanded Form:

It is a way of using **Place Value** to write a number.

Ex. 30,000 + 5,000 + 200 + 50 + 4
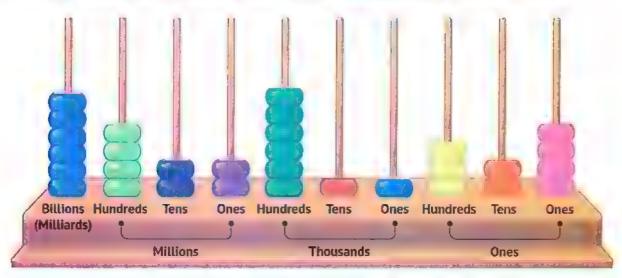

• Word Form:

It is a way of using **words** to write a number.

Ex. Thirty-five thousand, two hundred fifty-four.

Example (1):

Write the number represented on the abacus in different forms:

Billions (Milliards) | Hundreds | Tens | Ones | Hundreds | Tens | Ones | Hundreds | Tens | Ones

Millions   Thousands   Ones

– **Standard Form** : 6,422,611,324

– **Expanded Form:** 6,000,000,000 + 400,000,000 + 20,000,000 + 2,000,000 + 600,000 + 10,000 + 1,000 + 300 + 20 + 4

– **Word Form** : Six billion, four hundred twenty two million, six hundred eleven thousand, three hundred twenty-four.

Example (2):

Use the following Place Value table to write the number in different forms:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
4	9	0	2	0	7	0	0	1	5
4 Billions	902 Millions			70 Thousands			15		

– Standard Form : 4,902,070,015

4,000,000,000 + 900,000,000 + 2,000,000 + 70,000 + 10 + 5

Four billion, nine hundred two million, seventy thousand, fifteen.

Write the following numbers in the Word Form:

17,200,523: .

100,020,045:

20,000,000 + 100,000 + 400 + 50 + 9:

7,000,000,000 + 50,000 + 200:

2 **Write the following numbers in Standard Form:**

   a Five million, twenty-five thousand, two hundred three: ....

   b Three billion, six million, four thousand, four: ....

   c 9,000,000,000 + 40,000,000 + 80,000 + 200 + 6 = ...

   d 7,000,000,000 + 500,000 + 200 = ...

3 **Write the Expanded Form of the following numbers:**

   a 40,300,102 = ...

   b 7,000,080,006 = ...

   c Seven billion, fifty thousand, two hundred = ...

   ....

   d One hundred fifty million, twenty-nine thousand, three hundred sixteen =

   ....

4 **Complete the following table:**

	Standard Form	Word Form	Expanded Form
a	203,500,200		
b		Five billion, four million, nineteen thousand, six hundred seventy-five	
c			100,000,000 + 20,000,000 + 90,000 + 300 + 8

Lesson 6

Composing and Decomposing

(Expanded Notation), by using the following Place Value table:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
4	9	7	5	3	1	8	6	4	2

Notes:

- The digit 2 is in the **Ones** place and its value is 2 = (2 X 1)

  The digit 4 is in the **Tens** place and its value is 40 = (4 X 10)
- The digit 6 is in the **Hundreds** place and its value is 600 = (6 x 100)

  The digit 8 is in the **Thousands** place and its value is 8,000 = (8 X 1,000)

  The digit 1 is in the **ten-thousands** place and its value is 10,000 = (1 X 10,000)

  The digit 3 is in the **hundred-thousands** place and its value is 300,000 = (3 X 100,000)

  The digit 5 is in the **millions** place and its value is 5,000,000 = (5 X 1,000,000)

  The digit 7 is in the **ten-millions** place and its value is 70,000,000 = (7 X 10,000,000)

  The digit 9 is in the **hundred-millions** place and its value is 900,000,000

  $$= (9 X 100,000,000)$$

  The digit 4 is in the **billions** place and its value is 4,000,000,000 = (4 X 1,000,000,000)

So, **Composing Numbers:** 4,975,318,642

(Expanded Notation):

(4 X 1,000,000,000) + (9 X 100,000,000) + (7 X 10,000,000) +

(5 X 1,000,000) + (3 X 100,000) + (1 X 10,000) + (8 X 1,000) + (6 X 100)

(4 X 10) + (2 X 1)

1 Use the following Place Value table to compose and decompose the numbers:

a

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
8	0	2	7	0	5	0	0	0	6

1. Composing the Number: ....

    2. Decomposing the Number (Expanded Notation):

....

....

b

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
....	....	......	....	....	....	....	....	....	....

1. Composing the Number: ....

    2. Decomposing the Number (Expanded Notation):

    (6 X 1,000,000,000) + (9 X 100,000) + (2 X 10,000) + (5 X 100) + (9 x 10)

c

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
....	....	......	....	....	....	....	....	....	....

1. Composing the Number: 20,014,023.

    2. Decomposing the Number (Expanded Notation):

....

....

2 Compose the following numbers:

(8 X 10,000,000) + (7 X 10,000) + (2 X 10) + (1 X 1)

=   .

(2 X 1,000,000,000) + (9 X 10,000) + (8 X 1,000) + (5 X 100)

=   .

900,000,000 + 200,000 + 50,000 + 200 + 9

=   .

Write the following numbers in Expanded form:

67 millions, 125 thousands, 12 = ...

7,024,650:

Seventy five million, thirty thousand, four hundred sixty:

Write the following numbers in the expanded notation:

Six billion, nine hundred million, ten thousand, four.

Eight million, seventy thousand, two hundred.

10,200,548.

2 million, 200 thousand, 57. ....

Lesson ⑦

Comparing Really Big Numbers

– To compare two numbers, do the following:

First: If the number of digits of each number is different

The number that has more digits is the largest

Ex.   210,106   **>**   81,016

Six digits   Five digits

Second: If the number of digits of each number is equal

Compare the value of the digits of the two numbers from left to right:

Example:

ⓐ 245,568 < 567,984

⇒ Because the value of the digit 5 is **greater than** the value of the digit 2.

ⓑ 78,620 > 76,902

⇒ Because the value of the digit 8 is **greater than** the value of the digit 6.

ⓒ 952,105 < 958,601

⇒ Because the value of the digit 8 is **greater than** the value of the digit 2.

Choose the suitable symbol to compare:

ⓐ 780,215,564	> = <	770,215,564
ⓑ 56,242,980	> = <	56,224,980
ⓒ 88,995	> or = or <	550,882
ⓓ 1,000,600	> = <	235,450
ⓔ 7,000,546	> = <	7,000,546

2 Answer the following:

ⓐ Write a number in the Hundred-thousands place less than (<) 793,612.

....

ⓑ Write a number in the Hundreds place greater than (>) 289.

....

ⓒ Write a number in the Billions place less than (<) 6,300,000.

....

ⓓ Write a number in the Ten-thousands place greater than (>) 24,500.

....

Complete the following to make the comparison correct:

ⓐ .... < 223,445 < ....

ⓑ .... > 200,908 > ....

ⓒ 75,205,512 > .... > 70,258,456.

ⓓ 7,000,000,000 < .... < 8,000,000,000.

ⓔ .... < .... < 210,884,560.

Lesson **8**

Comparing Numbers in Multiple Forms

The same comparison strategies mentioned in the previous lesson are applied. Also, different forms can be converted to the Standard Form to facilitate the comparison process.

Example: Compare using (< , = or >):

325,050,240		325,500,240
Three hundred twenty five million, fifty thousand, two hundred forty	<	300,000,000 + 20,000,000 + 5,000,000 + 500,000 + 200 + 40

1 Complete the following table using (< , = or >):

a	Three hundred twenty five thousand, fourteen		300,000 + 20,000 + 5,000 + 10 + 4
b	20,900,852		19,899,510
c	(9 X 1,000,000) + (3 X 10,000) + (9 X 1,000) + (8 X 100) + (7 x 10)		90,000,000 + 30,000 + 9,000 + 800 + 70
d	2,000,500,250		Two billion, five hundred million, two hundred fifty thousand
e	Nine billion		(9 X 100,000,000) + (9 X 10,000,000) + (9 X 1,000,000)

Complete with a numeral in Standard Form:

ⓐ 7,225,547 < ....

ⓑ 12,125,250 > _____ .

Complete with a numeral in Expanded Form:

ⓐ 100,258,963 < _____

_____ .

ⓑ 20,300,520 > _____

_____ .

Complete with a numeral in Expanded Notation:

ⓐ 20,000 < _____

_____ .

ⓑ 7,000,000 > ....

_____ .

Complete with a numeral in Word Form:

ⓐ 200,350 < _____

_____ .

ⓑ 2,200,200 > _____

_____ .

Lesson 9

Descending and Ascending Numbers

Ascending Order

It is the order of numbers from the **least** to the **greatest**.

Descending Order

It is the order of numbers from the **greatest** to the **least**.

Example: **For arranging the following numbers:**

351,724 , 315,742 , 351,472 , 315,247

We compare **each digit** in the numbers from **left to right**.

351,724 , 315,742 , 351,472 , 315,247

If the first digits from the left are **equal,** we compare the next digits until we reach the **different** digits.

3 5 1,7 2 4 , 3 1 5,7 4 2 , 3 5 1,4 7 2 , 3 1 5,2 4 7

So, **The ascending order :** 315,247 , 315,742 , 351,471 , 351,724.

The descending order : 351,724 , 351,471 , 315,742 , 315,247.

Arrange the following numbers in a descending order:

ⓐ 520,000 , 205,000 , 502,000 , 250,000.

The order : _____ , _____ , _____ , _____ .

ⓑ 364,250 , 643,205 , 346,205 , 436,250.

The order : _____ , _____ , _____ , _____ .

Arrange the following numbers in an ascending order:

ⓐ 999,999 , 9,000,000 , 100,000 , 900,900.

The order : _____ , _____ , _____ , _____ .

ⓑ 78,090 , 79,010 , 78,091 , 79,100 , 78,999.

The order : _____ , _____ , _____ , _____ .

Arrange the following numbers in an ascending order (Numbers can be written using the Standard Form):

The order	Number	Standard Form
	Three billion, ten million, two thousand, fifty.	
	Three billion, one hundred million, twenty thousand, five.	
	Three billion, one million, two hundred thousand, five hundred.	
	Three billion, one hundred million, two hundred thousand, one hundred.	
	Three billion, one million, two thousand, five.	

4 Arrange the following numbers in a descending order (Numbers can be written using the Standard Form):

The order	Number	Standard Form
a.	Four billion, sixty thousand, seven.	
b.	(4 X 1,000,000,000) + (6 X 100,000) + (7X10).	
c.	4,000,000,000 + 600,000 + 700.	
d.	4,000,006,700.	
e.	Four billion, six thousand, seventy.

Lesson 10

Predicting the Unpredictable

Front-end Estimation Strategy:

To estimate a number, we replace all digits of the number with ____. Except for the first number on the left, it remains the same without any increase or decrease.

Example Front-end Estimation Strategy:

Number	Estimation
89,450	80,000
741,280	700,000
447,621,987	400,000,000

Number	Estimation
2,789	2,000
67,875,512	60,000,000
7,224,125,936	7,000,000,000

Complete the following table:

Number	Front-end Estimation
ⓐ 45,231,546	….
ⓑ Three billion, five hundred sixty million, nine hundred seven thousand, fifty five.	
ⓒ 7,000,000,000 + 400,000,000 + 200,000 + 90	
ⓓ (3 X 1,000,000) + (2 X 10,000) + (7 X 100) + (9 X 10)	
ⓔ 14 million, 258 thousand, 635	

Lesson 11

Rounding Rules

Rounding

It is replacing a number with a simpler number that is close to the original number.
The Symbol ($\approx$) is called "approximately equal".
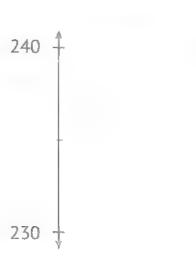

Rounding Rules:

First: The Midpoint Strategy:

470

Example (1): **Round the number 468 to the nearest ten:**   468

From the number line, we notice that:

465

⇒ The number 468 is located between the numbers 460 and 470

⇒ And the midpoint between the two numbers is 465.

So, the number 468 is closer to the number 470.   460

468 $\approx$ 470 (to the nearest ten).

Example (2): **Round the number 724 to the nearest hundred:**   800

From the number line, we notice that:

⇒ The number 724 is located between the numbers 700 and 800.

⇒ And the midpoint between the two numbers is 750.   750

So, the number 724 is closer to the number 700.   724

724 $\approx$ 700 (to the nearest hundred).

700

Note *When the number is in the middle, it is closer to the largest number.*

Write down the midpoint of the number line. Then, locate each number on the number line. Round each number to the nearest ten:

238 ≈ _____ .   98 ≈ _____ .

240 ┬
    │
    ┼
    │
230 ┴

100 ┬
    │
    ┼
    │
90 ┴

Write down the midpoint of the number line. Then, locate each number on the number line. Round each number to the nearest hundred:

278 ≈ _____ .   7,429 ≈ _____ .

300 ┬
    │
    ┼
    │
200 ┴

7,500 ┬
      │
      ┼
      │
7,400 ┴

3 Write down the midpoint of the number line. Then, locate each number on the number line. Round each number to the nearest thousand:

ⓐ 4,500 ≈ ....

ⓑ 11,157 ≈ ....

5,000 ⊥

4,000 ⊥

12,000 ⊥

11,000 ⊥

4 Write down the midpoint of the number line. Then, locate each number on the number line. Round each number to the nearest million:

ⓐ 9,208,504 ≈ ....

ⓑ 22,699,205 ≈ ....

10,000,000 ⊥

9,000,000 ⊥

23,000,000 ⊥

22,000,000 ⊥
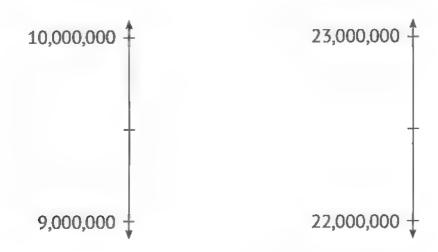

Second: The Place Value Strategy:

When rounding with a given Place Value:

We select the digit in the place to be rounded.

We replace the digits in the places that precede the previously selected digit with zeros.

We look at the digit in the place preceding the place to be rounded directly.

If the digit is	If the digit is
0, 1, 2, 3, or 4, the number of the specified place remains unchanged.	5, 6, 7, 8 or 9, we add (1) to the number of the specified place.

Round the following numbers to the nearest 10:

7 ②
↓ ↓ ↓
7 2 0

4,3 8̄
↓ ↓ ↓ ↓
4 3 9 0

724 ≈ 720 (To the nearest 10).

4,386 ≈ 4,390 (To the nearest 10).

Round the following numbers to the nearest 1,000:

⁺1
4 (9) 7̲ 8 6
↓ ↓ ↓ ↓
5 0 0 0 0

7 3̄, 6 5
↓ ↓ ↓ ↓ ↓
7 3 0 0 0

49,786 ≈ 50,000
(To the nearest 1,000).

73,465 ≈ 73,000
(To the nearest 1,000).

Example (3): Round the following numbers to the nearest 1,000,000:

a 1 ⑤ 1 7 0 7 2 8
↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
1 5 0 0 0 0 0 0

15,170,728 ≈ 15,000,000
(To the nearest 1,000,000)

b 5 ⓪ 9 3 3 2 0 6
↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
5 1 0 0 0 0 0 0

50,933,206 ≈ 51,000,000
(To the nearest 1,000,000)

1 **Round the following numbers to the nearest 10:**

a 255 ≈ ....

b 368 ≈ ....

c 73 ≈ ....

d 96 ≈ ....

e 12,257 ≈ ....

f 123,996 ≈ ....

2 **Round the following numbers to the nearest 100:**

a 750 ≈ ....

b 6,897 ≈ ....

c 71,915 ≈ ....

d 999 ≈ ....

e 29,990 ≈ ....

f 1,527 ≈ ....

3 **Round the following numbers:**

a 15,523 ≈ ....   (To the nearest 1,000)

b 86,165 ≈ ....   (To the nearest 10,000)

c 987,625 ≈ ....   (To the nearest 100,000)

d 452,652,251 ≈ ....   (To the nearest 1,000,000)

e 669,458,562 ≈ ....   (To the nearest 10 thousand)

f 6,500,000,000 ≈ ....   (To the nearest billion)

Find the result of each of the following, using the Front-end
Estimation Strategy and the Rounding Rule Strategy.
Then, determine which of them is closer to the actual answer:

Question	Actual Answer	Front-end Estimation Strategy	Rounding Rule Strategy
(Ex. 32 + 46	32 + 46 = 78	30 + 40 = 70 ( )	30 + 50 = 80 (✓)
ⓐ 12 + 58	....	.... ( )	.... ( )
ⓑ 189 + 226	....	.... ( )	.... ( )
ⓒ 287 + 285	....	.... ( )	.... ( )
ⓓ 3,348 + 2,563	....	.... ( )	.... ( )

Unit ② Addition and Subtraction Strategies

Lesson 1

Properties of Addition and Subtraction

Learning Objectives:

By the end of this lesson, the student will be able to:

- Determine the properties of the operations of addition and subtraction.
- Explain the properties of addition and subtraction.
- Search to determine whether the properties of addition apply to subtraction or not.

Lesson 2

Mental Math Strategies

Learning Objectives:

By the end of this lesson, the student will be able to:

- Apply various Mental Math Strategies for addition and subtraction.
- Explain the importance of Mental Math Skills.

Lesson 3

Addition With Regrouping

Learning Objectives:

By the end of this lesson, the student will be able to:

- Add multi-digit integers.
- Use estimation to determine whether his/her answers are reasonable or not.

Lesson 4

Subtraction Strategies

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use Decomposing Numbers Strategy to subtract whole numbers consisting of several digits.
- Explain the importance of identifying patterns and relationships in mathematics.

Lesson 5

Subtraction With Regrouping

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use place value to perform subtraction using Standard Algorithm.
- Perform subtraction with renaming.
- Use estimation to check the reasonableness of their answers.

Lesson 6

Bar Models, Variables and Story Problems

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use symbols in equations to represent unknown values.
- Use bar models to represent and solve word problems.
- Determine the value of the variable in an equation.

Lesson 7

Solving Multistep Story Problems with Addition and Subtraction

Learning Objectives:

By the end of this lesson, the student will be able to:

- Solve multi-step word problems.
- Explain how they solve multi-step word problems.

Learn 1

Properties of Addition and Subtraction

Properties of Addition

is zero

Neutral Element Property:

is the integer that can be added to any integer without changing the result.

the sum of any whole number with the neutral element remains the same. The Additive Neutral Element is ((**Zero**))

$24,256 + 0 = 24,256$, $0 + 3,648 = 3,648$

Commutative Property: الإبدال

– The sum of two numbers does not change by switching their order.

Example: $24 + 12 = 36$ and $12 + 24 = 36$

So, $24 + 12 = 12 + 24$

Associative Property: الدمج (الأقواس)

– If more than two numbers are added, we can add them in any order.

Example: $10 + 5 + 30 + 2$

$10 + 5 + 30 + 2$	$10 + 5 + 30 + 2$	$10 + 5 + 30 + 2$
$= (10 + 5) + 30 + 2$	$= 10 + (5 + 30) + 2$	$= 10 + 5 + (30 + 2)$
$= (15 + 30) + 2$	$= 10 + (35 + 5)$	$= (10 + 5) + 32$
$= 45 + 2$	$= 10 + 37$	$= 15 + 32$
$= 47.$	$= 47.$	$= 47.$

$10 + 5 + 30 + 2 = 10 + (5 + 30) + 2 = 10 + 5 + (30 + 2).$

1 Choose the correct answer:

ⓐ $5 + 3 = 3 + 5$

"................................ Property"

(Neutral Element or (Commutative) or Associative)

ⓑ $54 + 0 = 54$

"................................ Property"

((Neutral Element) or Commutative or Associative)

ⓒ $7 + 3 + (4 + 9) = 7 + (9 + 3) + 4$

"................................ Property"

(Neutral Element or (Commutative) or Associative)

ⓓ $254 + 328 = 328 + 254$

"................................ Property"

(Neutral Element or (Commutative) or Associative)

ⓔ $24,125 + 0 = 24,125$

"................................ Property"
((Neutral Element) or Commutative or Associative)

ⓕ $(120 + 147) + 250 = 147 + (250 + 120)$

"................................ Property"

(Neutral Element or (Commutative) or Associative)

• **Negative Numbers:** Look at the following number line:

$$-9 \quad -8 \quad -7 \quad -6 \quad -5 \quad -4 \quad -3 \quad -2 \quad -1 \quad 0 \quad 1 \quad 2 \quad 3 \quad 4 \quad 5 \quad 6 \quad 7 \quad 8 \quad 9 \quad 10$$

There are numbers less than **"Zero"** that are called: **Negative numbers.**

Ex. **(−1) is read as** negative one, and it means a number **less than zero by one.**

(−6) is read as: negative six, and it means a number **less than zero by six.**

It will be studied in details later in higher grades.

Properties of Subtraction

First (Neutral Element) **Property:**

– **When we subtract:** $5 - 0 = 5$.

– **When we subtract:** $0 - 5$ by using the number line, the difference is (-5).

So, $5 - 0 = 5$ but **$0 - 5 \neq 5$**

Therefore, Neutral Element Property is **not applicable** in the subtraction process.

Commutative Property:

– When we subtract: 7 – 3 = 4.

– .... 3 – 7 by using the number line, the difference is (–4).

So, $7 - 3 \neq 3 - 7$

$(\quad - \quad)$

.... Commutative Property is not applicable in the subtraction process.

Associative Property:

– When we subtract: 9 – 6 – 3.

– .... using **parentheses**, as follows:

$(9 - 6) - 3 = 3 - 3 = 0$ or $9 - (6 - 3) = 9 - 3 = 6.$

So, $(9 - 6) - 3 \neq 9 - (6 - 3)$

.... Associative Property is not applicable in the subtraction process.

Complete the following and write the Addition Property used:

ⓐ 5 + 3 = __3__ + 5.   "Commutative Property"

ⓑ 28 + __17__ = 17 + 28.   "Commutitive Property"

ⓒ 5 + 0 = __5__ .   "neutral element Property"

ⓓ __0__ + 215 = 215 .   "additive identity Property"

ⓔ (8 + 3) + 4 = 8 + (__3__ + 4).   "associative Property"

ⓕ (25 + 35) + 40 + 20 = __25__ + (35 + 40) + __20__ .

   "associative Property"

3 Find the result of each, then circle the property(ies):

	Problem		Property
a	13 + 20 + 15 ⟶ 48	20 + 15 + 13 ⟶ 48	Associative / (Commutative) / Neutral Element
b	0 + 214 ⟶ 214	214 + 0 ⟶ 214	Associative / Commutative / (Neutral Element)
c	(10 + 40) + 36 ⟶ 86	10 + (40 + 36) ⟶ 86	Associative / Commutative / (Neutral Element)
d	20 + 0 + 15 ⟶ 35	15 + 0 + 20 ⟶ 35	(Associative) / (Commutative) / Neutral Element

Lesson **2**

Mental Math Strategies

Front-end Estimation Strategy:

- Where only the _____ place value in each number (the first number on the left) is _____ _____ to obtain an estimate of the answer.

452 + 23	Will be →	400 + 20 = 420
628 − 29	Will be →	600 − 20 = 580

The result may not be close to the actual answer.

*This strategy is used if we want to get results
that are somewhat close to the answer.*

Rounding Strategy:

- Where previously studied Rounding Rules are applied to obtain a more accurate estimate of the answer.

452 + 23	Will be →	500 + 20 = 520
628 − 29	Will be →	600 − 30 = 570

The result will be somewhat close to the actual answer.

This strategy is used if we want to get results closer to the actual answer.

Compensation Strategy:

- Where _____ of the two numbers is replaced by a multiple of ten and the _____ _____ is _____ to keep the two numbers in balance.

Examples: **a** 63 + 29   *(The nearest multiple of 10 to 29 is 30)*

(We add 1 to 29 to be 30)

(We subtract 1 from 63 to be 62 to keep the

= 62 + 30 = 92   *balance)*

So, 63 + 29 = 92

b 217 + 78

= 215 + 80 = 295

c 245 – 99

= 246 – 100 = 146

d 885 – 58

= 887 – 60 = 827

Notes

- In addition ➔ Subtract to compensate.
- In subtraction ➔ Add to compensate.

This strategy is used if we have a number close to the perfect Tens or the perfect Hundreds. Such as: 99, 58, 27, 289, 399, 158 ...

Composing and Decomposing Strategy:

– Where the number that is subtracted or added is decomposed into **numbers** that are **easy to add or subtract mentally.** (We can use the **Expanded Form**).

Examples: **a** 438 + 247   *(Decompose the number 247 to*

200 + 40 + 7)

= 438 + 200 + 40 + 7   *(Add the Hundreds)*

= 638 + 40 + 7   *(Then add the Tens)*

= 678 + 7 = 685   *(Then add the Ones)*

b 583 – 57 = (583 – 50) – 7 = 533 – 7 = 526

c 928 – 253 = (928 – 200) – 50 – 3 = (728 – 50) – 3 = 678 – 3

= 675

This strategy is used to facilitate the solution of complex problems.

Counting up Strategy (from the smallest number to the largest number):

– Where the number is counted from the smallest number until we reach the largest number, and the result is the number of numbers that have been counted.

Examples:

a) $785 - 770 = 15$ *(We count after 770 until we reach 785)*
So, we find that the result is 15.

b) $90 - 86 = 4$ *(We count after 86 until we reach 90)*
So, we find that the result is 4.

This strategy is used if the difference between the numbers
is not so large that it is easy to count.

Use the **Front-end Estimation Strategy** and **Rounding Strategy** to find:

Problem	Front-end Estimation Strategy	Rounding Strategy
ⓐ 26 + 45		
ⓑ 42 – 58		
ⓒ 36 + 223		
ⓓ 427 – 125		
ⓔ 3,785 + 1,258		

2 Use the Compensation Strategy to find the result (Show your steps):

a) 9 + 45

= ....

= ....

= ....

b) 28 + 73

= ....

= ....

= ....

c) 399 + 245

= ....

= ....

= ....

d) 37 – 8

= ....

= ....

= ....

e) 82 – 39

= ....

= ....

= ....

f) 347 – 199

= ....

= ....

= ....

3 Use the Composing and Decomposing Strategy to find the result (Show your steps):

a) 163 + 27

= ....

= ....

= ....

b) 245 + 317

= ....

= ....

= ....

c) 75 – 24

= ....

= ....

= ....

d) 425 – 123

= ....

= ....

= ....

Use Counting up Strategy to find the result:

a) 45 – 37 = _____ .   b) 122 – 113 = _____ .

c) 871 – 776 = _____ .

Use the appropriate mental strategy to find the result (Show your steps). (Compensation or Composing and Decomposing or Counting up):

Problem	Mental Math Strategy	Solution
a) 49 + 64		
83 – 57		
c) 800 – 793		
d) 456 – 127		
e) 845 – 236		
f) 101 + 98		

Lesson 3

Addition With Regrouping

(Addition with Regrouping)

- To add two numbers, we start by adding the **Ones**, then the **Tens**, then the **Hundreds**, and **so on** in order.
- Sometimes we need to **rename** (regroup).

Example: Add:

ⓐ 5 4 3,2 6 7 + 1 8 9,4 5 2 = **7 3 2,7 1 9**

Horizontally

```
    5 4 3,2 6 7
  + 1 8 9,4 5 2
  _____
    7 3 2,7 1 9
```

Vertically   The Sum

ⓑ 1 2 5,4 6 8 + 8 7 6,5 3 6 = **1,0 0 2,0 0 4**

Horizontally

```
    1 2 5,4 6 8
  + 8 7 6,5 3 6
  _____
  1,0 0 2,0 0 4
```

Vertically   The Sum

ⓒ 9,9 9 9,9 9 9 + 1 = **1 0,0 0 0,0 0 0**

Horizontally

```
    9,9 9 9,9 9 9
  +             1
  _____
  1 0,0 0 0,0 0 0
```

Vertically   The Sum

1 Find the result of each of the following:

ⓐ 52,765
   + 37,135

ⓑ 8,675,568
   +   354,722

ⓒ 7,782,056
   + 2,217,944

ⓓ 4,836 + 6,274 = _____

ⓔ 999,999 + 6 = _____

ⓕ 963,452,793 + 47,058,207 = _____

4,528 + 3,834 = 8,362

By _____ the two numbers to the nearest 10: 4,530 + 3,830 = 8,360

By _____ the two numbers to the nearest 100: 4,500 + 3,800 = 8,300

By _____ the two numbers to the nearest 1 000: 5,000 + 4,000 = 9,000

Looking at the outputs in each case, we find that the closest estimate to the actual output is to the nearest ten.

2 Complete the following table:

(Determine which of the estimates is closest to the actual solution)

Problem	To the Nearest 10	To the Nearest 100	To the Nearest 1,000
ⓐ 7,684 + 6,418	_____ + _____	_____ + _____	_____ + _____
	_____ ( )	_____ ( )	_____ ( )

Problem	To the Nearest 10	To the Nearest 100	To the Nearest 1,000
ⓑ 2,589 + 7,283	+	+	+ ....
....	............( )	............( )	............( )

3 An ant colony goes on a walk through the woods in search for food. On this journey, the ants form two bridges, the first bridge consists of 142 ants and the second bridge consists of 165 ants. What is the number of ants required for both bridges? Explain your steps, then check the reasonableness of your answer.

Estimation (use one of the Rounding Rules):

....

Actual answer:

....

4 Ehab and Abeer travel from Aswan to Alexandria. They will travel 383 km on the first day to Assiut. On the second day, they will travel 462 km from Assiut to Alexandria.

How many kilometers will they travel in the two days?

Estimation (use one of the Rounding Rules):

....

Actual answer:

....
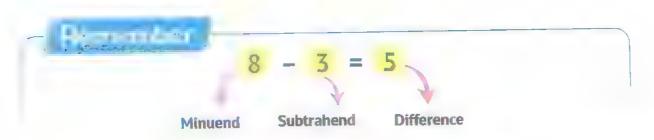

5 The speed of the fighter plane reaches 2,420 km per hour. If this plane moves for two hours maintaining this speed, how far will it travel?

Estimation (use one of the Rounding Rules):

....

Actual answer:

....

Lesson 4

Subtraction Strategies

Remember

$$8 - 3 = 5$$

Minuend   **Subtrahend**   **Difference**

Count down Strategy with Decomposition of Numbers:

We use a number line as follows:

First Step:

Draw a number line without markings (open number line) and write the **minuend** number at the **right end** of the line.

Second Step:
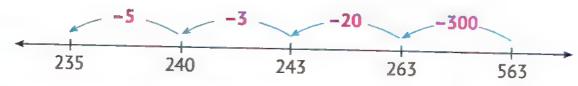

Decompose the subtrahend number into the Expanded Form.

Third Step:

Count down the **minuend** using the Expanded Form of the **subtrahend**.

Example 1: Subtract 563 – 328.

Answer: 328 = 8 + 20 + 300.

$$-8 \qquad -20 \qquad -300$$

235   243   263   563

563 – 328 = 235
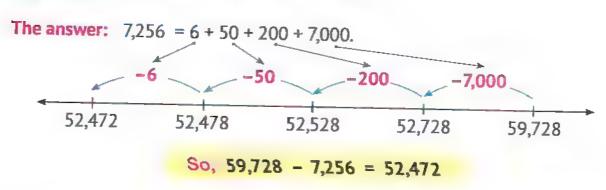

And it can be solved in a **simpler way** by **dividing the number 8 into (5 + 3)** as follows:

−5   −3   −20   −300

235   240   243   263   563

Example 2: Subtract 59,728 − 7,256

The answer: 7,256 = 6 + 50 + 200 + 7,000.

−6   −50   −200   −7,000

52,472   52,478   52,528   52,728   59,728

So, **59,728 − 7,256 = 52,472**

Count-on Strategy with Decomposition of Numbers:

We use a number line as follows:

First Step

Draw a number line without markings (open number line) and write the **subtrahend** number at the **left end** of the line.

Second Step

Decompose the **minuend** number into **easy numbers** or use the **Expanded Form**.

Third Step

Count up from the **subtrahend** number to the **minuend** number while recording the jumps and new results.

Add the jumps together to find the difference.

Subtract 324 – 134

Answer:

+100 +6 +60 +24

134   234   240   300   324

$100 + 6 + 60 + 24 = 190.$

324 – 134 = 190

Another answer:

+6 +60 +100 +20 +4

134   140   200   300   320   324

$6 + 60 + 100 + 20 + 4 = 190.$

So, 324 – 134 = 190

Note

○ The solution can be solved in more than one way by increasing or decreasing the number of hops.
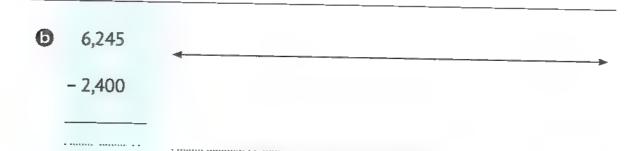

Subtract 43,456 – 23,258
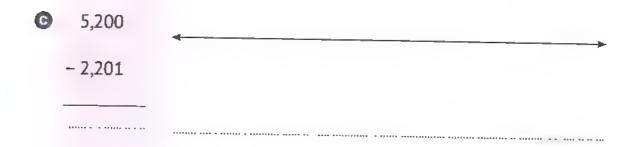

Answer:

+42 +6,700 +13,000 +400 +56

23,258 23,300 30,000 43,000 43,400 43,456
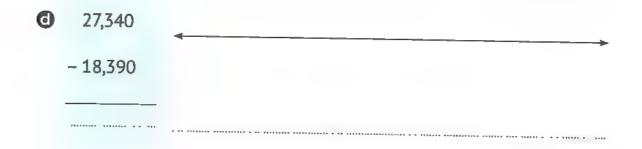

$42 + 6,700 + 13,000 + 400 + 56 = 20,198.$

43,456 – 23,258 = 20,198

1 Find the result of each of the following using the Count Down Strategy:

ⓐ 734

    – 243

    ‾‾‾‾‾‾

ⓑ 6,245

    – 2,400

    ‾‾‾‾‾‾

ⓒ 5,200

    – 2,201

    ‾‾‾‾‾‾

ⓓ 27,340

    – 18,390

    ‾‾‾‾‾‾

Solve the following problems using the Count-on Strategy:

a) 588

     – 326

b) 8,425

     – 4,362

c) 5,200

     – 2,301

d) 16,452

     – 8,250

Lesson 5

Subtraction With Regrouping

Standard Subtraction Algorithm

– To illustrate the **Standard Subtraction Algorithm**, we use the given **Place Value** table.

Example 1: Subtract 65,845 – 37,428

Answer:

First Step:

We use the the **Place Value** table to represent the **minuend** only:

Thousands			Ones		
Hundreds	Tens	Ones	Hundreds	Tens	Ones
	6	5	8	4	5

Second Step

We delete the subtrahend starting from the **Ones** place:

(And if what's inside the box **isn't enough**, we regroup by borrowing from the **next box**):

Thousands			Ones		
Hundreds	Tens	Ones	Hundreds	Tens	Ones
	6	5	8	4	5

So, 65,845 – 37,428 = 28,417

– And the solution can be solved without the use of the Place Value table, using .... renaming horizontally or vertically.
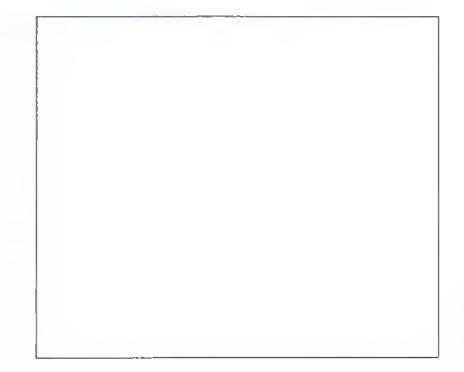

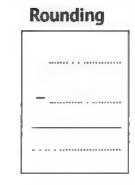

⑤ ⑮   ③ ⑮
6 5́, 8 4́ 5
− 3 7 , 4 2 8
――――――――
  2 8 , 4 1 7

6 5́, 8 4́ 5́ − 3 7 , 4 2 8 = 2 8 , 4 1 7

Use the Place Value **table to find the difference:**

ⓐ 6,254 − 4,823 = ...

Thousands			Ones		
Hundreds	Tens	Ones	Hundreds	Tens	Ones

ⓑ 24,456 − 11,269 = ...

Thousands			Ones		
Hundreds	Tens	Ones	Hundreds	Tens	Ones

2 **Subtract using one of the subtraction strategies, then round each number to the nearest 1,000 (Show your steps):**

ⓐ

8,200

− 6,058

_____

....

Rounding

....

− ....

_____

....

ⓑ

70,234

− 41,812

_____

....

Rounding

....

− ....

_____

....

- It takes 15,422,140 ants to carry an adult of 77 kg and about 3,350,300 ants to carry a 10-year-old child on average 32 kg. How many ants are needed to carry an adult minus a 10-year-old child?

- Round each number to the nearest million, then re-solve the question.

An ant colony contains 255,000 ants, and another colony contains 6.200 ants. What is the difference between the number of ants in the two colonies?

An ant wanted to cross a river that was 3,548 cm wide. The ant had already swam 1,672 cm.
What is the remaining distance that the ant should swim?

Two colonies of ants, the first colony had about 1,267 ants and the second colony had 3,452 ants.
How many more ants are there in the second colony than in the first colony?
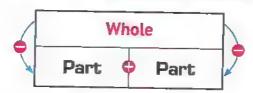

Concept 2.2 Solving Multistep Problems

Lesson 6

Bar Models, Variables and Story Problems
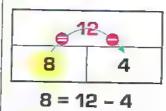

Bar Model: (Part-Part-Whole)
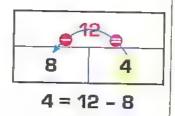

– It is a diagram to represent the relationship between the **whole** and the **part**:

Whole	
Part ⊕	Part

Example:

From the following bar model, we conclude that:

12	
8	4

$8 = 12 - 4$

12	
8 ⊕	4

$12 = 8 + 4$

12	
8	4

$4 = 12 - 8$

The equation:

– It is a **mathematical formula** in which we symbolize the **unknown number** with **one of the letters** (such as: x, y, a, ... etc).

– It is called a **variable** because its value is not fixed and changes from one question to another.

Ex. $4 + X = 9$ **then:** $X = 9 - 4$ → $X = 5.$

$X + 2 = 10$ **then:** $X = 10 - 2$ → $X = 8.$
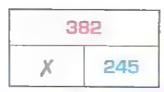

Solve the equation = find the value of the variable.

Example:

Find the missing number: 245 + _____ = 382

(Create a Bar Model and an Equation)

Bar Model:

382	
X	245
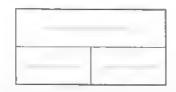

Equation: $X = 382 - 245$ So, $X = 137$

Solution: 137

Read the following questions. Create a Bar Model and
for each problem and then find the solution.

- Ahmed had 6,500 pounds, from which he bought a television set for
6,250 pounds. How much money is left with Ahmed?

Bar Model:
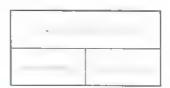

Equation: _____.

Solution: _____.

- A primary school has 2,050 students. 985 of them are girls.
How many boys are in this school?

Bar Model:
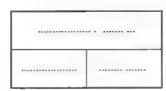

Equation: _____.

Solution: _____.

ⓒ A poultry farm with **4,200** chickens. **3,350** chickens were sold in a week. How many chickens are left on the farm?

Bar Model:

.... ＋	
....	....
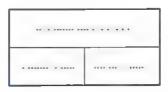

Equation: _____

Solution: _____

ⓓ Ahmed bought a car for **90,950** pounds and bought a house for his family for **750,500** pounds. How much money did Ahmed spend to buy the car and the house?

Bar Model:

... .	
....	....

Equation: _____

Solution: _____

Ⓔxample:

Create a Bar Model to solve the following equation:

$$250 - X = 80$$

Bar Model:

250	
80	X
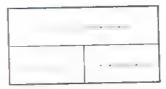

Solution: $X = 250 - 80$

$X = 170.$

Create a **Bar model** to solve the following equations:

a $7{,}120 - X = 5{,}200$

Bar Model:

Solution: _____

b $Y - 22{,}120 = 18{,}850$

Bar Model:
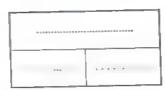

Solution: _____

c $812 + Z = 6{,}000$

Bar Model:

Solution: _____

d $W + 4{,}455 = 7{,}600$

Bar Model:

Solution: _____

Lesson 7

Solving Multistep Story Problems with Addition and Subtraction

Steps for solving word problems:

① Circle the important numbers and data.

② Underline the questions.

③ Draw a square around the solution keys.

④ **Check the information:**
  - What is known? • What is unknown?
  - What is the hidden question?

⑤ Use the knowns to answer the hidden question.

⑥ Use the new information to solve the problem and find the unknown.

Example:

Alaa went to a clothing store and bought a shirt for 260 pounds **and** pants for 430 pounds **and** shoes for 330 pounds. **If Alaa** had 1,300 pounds, how much money is left with him?

Answer:

Alaa paid $= 260 + 430 + 330$

$= 1,020$ pounds.

The amount left with him

$= 1,300 - 1,020$

$= 280$ pounds.

The information :
- **Purchases:**
  - T-shirt for 260 LE.
  - Pants for 430 LE.
  - Shoes for 330 LE.
- Alaa had an amount of 1,300 LE.
- **Unknown:** The remaining amount with Alaa.
- **Hidden question:** What is the total money of what Alaa paid?

    or

What is the value of the purchases that Alaa bought altogether?

The length of the Nile River is about 6,853 km. Karim and his family travel across the Nile from a side to the other side. If they traveled ... km in January, then 1,120 kilometers in February, and then ...525 kilometers in March. How many kilometers are left to travel to get to the other side?

Answer:

The Great Pyramid had 59,000 visitors on Monday, 27,525 on Tuesday, and 62,975 on Wednesday. The number of visitors is expected to be 150.000 from Monday to Thursday. How many visitors have to attend on Thursday to reach that number?

Answer:

Mansoura has a population of 420,195 people. The population of Helwan is ...000 people and the population of New Cairo is .... How much more is the population of Helwan and New Cairo combined than the population of Mansoura?

Answer:

Unit ③
Concepts of Measurement

Lesson 1

Ant Travel (Units of Length)

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the relationship between the metric units of length.
- Convert from one unit to another in metric units for measuring lengths.

Lesson 2

The Weight Can Wait (Measuring Mass)

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the relationship between metric units of mass.
- Convert between metric units of mass.

Lesson 3

Fill It Up (Volume/Capacity)

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the relationship between metric units of capacity.
- Convert between metric units of capacity.

Lesson 4

Measurement and Unit Conversions

Learning Objectives:

By the end of this lesson, the student will be able to:
- Know the relationships between place values and measurement transformations.
- Use multiplication and division to convert between units of measurement.

Lesson 5

What Time Is It?

Learning Objectives:

By the end of this lesson, the student will be able to:
- Read the time in minutes.
- Explain the relationships between units of time measurement.

Lesson 6

How Long Does It Take?

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the meaning of elapsed time.
- Solve elapsed time calculation problems.
- Explain the strategies they use to solve elapsed time problems.

Lesson 7

Scaled Measurement

Learning Objectives:

By the end of this lesson, the student will be able to:
- Draw a line plot graph to represent the given data.
- Select an appropriate key and scale for the line plot graph.
- Write questions that can be answered using their line plot graph.

Lesson 8&9

Measuring the World

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use addition and subtraction to solve problems.
- Use multiplication and division to solve problems.
- Solve word problems related to measurement.
- Apply a variety of strategies to solve word problems.

Concept 3.1 Metric Measurement

Lesson 1

Ant Travel (Units of Length)

Measurement systems

There are many measurement systems that are used in different parts of the world.

Main Quantities	Units of Measurement		
	French System (Gaussian System) (C. G. S.)	British System (F. P. S.)	The Metric System (M. K. S.)
Length	Centimeter	Foot	Meter
Mass	Gram	Pound	Kilogram
Time	Second	Second	Second

In Egypt, we use the Metric System (Meter, Kilogram, Second) in measurement.

Metric System of Measurement:

(Meter, Kilogram, Second)

This system depends on the following units as a basis for measurement:
The ___ is to measure length, the kilogram is to measure weight, the ___ is to measure time, and the liter is to measure capacity.
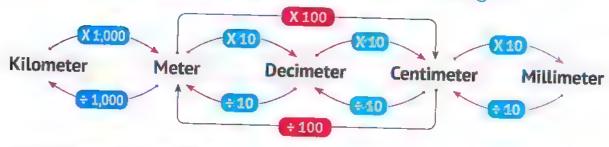

♦ **The following table shows the metric units:**

Main Quantities	1,000 Units	100 Units	10 Units	Unit	$\frac{1}{10}$ Unit	$\frac{1}{100}$ Unit	$\frac{1}{1,000}$ Unit
Length	Kilometer	Hectometer	Dekameter	Meter	Decimeter	Centimeter	Millimeter
Mass	Kilogram	Hectogram	Dekagram	Gram	Decigram	Centigram	Milligram
Time	Kiloliter	Hectoliter	Dekaliter	Liter	Deciliter	Centiliter	Milliliter

Length Units

The relationship between units of length

From the above we find that:

1 **Kilometer** = 1,000 **Meters.**

1 **meter** = 10 **decimeters** • 1 **meter** = 100 **centimeters** • 1 **meter** = 1,000 millimeters

1 **decimeter** = 10 **centimeters** • 1 **decimeter** = 100 millimeters

1 **centimeter** = 10 **millimeters**

1 **Choose the best unit for measuring each of the following:**

ⓐ **Child's height.** (kilometer, meter, centimeter, millimeter)

ⓑ The **distance** between **your house and the club.**

(kilometer, meter, centimeter, millimeter)

ⓒ The **length** of an **insect.** (kilometer, meter, centimeter, millimeter)

The **distance** between **Cairo and Alexandria**.

(kilometer, meter, centimeter, millimeter)

The **height** of a **school**. (kilometer, meter, centimeter, millimeter)
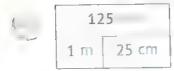

2 Complete each of the following:

Kilometer	Meter
5	....
	6 000
20	....
....	35 000

Meter	Centimeter
....	200
9	....
....	3 000
400	....

Meter	Decimeter
....	90
5	....
....	700
60	....
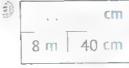

Complete the Bar Models to **convert lengths** units, as in the example:

125 cm
1 m	25 cm

2,360 cm
23 m	60 cm

6,820 m
6 km	820 m

20,290 m
20 km	290 m

.... cm
8 m	40 cm

.... cm
50 m	20 cm

.... m
7 km	70 m

.... m
15 km	120 m

372
.... m	.... cm

1,005
.... m	.... cm

9,300 m
.... km	.... m

70,020 m
.... km	.... m

4 Complete each of the following:

6 m + 25 cm = ... cm.   90 m + 32 cm = ... cm.

4 km + 138 m = ... m.   14 km + 225 m = ... m.

425 cm = ... m + ... cm.

2,003 cm = ... m + ... cm.

7,529 m = ... km + ... m.

90,050 cm = ... m + ... cm.

5 If the length of one bee is about **1 cm**, how long is a row of **100,000 bees?**

Row length = ... cm = ... m ≈ .... km.

6 Ahmed is **150 cm** tall. How tall is Ahmed in decimeters and millimeters?

150 cm = ... dm = ... mm.

7 Sameh practices walking. Usually, he walks **50 meters** per minute.

– How many minutes does Sameh need to walk 500 meters?

....

– What is the distance that Sameh walks in half an hour?

....

Lesson **2**
The Weight Can Wait (Measuring Mass)

(Mass Units)

The relationship between the units of mass.

X 1,000

Kilogram   Gram

÷ 1,000

1 Kilogram = 1,000 Grams

Choose the best mass unit for each of the following:

ⓐ The mass of a **child**.   (Kilograms, grams)

ⓑ The mass of a **ring**.   (Kilograms, grams)

ⓒ The mass of a **pencil**.   (Kilograms, grams)

ⓓ The mass of a **dog**.   (Kilograms, grams)

2 Complete each of the following:

Gram	Kilogram
2,000	....
....	15
61,000	....

Gram	Kilogram
....	9
5,000	....
....	12

3 Complete the Bar Models to convert between mass units:

60,030 grams	
60 kg	30 gm

Ex.

8,235 gm	
8 kg	235 gm

ⓐ
.... gm	
9 kg	105 gm

ⓑ
.... grams	
32 kg	8 gm

ⓒ
8,235 gm	
.... kg	.... gm

ⓓ
41,623 grams	
.... kg	.... gm

4 Complete each of the following:

ⓐ 6 kilograms = ... grams.

ⓑ 200 kilograms = ... grams.

ⓒ 90,000 grams = ... kilograms.

ⓓ 200,000 grams = ... kilograms.

ⓔ 3,624 gm = ... kg + ... gm.

ⓕ 67,026 gm = ... kg + ... gm.

ⓖ 5 kg + 583 gm = ... gm. ⓗ 50 kg + 9 gm = ... gm

5 If Shaima's weight is 45 kilograms and 200 grams, rewrite the weight in grams.

....

....

6 Adam bought 5 kilograms and 500 grams of oranges. Then, he bought 7 kilograms of oranges. Rewrite these weights in grams, then find the total weight of what Adam bought.

....

....

Lesson 3

Fill It Up (Volume/Capacity)

(Capacity Units)

The relationship between the units of Capacity.

X 1,000

Liter   Milliliter

÷ 1,000

1 Liter = 1,000 Milliliters

1 Complete the following:

a)

Liter	Milliliter
50	
	200,000
520,000	

b)

Milliliter	Liter
	8
7,000	
	18

Complete the Bar Models to convert the following volume units, as in the example:

20,008 milliliter	
20 l	8 ml

(Ex.)

7,302 milliliter	
7 l	302 ml

a)

ml	
35 l	20 ml

b)

ml	
9 l	252 ml

c)

3,022 ml	
l	

d)

200,200 ml	
l	ml

3 Complete each of the following:

ⓐ 3 liters = ... milliliters.

ⓑ 50 liters = ... milliliters.

ⓒ 700,000 milliliters = ... liters.

ⓓ 15,000 milliliters = ... liters.

ⓔ 7,320 milliliters = ... liters + ... milliliters.

ⓕ 20,008 milliliters = ... liters + ... milliliters.

ⓖ 11 liters + 11 milliliters = ... milliliters.

ⓗ 10 liters + 2 milliliters= .... milliliters.

4 The car's fuel tank is filled with 45 liters of gasoline. If the tank contains 30 liters and 250 milliliters.

– How much gasoline do we need to fill the tank?

45 liters = ... milliliters.

30 liters, 250 milliliters = ... milliliters.

– Amount of gasoline = ...

5 Islam has 2 liters, 500 milliliters of orange juice and one liter, 250 milliliters of apple juice. What is the total amount of juice that Islam has?

2 liters, 500 milliliters = ... milliliters.

1 liter, 250 milliliters = ... milliliters.

– Amount of juice = ...

6 A bottle contains two liters of soda water. Adel drank 320 milliliters of it and Samah drank 250 milliliters. How much sode water is left in the bottle?

– Use the following Bar Model to solve:

2 Liters		
230 ml	250 ml	...................ml

2 liters = ... milliliter.

– Amount of soda water = ...

Lesson 4

Measurement and Unit Conversions

The relationship between the units of measurement

meter   ...meter   Dekameter   ...   Decimeter   Centimeter   Millimeter

gram   ...gram   ...gram   ...   Decagram   Centigram   ...gram

liter   liter   liter   ...   liter   liter   liter

Milli...	← 1,000 X ← ● **Meter**	● → ÷ 1,000 →	Kilo...
Centi...	← 100 X ← ● **Gram**	● → ÷ 100 →	Hecto...
Deci...	← 10 X ← ● **Liter**	● → ÷ 10 →	Deka...
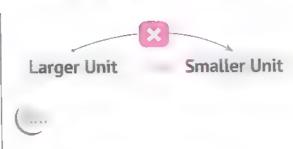

When converting from one unit to another, do the following:

÷
Smaller Unit — Larger Unit

✕
Larger Unit — Smaller Unit

200 cm = 200 ÷ 100 = 2 m.

4,000 gm = 4,000 ÷ 1,000 = 4 kg.

1,500 l = 1,500 ÷ 100 = 15 hectoliter.

5 l = 5 X 1,000 = 5,000 ml.

20 m = 20 X 10 = 200 dm.

200 dekagram = 5 X 10 = 2,000 gm.

1 **Complete the following:**

(a) 3 m = ... X .... = ... cm.

(b) 120 m = ... ÷ .... = ...dekameter.

(c) 50 decigrams = ... = ... centigrams.

(d) 1,200 decigrams = ... = ... grams.

(e) 2,000 ml = ... = ... deciliter.

(f) 42 hectoliters = ... = ... liters.

2 **Complete the following:**

(a) 2,000 cm = ... decimeters = ... meters.

(b) 4,000 gm = ... dekagrams = ... hectograms.

(c) 25 kiloliters = ... hectoliters = ... dekaliters.

(d) 7,000 dekameters = ... hectometers = ... kilometers.

(e) 12 decigrams = ... centigrams = ... milligrams.

(f) 5,000 deciliters = ... liters = ... dekaliters.

3 The distance between Ahmed's house and school is 400 meters. What is the distance that Ahmed travels to reach school in centimeters?

....

....
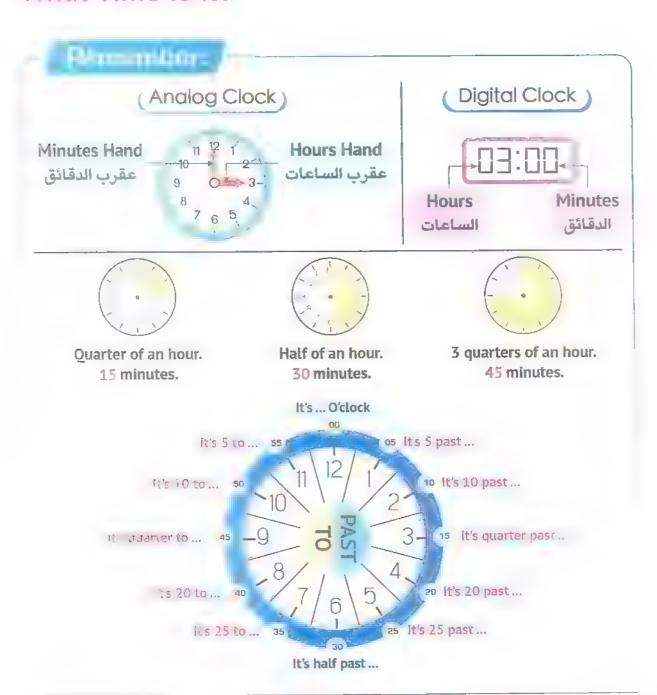

4 The person needs 4,000 ml of water per day. How many liters does a person need per day?

....

....

Evaluate Time and Scaled Measurement
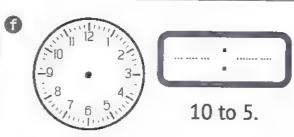

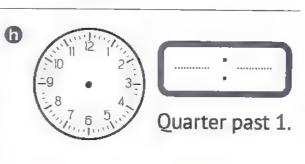

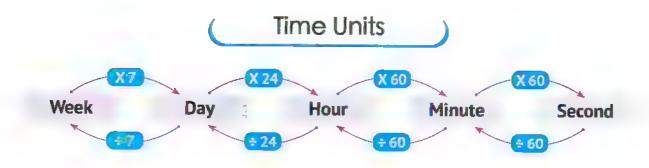

Lesson 5

What Time Is It?

Remember

9	

Solve the following conversion problems:

3 weeks and 5 days = 21 days + 5 days = 26 **days**.

ⓐ 2 **weeks** and 2 **days** = ... + ... = ... **days**.

ⓑ 7 **days** and 10 **hours** = ... + ... = ... **hours**.

ⓒ 3 **days** and 15 **hours** = ... + ... = ... **hours**.

ⓓ 2 **hours** and 10 **minutes** = ... + ... = ... **minutes**.

ⓔ 5 **hours** and 35 **minutes** = ... + ... = ... **minutes**.

10 **minutes** and 50 **seconds** = ... + ... = ... **seconds**.

5 **minutes** and 5 **seconds** = ... + ... = ... **seconds**.

4 Complete the following:

ⓐ 20 **days** = ... **weeks** + ... **days**.

ⓑ 45 **days** = ... **weeks** + ... **days**.

ⓒ 50 **hours** = ... **days** + ... **hours**.

d 130 hours = ... days + ... hours.

e 150 minutes = ... hours + ... minutes.

f 330 minutes = ... hours + ... minutes.

g 90 seconds = ... minutes + ... seconds.

h 605 seconds = ... minutes + ... seconds.

5 Emad traveled with his family on a trip to Luxor and Aswan.
He spent 3 days in Luxor and 4 days in Aswan.
How many hours did Emad spend on this trip?

....

....

....

6 Salah swam in training for 3 hours on Thursday, 2 hours on
Friday and 4 hours on Saturday.
How many minutes did Salah spend in Swimming training in the
three days?

....

....

....

Lesson 6

How Long Does It Take?

Adding and Subtracting Time:

To add and subtract time. Look at the following examples:

Example (1):

We add : Minutes + Minutes

Hours + Hours

In this example, when adding the minutes, we get 25+55=80 minutes. This is not acceptable because the _____ number that can be written in the minutes field is 59 minutes. As 60 minutes is an hour.

1 hour = 60 minutes

$$
\begin{array}{r}
4 : 25 \\
+ 3 : 55 \\
\hline
7 : 80 \\
8 : 20
\end{array}
$$

So, we will regroup 60 minutes and add an hour to the total hours.

4 hours and 25 minutes + 3 hours and 55 minutes = 8 hours and 20 minutes.

Or: $4:25 + 3:55 = 7:80 = 8:20$

Example (2):

We Subtract : Minutes – Minutes

Hours – Hours

In this example, when subtracting 20–45, we get (–25) and this is not acceptable. So, we must follow _____ . We convert 1 hour from hours to 60 minutes, then the minutes become 80 minutes, then we can subtract.

1 hour = 60 minutes

$$
\begin{array}{r}
9 : 20 \\
- 5 : 45 \\
\hline
3 : 35
\end{array}
$$

9 hours and 20 minutes - 5 hours and 45 minutes = 3 hours and 35 minutes.

Or: $9 : 20 - 5:45 = 3:35.$

1 Find the result of each of the following:

a

Hours		Minutes
6	:	34
+ 2	:	26

b

Hours		Minutes
4	:	35
+ 3	:	35

c

Hours		Minutes
9	:	25
− 2	:	43

d

Hours		Minutes
7	:	00
− 2	:	27

e 7 : 32 + 2 : 18 = ...

f 9 : 12 − 2 : 45 = ...

2 Khadija practiced Speed-ball for an hour and 25 minutes.
If she started training at 8:45, when will she finish her training?

....

....

3 Mahmoud travels from Cairo to Alexandria in a time of two hours
and 45 minutes in his car. If he starts his journey from Cairo at
3:30, when will he reach Alexandria?

....

....

4 Jana and Maha have 5 hours to watch three movies. The first
movie is 1 hour 22 minutes long, the second movie is 2 hours 12
minutes, and the third movie is 1 hour 57 minutes.
Do the two girls have enough time to watch the three movies?

(show your steps)

....

....

Lesson 7

Scaled Measurement
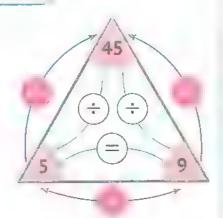

Remember:

Triangle of Division and Multiplication Facts:
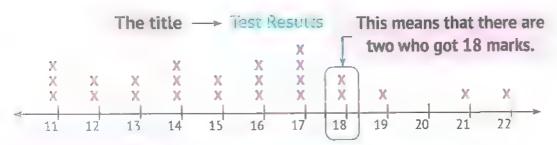

From the opposite triangle:

- $5 \times 9 = 45$
- $9 \times 5 = 45$
- $45 \div 9 = 5$
- $45 \div 5 = 9$

The Line Plot Graph:

The following line plot graph shows the grades of a number of students:

The title → Test Results

This means that there are two who got 18 marks.
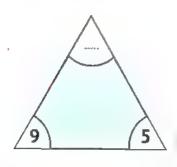

It shows us what the numbers on the line represent. → Students' Marks

X = 1 Student. ← The key

1 Complete the triangle of Division and Multiplication Facts:

a

9   5

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...

b

24

....   8

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...

2 The following line plot graph shows the number of minutes spent by a number of students in ....ball training.
Use the graph to answer the questions:
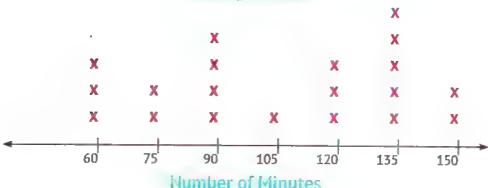

Training Minutes

Number of Minutes

X = 2 Students.

ⓐ The number line scale is ....

ⓑ The .... time students spend in training is .... minutes.

ⓒ The .... time students spend in training is .... minutes.

The most common time students spend in training is _____ minutes.

The least common time students spend in training is _____ minutes.

The number of students who spend _____ in training is _____.

The number of students who spend _____ in training is _____.

(Gradient Scales)

We see gradient scales in _____ and _____.
Examples may include:
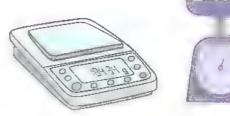

Watches

Rulers and metric sticks

Graduated cylinders
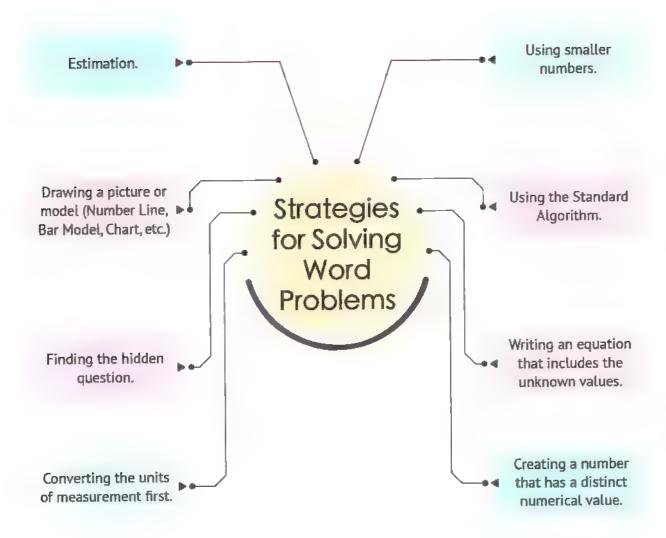

Weight scales
and scales used to measure masses

Lessons 8&9

Measuring the World Around Me

Estimation.

Using smaller numbers.

Drawing a picture or model (Number Line, Bar Model, Chart, etc.)

Using the Standard Algorithm.

Strategies for Solving Word Problems

Finding the hidden question.

Writing an equation that includes the unknown values.

Converting the units of measurement first.

Creating a number that has a distinct numerical value.

Aya bought potatoes weighing 2 kg and 950 g. She bought onions that weighed 1,075 grams less than the potatoes.
What is the weight of the potatoes and onions together?

It takes 4.5 days for a pharaonic ant to grow from the Egg Stage to become an adult ant. It takes 12 weeks for a wood ant to grow from the Egg Stage to become an adult.
Which species takes the longest to grow from the Egg Stage to an adult ant? What is the time difference between them?

A fish tank has a capacity of 100 liters. 20,000 milliliters of water are poured into it.
How many liters of water should be used to fill the tank completely?

4 Zina bought 8 kilograms of sugar, 10 kilograms of flour, 500 grams of cocoa, 225 grams of nuts, and 275 grams of coconut. What is the total mass of what Zina bought in kilograms?

5 Ahmed has a 12 meter long piece of wood. He wants to cut it into 3 equal pieces in length.
How long should each piece be in meters?
What is the length of each piece in centimeters?

6 Ayman likes jogging. During training, Ayman needs to drink 500 milliliters of water 4 times per day.
How many liters of water will he drink in one week?

Ehab trains Weightlifting. His weight is _____ .

Ehab wants his weight to _____ .

If this continues for _____ , what will his weight be in the end?

_____

_____

_____

_____

Unit ④
Area and Perimeter

Lesson 1

Marching Ants (The Perimeter)

Learning Objectives:

By the end of this lesson, the student will be able to:

- Define the perimeter.
- Use the rectangle perimeter formula to calculate the perimeter of the rectangle.
- Explain how to calculate the perimeter.

Lesson 3

Something Is Missing!

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use formulas to calculate unknowns when determining some dimensions of rectangles.

Lesson 2

Fill the Space (The Area)

Learning Objectives:

By the end of this lesson, the student will be able to:

- Define the area.
- Use the formula to calculate the areas of rectangles.
- Explain how to calculate the area.

Lesson 4

Odd Shapes

Learning Objectives:

By the end of this lesson, the student will be able to:

- Calculate the area and perimeter of odd shapes.
- Explain the strategies for finding the area and perimeter of odd shapes.

Lesson 5

Growing Dimensions

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use the formulas of area and perimeter to solve comparison problems using multiplication.

Exploring Area and Perimeter

Lesson 1

Marching Ants (The Perimeter)

Remember

Sides	Sides	Sides	Sides	Sides
Circle	Triangle	Quadrilateral	Pentagon	Hexagon

Square	Rectangle	Trapezoid	Rhombus
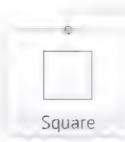

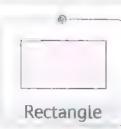

The Rectangle

- It is a quadrilateral with four sides and four angles.
- Each two opposite sides are equal and parallel.
- Each of its corners is a right angle (90 degrees).

The Square
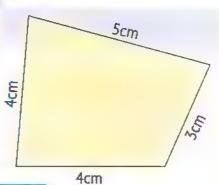

- A type of rectangles.
- Its four sides are equal.
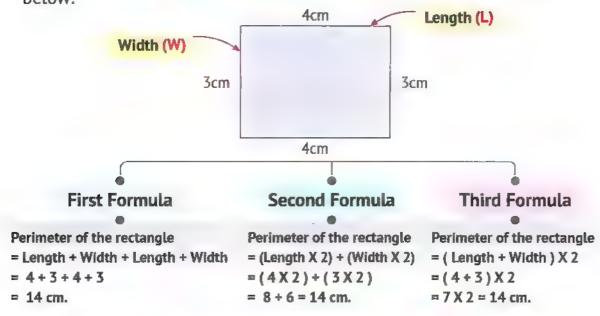

The Perimeter

- The perimeter of a figure is the sum of the lengths of its sides.

- **Example:** The perimeter of the opposite figure
  = 5 + 3 + 4 + 4 = 16 cm.

5cm

4cm

3cm

4cm

Perimeter of the Rectangle

- We can calculate the perimeter of the rectangle in one of the ways shown below:

4cm

Length (L)

Width (W)

3cm   3cm

4cm

First Formula

Perimeter of the rectangle
= Length + Width + Length + Width
= 4 + 3 + 4 + 3
= 14 cm.

Second Formula

Perimeter of the rectangle
= (Length X 2) + (Width X 2)
= (4 X 2) + (3 X 2)
= 8 + 6 = 14 cm.

Third Formula

Perimeter of the rectangle
= (Length + Width) X 2
= (4 + 3) X 2
= 7 X 2 = 14 cm.
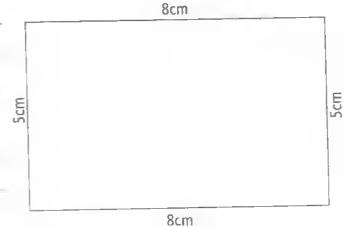

Perimeter of the Square

- We can calculate the perimeter of the square in one of the ways shown below.

3cm   **Side**

Side

3cm   3cm

3cm

First Formula

Perimeter of the square
= The sum of its sides lengths
= 3 + 3 + 3 + 3 = 12 cm.

Second Formula

Perimeter of the square
= Side length (L) X 4
= 3 X 4 = 12 cm.

1   Use two different formulas to find the perimeter for each shape (show your steps):
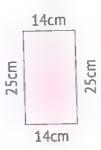

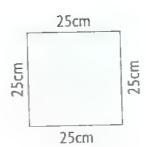

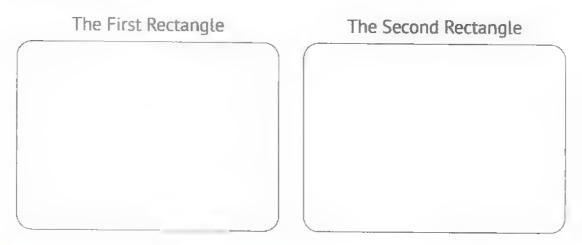

(a) First Formula = ...

Second Formula = ...

8cm

5cm   5cm

8cm

(b) First Formula = ...

Second Formula = ...

14cm

25cm   25cm

14cm

(c) First Formula = ...

Second Formula = ...

25cm

25cm   25cm

25cm

2 **Solve the following perimeter problems: For each problem, draw a rectangle and write the length and width according to the problem:**

ⓐ Tarek is making a frame for his rectangular picture, 45 cm long and 25 cm wide. What is the perimeter of the frame?

ⓑ Omar is building a square fence around his garden. Each side is 8 meters long. What is the perimeter of the fence?

ⓒ Issam wants to put a wooden frame around a 2 m long and 1 m wide window. What is the perimeter of the frame?

Maha walked in a path with a perimeter of 200 m. **Draw two different rectangles that can represent her path: (Write the height and width on the drawing).**

The First Rectangle

The Second Rectangle

A square whose sides are 20 cm. **Find its perimeter. Then draw a rectangle with the same perimeter.**

Lesson ②

Fill the Space (The Area)

(Area)

- Shape area is the surface area of two-dimensional geometric shapes.
  Or is the number of square units that make up the shape.

Example: **The area of the corresponding figure:**

- The units that make up the corresponding figure are 15 square units.

- **The area can be calculated in another way:**

  - We have 3 rows and each row consists of 5 units.

  - Therefore, the area (number of units)

    = 5 X 3 = 15 square units.

	5 Units				
3 Units	1	2	3	4	5
	6	7	8	9	10
	11	12	13	14	15

(Units of Measurement for Area:)

- Any unit of length (millimeter, centimeter, meter, kilometer) can be used. However, we always say the word square or write (the power of 2) to represent the amount of squares for a given unit which can be plotted in a grid on the figure.

- Square Centimeter (cm^2): is the area of a square with side length of

  (1 cm).

  1cm.
  1cm. ☐ 1cm.
  1cm.

- Square Meter (m^2): is the area of a square with a side length of **(1 m).**
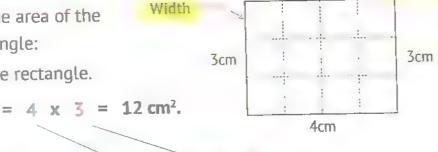

The area of the Rectangle:

- To calculate the area of the opposite rectangle:

  The area of the rectangle.

  $$= 4 \times 3 = 12 \text{ cm}^2.$$

Width — 4cm — Length

3cm | | 3cm

4cm
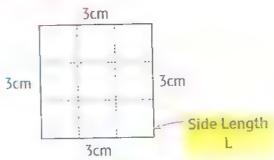

Formula:

- Area of the rectangle = Length (L) x Width (W)

The area of the Square:

- To calculate the area of the opposite Square:

  Area $= 3 \times 3 = 9 \text{ cm}^2.$

  $A = (L) \times (L)$

3cm

3cm | | 3cm

Side Length L

3cm
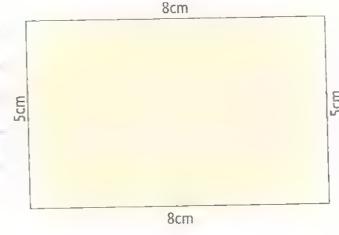

· Area of the square = the length of the side (L) x itself (L)

Calculate the area of the following rectangles (show your steps):

① Area = _____

8cm

5cm | | 5cm

8cm

② Area = _____

10cm

25cm | | 25cm

10cm

20cm 20cm

20cm

2 A dining table is **8 m** long and **6 m** wide. What is the area of the glass needed to cover the top of this table?

Area = ...

3 A square piece of paper with a side length of **9 cm**. What is the area of this piece of paper?

Area = ...

4 A glass window is surrounded by a wooden frame consisting of two parts joined from the two short edges. Each part is in the form of a rectangle of **6 m** length and **2 m** width. Find:

The area of the glass and the perimeter of the wooden frame.

Draw two rectangles with an area of 24 cm², then find the perimeter of each:

Perimeter = _____   Perimeter = _____

Draw a rectangle of 5 cm length and 2 cm width, then find its perimeter and area.

Perimeter = _____

Area = _____

A rectangle with an area of 30 square meters.
What is the perimeter of this rectangle. Draw your answer with the dimensions.

Perimeter = _____

Lesson ③

Something Is Missing!

Rectangle

- If we have the perimeter or area of a rectangle and one of its dimensions, (length or width):
- We can get the other dimension as shown in the following figure.

Length (L)
- Area (A) → Length = Area ÷ Width $L = A \div W$
- Perimeter (P) → Length = (Perimeter ÷ 2) – Width $L = (P \div 2) - W$

Width (W)
- Area (A) → Width = Area ÷ Length $W = A \div L$
- Perimeter (P) → Width = (Perimeter ÷ 2) – Length $W = (P \div 2) - L$

Ex.1: The area of a rectangle is 32 cm², and its length is 8 cm.

Find its width and its perimeter.

Answer: $W = A \div L$

$\quad = 32 \div 8$

$\quad = 4$ cm.

$P = 2L + 2W$

$\quad = 2 \times 8 + 2 \times 4$

$\quad = 16 + 8$

$\quad = 24$ cm.

Ex.2: The perimeter of a rectangle is 20 cm, and its width 3 cm.

Find its length and its area.

Answer: $P \div 2 = 20 \div 2$

$\quad = 10$ cm.

$L = 10 - 3$

$\quad = 7$ cm.

$A = L \times W$

$\quad = 7 \times 3$

$\quad = 21$ cm².

If we have the _____ of the square, we can get the length of the side by dividing the perimeter ÷ 4.

Perimeter   Side length = Perimeter ÷ 4 $L = P \div 4$

If we have the ____ of the square, then we can get the length of the side by looking for _____ is equal to the area.

Area   ➤ Side length X Side length = Area $L \times L = A$

Ex.3: A square has a perimeter of _____. Find its side length and area.

Answer: $L = P \div 4$

$= 24 \div 4$

$= 6$ cm.

$A = L \times L$

$= 6 \times 6$

$= 36$ cm².

Ex.4: A square has an area of _____. Find its side length and perimeter.

Answer: $25 = 5 \times 5$

So: side length = 5 cm.

$P = L \times 4$

$= 5 \times 4$

$= 20$ cm.

1 Complete the following table:

	Length	Width	Perimeter	Area
a	10 cm.	7 cm.		
b		6 m.	30 m.	
c	12 mm.		40 mm.	
d		4 cm.		36 cm².
e	8 dm.			48 dm².

2 Complete the following table:

	Side Length	Perimeter	Area
a	6 cm.		
b		28 m.	
c			64 mm².

Find the length of the unknown sides in the opposite figure. Then find the perimeter and area of the shape.

4cm

5cm

6cm

6cm

①

10cm

②

4cm

12cm

Complete the shape

6cm   6cm

6cm

10cm

4cm

12cm
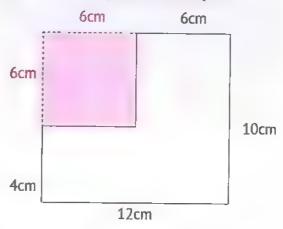

Perimeter = 12 + 10 + 6 + 6 + 6 + 4

= 44 cm.

Area of rectangle (1) = 10 x 6 = 60 cm².

Area of rectangle (2) = 6 x 4 = 24 cm².

Area of the shape = 60 + 24

= 84 cm².
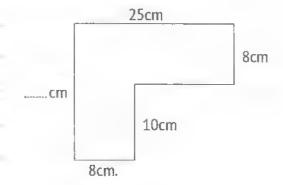

Perimeter = 12 + 10 + 6 + 6 + 6 + 4

= 44 cm.
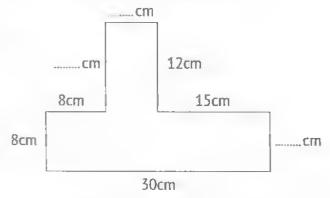

Area of the whole rectangle = 12 x 10

= 120 cm².

Area of the added part = 6 x 6 = 36 cm².

Area of the shape = 120 − 36 = 84 cm².

Calculate the perimeter and area of the following shape.

Lesson **5**

Growing Dimensions

Notes

• Double the number **5**	**Means**	**5 X** 2
• Three times the number **6**	**Means**	**6 X** 3
• Four times the number **7**	**Means**	**7 X** 4....., and so on.
• Half of the number **20**	**Means**	20 ÷ 2
• Third of the number **15**	**Means**	15 ÷ 3
• Fifth of the number **15**	**Means**	15 ÷ 5....., and so on.

Example: A rectangle has an area of 15 square meters, and its length is 5 meters.

Find the width.

Then, find the area of another rectangle whose length is twice the length and width of the first rectangle

Answer:

– The width of the rectangle	= 15 ÷ 5	= 3 m.
– The length of the other rectangle	= 5 x 2	= 10 m.
– The width of the other rectangle	= 3 x 2	= 6 m.
– The area of the rectangle	= 10 x 6	= 60 square meters.

1 Hussam owns a poultry farm, which is 10 meters long and 5 meters wide. Emad owns a poultry farm. Its length and width are three times the length and width of Hussam's farm.

Draw a diagram showing each of the two farms, showing the measurements on the drawing. Then find the area and perimeter of each.

Ramy owns a piece of land in the form of a square whose sides are 40 m long. He built a house in the shape of a rectangle whose length is half the length of the land and its width is fourth the width of the land.

He left the rest of the land as a garden for the house (as in the figure). Calculate the length and width of the house and then calculate the area of the garden.

40m

40m

A mural of area 24 square meters and 8 meters long. What is the width of this mural?

Another mural is the same length as the first mural and three times the width as the first one.

Find the perimeter and area of the second mural.

Theme 2 — Mathematical Operations and Algebraic Thinking

Unit 5 — Multiplication as a Relationship

Lesson 1

Understanding Multiplicative Comparison

Learning Objectives:

By the end of this lesson, the student will be able to:
- Develop a comparison using multiplication.
- Represent comparison problems using multiplication.

Lesson 2

Creating Multiplicative Comparison Equations

Learning Objectives:

By the end of this lesson, the student will be able to:
- Create equations to represent comparison problems using multiplication.
- Use symbols in equations to represent unknown values.

Lesson 3

Solving Multiplicative Comparison Equations

Learning Objectives:

By the end of this lesson, the student will be able to:
- Create equations for comparisons using multiplication and solve these equations.

Lesson 4

Commutative Property of Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the Commutative Property of Multiplication.
- Use the Commutative Property of Multiplication to solve problems.

Lesson 5

Patterns of Multiplying by 10s

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the property of the Neutral Element in multiplication to solve problems.
- Use the Zero Element Property in multiplication to solve problems.
- Know the patterns that are repeated when multiplying by 10, 100, 1,000.

Lesson 6

Exploring Patterns in Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use place value concepts of multiplication in multiples of 10, 100, 1,000.
- Explain the patterns of multiplication in multiples of 10, 100 and 1,000.

Lesson 7

Exploring More Patterns in Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the Property of Association in the multiplication process.
- Use the Associative Property in the multiplication process to solve multiplication problems.
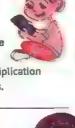

Lesson 8

Applying Patterns in Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use Decomposition of a number into its factors and Associative Property of Multiplication to solve equations with multiples of 10, 100, 1,000.

Concept 5.1 — Develop Multiplicative Comparisons

Lesson 1

Understanding Multiplicative Comparison

Know that

$4 \times 6 = 24$, The number 24 can be decomposed as:

24

6 6 6 6

24

4 + 4 + 4 + 4 + 4 + 4

So, ☐ is 4 times ☐   **or**   24 is 6 times ☐

- Compare   18 and 6   →   18 is **triple (three** times) 6
- Compare   18 and 3   →   18 is **six** times 3

1 Compare the following numbers:

- (a) 15 and 3   15 _____ 3.
- (b) 15 and 5   15 _____ 5.
- (c) 20 and 4   20 _____ 4.
- (d) 21 and 7   21 _____ 7.
- (e) 42 and 6   42 _____ 6.

2 Complete the following:

- (a) $4 + 4 + 4 + 4 + 4 + 4 =$ _____ x _____ = _____ .
- (b) $3 + 3 + 3 + 3 + 3 =$ _____ x _____ = _____ .
- (c) $7 \times 3 =$ _____ + _____ + _____ = _____ .
- (d) $6 \times 5 =$ _____ + _____ + _____ + _____ + _____ = _____ .

Strip Diagram:

6	6	6	6	6

– In the previous diagram, we find that the number **(6)** is repeated **(5 times)**.

$$6 + 6 + 6 + 6 + 6 = 30 \quad \text{ie} \quad 6 \times 5 = 30$$

And we can say that **30** is **5** times **6**

3 **Complete each of the following using the Strip Diagrams:**

a

4	4	4	4

.... is .... times **4.**

b

7	7	7	7	7	7	7

.... is .... times ....

c

2	2	2	2

.... is .... times ....

d

3	3	3	3	3	3	3	3	3

.... is .... times ....

4 **Divide the Strip Diagrams according to the numerical sentence:**

a
28 is **four** times **7.**

b
28 is **seven** times **4.**

c
24 is **three** times **8.**

d
30 is **three** times **10.**

Lesson 2

Creating Multiplicative Comparison Equations

Equation:

It is a mathematical formula in which numbers and symbols are used to express the equality relationship in a number sentence.
Where the unknown number is expressed by one of the letters (x, y, z, a, b, ...) and it is called "variable".

Converting a Numerical Sentence into an Equation

A number equals 3 times 7.

$$x = 3 \times 7$$

24 equals 4 times a number.

$$24 = 4 \times y$$

A number equals 5 times 9.

$$a = 5 \times 9$$

27 equals .... times 1.

$$27 = m \times 3$$

Write an equation for the following comparisons. Use a symbol to represent the unknown number:

ⓐ A number is 7 times 4: ....

ⓑ A number is 4 times 3: ....

ⓒ A number is equal to twice the number 7: ....

ⓓ 18 equals 6 times a number: ....

e 24 equals 4 times a number: ....

f 48 equals 8 times a number: ....

g 21 is equal to ..... times the number 3: ....

h 36 is equal to ..... times the number 9: ....

Ex.5: **Ahmed has 15 balls. This is equal to 5 times the number of balls that his brother Adel has . Write an equation to represent this comparison.**

Solution : The number of balls that Ahmed has is 5 times the number of balls that Adel has...

Equation : $15 = 5 \times x$

Read the word problems and think about the comparisons. Then write the multiplication equation that represents this problem:

(Use a symbol to represent the unknown number. It is **not necessary** to solve the equations):

a Nadia collected 5 glass balls in March and continued to collect balls until May. The number of balls with her now is 4 times that number. How many glass balls does she have in May?

....

....

....

....

b Hamid has 12 pieces of cake. This is equal to 3 times the number of cakes that his brother Ahmed has.
How many pieces of cake does Ahmed have?

....

....

....

....

c Aida walked to school on Monday and arrived in 21 minutes.

On Tuesday, she rode her bike to school and arrived 7 minutes later.

How many times was riding a bike faster than walking?

d Sarah ran around the football field 4 times.

Aya ran around the football field twice as many times as Sarah.

How many times did Aya run around the football field?

e Rana has mangoes. Her brother Sherif has 18 mangoes.

How many times is the number of mangoes with Sherif the same as the number of mangoes with Rana?

Lesson 3

Solving Multiplicative Comparison Equations

> Solve the Equation = Find the Value
> of the Unknown (the Variable)

Ex.: Write an equation for comparisons, use symbols to represent the unknown, then find the value of the unknown.

ⓐ A number equals ⃞ times ⃞

Equation: $X = 3 \times 8$

Solution: $X = 24$

ⓑ ⃞ equals ⃞ times a number

Equation: $28 = 4 \times y$

Solution: $y = 28 \div 4 = 7$

1 Write an equation for comparisons, use symbols to represent the unknown. Then find the value:

ⓐ A number is equal to ⃞ times ⃞. : ....

Solution : ....

ⓑ A number is equal to 6 times 5. Equation : ....

Solution : ....

ⓒ A number is equal to 9 times ⃞. : ....

Solution : ....

ⓓ 18 equals ⃞ times a number. ....

Solution : ....

ⓔ ⃞ equals ⃞ times a number. ....

Solution : ....

⬤ 42 equals 7 times a number.   Equation   _____

Solution   _____

Read the word problems and think about the comparisons, then write the multiplication equation that represents this problem:

(Use a symbol to represent the unknown number. Then solve the equations):

(a) Rana has _____ . This is _____ the number of candy bars her brother Karim has. How many candy bars are there with Karim?

Equation   : _____

Solution   : _____

(b) Alaa ran around the football field _____ . Aya ran around the field 3 times as many times as Alaa.

How many times did Aya run around the field?

Equation   : _____

Solution   : _____

(c) Saleh has _____ . His brother, Adel, has _____ .

How many times is the number of oranges with Adel the same as the number of oranges with Saleh?

Equation   : _____

Solution   : _____

(d) The height of a building is _____ . A tree is _____ high.

How many times the height of the building is the same as the height of the tree?

Equation   : _____

Solution   : _____

Properties and Patterns of Multiplication

Lesson 4

Commutative Property of Multiplication
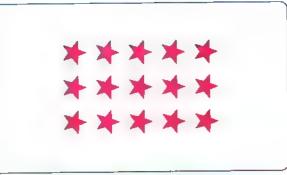

Arrays and the Commutative Property

— Note the following arrays:

5 rows of 3 stars each.

$5 X 3 = 15$

3 rows of 5 stars each.

$3 X 5 = 15$

So, $5 X 3 = 3 X 5$

— In the opposite array:

4 rows , 3 circles in each row: $4 X 3 = 12$

3 columns , 4 circles in each column: $3 X 4 = 12$

So, $4 X 3 = 3 X 4$

— From above, we find that:

$$5 X 3 = 3 X 5 \quad , \quad 4 X 3 = 3 X 4$$

That is, the product of multiplication is **not affected** by changing the **places** of the factors in the multiplication process **(Commutative Property)**.

1 Complete the following:

ⓐ 5 X _____ = 7 X 5.

ⓑ _____ X 3 = 3 X 6.

ⓒ 8 X 6 = _____ X 8.

ⓓ 9 X 3 = 3 X _____ .

2 Use the ~~commutative property of multiplication~~ to find the unknown value:

ⓐ 5 X x = 8 X 5 , x = _____ .

ⓑ y X 4 = 4 X 10 , y = _____ .

ⓒ 6 X 3 = 3 X m , m = _____ .

ⓓ 4 X 8 = a X 4 , a = _____ .

3 Saleh has _____ . Write an equation using the ~~Commutative Property of Multiplication~~ to describe two ways in which he can arrange the eggs.

_____

_____

_____

4 Lamia has _____ . Write an equation using the ~~Commutative Property of Multiplication~~ to describe two ways in which she can arrange the books.

_____

_____

_____

Lesson 5

Patterns of Multiplying by 10s

• **Identity Property of Multiplication:**

(**The Property of the Neutral Element in the multiplication operation)**

Note that: $8 \times 1 = 8$, $1 \times 8 = 8$

So, $8 \times 1 = 1 \times 8 = 8$

That is, the product of any number multiplied by (1) is the **same** number.

The number "1" is the neutral element in the multiplication operation.

• **Zero Property of Multiplication (Multiplying by zero):**

Note that: $8 \times 0 = 0$, $0 \times 8 = 0$

So, $8 \times 0 = 0 \times 8 = 0$

The product of any number multiplied by zero is zero.

• **Multiplying by 10, 100, 1,000, ...**

$6 \times 10 = 60$, $6 \times 100 = 600$, $6 \times 1,000 = 6,000$

• When multiplying by **10 , 100 , 1,000 , ...**

• Take out the **zeros** on the **right** and then complete the multiplication.

Remember the Different Table

Billions (Milliards)	Millions			Thousands					
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
			5	3	1	8	6	4	2

We notice that:

• The digit 2 is in the Ones place and its value is = (2 X 1).

• The digit 4 is in the Tens place and its value is 40 = (4 X 10).

• The digit 6 is in the Hundreds place and its value is = (6 x 100).

• The digit 8 is in the Thousands place and its value is = (8 X 1,000).

The digit is in the place and its value is = (1 X 10,000).

The digit is in the place and its value is = (3 X 100,000).

The digit is in the place and its value is = (5 X 1,000,000).

1 Complete the following:

(a) 5 x _____ = 0.

(b) _____ x 7 = 0.

(c) _____ x 6 = 6.

(d) _____ x 1 = 9.

(e) 1 x _____ = 7.

(f) 3 x _____ = 3.

2 Find the result:
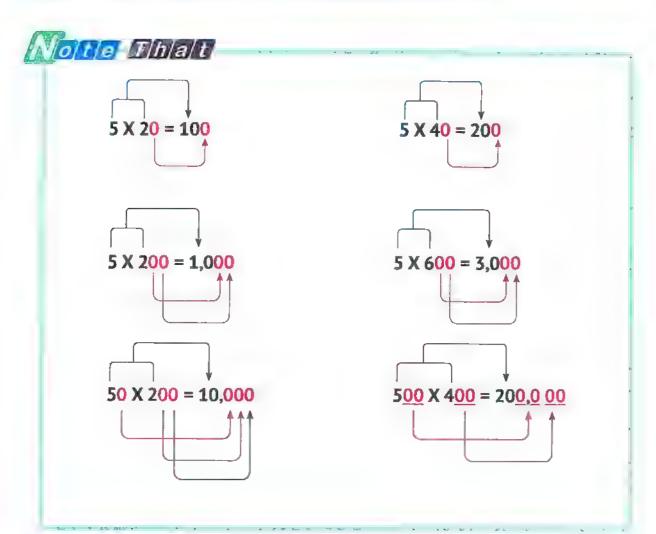

(a) 8 x 10 = _____ .

(b) 9 x 100 = _____ .

(c) 1,000 x 6 = _____ .

(d) 12 x 10 = _____ .

(e) 20 x 100 = _____ .

(f) 30 x 1,000 = _____ .

3 Complete the following:

(a) 4 x _____ = 40.

(b) 8 x _____ = 8,000.

(c) 6 x _____ = 600.

(d) 10 x _____ = 1,000.

(e) _____ x 20 = 200.

(f) 10 x _____ = 100.

Lesson **6**

Exploring Patterns in Multiplication

Note That

$5 \times 20 = 100$

$5 \times 40 = 200$

$5 \times 200 = 1,000$

$5 \times 600 = 3,000$

$50 \times 200 = 10,000$

$500 \times 400 = 200,0\,00$

1 Find the result:

ⓐ 60×20 = ...

ⓑ 50×30 = ...

ⓒ 50×800 = ...

ⓓ 50×200 = ...

200 x 500 = ...

800 x 500 = ...

2 Complete the following:

(a) .... x 20 = 1,000.

(b) .... x 50 = 3,000.

(c) 40 x .... = 20,000.

(d) 500 x .... = 10,000.

(e) .... x 10 = 50,000.

(f) 80 x .... = 8,000.

The length of the ant is about 2 mm. If the length of the crocodile is .... times the length of the ant, find the length of the crocodile.

Lesson ⑦

Exploring More Patterns in Multiplication

Associative Property of Multiplication

Example:

In the opposite picture, there are:

*Each plate contains **6** eggs.*   *Each row contains **4** egg plates.*   ***Two** rows of egg plates.*

To calculate the number of eggs =   6   x   4   x   2

The First Method: • Number of plates   = **4 x 2 = 8** egg plates.

• The total number of eggs   = **8 x 6 = 48** eggs.

$$6 \times 4 \times 2 = (4 \times 2) \times 6 = 8 \times 6 = 48$$

The Second Method: • Number of eggs in each row = **6 x 4 = 24**

• The total number of eggs   = **24 x 2 = 48** eggs.

$$6 \times 4 \times 2 = (6 \times 4) \times 2 = 24 \times 2 = 48$$

So, $(4 \times 2) \times 6 = (6 \times 4) \times 2$

When multiplying more than one number, any two numbers can be multiplied first and this **does not affect** the result.

(Associative Property)

1 Find using the .... :

   ⓐ 5 x 3 x 2 = (............... x ....) x .... = ... x .... = ...

   ⓑ 3 x 4 x 2 = (............... x ....) x .... = ... x .... = ...

   ⓒ 2 x 5 x 4 = ... x (............... x ....) = ... x .... = ...

   ⓓ 10 x 6 x 5 = ... x (............... x ....) = ... x .... = ...

2 Complete the following:

   ⓐ (5 x ....) x 6 = ... x (3 x 6).

   ⓑ (............... x 6) x 4 = 3 x (6 x ....).

   ⓒ (9 x 2) x .... = ... x (2 x 7).

   ⓓ (2 x ....) x 8 = ... x (7 x 8).

Use the .... to count the number of eggs in the picture.

_____

_____

_____
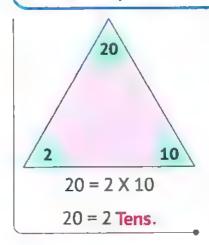

Emad bought .... of water bottles. Each package contains .... of bottles, each row has 5 bottles.
How many bottles of water did Emad buy?
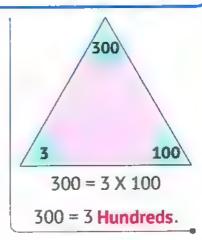

_____

_____

_____

Lesson **8**
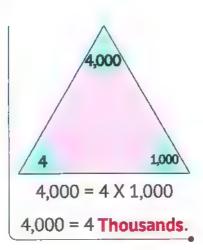

Applying Patterns in Multiplication

Decomposition of Multiples of 10:

20	300	4,000
2 10	3 100	4 1,000
20 = 2 X 10	300 = 3 X 100	4,000 = 4 X 1,000
20 = 2 **Tens.**	300 = 3 **Hundreds.**	4,000 = 4 **Thousands.**

Example:

Use Decomposition of a number into its factors and Associative Property of Multiplication to solve each of the following:

ⓐ 20 x 7　　　　　**ⓑ** 8 x 300　　　　　**ⓒ** 6 x 5,000

Solution:

ⓐ　20 X 7

= (10 X 2) X 7

= 10 X (2 X 7)

= 10 X　14

= 140.

ⓑ　8 X 300

= 8 X (3 X 100)

= (8 X 3) X 100

=　24 X 100

=　2,400.

ⓒ　6 X 5,000

= 6 X (5 X 1,000)

= (6 X 5) X 1,000

=　30 X 1,000

=　30,000.

1 Complete the following:

(a) $40 = \underline{\quad\quad} \times 4.$

(b) $600 = \underline{\quad\quad} \times 6.$

(c) $80 = \underline{\quad\quad}$ Tens.

(d) $500 = \underline{\quad\quad}$ Hundreds.

(e) $6,000 = \underline{\quad\quad}$ Hundreds.

Use Decomposition of a number into its factors and Associative Property of Multiplication to solve each of the following:

(a) $8 \times 30 = 8 \times (\underline{\quad} \times \underline{\quad}) = (8 \times \underline{\quad}) \times \underline{\quad}.$

$= \underline{\quad} \times \underline{\quad} = \underline{\quad}.$

(b) $6 \times 40 = 6 \times (\underline{\quad} \times \underline{\quad}) = (6 \times \underline{\quad}) \times \underline{\quad}.$

$= \underline{\quad} \times \underline{\quad} = \underline{\quad}.$

(c) $5 \times 800 = 5 \times (\underline{\quad} \times \underline{\quad}) = (\underline{\quad} \times \underline{\quad}) \times \underline{\quad}.$

$= \underline{\quad} \times \underline{\quad} = \underline{\quad}.$

(d) $9 \times 700 = \underline{\quad\quad\quad\quad}$

(e) $5 \times 8,000 = \underline{\quad\quad\quad\quad}$

(f) $7 \times 6,000 = \underline{\quad\quad\quad\quad}$

Unit ⑥ Understanding Factors and Multiples

Lesson 1

Identifying Factors

Learning Objectives:

At the end of this lesson, the student will be able to:
- Define the factors of any integer.
- Find all the factors of a given number between 0 and 100.
- Explain the patterns they notice in numbers whose factors are 2, 5 or 10.

Lesson 2

Prime and Composite Numbers

Learning Objectives:

At the end of this lesson, the student will be able to:
- Find all the factors of a given number between 0 and 100.
- Explain the patterns he/she notices in numbers that have a factor of 2, 3, 5, 6 or 9.
- Determine whether a number is prime or not.

Lesson 3

Greatest Common Factor (G.C.F.)

Learning Objectives:

By the end of this lesson, the student will be able to:
- Find the common factors of two integers.
- Determine the greatest common factor of two integers.

Lesson 4

Identifying Multiples of Whole Numbers

Learning Objectives:

By the end of this lesson, the student will be able to:
- Define multiples of integers.
- Determine multiples of integers.

Lesson 5

Common Multiples

Learning Objectives:

By the end of this lesson, the student will be able to:
- Determine the common multiples of two numbers.

Lesson 6

Relationships Between Factors and Multiples

Learning Objectives:

By the end of this lesson, the student will be able to:
- Explain the relationship between factors and complications.
- Determine whether a number is a multiple or a factor of another number.
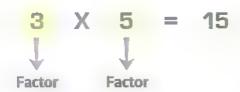

Lesson 1

Identifying Factors of Whole Numbers

$$3 \quad X \quad 5 \quad = \quad 15$$

↓   ↓

Factor   Factor

From the above, we find that 3 is one of the factors of the number 15 and 5 is one of the factors of the number 15.

Find all the factors of the number 18.

Factors of 18 can be found in several ways:

Factor Pairs	Factor Tree	Factor Rainbow	Factor Diagram
1 X 18	18		1 | 18
2 X 9			2 | 9
3 X 6	1 2 3 6 9 18	1 2 3 6 9 18	3 | 6

From the above, we find that the factors of 18 are 1, 2, 3, 6, 9, 18.

Find all the factors of 16.

The factors of 16 are:

1 , 2 , 4 , 8 , 16

1 2 4 4 8 16

1	16
2	8
4	4

Notes

- Factors are written **without** repetition.
- The number **(1)** is a factor of **all numbers**.
- Any number has at least **two factors**, the number itself and one, except the number **(1)** has **only one factor**.

1 Find all the factors of each number using the **Rainbow** and the **Factor Diagrams**:

ⓐ 12:

The factors of 12 are:

....

....

ⓑ 40:

The factors of 40 are:

....

....

ⓒ 36:

The factors of 36 are:

....

....

2 Find all the factors of each number of the following:

(Use the method you prefer):

ⓐ 25 **ⓑ 48** **ⓒ 19**

The factors of 25 are: The factors of 48 are: The factors of 19 are:

3 Using the following table:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Color the multiples of 2 ,
the multiples of 5 and the multiples
of 10 , in different colors.

● Write   numbers whose factors are 2, 5, 10:

● Circle the factors of the following numbers:

(1) 15   (2   ,   5   ,   10)

(2) 30   (2   ,   5   ,   10)

(3) 12   (2   ,   5   ,   10)

(4) 25   (2   ,   5   ,   10)

(5) 36   (2   ,   5   ,   10)

Lesson 2

Prime and Composite Numbers

Note That

Number (2):

- It is the factor of a number if this number is an **even** one.

  (Ones $\Rightarrow$ 0, 2, 4, 6, 8).

  Example: 2 is a factor of 14 because it is an **even** number.

Number (3):

- It is the factor of a number if the **sum** of the digits of this number is a **multiple of (3)**.

  Example: 3 is a factor of 72 because $2 + 7 = 9$, 9 is a multiple of 3.

Number (9):

- It is the factor of a number if the **sum** of the digits of this number is **a multiple of (9)**.

  Example: 9 is a factor of 126 because $6 + 2 + 1 = 9$ and 9 is a multiple of 9.

Number (6):

- It is the factor of a number if this number is an **even number** and the **sum** of the digits of this number is **a multiple of (3)** or that 2 and 3 are **factors** of this number.

  Example: 6 is a factor of 96 because it is an **even** number and $6 + 9 = 15$

  Also, the number 15 is a multiple of (3).

Number (5):

- It is the factor of a number if the **Ones** digits of the number is "0" or "5".

  Example: 5 is a factor of 80 as its Ones digit is 0.

Complete the following table as in the example:

Number	Factors of the Number				
	2	3	6	9	5
(Ex. 24	✓	✓	✓	✗	✗
ⓐ 15					
ⓑ 36					
ⓒ 10					
ⓓ 18					
ⓔ 40					
ⓕ 63					

Prime Numbers:

Are numbers that have only two factors, (the same number and one).

The factors of 6 are: $(1, 2, 3, 6)$ $\Rightarrow$ 4 factors

So, the number 6 is not a prime number.

The factors of 5 are: $(1, 5)$ $\Rightarrow$ 2 factors

So, the number 5 is a prime number.

The factors of 1 are: (1) $\Rightarrow$ Only one factor

So, the number 1 is not a prime number.

2 Using the following table:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Circle the numbers (2, 3, 5, 7), then cross out all the multiples of these numbers. Circle all the remaining numbers, except one. The numbers enclosed in a circle are:

....

....

....

....

(These are the prime numbers less than 100)

Note

- All prime numbers are **odd** numbers, except 2 is an **even** number.

Write down all the factors of the following numbers. Then write if the number is a prime one or not:

Number	Factors of the Number	Prime Number or Not
ⓐ 14		
ⓑ 46		
ⓒ 22		
ⓓ 59		
ⓔ 50		
ⓕ 29		

4 **Complete the following:**

ⓐ An ____ number between 20 and 30. Some of its factors are 1, 2, 4, 7 and 14.

The number is: ....

ⓑ An ____ number greater than 40 and less than 60 with 10 factors.

The number is: ....

ⓒ A ____ number, and 7 are from its factors, the Tens place digit is less than the Ones place digit.

The number is: ....

Lesson 3

Greatest Common Factor (G.C.F.)

To find the **greatest common factor** between two numbers, we follow these steps:

1. **Find** the factors of each number through one of the previous methods.

2. **Rearrange** these factors from **least to greatest**.

3. **Determine** the **common factors** between the two numbers.

4. The **largest number** in the common factors is the **Greatest Common Factor** (G.C.F.).

Example: Find the common factors of the numbers 18 and 24. Then find the greatest common factor (G.C.F.) for them:

1	18
2	9
3	6

1	24
2	12
3	8
4	6

- Factors of the number **18** are: 1 , 2 , 3 , 6 , 9 , 18.

- Factors of the number **24** are: 1 , 2 , 3 , 4 , 6 , 8 , 12 , 24.

- The common factors of **18** and **24** are : 1 , 2 , 3 , 6.

- The **greatest common factor** (G.C.F.) is : 6.

Find the _____ factor of each of the following numbers:

(a) **12 and 16.**

Factors of the number 12 are: _____

Factors of the number 16 are: _____

The common factors are: _____

The greatest common factor (G.C.F.) is: _____

(b) **20 and 30.**

Factors of the number 20 are: _____

Factors of the number 30 are: _____

The _____ are: _____

The _____ (G.C.F.) is: _____

(c) **21 and 35.**

Factors of the number 21 are: _____

Factors of the number 35 are: _____

The common factors are: _____

The greatest common factor (G.C.F.) is: _____

(d) **11 and 15.**

Factors of the number 11 are: _____

Factors of the number 15 are: _____

The common factors are: _____

The greatest common factor (G.C.F.) is: _____

The fourth grade of primary school students will go on a school trip. There are 36 girls and 27 boys. The pupils will be divided into equal groups of girls and equal groups of boys.

What is the largest number of groups that can be formed so that each group has the same number of pupils?

How many boys are in each group of boys? How many girls are in each group of girls?

Amira and her friends are going for a walk. Amira wants to take apple snacks and some candy in the journey. She has 24 apples and 36 small bags of candy.

How many snacks can Amira take if each package contains exactly the same number of apples and the exact same number of candy bags?

How many apples are there in each package?

How many bags of candy are there in each package?

Lesson 4
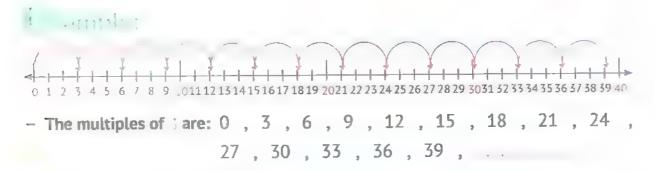

Identifying Multiples of Whole Numbers

(The Multiple)

A multiple is the _____ of a given integer multiplied by any other integer.
12 is a multiple of 3 and 4 because 3 x 4 = 12.

Multiples of a number can be found by _____ Counting on the Number Line:

Example:

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

- **The multiples of 3 are:** 0 , 3 , 6 , 9 , 12 , 15 , 18 , 21 , 24 ,
27 , 30 , 33 , 36 , 39 , ...

Find the multiples of by _____ on the Number Line:

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40
The multiples of 2 are: _____

Find the multiples of by _____ on the Number Line:

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

The multiples of 5 are: _____

3 **Use the following hundred table and color the multiples:**

ⓐ Color the multiples of **4**.

The multiples of **4** are:

_____

_____

_____

_____

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

ⓑ Color the multiples of **10**.

The multiples of **10** are:

_____

_____

_____

_____

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

4 **Answer the following:**

ⓐ Skip Count by **8** and fill in the blanks:

_____ , 8 , _____ , 24 , _____ , _____ , 48 , _____ , _____ , _____ , _____ .
ⓑ Write **10** multiples of **6**: _____
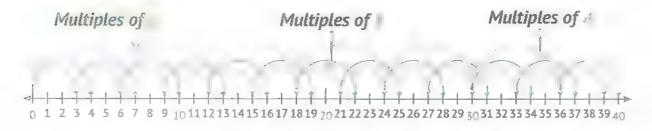

ⓒ Write **5** multiples of **7**: _____

ⓓ Circle the numbers that are multiples of **9**:

19 , 27 , 54 , 99 , 39 , 42 , 36 , 45 , 66 , 78 , 100.

Lesson 5

Common Multiples

Find out! Find the multiples of 3, 4 and 6 using Skip Counting on the Number Line:

Multiples of 3   Multiples of 6   Multiples of 4

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

- The multiples of 3 are : 0 , 3 , 6 , 9 , 12 , 15 , 18 , 21 , 24 , 27 , 30 , 33 , 36 , 39.

- The multiples of 4 are : 0 , 4 , 8 , 12 , 16 , 20 , 24 , 28 , 32 , 36 , 40.

- The multiples of 6 are : 0 , 6 , 12 , 18 , 24 , 30 , 36.

- The common multiples of 3 , 4 and 6 : 0 , 12 , 24 , 36.

Find the multiples of each of the numbers 2 and 3, up to 20. Then find the common multiples between them:

- The multiples of 2 are: _____

- The multiples of 3 are: _____

- The common multiples of the two numbers are: _____

2 Find the multiples of each of the numbers 4 and 6, up to 30. Then find the common multiples between them:

– The multiples of 4 are: ....

– The multiples of 6 are: ....

– The common multiples of the two numbers are: ....

....

3 Find the two common multiples between each of the following:

ⓐ The two numbers 4 and 8: (........................ and ....)

ⓑ The two numbers 2 and 5: (........................ and ....)

ⓒ The two numbers 6 and 8: (........................ and ....)

ⓓ The two numbers 7 and 6: (........................ and ....)

Note

- The product of any two numbers is a common multiple of them.

4 Complete:

ⓐ The common multiples of 2 and 5 are:

    0 , 10 , 20 , 30 , ... , ... , ... , ...

ⓑ The common multiples of 3 and 4 are:

    0 , 12 , 24 , 36 , ... , ... , ... , ...

ⓒ The common multiples of 6 and 8 are:

    0 , 24 , 48 , ... , ... , ...

Lesson **6**

Relationships Between Factors and Multiples

Remember:

$$4 \times 7 = 28$$

Factor   Factor   Multiple

- From this figure:

  and are factors of   &   28 *is a multiple of* 4 *and* 7

Complete the following:

- If _____ , then _____ is a multiple of the two numbers

  _____ and _____ , then _____ and _____

  are factors of the number _____ .

- If _____ = _____ x _____ , then 48 is a multiple

  of the two numbers of **6** and _____ . Then, **6** and _____

  are factors of the number _____ .

- An ____ number is a multiple of 3, 4 and 6 and lies between 20 and

  30. The number is _____ .

- An ____ number is a multiple of 3 and 6 and lies between 20 and 40.

  The number is _____ .

- The relationship between 2, 3 and 6 is that _____

  _____

Unit 7

Multiplication and Division: Computation and Relationships

Lesson 1

The Area Model Strategy

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use Rectangle Area Models to represent the multiplication of a 2-digit-number by a 1-digit-number.
- Explain how to use place value in multiplication.

Lesson 2

The Distributive Property

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the Rectangle Area Model to multiply a 1-digit-number by an integer up to four digits.
- Explain the Distributive Property of Multiplication.
- Use the Distributive Property of Multiplication to multiply a 1-digit-number by an integer up to four digits.

Lesson 3

The Partial Products Algorithm

Learning Objectives.

By the end of this lesson, the student will be able to:
- Use the Partial Products Algorithm to multiply a one-digit-number by an integer up to four digits.

Lesson 4

The Standard Multiplication Algorithm

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use Estimation to find the product of the multiplication process in multi-digit-number problems.
- Use the Standard Algorithm to multiply a one-digit-number by an integer up to four digits.

Lesson 5

Connecting Strategies

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the Standard Algorithm to multiply a one-digit-number by an integer up to four digits.

Lesson 6

Two-Digit Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Recognize patterns when multiplying two multiples of 10.
- Multiply a two-digit-number by a multiple of 10.
- Evaluate the reasonableness of the answer that was assessed using Estimation and Mental Arithmetic.

Lesson 7

Area Models and 2-Digit Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the Area of a Rectangle Model to solve the problems of multiplying a two-digit-number by a two-digit-number.

Lesson 8

Algorithms and 2-Digit Multiplication

Learning Objectives.

By the end of this lesson, the student will be able to:
- Apply a variety of strategies to solve a two-digit-number multiplying a two-digit-number problems.

Lesson 9

Putting It All Together

Learning Objectives.

By the end of this lesson, the student will be able to:
- Apply the Three-time Reading Strategy to analyze and solve word problems.
- Use addition, subtraction, or multiplication to solve word problems.

Lesson 10

Exploring Remainders

Learning Objectives:

By the end of this lesson, the student will be able to:
- Determine the dividend, the divisor and the quotient in the division question.
- Solve division problems.
- Explain what the remainder of the division represents in the division problem.

Lesson 11

Patterns and Place Value in Division

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the concept of place value, the facts of the multiplication process and the patterns used with zeros to divide the multiples of 10, 100, 1,000 by a one-digit-divisor.

Lesson 12

The Area Model

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use Rectangle Area Models to represent and solve division problems.

Lesson 13

The Partial Quotients Algorithm

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use a Partial Quotient Algorithm to divide up to four-digit-dividend by one-digit-divisors.

Lesson 14

The Standard Division

Learning Objectives:

By the end of this lesson, the student will be able to:
- Estimate quotients using place value properties and patterns of multiplication and division.
- Use the Standard Algorithm to solve division problems.

Lesson 15

Division and Multiplication

Learning Objectives:

By the end of this lesson, the student will be able to:
- Use the place value properties to find the quotient accurately.
- Use the relationship between multiplication and division to check the accuracy of the quotient.

Lesson 16

Solving Challenging

Learning Objectives.

By the end of this lesson, the student will be able to:
- Organize information into word problems to determine when to add, subtract, multiply, or divide.
- Solve word problems using addition, subtraction, multiplication and division.

Multiplying by 1-Digit and 2-Digit Factors

Lesson ❶

The Area Model Strategy

Blocks Strategy
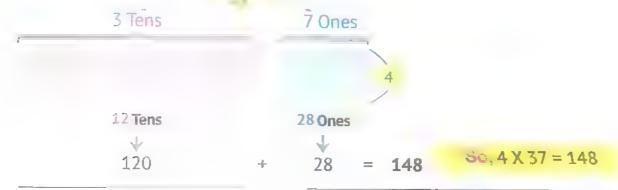

When multiplying a 1-digit-number by a 2-digit-number,
We represent the 2-digit-number, the Tens with lines and Ones with small squares.
We _____ the number according to the 1-digit-number.

The number 23 is represented by two lines and 5 small squares repeated 5 times as follows:

2 Tens	3 Ones
	5

10 Tens	15 Ones
↓	↓
100 +	15 = 115

So, 23 X 5 = 115

Example (2): Multiply 4 X 37

3 Tens	7 Ones
	4

12 Tens	28 Ones
↓	↓
120 +	28 = 148

So, 4 X 37 = 148

1 **Multiply using the Base-10 Blocks Strategy:**

ⓐ 16 X 4 = ...

ⓑ 28 X 3 = ...

ⓒ 34 X 5 = ...

Second: Rectangle Area Model Strategy:

When multiplying a 1-digit-number by a 2-digit-number,

- Draw a rectangle.
- Represent the 2-digit-number with the long side and the 1-digit-number with the short side.
- Divide the rectangle into **two parts** by drawing a vertical line to represent the **decomposition** of the 2-digit-number.

Example (1): **Multiply 23 X 5**

	20	3
23 X 5 = 115	5 X 20 = 100	5 X 3 = 15	5

100 + 15 = 115

Example (2): **Multiply 6 X 78**

	70	8
6 X 78 = 468	6 X 20 = 420	6 X 8 = 48	6

420 + 48 = 468

Use the _____ Area Model Strategy to multiply:

5 X 24 = _____

| ___ X ___ = ___ | ___ X ___ = ___ | ___ |

_____ + _____ = _____

9 X 58 = _____

| ___ X ___ = ___ | ___ X ___ = ___ | ___ |

_____ + _____ = _____

67 X 4 = _____

| ___ X ___ = ___ | ___ X ___ = ___ | ___ |

_____ + _____ = _____

98 X 7 = _____

| ___ X ___ = ___ | ___ X ___ = ___ | ___ |

_____ + _____ = _____

A car travels ___ kilometers in one hour. How many kilometers will the car travel in 9 hours?

(Use the Rectangle Area Model in the solution).

_____ + _____ = _____

The school bus carries ___ students per trip. What is the _____ number of students that the bus can carry during 6 trips? (Use the Rectangle Area Model in the solution).

_____ + _____ = _____

Lesson ②

The Distributive Property

> **Remember that**
>
> ### Expanded Form
>
> $456 = 400 + 50 + 6$
>
> $729 = 700 + 20 + 9$
>
> $3,729 = 3,000 + 700 + 20 + 9$
>
> $5,392 = 5,000 + 300 + 90 + 2$
>
> ### The Distributive Property of Multiplication
>
> $6 \times (5 + 3) = (6 \times 5) + (6 \times 3)$
>
> $3 \times (400 + 20 + 4) = (3 \times 400) + (3 \times 20) + (3 \times 4)$

— Using the Distributive Property to multiply a one-digit-number by an integer up to 4 digits (numbers and symbols).

Example (1): Multiply 4 X 237

Answer:

4×237 ← *Decompose the largest number (Expanded form)*

$= 4 \times (200 + 30 + 7)$ ← *Multiply the digit 4 by the components of the number 237*

$= (4 \times 200) + (4 \times 30) + (4 \times 7)$

$= \quad 800 \quad + \quad 120 \quad + \quad 28 \quad = 948$
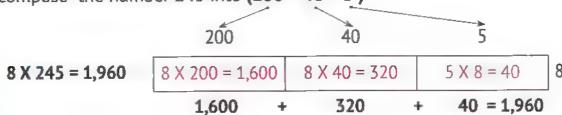

Example: Multiply 6 X 5,819

Answer:

6 X 5,819

= 6 X (5,000 + 800 + 10 + 9)

= (6 X 5,000) + (6 X 800) + (6 X 10) + (6 X 9)

= 30,000 + 4,800 + 60 + 54 = **34,914**

Use the Distributive Property **to solve the following problems:**

a) 4 X 312 = 4 X (_____ + _____ + _____)

= (4 X _____) + (4 X _____) + (4 X _____)

= _____ + _____ + _____ = _____

b) 6 X 374 = _____ X (_____ + _____ + _____)

= (_____ X _____) + (_____ X _____) + (_____ X _____)

= _____ + _____ + _____ = _____

c) 9 X 5,234 = _____ X (_____ + _____ + _____)

= (_____ X _____) + (_____ X _____) + (_____ X _____)

= _____ + _____ + _____ = _____

d) 4 X 2,687 = _____ X (_____ + _____ + _____)

= (_____ X _____) + (_____ X _____) + (_____ X _____)

= _____ + _____ + _____ = _____

– **Using the Rectangle Area Model to multiply a 1-digit-number by an integer up to 4 digits.**

Example (1): Multiply 8 X 245

• Draw a rectangle and divide it into 3 parts.

• Decompose the number 245 into **(200 + 40 + 5)**

200	40	5

8 X 245 = 1,960

8 X 200 = 1,600	8 X 40 = 320	5 X 8 = 40	8

1,600 + 320 + 40 = 1,960

Example (2): Multiply 7 X 6,312

6,000	300	10	2

7 X 6,312 = 44,184

7 X 6,000 = 42,000	7 X 300 = 2,100	7 X 10 = 70	7 X 2 = 14	7

42,000 + 2,100 + 70 + 14 = 44,184

2 Use the Area Model of a Rectangle to solve the following problems:

ⓐ 8 X 375 = ... ,

ⓑ 9 X 216 = ...

3 X 6,475 = _____ .

4,962 X 8 ~ _____ .

The length of the car is 245 cm, how long are 4 cars?

(Use the **Rectangle Area Model**)

Lesson **3**

The Partial Products Algorithm

(The Partial Products Algorithm)

Each arithmetic operation is a **"part"** of a larger product.

Ex.1: **Multiply 7 X 328**

Answer: *Expand the largest number:*

$$(328 = 300 + 20 + 8)$$

Step 1: Multiply the 1-digit-number by the **Hundreds.** (7 X 300)

Step 2: Multiply the 1-digit-number by the **Tens.** (7 X 20)

Step 3: Multiply the 1-digit-number by the **Ones.** (7 X 8)

Step 4: Add the products of the Hundreds, Tens and Ones.

```
        3 2 8
   X        7
  +     2,100
  +       140
  +        56
  ─────────────
        2,296
```

Ex.2: **Multiply 9 X 83**

```
              83
     X         9
  ─────────────
 (9 X 80)    720
 (9 X 3)  +   27
  ─────────────
             747
```

Ex.3: **Multiply 6 X 3,702**

```
              3 702
     X            6
  ──────────────────
 (6 X 3,000)  + 18,000
 (6 X   700)  +  4,200
 (6 X     2)  +     12
  ──────────────────
                22,212
```

Use the Partial Products Algorithm to multiply:

(a) 8 X 256 = ...

$$
\begin{array}{r}
2\ 5\ 6 \\
\times \quad\quad 8 \\
\hline
\end{array}
$$

(. X ..) ....
(X ..) ....
(X) ....
_____

(b) 3,986 X 6 = ...

$$
\begin{array}{r}
3{,}986 \\
\times \quad\quad 6 \\
\hline
\end{array}
$$

(... X ..) ....
(... X ..) ....
(.. X) ....
(X .) ....
_____

(c) 9 X 63 = ...

$$
\begin{array}{r}
63 \\
\times \quad 9 \\
\hline
\end{array}
$$

(X) ....
(X) + ...
_____

(d) 8 X 702 = ...

$$
\begin{array}{r}
702 \\
\times \quad 8 \\
\hline
\end{array}
$$

(X) .
(X) + ...
_____

(e) 125 X 4 = ...

(f) 9 X 8,465 = ...

Lesson 4

The Standard Multiplication Algorithm

(Similarities in Models)

Example: Multiply 132 X 8

- Using the **Product Estimation of the multiplication process**, the **Area Model of the Rectangle** and the **Partial Products Algorithm**.

The Product Estimation	The Area of Rectangle Model	Partial Products Algorithm
Estimation 100 X 8 = 800	100 30 2 |100X8=800|30X8=240|2X8=16| 8 **800 + 240 + 16 = 1,056**	132 X 8 (8 X 100) 800 (8 X 30) + 240 (8 X 2) + 16 1,056

We notice that: the estimate is low because we rely on "Rounding Down Strategy".

1 **Complete the following table:**

Problem	Product Estimation	Area of Rectangle Model	Partial Products Algorithm
a 237 X 6			

6 7,425 X 9		

The Standard Multiplication Algorithm:

Follow the steps below to multiply **132 x 8** using the Standard **Multiplication Algorithm:**

1. Write the numbers vertically with the largest number on top.

2. Start by multiplying the Ones (8 Ones x 2 Ones = 16 Ones).

3. Write the number **6** in the **Ones** place below the line.

4. Write the number representing one Ten above the number 3 (this is called **Renaming**).

5. Next, multiply the Tens (8 Ones x 3 Tens = 24 Tens).

6. Add (from the previous step) to 24 Ten to get 25 Ten.

7. Write the number **5** in the **Tens place** below the line.

8. Rename by writing the number 2 representing two above the number 2 in the Hundreds place.

9. And finally, multiply the Hundreds (8 Ones x one Hundred = 8 Hundreds).

10. Add (from the previous step) plus 8 Hundreds to get 10 Hundreds.

= one thousand. Write 0 in the Hundreds place and 1 in the Thousands place below the line.

$$
\begin{array}{r}
\overset{2\ 1}{1\ 3\ 2} \\
\times \qquad 8 \\
\hline
6 \\
+\qquad 5\ 0 \\
+\ 1{,}0\ 0\ 0 \\
\hline
1{,}0\ 5\ 6
\end{array}
$$

2 **Use the Standard Multiplication Algorithm to multiply:**

ⓐ

$$48 \times 7$$

ⓑ

$$324 \times 6$$

ⓒ

$$3,248 \times 9$$

ⓓ

$$36 \times 6$$

ⓔ

$$298 \times 4$$

ⓕ

$$7,866 \times 5$$

Lesson 5
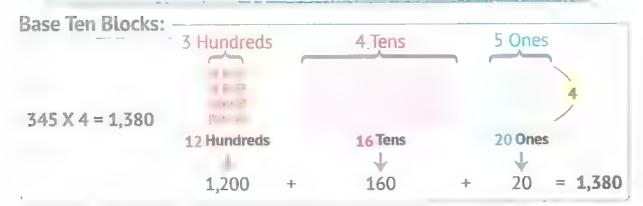

Connecting Strategies

Strategies for Multiplying a One-digit-number by an Integer up to Four Digits

Base Ten Blocks:

$345 \times 4 = 1,380$

3 Hundreds	4 Tens	5 Ones
12 Hundreds	16 Tens	20 Ones
1,200 +	160 +	20 = **1,380**

Area of Rectangle Model:

$345 \times 4 = 1,380$

300	40	5	
4 X 300 = 1,200	4 X 40 = 160	4 X 5 = 20	4

1,200 + 160 + 20 = **1,380**

Distributive Property:

$$4 \times 345 = 4 \times (300 + 40 + 5)$$
$$= (4 \times 300) + (4 \times 40) + (4 \times 5)$$
$$= 1,200 + 160 + 20 = 1,380$$

Standard Multiplication Algorithm:

```
      ❶❷
      345
  X     4
        0
  +    80
  + 1,300
    1,380
```

Partial Products Algorithm:

```
              345
      X         4
  ( 4 X 300 ) 1,200
  ( 4 X  40 ) + 160
  ( 4 X   5 ) +  12
              1,380
```

1 **Use the** Standard Multiplication Algorithm **to multiply (as in the example):**

Ex.:
```
      ③⑥
      2 4 8
  X       8
  ─────────
    1,9 8 4
```

a
```
      387
  X     4
  ───────
```

b
```
       45
  X     6
  ───────
```

c
```
      614
  X     7
  ───────
```

d
```
    2,375
  X     9
  ───────
```

e
```
    5,008
  X     5
  ───────
```

Use the following strategies to solve each problem:

(a) 456 X 7 = ...

(Blocks strategy)

(b) 3 X 124 = ...

(Area of Rectangle Strategy)

(c) 8 X 205 = ...

(Partial Products Algorithm)

(d) 3 X 124 = ...

(Distributive Property Strategy)

Lesson ⑥

Two-Digit Multiplication

(Multiply a 2-digit-number by a Multiple of 10)

Example: **Multiply 62 X 30:**

First **Using the Rectangle Area Model Strategy:**

	60	2	
62 X 30 = 1,860	30 X 60 = 1,800	30 X 2 = 60	30

$$1,800 + 60 = 1,860$$

Second **Using Distributive Property Strategy:**

$$62 \times 30 = (60 + 2) \times 30$$
$$= (60 \times 30) + (2 \times 30)$$
$$= 1,800 + 60$$
$$= 1,860$$

Third **Using Partial Products Algorithm:**
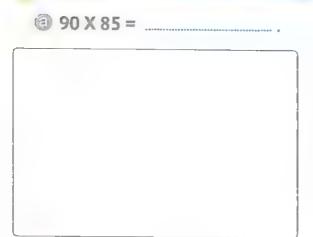

```
              6 2
        X      3 0
(30 X 60)   1,8 0 0
(30 X 2) +     6 0
            1,8 6 0
```

1 **Use the Rectangle Area Model Strategy to multiply:**

ⓐ **48 X 20 =** ....

ⓑ **40 X 74 =** ....

Use the Partial Products Algorithm to multiply:

ⓐ 35 X 80 = ...

ⓑ 70 X 82 = ...

Use the Partial Products Algorithm to multiply:

ⓐ 90 X 85 = ...

ⓑ 27 X 30 = ...

Example:

$$24 \times 30 = 720$$

4 Multiply:

ⓐ 15 X 30 = ...

ⓑ 14 X 50 = ...

ⓒ 42 X 20 = ...

ⓓ 60 X 40 = ...

Lesson 7

Area Models and 2-Digit Multiplication

> Using the Rectangle Area Model to Multiply
> a Two-digit-number by a Two-digit-number

Example (1): Multiply 36 X 42 :

- Create the corresponding **rectangle.**
- **Expand** the first number: 36 = 30 + 6
  Then, the second number:
  42 = 40 + 2
- **Multiply** the **rows** and **columns** as shown.
- **Add** the **products** of the multiplication.

X	30	6
40	40 X 30 = 1,200	40 X 6 = 240
2	2 X 30 = 60	2 X 6 = 12

So, 36 X 42 = 1,200 + 240 + 60 + 12 = **1,512**

Example (2): Multiply 27 X 35 :

27 X 35

= 600 + 210 + 100 + 35

= **945**

X	20	7
30	20 X 30 = 600	30 X 7 = 210
5	5 X 20 = 100	5 X 7 = 35

Use the Rectangle Area Model **to multiply:**

X	40	5
40	____ X ____ = ____	____ X ___ = ___
9	____ X ____ = ____	___ X ____ = ___

(a) 45 X 49

= _____ + _____ + ____ + _____

= _____ .

X		
	____ X ___ = _____	____ X ___ = ____
	____ X ____ = _____	___ X ___ = ____

(b) 89 X 43

= _____ + _____ + _____ + _____

= _____ .

X		
	___ X ____ = ____	____ X ____ = ____
	____ X ____ = ____	___ X ___ = ____

(c) 28 X 69

= _____ + _____ + _____ + _____

= _____ .

X		
	___ X ___ = _____	___ X ___ = ____
	____ X ____ = ___	___ X ___ = ____

(d) 49 X 37

= _____ + _____ + _____ + _____

= _____ .

2 Ahmed bought 6 pens. If the price of one pen is 215 piasters, what is the price of all pens?

(Use the Area of a Rectangle Model to solve)

X	....	....	....
....	.... X .... = ...	.... X .... = ...	.... X .... = ...

.... X .... = ... + ... + ... = ...

3 38 persons will travel together by bus, and a single ticket costs 35 pounds. What is the price of the tickets for all passengers?

(Use the Area of a Rectangle Model to solve)

X	....	....
....	.... X .... = ...	.... X .... = ...
....	.... X .... = ...	.... X .... = ...

Lesson 8

Algorithms and 2-Digit Multiplication

Multiplying a Two-digit-number by a Two-digit-number

To multiply 76 x 54, we can use one of the multiplication algorithms. We put the two numbers vertically, the larger number above the smaller number, and then follow the steps as shown.

---

1) Decompose the numbers into Ones and Tens:

$$(76 = 70 + 6) , (54 = 50 + 4)$$

2) Multiply the ones of the first number by:
- the Ones of the second number (6 x 4 = 24)
- and the Tens of the second number (6 x 50 = 300)

3) And also multiply the Tens of the first number by:
- the Ones of the second number (70 x 4 = 280)
- and the Tens of the second number (70 x 50 = 3,500)

4) Then, we add all the products:

$$24 + 300 + 280 + 3,500 = 4,104$$

Partial Products Algorithm:

```
                76
        X       54
( 6 X  4 )      24
( 6 X 50 ) +   300
( 70 X  4 ) +  280
( 70 X 50 ) + 3,500
               4,104
```

---

1) Decompose the second number into Ones and Tens:

$$(54 = 50 + 4)$$

2) Multiply the first number by:
- the Ones of the second number.

$$(76 \times 4 = 304)$$

3) Multiply the first number by:
- the Ones of the second number.

$$(76 \times 50 = 3,800)$$

4) Then, we add all the products:

$$304 + 3,800 = 4,104$$

Standard Multiplication Algorithm:

```
                76
        X       54
( 76 X  4 )    304
( 76 X 50 ) + 3,800
               4,104
```

Find the product of each of the following:

Begin by estimating the product of the multiplication and then solve the problems using the **Partial Product Algorithm** and the **Standard Multiplication Algorithm**.

Lesson 9

Putting It All Together

Three-time Reading Strategy to Solve Word Problems

First Read   Determine what happens in the problem.

Second Read   Determine the _____ in the problem.

Third Read   Determine the **questions** that can be asked in this problem.

Example:

Aya draws pictures and sells them in art galleries. She takes 56 pounds for the large painting, and ___ pounds for the small painting.
Last month, Aya sold six large paintings and three small paintings.

Reading the problem answer the following questions:

What happens in the problem?

Aya sold large paintings for 56 pounds each and 3 small paintings for 24 pounds each.

What are the values in the problem?

_____ (the price of a large painting)   ,   _____ (the price of a small painting).

6 large paintings.   ,   3 small paintings.

What questions can be asked in this problem?

How much money did she get for selling all her paintings?

Answer:

- The price of the 6 large paintings = 6 X 56 = 336 pounds.
- The price of the 3 small paintings = 3 X 24 = 72 pounds.
- The price of all paintings = 336 + 72 = 408 pounds.

1 On Thursday, a butcher sold 210 kilograms of minced meat. On Friday, he sold twice that amount. On Saturday, he only sold 130 kilograms. How much more quantity did the butcher sell on Friday than on Saturday?

Answer: ....

....

....

....

....

....

2 Malik walked 8 km on Friday and 6 km on Saturday.

Malik repeated this every weekend for 6 weeks.

How many kilometers did Malik walk at the end of the six weeks?

Answer: ....

....

....

....

....

....

The premium bus has 76 seats. The number of seats of the premium train is 3 times that of the premium bus, and the number of seats in it is 53 more than the premium ferry. How many people can the premium bus, the premium train, and the premium ferry accommodate at the same time?

Answer: _____

A salesperson must drive 500 km. In the first 3 hours, he was driving at 65 kilometers per hour. Over the next two hours, he traveled 35 kilometers per hour. How many kilometers are left for him to drive?

Answer: _____

Ahmed drives for two hours and covers 200 kilometers. Mona drives for 3 hours and covers 270 km. Hoda also drives for hours, but travels 70 kilometers less than Mona. How many kilometers do they all drive?

Answer: _____

Lesson 10

Exploring Remainders

(Here are Three Word Problems to be Read Carefully:)

There are **72** students in the playground. We need to divide the students into **8 teams**. How many students are there in each team?
Solution:
72 ÷ 8 = 9 students.
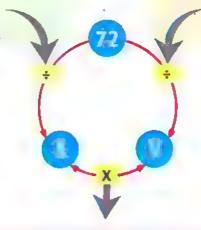

There are **72** students in the playground. We need to divide the students into teams, so that each team includes **9** students. How many teams can be formed?
Solution:
72 ÷ 9 = 8 teams.

There are **8** teams playing football, and each team has **9** players. How many students are there in each team?
Solution:
8 x 9 = 72 students.

(From the above we note that:)

- The numbers are the **same**, and the problems are all about equal groups (teams). **However,** you can use different operations to solve each of these problems.

- **Multiplication:** things are already in equal groups.

- **Division:** things must be divided into equal groups.

Example:

Saleem brought 14 pies to give to four of his friends. How can Saleem divide the pies evenly?

The corresponding graph can be used to solve this problem.

When you divide the pies among the **four** friends, each person's share will be 3 pies, and the remaining will be 2 pies.

Solution:

$14 \div 4 = 3$ and the remainder is 2.

In the previous question, we find that:

$$15 \div 4 = 3 \quad \text{Remainder (R)} \quad 2$$

Dividend	Divisor	Quotient	Remainder
It is the number that is divided in the problem. (The sum of things)	The number of equal groups or the number in each group.	The answer to the division problem.	The remaining value after all things are divided equally.

1 **Complete the following table:**

Problem	Dividend	Divisor	Quotient	Remainder
ⓐ 25 ÷ 4				
ⓑ 30 ÷ 6				
ⓒ 28 ÷ 5				
ⓓ 16 ÷ 3				
ⓔ 15 ÷ 2				

2 The swimming team will take a bus to go to the Swimming competition. Each bus accommodates 40 students. 60 students will attend this competition.

How many buses are required to accommodate all students?

Will there be empty seats? And how many?

Answer: ....

....

....

....

....

3 There are 48 mugs that need to be boxed and shipped.

Each box holds five cups.

How many boxes are needed to ship the cups?

Answer: ....

....

....

....

....

Lesson 11

Patterns and Place Value in Division

Dividing Multiples of 10, 100, 1,000 by a 1-digit-number

When dividing multiples of 10, 100, 1,000 by a one-digit-number, we do the following:

Example: Divide:

ⓐ $400 \div 5 =$ ....

ⓑ $2,400 \div 4 =$ ....

Answer:

ⓐ To divide $400 \div 5$,

We note that: $5 \times 8 = 40$

So, $5 \times 80 = 400$

So, $400 \div 5 = 80$

$$400 \div = 80$$
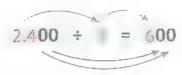

ⓑ To divide $2,400 \div 4$,

We note that: $4 \times 6 = 24$

So, $4 \times 60 = 240$, $4 \times 600 = 2,400$

So, $2\,400 \div 4 = 600$

$$2,400 \div = 600$$

Complete the following table: (As in the example):

	Equation	Related Fact	Quotient
(Ex.)	$8,000 \div 4$	$8 \div 4 = 2$	200
ⓐ	$4,500 \div 9$		
ⓑ	$15,000 \div 5$		
ⓒ	$8,000 \div 4$		
ⓓ	$8,000 \div 4$		

2 **Find the quotient:**

    ⓐ $2,400 \div 8 =$ _____ .   ⓑ $2,000 \div 4 =$ _____ .

    ⓒ $10,000 \div 5 =$ _____ .   ⓓ $3,000 \div 6 =$ _____ .

3 **8,100 workers need to go to work on Monday morning at 7:00 am, and they all want to go by metro. Each metro train consists of 9 cars. If every car accommodates 90 persons, can all workers ride the same metro to go to work?**

        (Explain your ideas using numbers, words, and symbols.)

Lesson 12

The Area Model and Division

Rectangle Area Model Strategy for Representing and Solving Division Problems

This strategy can be understood through the following examples.

Example: Divide $96 \div 5$

First:

Draw a long rectangle and write "**5**" to the right side of the rectangle.

	5

Second:

Draw a vertical line inside the rectangle and write in the left part "**5 x 10 = 50**" (as the divisor is two digits) And write under this part "**10**".

5 X 10 = 50	

(10)

Third:

By subtracting 96 (the dividend) − 50 = 46.
Divide $46 \div 5 = 9$
and the remainder is 1.
Write   =   in the remaining part of the rectangle and write "9" under this part of the rectangle.

5 X 10 = 50	5 X 9 = 45

(10)   (9)

Fourth:

Adding $9 + 10 = 19$ (Quotient).

$96 \div 5 = 19$ and the remainder: 1

The solution can be verified by multiplying the numbers outside of the division by the divisor and then adding the remainder, if any, to get the dividend.

Verification

$19 \times 5 = 95$, $95 + 1 = 96$ (the dividend).

Example (2): **Using the Rectangle Area Model to divide 919 ÷ 8**

Hundreds: There is 9 in the Hundreds place = 900

9 hundreds ÷ 4 = 2 hundreds.

The related fact is $4 \times 200 = 800$.

The remainder = 919 − 800 = 119

Tens: $4 \times 10 = 40$,

40 is much smaller than 119

$4 \times 20 = 80$

$4 \times 30 = 120$,

120 is more than 119.

So, 80 is the closest value to 119.

119 − 80 = 39.

$4 \times 200 = 800$	$4 \times 20 = 80$	$4 \times 9 = 36$
200	20	9

Ones: $3 \times 9 = 36$.

39 is the closest value to 39.

39 − 36 = 3

(3 is the remainder)

The quotient = 200 + 20 + 9 = 229

So, **919 ÷ 4 = 229** **and the remainder is 3**

Verification

$229 \times 4 = 916$, $916 + 3 = 919$ (the dividend).

Example 12: Using the Rectangle Area Model to divide 156 ÷ 6

Hundreds: You can't use 6 X 100 = 600.

Because: 600 > 156.

Tens: 6 X 10 = 60,

60 is much smaller than 150.

6 X 20 = 120

6 X 30 = 180,

180 is more than 150.

So, 120 is the closest value to 156.

156 − 120 = 36.

Ones: 6 X 6 = 36.

36 − 36 = 0.

(No remainder)

120 + 36 = 156

6 X 20 = 120	6 X 6 = 36

(20) (6)

20 + 6 = 26 (Quotient)

156 ÷ 6 = 26

26 x 6 = 156 (the dividend).

Find the quotient in each of the following:

(Use the **Area of Rectangle Model**)

ⓐ 84 ÷ 6

6 X .... = ...	6 X .... = ...	6

84 ÷ 6 = ...

ⓑ 90 ÷ 4

4 X .... = ...	4 X .... = ...	4

90 ÷ 4 = ...

ⓒ $457 \div 3 =$ ....

....

....

....

ⓓ $3,200 \div 8 =$ ....

....

....

....

2 Sarah saved 868 coins last year. She wanted to put them in 8 pots. How many coins will she put in each pot?

(Use the Rectangle Area Model to solve, show your steps)

....

....

....

....

3 There are 492 cars that need to use the parking lot in the stadium. The stadium includes 4 parking spaces. Each parking lot must contain the same number of cars evenly.

How many cars are there in each parking lot?

(Use the Rectangle Area Model to solve, show your steps)

....

....

....

....

Lesson 13

The Partial Quotients Algorithm

The Partial Quotient Algorithm:

Example 1: Compute 897 ÷ 4
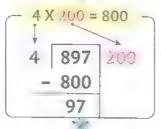

1

Draw the line as shown in the figure. Then, write the dividend on the **bottom** and the divisor on the **left**.
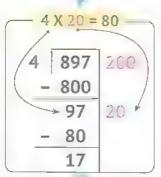

2

Start from the **left**, there are 8 in the Hundreds place. Notice that 800 is a multiple of 4, (4 x 200 = 800). Write 200 to the **right** of the line as shown. Then write 800 under 897, then subtract.

3

Move to number 79 (the difference). Find the nearest multiple of 4 to 97 (4 x 20 = 80); we can use another number. Write 20 to the **right** of the line, write 80 below 97, then subtract.
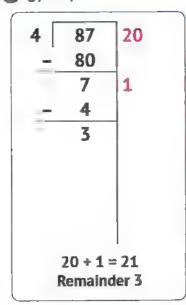

4

We move to number 17 (the difference). The nearest multiple of 4 to 17 is 16 (4 x 4 = 16). Write 4 to the **right** of the line, write 16 under 17, then subtract.

The quotient = 200 + 20 + 4 = 224

So, 897 ÷ 4 = 224 and the remainder is 1.

Example (2): Divide:

ⓐ 87 ÷ 4

4	87	20
	− 80	
	7	1
	− 4	
	3	

20 + 1 = 21
Remainder 3

87 ÷ 4 = 21
and the remainder is 3

Verification:
    4 x 21 = 84 ,
    84 + 3 = 87
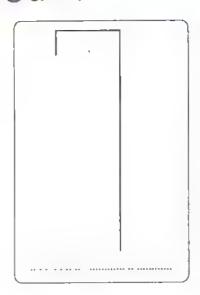

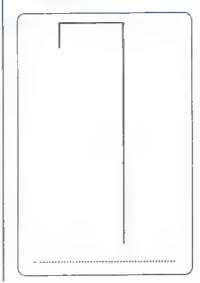

ⓑ 675 ÷ 5

5	675	100
	− 500	
	175	30
	− 150	
	25	5
	− 25	
	0	

100 + 30 + 5 = 135

675 ÷ 5 = 135

Verification:
    5 x 135 = 675

ⓒ 8,215 ÷ 3

3	8,215	2,000
	− 6,000	
	2,215	700
	− 2,100	
	115	30
	− 90	
	25	8
	− 24	
	1	

2,000 + 700 + 30 + 8
= 2,738 , Remainder 1

8,215 ÷ 3 = 2,738
and the remainder is 1

Verification:
    3 x 2,738 = 8,214 ,
    8,214 + 1 = 8,215

1 Use the **Partial Quotient Algorithm** to divide:

ⓐ 67 ÷ 4

ⓑ 84 ÷ 3

ⓒ 625 ÷ 5

ⓓ 937 ÷ 4

ⓔ 9,248 ÷ 4

ⓕ 6,278 ÷ 3
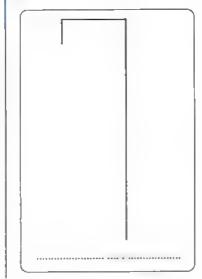

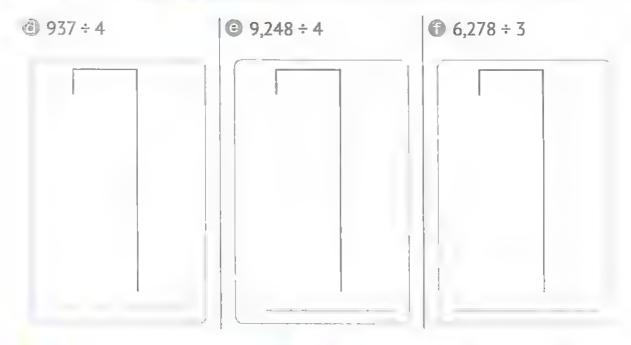

A juice shop owner owns 480 cups. If the shop owner wants to use these cups for 3 months, how many cups should he use each month?　　　　　(Using the Partial Quotient Algorithm)

One machine was used to make 1,026 cans of sugar-free soda and ⓓ ᵤₘₑₛ that number of regular soda cans over the course of ᵤ ᵢₙᵤₜₑₛ. The regular soda cans were then placed in two shipping boxes, each containing the same number of soda cans. How many cans of regular soda are there in each shipping box?

Lesson 14

The Standard Division Algorithm

Estimate Quotients

To estimate the quotient:

• We look for two numbers between which the **dividend** is **limited** and which are a **multiple** of the **divisor**.

• We divide each of the two numbers by the divisor, so that the result of the division is **limited** to the **quotient** of the division of the **two numbers**.

Example (1):

To estimate the quotient of 68 ÷ 4.

The number 68 is between **40** and **80.**

(Since these two numbers are multiples of 4)

$40 ÷ 4 = 10$, $80 ÷ 4 = 20$

The quotient is between 10 and 20.

$$40 ÷ 4 = 10$$
$$68 ÷ 4 = ??$$
$$80 ÷ 4 = 20$$

Example (2):

To estimate the quotient of 752 ÷ 3.

The number 752 is between **600** and **900.**

(Since these two numbers are multiples of 3)

$600 ÷ 3 = 200$, $900 ÷ 3 = 300$

The quotient is between 200 and 300.

$$600 ÷ 3 = 200$$
$$752 ÷ 3 = ??$$
$$900 ÷ 3 = 300$$

Example (3):

To estimate the quotient of 6,245 ÷ 2.

The number 6,245 is between **6,000** and **8,000**

(Since these two numbers are multiples of 2)

$6,000 ÷ 2 = 3,000$, $8,000 ÷ 2 = 4,000$

The quotient is between 3,000 and 4,000.

$$6,000 ÷ 2 = 3,000$$
$$6,245 ÷ 2 = ??$$
$$8,000 ÷ 2 = 4,000$$

1 Complete the following table:

	Problem	The dividend is between	The quotient is between
(Ex.	45 ÷ 3	30 and 60	10 and 20
ⓐ	75 ÷ 3	.... and	.... and
ⓑ	845 ÷ 3	.... and	and
ⓒ	215 ÷ 4	.... and	.... and .
ⓓ	4,256 ÷ 2	.... and	.... and ....
ⓔ	5,487 ÷ 4	.... and	.... and

The Standard Division Algorithm:

Example (1): Divide 98 ÷ 4:

First Step: (writing the problem)

$$4\overline{)98}$$

- The ..... is written below the line and the divisor is written to the **left** of the division symbol.

Second Step: (division)

$$4\overline{)98} \quad \overset{2}{}$$

- Start with the number in the place with the **highest value** (on the left). You know that 9 ÷ 4 = 2 and the remainder of the division is 1.
- Write the number 2 above the line, above number 9.
- The remainder of the division will not be recorded this time.

Third Step: (multiplication)

$$4\overline{)\begin{array}{c}98\\80\end{array}} \quad \overset{2}{}$$

- The **value** of the number 2 is 20 because it is in the **Tens** place.
- Multiply 20 x 4 = 80, then write 80 below 98.
- Since **80** is part of the **dividend** you divided.

Fourth Step: (Subtraction)

$$\begin{array}{r} 2 \\ 4\overline{)98} \\ -80 \\ \hline 18 \end{array}$$

Subtract:

$$98 - 80 = 18$$

Write the result of the subtraction.

Fifth Step: (Division)

$$\begin{array}{r} 24 \\ 4\overline{)98} \\ -80 \\ \hline 18 \end{array}$$

- The number **18** is the **new divisor**.
- $18 \div 4 = 4$ and the **remainder** is 2.
- Write 4 over 8 in the **Ones** place.

Sixth Step: (Multiplication)

$$\begin{array}{r} 24 \\ 4\overline{)98} \\ -80 \\ \hline 18 \\ 16 \end{array}$$

Multiply $4 \times 4 = 16$.
Write 16 **under** 18.

Seventh Step: (Subtraction)

$$\begin{array}{r} 24 \\ 4\overline{)98} \\ -80 \\ \hline 18 \\ -16 \\ \hline 2 \end{array}$$

Subtract:

$$18 - 16 = 2$$

So: $98 \div 4 = 24$ and the remainder is 2

From above we note that:

There are three basic steps:

(Division $\Rightarrow$ Multiplication $\Rightarrow$ Subtraction)

- These three steps are **repeated** according to the **number of digits of the dividend**.

Quotient

$$\begin{array}{r} 24 \\ 4\overline{)98} \\ -80 \\ \hline 18 \\ 16 \\ \hline 2 \end{array}$$

Divisor → 4 9 8 ← Dividend

2 ← Remainder

Example (2):   Divide 858 ÷ 3:

First Step: (Writing the problem):

$$3\overline{)858}$$
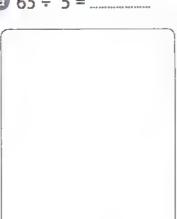

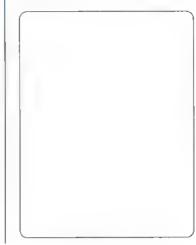

Second Step (Division):

$$3\overline{)858}^{\,2}$$

Third Step (Multiplication):

$$\begin{array}{r} ^{\times\,2} \\ 3\overline{)858} \\ 600 \end{array}$$

Fourth Step (Subtraction):

$$\begin{array}{r} 2 \\ 3\overline{)858} \\ -600 \\ \hline 258 \end{array}$$

Fifth Step (Division):

$$\begin{array}{r} 28 \\ 3\overline{)858} \\ -600 \\ \hline 258 \end{array}$$

Sixth Step (Multiplication):

$$\begin{array}{r} ^{\times\,28} \\ 3\overline{)858} \\ -600 \\ \hline 258 \\ 240 \end{array}$$

Seventh Step (Subtraction):

$$\begin{array}{r} 28 \\ 3\overline{)858} \\ -600 \\ \hline 258 \\ -240 \\ \hline 18 \end{array}$$

Eighth Step (Division):

$$\begin{array}{r} 286 \\ 3\overline{)858} \\ -600 \\ \hline 258 \\ -240 \\ \hline 18 \end{array}$$

Ninth Step (Multiplication):

$$\begin{array}{r} ^{\times\,286} \\ 3\overline{)858} \\ -600 \\ \hline 258 \\ -240 \\ \hline 18 \\ 18 \end{array}$$

Tenth Step (Subtraction):

$$\begin{array}{r} 286 \\ 3\overline{)858} \\ -600 \\ \hline 258 \\ -240 \\ \hline 18 \\ -\;18 \\ \hline 0 \end{array}$$

$$858 \div 3 = 286$$

1 Divide using the Standard Division Algorithm:

ⓐ 65 ÷ 5 = ...

ⓑ 97 ÷ 4 = ...

ⓒ 456 ÷ 3 = ...

ⓓ 837 ÷ 6 = ...

ⓔ 8,457 ÷ 3 = ...

ⓕ 9,807 ÷ 3 = ...
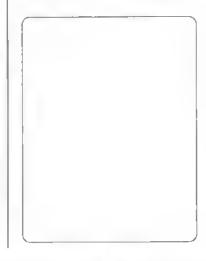

2 The train has 784 passenger seats. If the train has 8 cars and each car has the same number of seats, how many passengers can be seated in each car?

(Solve the problem using at least two different strategies)

Lesson 15

Division and Multiplication

Follow the Standard Division Algorithm:

Example (1): Divide $985 \div 4$:

(Using the Standard Division Algorithm)

The quotient will be between 200 and 300.

(between 800 and 1,200)

- **Follow the division steps:**
  Start by writing the problem, then
  (divide - multiply - subtract).
- These last three steps are repeated
  according to the dividend.

Check $246 \times 4 = 984$, $984 + 1 = 985$

$$18 \div 4 = 4 \text{ Remainder 2}$$
$$9 \div 4 = 2 \text{ Remainder 1} \qquad 25 \div 4 = 6 \text{ Remainder 1}$$

```
        2 4 6
  4 | 9 8 5
4 X 200 → - 8 0 0
          1 8 5
4 X 40 → - 1 6 0
            2 5
4 X 6 → -   2 4
              1
```

Example (2): Divide $296 \div 4$:

(Using the Standard Division Algorithm)

The quotient will be between 0 and 100.

(Because the divisor is between 0 and 400)

Note that: When dividing $2 \div 4$,
division is not possible because $2 < 4$.
So: We divide 2 and 9 together ($29 \div 4$)

Note that: If the division is not possible,
we add the number that cannot be
divided to the next number.

Note that: 0 is written above the number that cannot be divided.

$$29 \div 4 = 7 \text{ Remainder 1}$$
$$2 \div 4: \text{ Not possible} \qquad 16 \div 4 = 4$$

```
          7 4
   4 | 2 9 6
4 X 70 → - 2 8 0
            1 6
4 X 4 → -   1 6
              0
```

Check $74 \times 4 = 296$
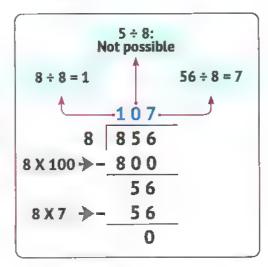

Example (3): **Divide 856 ÷ 8:**

(Using the Standard Division Algorithm)

The quotient will be **between** 100 and 200.

(Because the divisor is between 800 and 1,600)

- **Note that:** When dividing 5 ÷ 8,
  division is **not possible** because 5 < 8.
  So: We divide 5 and 6 together (56 ÷ 8).

Check 107 x 8 = 856

```
        5 ÷ 8:
     Not possible
              ↑
8 ÷ 8 = 1           56 ÷ 8 = 7
     ↑    ·107·        ↑
      8 | 8 5 6
8 X 100 ➤ - 8 0 0
              5 6
8 X 7 ➤ -     5 6
               0
```

- **Note that:** The number of digits of the **quotient** may be **equal** to or **less than** the number of digits of the **dividend**.

Example (4):

- 7,856 ÷ 5 ⟶ Number of digits of the quotient is **4** digits.

  2,364 ÷ 5 ⟶ Number of digits of the quotient is **3** digits.

  Because: 2 ÷ 5 is not possible.

---

1 Complete the following table:

	Problem	Number of Digits of Quotient	The Quotient is between	Using the Standard Division Algorithm
(Ex.	452 ÷ 4	3	100 and 200	113 4 | 452 - 400 52 - 40 12 - 12 0

(Ex.	278 ÷ 6	2	0 and 100	$$\begin{array}{r} 046 \\ 6\,\overline{)\,278} \\ -\ 240 \\ \hline 38 \\ -\ 36 \\ \hline 2 \end{array}$$
a	845 ÷ 5	....	.... and	
b	396 ÷ 6	....	.... and .	
c	4,256 ÷ 7	....	.... and	
d	4,824 ÷ 8	....	.... and	

2 Estimate the quotient and determine the number of digits of the quotient, then solve each problem using the Standard Division Algorithm:

ⓐ **576 ÷ 3 =** ....

Number of digits of the quotient is ....

The quotient will be between .... and ....

ⓑ **558 ÷ 6 =** ....

Number of digits of the quotient is ....

The quotient will be between .... and ....

3 Kazem wants to travel from Cairo to Alexandria. The distance between the two cities is 219 km. Kazem plans to stop 3 times during his journey. After how many kilometers should he stop?

....

....

....

....

Lesson 16

Solving Challenging Story Problems

Three-time Reading Strategy to Solve Word Problems:

First read	Determine what happens in the problem.
Second read	Determine the values in the problem.
Third read	Determine the **questions** that can be asked in the problem.

Example:

Ahmed and his mother want to plant a garden, and they will buy ⬚ tomato seedlings, ⬚ carrot seedlings, and ⬚ beet seedlings. They want to put the seedlings in ⬚ rows. How many seedlings are there in each row?

Read the problem and answer the following questions:

What happens in the problem?
There are a number of different seedlings that we want to divide into 6 rows.

What are the values in the problem?
⬚ seedlings, ⬚ carrot seedlings, ⬚ beet seedlings, ⬚ rows.

What questions can be asked in this problem?
What is the sum of the seedlings? How many seedlings are there in each row?

Answer:

- Total seedlings = 35 + 16 + 9 = 60 seedlings.
- Number of seedlings in each row = 60 ÷ 6 = 10 seedlings.

1 In 20 weeks, Sarah collected 14 kilograms of metal cans for recycling. Salim collected 6 times what Sarah collected.
The cans should be put into bags to be taken to the recycling center. Each bag holds 7 kg of cans. How many bags do they need?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

....

....

....

2 Hadi owns 347 small glass balls. Kamal owns 4 times as much as Hadi. Hala has 799 less than Kamal. How many glass balls does Hala have?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

....

....

....

Yahya placed 21 bottles of paint equally on 3 tables. How many bottles of paint did he put on each table?

What happens in the problem? _____

What are the values in the problem? _____

What questions can be asked in this problem? _____

Answer: _____

_____

_____

_____

Noor read 814 pages of a book in one month. His sister read three times as many pages as Nour in the same month. How many pages did Noor and his sister read altogether?

What happens in the problem? _____

What are the values in the problem? _____

What questions can be asked in this problem? _____

Answer: _____

_____

_____

_____

_____

Unit 8
Order of Operations

1
Problem-Solving Strategies

Learning Objectives:

At the end of this lesson, the student will be able to:

- Apply strategies to solve addition, subtraction, multiplication, and division problems.

2
Which Comes First?

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use the order of operations to solve two-operation problems.

3
Order of Operations

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use the order of operations to solve equations that require more than one operation.

4
The Order of Operations and Story Problems

Learning Objectives:

By the end of this lesson, the student will be able to:

- Use the order of operations to solve equations that require more than one operation.
- Write an equation and solve it to represent a multi-step word problem.

Concept 8.1 Order of Operations

Lesson 1

Problem-solving Strategies

second: You studied the strategies of Mental Arithmetic and strategies of **Addition and Subtraction**.

seventh: You studied the strategies of multiplication and division.

«Remember these strategies»

Solve the following problems using any strategy you choose. Explain your steps:

ⓐ $349 + 199 =$ _____

ⓑ $9,230 - 455 =$ _____

ⓒ $18 \times 62 =$ _____

ⓓ $678 \div 6 =$ _____

2 **Estimate the solution of each problem and then use the appropriate strategy to solve:** (Show your steps)

ⓐ 1,892 + 3,267 = ...

Estimation: ....

ⓑ 5,612 – 56 = ...

Estimation: ....

ⓒ 127 X 6 = ...

Estimation: ....

ⓓ 1,892 ÷ 9 = ...

The quotient will be between

.... and ....

3 **Solve the following problems using the Standard Algorithm:**

ⓐ
```
   24,456
+  27,157
_____
.................
```

ⓑ
```
   12,500
+   8,215
_____
.................
```

ⓒ
```
     48
X    32
_____
.............
+  ...........
_____
.............
```

ⓓ
```
      ...........
  5 | 7 4 5
```

Lesson ②

Which Comes First?

Order of Operations Diagram

Parentheses ▶ Exponents ▶ **Multiplication and Division** (From left to right) ▶ **Addition and Subtraction** (From left to right)

Problems that contain addition and subtraction only:

When a problem contains only addition and subtraction.

○ We perform operations from **left** to **right**.

1: ••••••	2: $9 - 8 - 2$	3: $8 - 2 + 3$
= 11 + 4	= 3 − 2	= 6 + 3
= 15	= 1	= 9

Problems that contain multiplication and division only:

– When a problem contains only multiplication and division.

○ We perform operations from **left** to **right**.

1: ▮▮▮▮▮	2: $9 \div 3 \div 3$	3: $24 \div 8 \times 2$
= 10 X 4	= 9 ÷ 3	= 3 X 2
= 40	= 3	= 6

Third **Problems that contain two operations:**

• **One of them is multiplication or division, and the other is addition or subtraction:**

- When a problem contains more than one operation, multiplication and division must be done before addition and subtraction.

$5 + 3 \times 4$	$7 \times 2 + 4$	$9 \div 3 + 6$	$3 + 6 \div 3$
$= 5 + 12$	$= 14 + 4$	$= 3 + 6$	$= 3 + 2$
$= 17$	$= 18$	$= 9$	$= 5$
$9 - 4 \times 2$	$5 \times 3 - 7$	$8 \div 4 - 2$	$9 - 6 \div 2$
$= 9 - 8$	$= 15 - 7$	$= 2 - 2$	$= 9 - 3$
$= 1$	$= 8$	$= 0$	$= 6$

1 **Follow the order of calculations to solve the following problems:**

ⓐ $12 + 2 + 8$

= ....

= ....

ⓑ $12 - 5 - 2$

= ....

= ....

ⓒ $9 + 8 - 2$

= ....

= ....

ⓓ $12 - 2 + 5$

= ....

= ....

ⓔ $24 \div 6 \div 4$

= ....

= ....

ⓕ $5 \times 6 \times 3$

= ....

= ....

ⓖ $9 \times 4 \div 6$

= ....

= ....

ⓗ $24 \div 8 \times 4$

= ....

= ....

ⓘ $5 \times 4 + 3$

= ....

= ....

j) $32 \div 8 + 5$	k) $5 + 20 \div 4$	l) $6 + 6 \times 2$
=	=	=
=	=	=
m) $16 \div 2 - 7$	n) $16 - 8 \div 4$	o) $8 - 2 \times 3$
=	=	=
=	=	=
p) $2 \times 8 - 6$	q) $6 + 5 - 3 - 2$	r) $6 \times 5 \div 3 \div 2$
=	=	=
=	=	=

puzzles using the correct order of operations

Example (1): If 📖 + 📖 + 📖 = 15

– Three equal shapes whose sum is (15).   **So:** 📖 = 15 ÷ 3 = 5

Example (2): If ✉ X ✉ X ✉ = 27

– 27 = 3 X 3 X 3.   **So:** ✉ = 27

Example (3): Solve the following puzzle. When you know the number each picture represents, write the value above the picture. Remember the order of operations.

😋 + 😋 + 😋 = 36

❤ + ❤ x 😄 = 28

❤ x ⬜ + ❤ = 44

😋 + ⬜ x 😄 = .

– **To solve the previous puzzle, we must first look for the key to this puzzle:**

The first line: 😋 + 😋 + 😋 = 36

– Three equal shapes whose sum is (36), by dividing $36 ÷ 3 = 12$.

– This means that the figure 😋 = 12 and that: 😄 = 6

The second line: 💜 + 💜 x 😄 = 28

– Put the number 6 in the place of the figure 😄 → 💜 + 💜 X 6 = 28

– By doing multiplication first and then adding:

$$💜 + 💜 + 💜 + 💜 + 💜 + 💜 + 💜 = 28$$

– This means: 7 X 💜 = 28 ⇒ 💜 = 4

The third line: 💜 x 👍 + 💜 = 44

– Put the number 4 in the place of the figure 💜 → 4 X 👍 + 4 = 44

– **And this line can be written as follows:** 4 X 👍 + 4 = 40 + 4

– **This means:** 4 X 👍 = 40   So: 👍 = 10

The fourth line: 💕 + 👍 x 😄 = ...

– Put the number 6 in the place of the figure 😄 .

– Put the number 4 in the place of the figure 💜 .

– Put the number 10 in the place of the figure 👍 .

💕 + 👍 x 😄 = 4 X 2 + 10 X 6

                = 8 + 60 = 68

Note

💕 = 💜 + 💜   and   😄😋 = 😄 + 😄

Solve the following puzzles. When you know the number each picture represents, write the value above the picture. Remember the order of operations:

ⓐ

+ + = 12

+ + = 18

+ + = 26

× + = ...

= ___ , = ___ , = ___

ⓑ

+ + = 18

+ + = 23

+ + = 17

× + = ...

= ... , = ___ , = ___

ⓒ

÷ + + = 27

+ + = 22

+ + = 18

× + = ...

= ___ , − = ___ , = ___

ⓓ

+ + = 12

+ × = 18

+ × = 28

+ × = ...

= ___ , = ___ , = ___

Lesson **3**

Order of Operations

Order of Operations Diagram

Parentheses → Exponents → **Multiplication and Division** (From left to right) — **Addition and Subtraction** (From left to right)

♦ Problems with more than one operation:

• **If the problem contains more than one operation:**
  Multiplication and division must be done **before** addition and subtraction.
  Then add and subtract from **left** to **right**.

Ex.1: $30 \div 5 + 4 \times 7 + 2 \times 6$

$= 6 + 28 + 12$

$= 34 + 12$

$= 46$

Ex.2: $3 \times 4 \times 5 + 40 \div 4 \div 2$

$= 12 \times 5 + 10 \div 2$

$= 60 + 5$

$= 65$

Follow the order of calculations to solve the problems:

ⓐ $2 + 4 \times 6$
= ....
= ....

ⓑ $48 \div 4 + 9$
= ....
= ....

ⓒ $6 \times 3 - 3 \times 5$
= ....
= ....

ⓓ $7 + 70 \div 10 - 2$
= ....
= ....

ⓔ $49 - 7 \times 6 + 4$
= ....
= ....

ⓕ $8 \times 2 + 24 - 12$
= ....
= ....

ⓖ $8 \times 3 + 6 \div 2$
= ....
= ....

ⓗ $21 \div 3 - 2 \times 3$
= ....
= ....

ⓘ $25 \div 5 + 30 \div 3$
= ....
= ....

Lesson 4

The Order of Operations and Story Problems

Order of Operations Diagram

| Parentheses | ► Exponents | ► **Multiplication and Division**
(From left to right) | **Addition and Subtraction**
(From left to right) |

Use numbers and symbols to represent each problem and then solve it (remember the order of operations):

1 Adel loves chocolate. He received 246 bars of chocolate for his birthday. He ate 24 bars of chocolate and wants to give the rest to 6 of his friends. How many bars of chocolate would each friend have if they divided them equally?

_____

_____

_____

_____

_____

2 Maha walked 14 kilometers every day for two weeks. The following week, Maha walked 56 kilometers. How many kilometers did she walk during those three weeks?

_____

_____

_____

_____

_____

3 Ashraf must take the bus to go to work. It takes 27 minutes to reach the bus stop near his works place. After that, he has to walk for 12 minutes from the bus stop to his workplace. How many minutes does Ashraf spend on his way to work 5 days a week?

....

....

....

4 A group of tourists is on a tour in Alexandria. The group includes 172 tourists and 8 tour guides who want to travel to visit the pyramids by microbus. Each microbus can accommodate 9 persons. How many microbuses do they need so that everyone can reach the pyramids?

....

....

....

5 Nashwa wants to bake blueberry pancakes. She will put 6 berries in each pancake. Nashwa bought 198 berries from the store. On her way home, Nashwa ate 18 berries. How many pancakes can Neshwa bake with the remaining berries?

....

....

....

....

6 Write a word problem that can be represented by the equation: $6 + 36 \div 4$.

4th

**Primary
First Term**

2022

Theme 1 Number Sense and Operations

Unit 1 Place Value

Concept 1.1 Reinforcing Place Value

Exercises on Lessons 1&2

Digit, Numeral and Number & Really Big Numbers!

1 Complete the following table by putting a tick (✓) as shown in the example.

		Digit	Number	Numeral
Ex.	25		✓	✓
a	8			
b	125			
c	Eight			
d	Two hundred fifteen			
e	3			
f	45			
g	200 + 5			

2 Write the **greatest** and the **smallest** numbers that can be formed from the following digits.

a (6 , 8 , 7 , 2 , 9) – The **greatest** number is: ....

   – The **smallest** number is: ....

b (2 , 0 , 8 , 3 , 4) – The **greatest** number is: ....

   – The **smallest** number is: ....

c (5 , 1 , 9 , 3 , 4) – The **greatest** number is: ....

   – The **smallest** number is: ....

d (8 , 0 , 2 , 7 , 5) – The **greatest** number is: ....

– The **smallest** number is: ....

3 Complete the following table (Write the place value and the value of the digit 8 in each number):

	Number	Place Value	Value
a	422,48 5		
b	38,250		
c	8 3,115		
d	700,8 10		
e	415,128		
f	8 20,200		
g	210,68 2		

4 Complete using (< , = or >):

a 452,252   542,252   **b** 25,225   25,252

c 60,606   600,060   **d** 10,000   9,999

e 20,850   20,850   **f** 900,900   99,999

5 Use the following Place Value table to read the shown number:

a Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
			8	1	0	4	2	8	8
	.... Millions			.... Thousands			....		

– The previous number is read as: ....

....

(b)

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
		4	3	1	8	0	0	0	5
		Millions			Thousands				

– The previous number is read as: ....

(c)

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
	5	1	8	1	2	9	2	0	8
		.... Millions			...... Thousands				

– The previous number is read as:

(d)

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
5	0	0	2	4	0	3	7	5	0
		.... Millions			Thousands				

– The previous number is read as: ..

(e)

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
7	3	6	5	4	2	9	9	6	8
		.... Millions			.... Thousands				

– The previous number is read as:

6 Write the following numbers in digits: (Standard Form):

ⓐ 25 Millions + 250 Thousands + 200 = ...

ⓑ 120 Millions + 25 Thousands + 12 = ...

ⓒ 300 Millions + 5 thousands + 3 = ...

ⓓ 600 Millions + 200 Thousands + 3 = ...

ⓔ 5 Billions + 6 Millions + 4 Thousands + 4 = ...

ⓕ 9 Billions + 25 Millions + 125 Thousands + 225 = ...

7 Complete the following numbers:

ⓐ 456,254 = ... Thousands + ...

ⓑ 7,024,258 = ... Millions + ... Thousands + ...

ⓒ 14,105 = ... Thousands + ...

ⓓ 9,005,002= .... Millions + ... Thousands + ...

ⓔ 23,015 = ... Thousands + ...

ⓕ 7,000,021 = ... Millions + ... Thousands + ...

8 Complete the following table:

	Number	The Place in Which the Number 4 is Located
ⓐ	227,102,245	
ⓑ	13,247,258	
ⓒ	4,127,578

ⓔ	2,415,220	
ⓕ	6,125,200,482	
ⓖ	248,367,250	
ⓗ	4,000,000,525	

	5,400,300,200	
	24,100,000	

Circle the number in the place shown in front of it:

	Number	The Place in Which the Number is Located
a	528,745,432	Ones
b	789,654,026	Hundreds
c	427,167,523	Thousands
d	210,347,163	Millions
e	793,400,063	Ten-thousands
f	7,463,814,325	Billions
g	9,521,005,136	Hundred-millions
h	8,852,963,852	Ten-millions
i	520,753,159	Hundred-thousands
j	8,201,093	Ten

10 Complete the following:

ⓐ The **largest** 5-digit-number is ....

ⓑ The **smallest** 4-digit-number is ....

ⓒ The **largest** 6-different-digit-number is ....

ⓓ The **smallest** 6-different-digit-number is ....

ⓔ The value of the digit 6 in the number 126,251 is ....

ⓕ The value of the digit 3 in the number 32,105 is ....

ⓖ The place value of the digit 0 in the number 120,213 is ....

ⓗ The place value of the digit 4 in the number 10,214 is ....

i The **largest** number that can be formed from the digits: (5, 6, 3, 8, 2) is

....

j The **smallest** number that can be formed from the digits: (5, 0, 7, 3, 1) is

....

k The **largest** 5-digit-number that can be formed from the digits: (3, 7, 2)

is ....

l The **smallest** 6-digit-number that can be formed from the digits: (6, 8, 4)

is ....

m 450 Millions + 50 Thousands = ...

n 25 Millions + 20 = ...

o 40,002,200 = ... Thousands + ... Millions + ...

p 7,458,115,251 = ... Billions + ... Millions +

.... Thousands + ...

q The number 77,002,205 is read as: ....

r The number "Three hundred five million, fourteen thousand, seven" is

written as: .... **(Standard Form)**

s The digit 3 in the number 36,154,258 is in the .... place.

t The digit 8 in the number 45,185,252 is in the .... place.

u The digit .... in the number 7,335,102,562 is in the Billions

place.

v The digit .... in the number 922,157,528 is in the

Hundred-millions place.

Choose the correct answer from the brackets:

a. The _____ is an amount related to the numeral and consists of one or more digits.

(number or digit or numerical form)

b. The .... is writing the number in any way.

(number or digit or numerical form)

c. .... represents a digit. (15 or 9 or Eight)

d. _____ represents a number. (Two hundred fifty or 200 + 5 or 29)

e. The **largest** 4-digit-number is ....

(9,999 or 9,000 or 1,000)

f. The **smallest** 5-digit-number is ....

(99,999 or 10,000 or 10,234)

g. The **largest** 5-different-digit-number is _____ .

(98,765 or 10,234 or 10,000)

h. The **smallest** 4-different-digit-number is _____ .

(9,876 or 1,023 or 1,000)

i. The value of the digit 7 in the number 125,357 is _____ .

(7 or 70 or 700)

j. The value of the digit 0 in the number 87,051 is _____ .

(0 or 10 or 100)

k. The place value of the digit 8 in the number 15,382 is _____ .

(Ones or Tens or Hundreds)

l. The place value of the digit 7 in the number 725,145 is _____ .

(Thousands Ten-thousands Hundred-thousands)

Ⓜ The largest number that can be formed from the digits: (8, 6, 1, 7, 9) is

....   (98,761 or 16,789 or 97,168)

Ⓝ The **smallest** number that can be formed from digits: (0, 8, 1, 4, 5) is

....   (85,510 or 10,458 or 85,410)

Ⓞ The **largest** 6-digit-number that can be formed from the digits: (9, 1, 7)

is ....   (971,971 or 999,971 or 111,179)

Ⓟ The smallest 5-digit-number that can be formed from the digits (8, 2,

6) is ....   (22,268 or 88,862 or 20,068)

Ⓠ 12 Millions + 15 Thousands + 20 = ...

(20,015,012 or 121,520 or 12,015,020)

Ⓡ 5 Billions + 3 Millions + 45 Thousands + 9 = ...

Ⓢ 3,400,003,025 = ...

(3 Billions + 400 Millions + 300 Thousands + 25 or 3 Billions + 4 Millions +

3 Thousands + 25 or 3 Billions + 400 Millions + 3 Thousands + 25)

Ⓣ Four billion, six hundred five million, ninety thousand, fifteen

= ....   (4,065,090,015 or 4,650,900,015 or 4,605,090,015)

Ⓤ Six billion, five hundred thousand, thirty = ...

(6,000,500,030 or 6,500,000,030 or 6,500,000,300)

Ⓥ The digit 8 in the number 214,284,697 is in the .... place.

(Tens or Ten-thousands or Ten-millions)

Ⓦ The digit .... in the number 745,215,369 is in the

Hundred-thousands place.   (3 or 2 or 7)

Worksheet

1 **Complete the following:**

a The number that represents the numeral " three hundred and seventeen" is ....

b The value of the digit 3 in the number 234,542,124 is ....

c The **largest** 6-digit-number is ....

d The billion is the **smallest** number formed from .... digits

e All digits are .... and all numbers are not ....

2 **Choose the correct answer from the brackets:**

a "8" represents ....

(digit only ● digit and number only ● digit, number and numeral)

b The place value of the digit 0 in the number 30,745 is ....

(Thousands ● Ten-thousands ● Zero)

c The **smallest** 5-different-digit-number is ....

(10,000 or 90,000 or 10,234)

d The **largest** number that can be formed from the digits: (2, 7, 1, 0, 3) is

....

(70,321 or 73,210 or 10,237)

e 500 + 0 + 25 = ...

(500,025 or 5,025 or 525)

3 **Complete using (< , = or >):**

a 54,205   45,250   b 25,000   200,005

c 808,080   80,808

d 100,000   One hundred thousand

4 **Arrange the following numbers in an .... order:**

100,100 , 99,999 , 990,000 , 10,000

The order: .... , ... , ... , ...

Exercises *on* Lessons 3&4

Changing Values & Comparing Values

1 Complete the following table, write the **value** and the **place value** of the underlined digit of the following numbers:

	Number	Place Value	Value
a	7,654,328,63**8**		
b	9,654,104,**1**03		
c	6,123,6**8**9,456		
d	5,00**0**,412,698		
e	**7**,021,842,036		
f	7,002,852,3**6**9		
g	9,852,14**7**,633		
h	700,**5**20,069		
i	**4**05,039,506		
j	5**0**0,700,021		

2 Complete the following table:

	Digit	Place Value	Value
a	8	Ones	
b	6	Hundreds	
c	9		9,000

	3	....	300,000
	7	Ten-millions	....
	2	Billions	....
	4	....	40
	5	....	50,000
	1	Millions	....
	6	....	600,000,000

3 Complete the following:

ⓐ 30 Tens = ...

ⓑ 50 Ten-thousands = ...

ⓒ 20 Ten-millions = ...

ⓓ 600 Ones = ...

ⓔ 700 Hundreds = ...

ⓕ 200 Hundred-thousands = ...

ⓖ 90 Millions = ...

ⓗ 100 Thousands = ...

ⓘ 5,000 = ... Hundreds.

ⓙ 10,000 = ... Thousands.

ⓚ 800,000 = ... Ten-thousands.

ⓛ 90,000 = ... Tens.

ⓜ 1,000,000,000 = ... Millions.

4 Complete the following:

ⓐ 500 Tens = ... Thousands.

ⓑ 600 Thousands = ... Tens.

ⓒ 60 Ten-millions = ... Hundreds.

ⓓ 1,000 Hundreds = ... Thousands.

ⓔ 3,000 Hundred-thousands = ... Millions.

ⓕ 9,000 Millions = ... Billions.

ⓖ 100 Thousands = ... Ten-thousands.

5 **Complete the following:**

ⓐ The place where the digit 8 is in a value **10 times** the digit 8 in the Ten-thousands place is ....

ⓑ The place where the digit 7 is in a value **100 times** the digit 7 in the Ten-thousands place is ....

ⓒ The place where the digit 3 is in a value **1,000 times** the digit 3 in the Tens place is ....

ⓓ The place where the digit 6 is in a value **10 times** the digit 6 in the Millions place is ....

ⓔ The value of the digit in the **Ones** place is .... times the value of the digit in the Hundreds place.

ⓕ The value of the digit in the **Hundred-thousands** place is .... times the value of the digit in the Tens place.

ⓖ The value of the digit in the **Millions** place is .... times the value of the digit in the Thousands place.

ⓗ The value of the digit in the **Billions** place is .... times the value of the digit in the Millions place.

6 **Complete the following:**

ⓐ (8 Tens , 7 Ones) X 10 = ...

ⓑ (6 Hundreds, 3 Ones) X 100 = ...

ⓒ (3 Hundreds, 5 Tens) X 10 = ...

ⓓ (7 Thousands, 2 Tens) X 100 = ...

ⓔ (6 Thousands, 2 Hundreds) X 1,000 = ...

ⓕ (4 Millions, 7 Hundreds) X 100 = ...

ⓖ (9 Hundreds, 5 Tens, 3 Ones) X 10 = ...

ⓗ (9 Thousands, 7 Hundreds, 2 Ones) X 100 = ...

(9 Hundreds , 5 Tens , 3 Ones) X 10 = _____

(9 Hundred-thousands , 5 Ones) X 10 = _____

8 Hundreds X 100 = _____

15 Thousands X 1,000 = _____

100 Millions X 10 = _____

7 Complete the following:

The greatest and the smallest 7-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 8-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 9-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 10-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 7-different-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 8-same-digit-numbers are:

The **greatest** number is _____

The **smallest** number is _____

The greatest and the smallest 9-different-digit-numbers are:

The **greatest** number is _____

The **smallest** number is ....

h The greatest and the smallest numbers formed from the digits:

(8 , 6 , 7 , 2 , 0 , 3 , 4) are:

The **greatest** number is ....

The **smallest** number is ....

i The greatest and the smallest numbers formed from the digits:

(9 , 5 , 6 , 8 , 2 , 4) are:

The **greatest** number is ....

The **smallest** number is ....

j The greatest and the smallest 8-digit-numbers formed from the digits:

(9 , 2 , 4) are:

The **greatest** number is ....

The **smallest** number is ....

k The greatest and the smallest 8-even-digit-numbers are:

The **greatest** number is ....

The **smallest** number is ....

l The greatest and the smallest 8-odd-digit-numbers are:

The **greatest** number is ....

The **smallest** number is ....

8 **Choose the correct answer from the brackets:**

a The value of the digit 8 in the number 36,815,250 is ....

(80,000 **or** 800,000 **or** 8,000,000)

b The place value of the digit 7 in the number 33,128,275 is ....

(Tens **or** Ten-thousands **or** Hundred-thousands)

c The value of the digit 6 in the Ten-thousands place is ....

(6,000 **or** 60,000 **or** 600,000)

The value of the digit 3 in the Hundred-millions place is _____ .

(300 or 300,000 or 300,000,000)

60 Hundred-thousands = _____ . (60,000 or 600,000 or 6,000,000)

800 Thousands = _____ . Hundreds. (8,000 or 800 or 80)

4 Billions = _____ Ten thousands. (4,000 or 40,000 or 400,000)

4,000 = _____ Hundreds. (4 or 40 or 400)

60,000 = _____ Thousands. (6 or 60 or 600)

200 Millions = _____ . (200 or 200,000 or 200,000,000)

500 Tens = _____ . (5,000 or 50,000 or 500,000)

1 Billion = _____ Millions. (10,000 or 1,000 or 1,000,000)

The value of the digit in the Ten-thousands place is **100 times** the value

of the digit in the _____ place. (Tens or Hundreds or Thousands)

The value of the digit in the _____ place is **10 times** the value of

the digit in the Hundreds place.

(Thousands or Ten-thousands or Hundred-thousands)

(7 Tens, 3 Ones) X 100 = _____ . (7,300 or 73,000 or 730,000)

(3 Hundreds, 2 Tens) X 1,000 = _____ .

(32,000 or 320,000 or 3,200,000)

15 Millions X 100 = _____ .

(1,500,000 or 15,000,000 or 1,500,000,000)

The value of the digit 3 in the number 9,237,468,258 is _____ .

(3,000,000,000 or 300,000,000 or 30,000,000)

The **smallest** number formed from the digits: (5 , 6 , 7 , 2 , 0 , 8) is

(876,250 or 205,678 or 678,205)

The number 200,000 = _____ times the number 200.

(100 or 1,000 or 10,000)

Worksheet 2

1 Choose the correct answer from the brackets:

ⓐ The **smallest** number formed from the digits: (5, 3, 7, 2, 0, 4)

is ....   (754,302 or 754,320 or 203,457)

ⓑ The number 60,000 = ... times the number 600.

(100 or 1,000 or 10,000)

ⓒ The **largest** 7-similar-digits-number is ....

(9,999,999 or 1,111,111 or 9,876,543)

ⓓ 25 Thousands x 1,000 = ...

(25,000,000 or 25,000 or 250,000)

ⓔ The place value of the digit 7 in the number 251,475,253

is ....   (Tens or Ten-thousands or Ten-millions)

2 Complete the following:

ⓐ (4 Hundreds and 5 Tens) x 100 = ...

ⓑ The **largest** even number formed from 8 digits is ....

ⓒ The value of the digit in the Millions place is equal to .... times the number in the Thousands place

ⓓ 400 Thousands = ...

ⓔ 800,000 = ... Ten-thousands.

3 Match:

① 1,000,000	ⓐ The value of the digit 5 in Billions place.
② 9,876,543	ⓑ The smallest 7-digit-number.
③ 5,000,000,000	ⓒ 30 Ten-thousands.
④ 2,500,000,000	ⓓ The greatest 7-different-digit-number.
⑤ 300,000	ⓔ 25 Millions X 100

Exercises on Lessons 5&6

Many Ways to Write & Composing and Decomposing

Write the following numbers in the Word Form:

1 7,200,150,208: ....

2 400,300,200:

3 1,500,000: ....

4 20,050,003:

5 4,000,000,000 + 6,000,000 + 20,000 + 300 + 20 + 6: ....

6 2,000,000,000 + 30,000,000 + 700,000 + 600:

7 200,000,000 + 700,000: ....

2 **Write the following numbers in the** Standard Form:

ⓐ Five hundred million, twenty thousand, fifty: ....

ⓑ Four billion, seven million, five thousand, nine: ....

ⓒ Eighteen million, ninety thousand: ....

ⓓ One billion, five hundred twenty thousand, forty : ....

ⓔ 8,000,000,000 + 50,000,000 + 60,000 + 300 + 7 = ...

ⓕ 9,000,000,000 + 800,000 + 300 = ...

ⓖ 9,000,000,000 + 30,000,000 + 60,000 + 20 = ...

ⓗ 3,000,000,000 + 300,000 = ...

3 **Write the** Expanded Form **of the following numbers:**

ⓐ 400,120,603 = ... + ... + ... + ... + ...

ⓑ 5,200,090,050 = ...

ⓒ 20,750,600 = ...

ⓓ 250,000,524 = ...

ⓔ Six billion, eight hundred fifteen million, four hundred thousand, thirty =

....

....

ⓕ Nine billion, thirty-five million, nine hundred five thousand, three
hundred six = ...

....

ⓖ One hundred ninety million, six hundred twenty-four thousand,
seventeen = ...

....

ⓗ Sixty-three million, five hundred ninety-seven =

....

....

4 Complete the following table:

	Standard Form	Word Form	Expanded Form
ⓐ	4,080,107,250		
ⓑ	4,000,125,695		
ⓒ		Three hundred fifty million, nine hundred five thousand, two hundred fifty five	
ⓓ		Three billion, six hundred million, seventy thousand, fifteen	
ⓔ			700,000,000 + 50,000 + 4,000 + 300 + 20 + 5
ⓕ			7,000,000,000 + 200,000,000 + 4,000,000 + 30,000 + 200 + 90 + 3

5 Complete the following table:

	Composing Numbers (Expanded Form)	Decomposing Numbers (Expanded Notation)
a	300,250,102	(3 X ....) + (2 X ....) + (5 X ....) + (1 X ....) + (2 X ....)
b	7,050,000,865	....
c	3,006,080,500	....
d	....	(2 X 1,000,000,000) + (9 X 10,000,000) (8 X 100,000) + (7 X 1,000) + (3 X 100) + (7 X 10) + (1 X 6)
e	.... :	(3 X 1,000,000,000) + (6 X 100,000,000) + (5 X 10,000) + (3 X 1,000) + (8 X 10)
f	....	(2 X 100,000,000) + (5 X 10,000,000) (6 X 1,000,000) + (9 X 1,000) + (4 X 100) + (8 x 10) + (3 X 1)

Use the Place Value table to help you write the following numbers in different forms:

Billions (Milliards)	Millions			Thousands			Ones

7 **Choose the correct answer:**

a The number 35,200,810 (in the **Word Form**) is ....

(thirty-five thousand two hundred eighty-one **or** thirty-five million, two
hundred thousand, eight hundred ten **or** three hundred fifty two million,
eight hundred ten)

a) 800,000,000 + 7,000,000 + 50,000 + 300 + 2 = _____ .

(in the Word Form)   (807,050,302 ● Eight hundred and seven million, five hundred thousand, three hundred two ● Eight hundred seventy million, fifty thousand, three hundred two)

c) Six hundred and fifty million, thirteen thousand, five hundred twenty-six

(in Standard Form):   .(605,130,516 ● 605,013,516 ● 650,013,526)

d) 7,000,000,000 + 400,000,000 + 2,000 + 30 = _____ .

(in Standard Form) (740,002,030 ● 7,400,002,030 ● 740,002,030)

e) 150,000,230 : _____ .   **(in Expanded Form)**

(100,000,000 + 5,000,000 + 200 + 30 ● 10,000,000 + 50,000,000 + 200 + 30 or 100,000,000 + 50,000,000 + 200 + 30)

f) 8,000,000,000 + 20,000,000 + 800,000 + 2,000 + 80 = _____ .

(8,280,280 ● 8,020,802,080 ● 80,280,080)

g) (6 X 1,000,000,000) + (6 X 10,000,000) + (6 X 10,000) + (6 X 100) + (6 X 10) = _____ .   (6,060,060,660 ● 660,060,660 ● 6,660,000,660)

h) 3,000,000,000 + 50,000,000 + 12,000 + 245 = _____ .

(3,512,245 or 3,512,000,245 or 3,050,012,245)

i) 5,000,000,000 + 500,000,000 + 50,000 + 500 = _____ .

(5,000,550,500 ● 5,500,050,500 ● 5,550,000,500)

j) Three hundred five million, seven hundred thousand, sixteen =

(350,700,016 or 305,700,160 or 305,700,016)

k) Five billion, six million, nine thousand, seven = _____ .

(5,006,009,007 ● 5,060,090,070 ● 5,600,900,700)

l) (3 X 100,000,000) + (3 X 10,000,000) + (3 X 100,000) + (3 X 10,000) + (3 X 100) + (3 X 10) = _____ .

(33 million , 33 thousand , 33 ● 303 million , 303 thousand , 303 ● 330 million , 330 thousand , 330)

Worksheet 3

1 **Choose the correct answer from the brackets:**

The number 350,000,350: .... **(in Word Form)**

(Three hundred fifty thousand, three hundred fifty **or** Thirty-five million, three hundred fifty **or** Three hundred fifty million, three hundred fifty)

(4 X 1,000,000, 000) + (5 X 10,000,000) + (3 X 1,000,000) + (4 X 1,000)

+ (5 X 100) + (3 X 1): .... **(in Standard Form)**

(4,053,004,503 **or** 4,053,000,453 **or** 4,530,045,003)

Four hundred thirty-five million, four hundred thousand, three hundred

five: .... **(in Standard Form)**

(435,400,350 **or** 435,040,305 **or** 435,400,305)

200,000,000 + 60,000,000 + 20,000 + 6,000 + 20 + 6 : ....

(in Standard Form) (206,206,206 **or** 260,026,026 **or** 26,026,206)

The value of the digit 8 in the number 180,302,201 is ....

(8,000,000,000 **or** 800,000,000 **or** 80,000,000)

2 **Complete the following:**

The number 5,005,050,500: **(in Word Form)**

....

....

4,000,000,000 + 30,000,000 + 900,000 + 5,000 + 70

= (4 X ....) + (3 x ....) + (9 X ....)

+ (5 X ....) + (7 X ....).

The place value of the digit 3 in the number 80,234,256 is _____ .

If the digit 5 is in the Millions place, its value = (5 x _____).

Seven hundred million seventy thousand =

(7 X _____) + (7 X _____).

3   Match:

Three billion, three thousand.

(3 X 1,000,000,000) + (3 X 10).

300,000,300.

Three hundred, thirty.

(3 X 100,000) + (3 X 1,000).

Three hundred thousand, three hundred.

3,000,003,000.

Three hundred thirty thousand.

3,000,000,030.

(3 x 100,000) + (3 X 10).

Use the Place Value table to help you write the following numbers in different forms:

Billions (Milliards)	Millions			Thousands			Ones		
Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones	Hundreds	Tens	Ones
3	0	9	0	2	0	0	2	4	0

(1) Standard Form: _____

(2) Word Form: _____

_____

(3) Expanded Form: _____

_____

(4) Expanded Notation: _____

_____

Concept 1.2 Using Place Value

Exercises on Lessons 7, 8&9

Comparing Really Big Numbers, Comparing Numbers in Multiple Forms & Descending and Ascending Numbers

1 Complete the following table using (< , = or >):

a	760,715,213	....	680,715,312
b	245,675	....	254,576
c	6,550,852	....	6,505,852

e	620,620,620	....	602,602,602
f	20,000,900	....	20,000,009
g	45 millions ,45 thousands	....	45,045,000
h	(8 X 10,000,000) + (8 X 100)	....	80,000,008
i	(6X 1,000,000,000) + (6X1)	....	6,000,000,006
j	5,500,550	....	550 millions, 550
k	The smallest 9-digit-number	....	1 X 1,000,000,000
l	Three hundred thirty three million	....	3,330,000,000
m	100,000,000	....	The greatest 8-digit-number
n	The smallest 9-digit-number	....	1 X 1,000,000,000
o	(3 X 100,000,000) + (3X1)	....	Three hundred million, three
p	Two billion, five hundred five thousand, fifty	....	2,550,000,050

2 Choose the correct answer:

_____ < 795,002.   (792,689 or **796,002** or 795,020)

_____ > 279.   (219 or 269 or **280**)

_____ < 1,000,200,000.

(**1,002,000,000** , 1,020,000,000 , 1,000,020,000)

_____ > 70,500.   (**75,000** or 70,050 or 70,005)

Choose from the brackets and complete:

_____ < 256,256 < _____

(**200,200** , 256,256 , **300,000**)

_____ > 500,000 > _____

(500,000 , **600,000** , **400,000**)

350,350 < _____ < 450,450

(**405,405** , 540,540 , 300,300)

4,000,600 > _____ > 4,000,258

(4,000,150 , **4,000,500** , 4,000,000)

3,000,754 < _____ < _____

(**3,000,554** , 4,000,754 , 5,000,754)

150,452 > _____ > _____

(**150,352** , **150,252** , 150,552)

Arrange the following numbers in an ascending order :

ⓐ 25,030,000 , 550,000 , 5,000 , 45,000.

The order : _____ , _____ , _____ , _____ .

ⓑ 360,548 , 205,687 , 545,352 , 154,200.

The order : _____ , _____ , _____ , _____ .

ⓒ 557,859 , 557,895 , 557,589 , 557,985.

The order : .... , ... , ... , ...

ⓓ 500,005 , 505,550 , 500,000 , 500,500.

The order : .... , ... , ... , ...

5 **Arrange the following numbers in a descending order:**

ⓐ 909,909 , 900,000 , 999,999 , 900,990.

The order : .... , ... , ... , ...

ⓑ 55,125 , 55,512 , 55,152 , 55,251.

The order : .... , ... , ... , ...

ⓒ 300,002,100 , 200,030,001 , 300,020,010 , 200,300,100.

The order : .... , ... , ... , ...

6 **Arrange the following numbers in an ascending order (Write the numbers using the Standard Form):**

The order	Number	Standard Form
ⓐ	Five hundred thirty million, four hundred fifty.	....
ⓑ	Five hundred three million, four hundred thousand, five.	....
ⓒ	Five hundred thirty million, four hundred five thousand.	....
ⓓ	Five million , thirty thousand, four hundred fifty.	....
ⓔ	Fifty million, thirty thousand, forty five.	....

Arrange the following numbers in a descending order (Write the numbers using the Standard Form):

The order	Number	Standard Form
a	Ninety-nine million, nine hundred ninety thousand, ninety.	
b	Nine billion, ninety.	
c	Nine hundred and ninety-nine million.	
d	Nine billion, ninety thousand.	
e	Nine hundred million, nine hundred thousand, nine hundred.	

Arrange the following numbers in an ascending order (Write the numbers using the Standard Form):

The order	Number	Standard Form
a	Five billion, three hundred thousand, ninety.	
b	(5 X 1,000,000,000) + (3 X 100,000) + (9 X 10).	
c	5,000,000,000 + 300,000 + 900.	
d	5,000,003,900.	
e	Five billions, three thousand, nine.	

9 Arrange the following numbers in a descending order (Write the numbers using the Standard Form):

The order	Number	Standard Form
ⓐ	1,000,000,000 + 500,000 + 3,000 + 200 + 5.	....
ⓑ	(1 X 1,000,000,000) + (3 X 10,000) + (2 X 100) + (5 X 10).	....
ⓒ	1 billion, 50 million, 325 thousand.	....
ⓓ	1,500,030,250.	....
ⓔ	1 billion, 32 million, 5 thousand.	....

10 Choose the correct answer:

ⓐ The value of the digit in the Hundred-thousands place .... the value of the digit in the Millions place.   (< or = or >)

ⓑ 50 Ten-millions .... 5 Billions.   (< or = or >)

ⓒ 450,000,450 .... Forty five million forty five.   (< or = or >)

ⓓ .... > 3 millions.   (3,000,000 or 2,999,999 or 10,000,000)

ⓔ 40 millions > .... > 30 millions.

(350,220,000 or 35,202,000 or 3,022,000)

ⓕ The **largest** 8-digit-number > ....

(99,999,999 or 100,000,000 or 10,000,000)

ⓖ The **smallest** 9-digit-number < ....

(One billion or 100 million or 999 thousand)

Worksheet

1 Choose the correct answer:

a) Two billion, three thousand, three: _____ **(in Standard Form)**

(2,000,003,003 **or** 2,000,303,000 **or** 2,003,003)

b) The digit 8 in the number 214,284,697 is in the _____ place.

(Tens **or** Ten-thousands **or** Ten-millions)

c) 200,450 > _____ .

(204,500 **or** 245,000 **or** 200,045)

d) The **smallest** 6-digit-number < _____ .

(99,999 **or** 1,000,000 **or** 99,000)

e) The **largest** even number consisting of 7 different digits is _____ .

(9,876,543 **or** 9,876,534 **or** 9,999,998)

2 Complete the following:

a) (9 X 100,000,000) + (2 X 100,000) + (6 X 1,000) + (8 X 1)

= _____ + _____ + _____ + _____ .

b) (_____ Thousands, _____ Tens) X 100 = 4,050 X 100

= _____ .

c) The place value of the digit "0" in the number 9,025,123

is _____ .

d) The value of the digit 5 in the Millions place = **1,000 times** the value

of the digit 5 in the _____ place.

e) (8 X 1,000,000) + (8 X 1,000) = **(in Word Form)**

_____

_____

3 **Complete using (< , = or >):**

a	The value of digit 8 in the Hundred-thousand place.		The value of the digit 8 in the Millions place.
b	(3 X 1,000,000,000) + (3 X 10)		3,000,003,000
c	The greatest 10-digit-number		10 Millions
d	600,000,000 + 60,000 + 600 + 6		600,060,606
e	Eight hundred eighty eight thousand.		Eight hundred eighty thousand, eight.

4 **Arrange the following numbers in an** ascending order**:**

10,025,000 , 10,002,005 , 10,200,050 , 10,020,500

The order : .... , ... , ... , ...

Exercises on Lessons 10&11

Predicting the Unpredictable & Rounding Rules
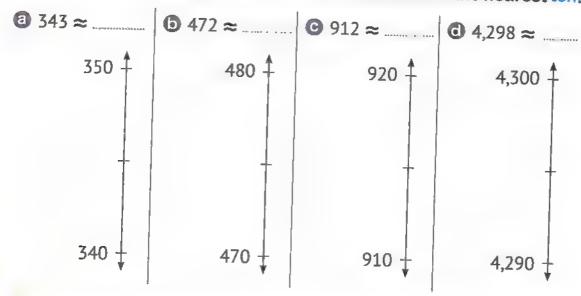

1 Complete the following table:

Number	Front-end Estimation
a) 400,235,950	
b) 7,453,002,650	
c) 25,000,205	
d) 8,999,899	
e) 459,560	
f) 4,950,009,555	
g) 412,325,696	

Write the following numbers in Standard Form and then estimate the number by the Front-end estimation:
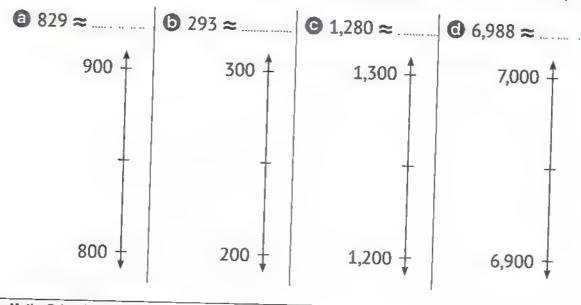

Numeral	Standard Form	Estimation
a) $(9 \times 1{,}000{,}000) + (6 \times 100) + (5 \times 10) + (4 \times 1)$		
b) $(8 \times 10{,}000{,}000) + (7 \times 100{,}000) + (3 \times 1{,}000) + (8 \times 1)$		
c) Eight hundred thirty million, sixty five thousand, four hundred.		
d) Nine billion, eighty million, fifty thousand, five hundred sixty three.		
e) $500{,}000{,}000 + 60{,}000{,}000 + 40{,}000 + 8.$		

f	80,000,000 + 6,000,000 + 20,000 + 8,000.		
g	452 million, 25 thousand, 315.		
h	Six billion, six hundred fifty million, nineteen thousand, four hundred.		

3 Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest ten:

a 343 ≈ ....   **b** 472 ≈ ....   **c** 912 ≈ ....   **d** 4,298 ≈ ....

350 ⊣   480 ⊣   920 ⊣   4,300 ⊣

340 ⊣   470 ⊣   910 ⊣   4,290 ⊣

4 Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest hundred:

a 829 ≈ ....   **b** 293 ≈ ....   **c** 1,280 ≈ ....   **d** 6,988 ≈ ....

900 ⊣   300 ⊣   1,300 ⊣   7,000 ⊣

800 ⊣   200 ⊣   1,200 ⊣   6,900 ⊣

Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest thousand:

5,425 ≈ _____   6,774 ≈ _____   18,524 ≈ _____   29,954 ≈ _____

```
      6,000 ┬              7,000 ┬              19,000 ┬              30,000 ┬
            │                    │                     │                     │
            │                    │                     │                     │
            ┼                    ┼                     ┼                     ┼
            │                    │                     │                     │
            │                    │                     │                     │
      5,000 ┼              6,000 ┼              18,000 ┼              29,000 ┼
```

Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest hundred-thousand:

178,652 ≈ _____   462,685 ≈ _____   972,821 ≈ _____

```
    200,000 ┬            500,000 ┬            1,000,000 ┬
            │                    │                      │
            │                    │                      │
            ┼                    ┼                      ┼
            │                    │                      │
            │                    │                      │
    100,000 ┼            400,000 ┼              900,000 ┼
```

7 Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest ten-million:

ⓐ 45,284,564 ≈ .... ⓑ 2,326,120 ≈ ....

8 Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest billion:

ⓐ 5,205,452,152 ≈ .... ⓑ 4,815,600,002 ≈ ....

Round the following numbers to the nearest 10:

ⓐ 54 ≈ _____ . ⓑ 76 ≈ _____ .

ⓒ 845 ≈ _____ . ⓓ 967 ≈ _____ .

ⓔ 7,552 ≈ _____ . ⓕ 2,595 ≈ _____ .

ⓖ 75,999 ≈ _____ . ⓗ 99,999 ≈ _____ .

Round the following numbers to the nearest 1,000:

ⓐ 7,869 ≈ _____ . ⓑ 6,289 ≈ _____ .

ⓒ 4,587 ≈ _____ . ⓓ 9,964 ≈ _____ .

ⓔ 29,456 ≈ _____ . ⓕ 99,598 ≈ _____ .

ⓖ 99,900 ≈ _____ . ⓗ 456,400 ≈ _____ .

Find the result of each of the following, using the Front-end Estimation Strategy and the Rounding Rule Strategy to the nearest 10 and determine which of them is closer to the actual answer:

Question	Actual Answer	Front-end Estimation Strategy	Rounding Rule Strategy
ⓐ 45 + 27	_____	_____ ( )	_____ ( )
ⓑ 22 + 47	_____	_____ ( )	_____ ( )
ⓒ 19 + 28	_____	_____ ( )	_____ ( )
ⓓ 156 + 142	_____	_____ ( )	_____ ( )
ⓔ 344 + 256	_____	_____ ( )	_____ ( )
ⓕ 123 + 357	_____	_____ ( )	_____ ( )

g 89 − 15		.... ( )	.... ( )
h 800 − 758		.... ( )	.... ( )
i 456 − 359		.... ( )	.... ( )
j 987 − 245		.... ( )	.... ( )

12 **Round the following numbers:**

a $4{,}545 \approx$ ....   *(To the nearest 1,000)*

b $258{,}654 \approx$ ....   *(To the nearest 100,000)*

c $299{,}99 \approx$ . ...   *(To the nearest 10)*

d $1{,}000{,}000 \approx$ ....   *(To the nearest 100,000)*

e $89{,}541 \approx$ ....   *(To the nearest 10,000)*

f $654 \approx 650$.   *(To the nearest ....)*

g $8{,}840 \approx 9{,}000$.   *(To the nearest ....)*

h $2{,}458{,}235 \approx 2{,}000{,}000$.   *(To the nearest ....)*

i $458{,}605 \approx 459{,}000$.   *(To the nearest ....)*

j $7{,}456{,}572 \approx 7{,}000{,}000$.   *(To the nearest ....)*

k $754 + 245 =$ .... $\approx$ ....   *(To the nearest 10)*

l $2{,}856 + 6{,}410 =$ .... $\approx$ ....   *(To the nearest 1,000)*

m $876 − 225 =$ .... $\approx$ ....   *(To the nearest 100)*

n $15{,}000 − 125 =$ .... $\approx$ ....   *(To the nearest 1,000)*

13 Choose the correct answer:

a) 980 ≈ ....

(To the nearest 100)

(900 or 990 or 1,000)

b) 906,456 ≈ ....

(To the nearest 100,000)

(1,000,000 or 910,000 or 900,000)

c) 99,768 ≈ ....

(To the nearest 1,000)

(100,000 or 90,000 or 99,000)

d) 6,450,450, ≈ ....

(To the nearest 1,000,000)

(5,000,000 or 6,000,000 or 7,000,000)

e) 258 ≈ 300.

(To the nearest ....)

(10 or 100 or 10,000)

f) 6,587 ≈ 6,600.

(To the nearest ....)

(10 or 100 or 1,000)

g) 295,120 ≈ 300,000.

(To the nearest ....)

(100 or 10,000 or 10,000,000)

h) The **largest** integer that can be rounded to the nearest **10** so that the result is 450 is ....

(458 or 454 or 450)

i) The **smallest** integer that can be rounded to the nearest **100** so that the result is 1,200 is ....

(1,159 or 1,299 or 1,150)

Worksheet D

1 **Choose the correct answer:**

ⓐ 7,542 ≈ .... *(To the nearest thousand)*

(7,000 or 8,000 or 75,000)

ⓑ The smallest 7-digit-number is ....

(9,999,999 or 1,000,000 or 1,023,456)

ⓒ 6,566 ≈ 6,600. *(To the nearest ....).* (10 or 1,000 or 10,000)

ⓓ The number of integers that can be rounded to the nearest **10**, so that

the result is 70 is .... (5 or 10 or 11)

ⓔ The number that comes right **after** the number 2,099,999

is .... (20,000,000 or 2,100,000 or 2,099,998)

2 **Complete the following:**

ⓐ Eight hundred ninety-six million, three thousand, fifteen **(in Expanded Form):**

= .... + ... + ... + ... + ... + ...

ⓑ The place value of the digit 5 in the number **5,069,420,000**

is ....

ⓒ 6,475 + 4,125 = ... ≈ .... *(To the nearest 1,000)*

ⓓ The digit 7 in the Billions place = ... times the digit 7 in the

Hundred-thousands place

ⓔ .... ≈ 500. *(To the nearest 100)*

"Complete by writing the greatest whole number possible"

3 **Arrange the following numbers in an** **ascending order:**

Three hundred thirty thousand , 30,000,030,000 , 30,030,000 , Thirty million

The order : .... , ... , ... , ...

4 Complete the following table:

Number	To the Nearest 10	To the Nearest 100	To the Nearest 1,000	To the Nearest 10,000
(a) 56,452				
(b) 805,605				
(c) 9,499				
(d) 9,809				
(e) 10,200				

Concept 2.1 Using Addition and Subtraction Strategies

Exercises on *Lesson* **1**

Properties of Addition and Subtraction

1 Complete the following (Write the addition property):

   ⓐ $7 + 6 = \underline{\hspace{1cm}} + 7.$ " $\underline{\hspace{3cm}}$ Property"

   ⓑ $(7 + \underline{\hspace{1cm}}) + 4 = 7 + (9 + 4).$ " $\underline{\hspace{3cm}}$ Property"

   ⓒ $8 + 0 = \underline{\hspace{1cm}}.$ " $\underline{\hspace{3cm}}$ Property"

   ⓓ $27 + 19 = 19 + \underline{\hspace{1cm}}.$ " $\underline{\hspace{3cm}}$ Property"

   ⓔ $0 + \underline{\hspace{1cm}} = 9.$ " $\underline{\hspace{3cm}}$ Property"

   ⓕ $(41 + 27) + 21 + 94 = \underline{\hspace{1cm}} + (27 + 21) + \underline{\hspace{1cm}}.$

                      " $\underline{\hspace{3cm}}$ Property"

   ⓖ $\underline{\hspace{1cm}} + 18 = 18 + 39.$ " $\underline{\hspace{3cm}}$ Property"

   ⓗ $28 + \underline{\hspace{1cm}} = 28.$ " $\underline{\hspace{3cm}}$ Property"

   ⓘ $(\underline{\hspace{1cm}} + 125) + 417 = 300 + (\underline{\hspace{1cm}} + 417).$ " $\underline{\hspace{3cm}}$ Property"

2 Complete the following problems using the properties of addition: (Write the property used):

   ⓐ $15 + 27 + 85$

            $= \underline{\hspace{1cm}} + 85 + 27$ " $\underline{\hspace{2cm}}$ Property"

            $= (\underline{\hspace{1cm}} + \underline{\hspace{1cm}}) + \underline{\hspace{1cm}}$ " $\underline{\hspace{2cm}}$ Property"

            $= \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

            $= \underline{\hspace{1cm}}.$

   ⓑ $755 + 615 + 245 = 755 + \underline{\hspace{1cm}} + 615$ " $\underline{\hspace{2cm}}$ Property"

            $= \underline{\hspace{1cm}} + (\underline{\hspace{1cm}} + \underline{\hspace{1cm}})$ " $\underline{\hspace{2cm}}$ Property"

            $= \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

            $= \underline{\hspace{1cm}}$

c) $42 + 908 + 92$ $= 42 + (\underline{\hspace{2cm}} + \underline{\hspace{2cm}})$ "$\underline{\hspace{3cm}}$ *Property*"

$= \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

d) $244 + 0 + 256$ $= 0 + \underline{\hspace{2cm}} + 256$ "$\underline{\hspace{3cm}}$ *Property*"

$= 0 + (\underline{\hspace{2cm}} + \underline{\hspace{2cm}})$ "$\underline{\hspace{3cm}}$ *Property*"

$= \underline{\hspace{2cm}} + \underline{\hspace{2cm}}$ "$\underline{\hspace{3cm}}$ *Property*"

$= \underline{\hspace{2cm}}$

e) $244 + 0$ $= 0 + \underline{\hspace{2cm}}$ "$\underline{\hspace{3cm}}$ *Property*"

$= \underline{\hspace{2cm}}$

3 **Choose the correct answer:**

a) $9 + 2 = 2 + 9$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

b) $(100 + 117) + 25 = 100 + (117 + 25)$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

c) $245 + 0 = 0\ 245$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

d) $8 + (5 + 12) = (8 + 5) + 12$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

e) $205 + 15 = 15 + 205$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

f) $0 + 215 = 215 + 0$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

g) $4 + 3 + (7 + 6) = 4 + (3 + 7) + 6$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

h) $45 + 0 = 45$. "$\underline{\hspace{3cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

$42 + 15 + 85 = 42 + (15 + 85) = 42 + 100 = 142$. "$\underline{\hspace{2cm}}$ *Property*"

(Neutral Element   Commutative   Associative)

$45 + 55 + 123 + 27 = (45 + 55) + (123 + 27) = 100 + 250 = 350$.

"$\underline{\hspace{2cm}}$ *Property*" (Neutral Element   Commutative   Associative)

Worksheet 1

1 **Complete the following:**

   ⓐ 45 + 65 = 65 + _____ .

                                                             " _____ Property"

   ⓑ (85 + 48) + 52 = _____ + (48 + 52).

                                                             " _____ Property"

   ⓒ The value of the digit 8 in the number 28,147,256 is _____ .

   ⓓ 25,458 ≈ _____ .   *(To the nearest 10,000)*

   ⓔ 732 + _____ = 732.   " _____ Property"

2 **Choose the correct answer:**

   ⓐ 421 + 45 = 45 + 421.   " _____ Property"

                                      (Neutral Element **or** Commutative **or** Associative)

   ⓑ The smallest 6-same-digit-number is _____ .

                                        (999,999 **or** 100,000 **or** 111,111)

   ⓒ 25,452 ≈ 30,000.   *(To the nearest _____)*

                                          (1,000 **or** 10,000 **or** 100,000)

   ⓓ 25 + (75 + 26) = (25 + 75) + 26.   " _____ Property"

                                        (Neutral Element **or** Commutative **or** Associative)

   ⓔ Five hundred fifty million, five: _____ .   **(in Standard Form)**

                               (550,005 **or** 550,005,000 **or** 550,000,005)

3 **Complete using (< , = or >):**

   ⓐ Three million, five hundred   3,000,050

   ⓑ 370,205   (3 X 100,000) + (7 X 1,000) + (2 X 100) + (5 x 1)

   ⓒ 909,990   990,090

   ⓓ 400,300,200   400 + 300 + 200
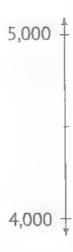

Arrange the following numbers in an **ascending** order:

3,584,852 , 3,458,582 , 3,854,852 , 3,548,258

The order: .... , ___ ___ , ___ , .

Write down the midpoint of the number line. Then locate each number on the number line and round each number to the nearest 1,000:
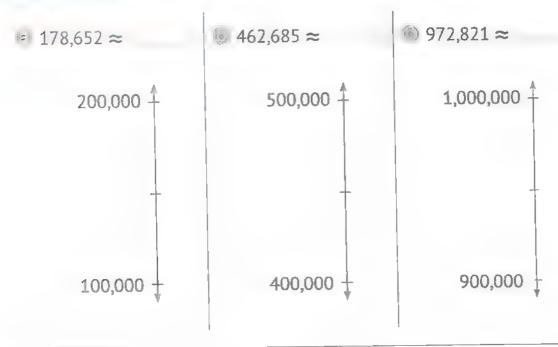

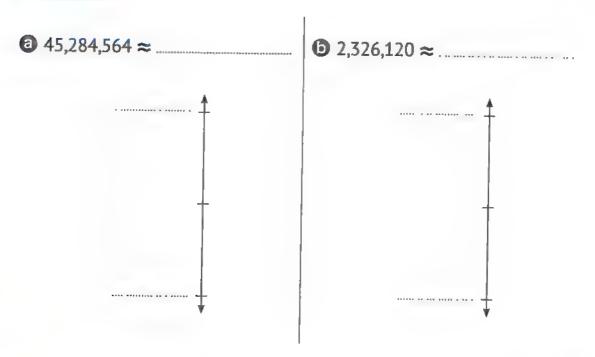

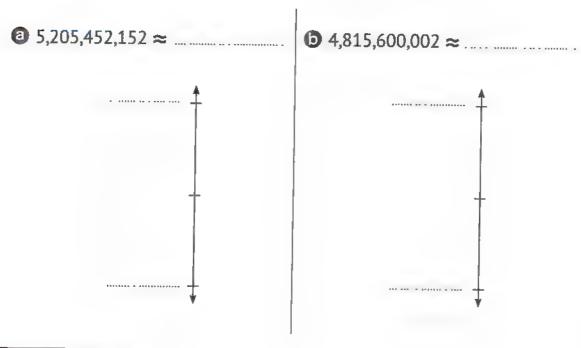

4,458 ≈ ....

8 **Answer the following:**

ⓐ Nada has 7,245 piasters, and Ahmed has 9,372 piasters.

What is the sum of what Nada and Ahmed have together?

Explain your steps and then check the reasonableness of your

answer.

Estimation (Use Rounding to the Nearest 100):

....

The actual answer:

....

ⓑ The number of girls in a school is 458 and the number of boys

is 367. What is the total number of students in the school?

Explain your steps and then check the reasonableness of your

answer.

Estimation (Use Rounding to the Nearest 10):

....

The actual answer:

....

The desert silver ant is the fastest ant on the planet. It can move about ⬚ mm per second. If this ant can maintain this speed for two seconds, how far will it go?

Explain your steps and then check the reasonableness of your answer.

Estimation (Use Rounding to the Nearest 100):

The actual answer:

The distance between Aswan and Assiut is ⬚⬚⬚ km, and the distance between Assiut and Alexandria is ⬚⬚⬚ km.

How far is the distance between Alexandria and Aswan?

Explain your steps and then check the reasonableness of your answer.

Estimation (Use Rounding to the Nearest 100):

The actual answer:

⬚⬚⬚ tourists visited the Egyptian Museum on Sunday, and ⬚⬚⬚ tourists visited it on Monday.

How many tourists visited the museum in the two days?

Explain your steps and then check the reasonableness of your answer.

Estimation (Use Rounding to the Nearest 100):

The actual answer:

Worksheet 2
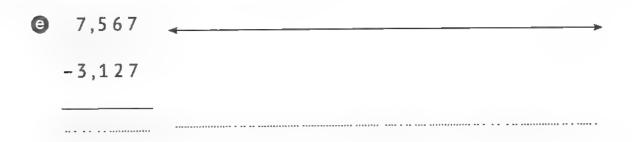

1 **Complete the following:**

ⓐ 25 + 99 = 24 + ... = ...

6 **Answer the following:**

a Some students wanted to plant 621 trees in their village. They planted 476 trees. How many trees are left?

b Sarah had 1,270 pounds, she bought a dress for 630 pounds. How many pounds are left with Sarah?

c A primary school with 1,028 students, 542 of whom are girls. How many boys are in this school?

Eman has 3,256 pounds, and Sameh has 2,804 pounds.

What is the difference between their money?

The height of a tree is 1,200 cm, and the length of its shadow is 235 cm.

How much taller is the tree than its shadow?

There are 4,015 books in the school library, 725 books were borrowed by the students.

How many books are left in the library?

A family saved 3,250 pounds to buy a TV.

If the price of the TV is 5,100 pounds, how many pounds does this family need to buy the TV?

Worksheet

1 **Complete the following:**

ⓐ Nine billion, five hundred thousand, four hundred: ....

(in Standard Form)

ⓑ The place value of the digit 6 in the number 56,124,248 is ....

ⓒ 245 + 243 = ... + 245.

ⓓ 27,957 ≈ 30,000. *(To the nearest ....)*

2 **Choose the correct answer:**

ⓐ The **smallest** 6-even-digit-number is ....

(100,003 **or** 100,000 **or** 102,254)

ⓑ 4,000,000 + 60,000 + 100 + 9 = ...

(64,000,109 **or** 40,060,109 **or** 4,060,109)

ⓒ 1,000,000 − 1 = ... (9,999,999 **or** 999,999 **or** 99,999)

ⓓ 50 Hundred-thousands = ... Thousands. (500 **or** 5,000 **or** 50,000)

ⓔ 45 + 0 = 45. (............................ *Property)*

(Neutral Element **or** Commutative **or** Associative)

3 **Find the result of each of the following:**

ⓐ	ⓑ	ⓒ	ⓓ
75,654	40,802	63,880	800,002
+ 15,257	+ 9,258	− 52,209	− 89,566

4 **Subtract using the number line:**

754 − 245 = ...

5 773 ships passed through the Suez Canal in January, and 375 ships passed in February. Find the difference between the number of ships that passed through it in the two months.

Concept 22 Solving Multistep Problems

on 6&7

Read the following questions. **Create a** Bar Model **and an** for each problem and then find the solution.

There are ____ ants in the colony. Some ants go out looking for food while ___ ants dispose of the garbage outside the colony. How many ants are searching for food?
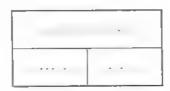

Bar Model:

Equation: _____

There are ____ ants in the colony. 11,000 ants of them are females and the rest are males. How many male ants are there in the colony?

Bar Model:

Equation: _____

c There are 12,000 species of ants. 2,500 of these species live in Africa and the rest live in other parts of the world.

How many species do not live in Africa?

Bar Model:

Equation: _____

Solution: _____

d Tariq practiced walking. On Monday, Tariq walked a number of steps, then took another 10,075 steps on Tuesday. Now, a total of 78,200 steps were taken by Tariq . How many steps did he take on Monday?

Bar Model:

Equation: _____

Solution: _____

e A worker ant travelled 3,500 meters on Monday and then 2,450 meters on Tuesday in search of food.

How far did the ant travel on Monday and Tuesday together?

Bar Model:

Equation: _____

Solution: _____

1 The number of books in the school library is 890, and the number of borrowed books is ___ . If students return all borrowed books, how many books will be in the library?

Bar Model:

Equation: _____ .

Solution: _____ .

2 Mahmoud saved _____ piasters and got 39 000 piasters from his father. What is the sum of Mahmoud's money?

Bar Model:

Equation: _____ .

Solution: _____ .

2 **Read the following questions.**
Then use the word problems solving steps.

The Suez Canal extends from Port Said to the city of Suez, and its length is _____ meters. If a boat travels 93,620 meters every day for two days, how many more meters will it have to travel to reach the end of the canal?

_____

_____

_____ .

ⓑ The population of Tanta is 404,901 people. The population of Benha is 167,029 people, and the population of Kafr Al-Dawwar is 67,370. What is the population of Banha and Kafr Al-Dawwar together? And what is the difference between their population and Tanta's population?

....

....

ⓒ Salma was counting the ants in the colony. She counted 1,525 ants on Monday, 19,750 ants on Tuesday, and 3,705 ants on Wednesday. If there are 30,520 ants in the colony, how many ants does she still need to count?

....

....

ⓓ A local bakery sold 1,232 doughnuts in one day. If they sold 876 doughnuts in the morning, how many doughnuts did they sell during the rest of the day?

....

....

2 **Solve the following equations:**

(Make a Bar Model and then find the solution) :

ⓐ $X + 125 = 207.$
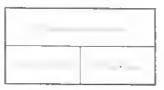

Bar Model:

Solution: ....

ⓑ X + 514 = 1,025.
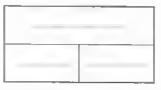

Bar Model:

Solution: _____

ⓒ 2,087 + Y = 7,248.
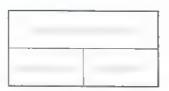

Bar Model:

Solution: _____

ⓓ 69 + Y = 1,200.

Bar Model:

Solution: _____

ⓔ M – 215 = 375.

Bar Model:

Solution: _____

ⓕ A – 258 = 915.

Bar Model:

Solution: _____

g $542 - B = 289.$
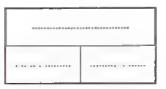

Bar Model:

Solution: _____

h $845 - N = 457.$

Bar Model:

Solution: _____
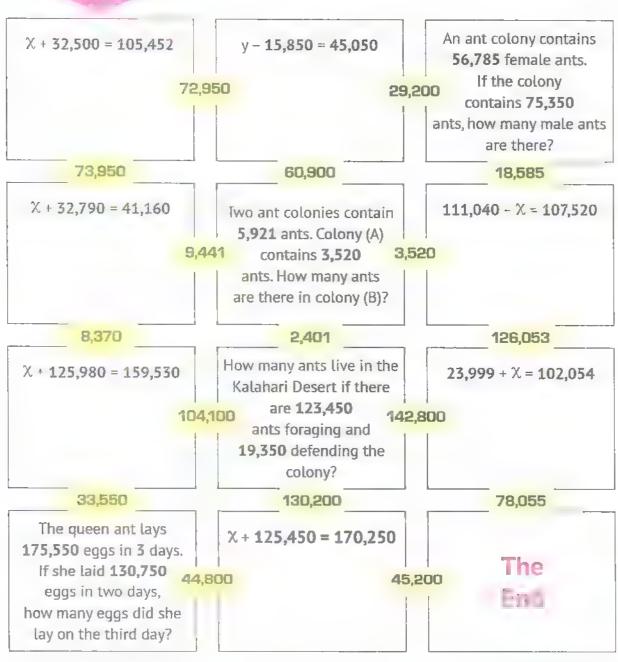

i $K + 200 + 50 = 455.$

Bar Model:

Solution: _____

j $75 + R + 125 = 620.$

Bar Model:

Solution: _____

The Maze

Your goal is to complete the game from the "Start" to the "End".
Start the game from the **"Start"** sign.
To move to the next space in the game, the number in the path must be a solution to the space you are in. Use the arrows to show the path you took. When you reach the end, you have completed the maze. **Good Luck!**

Start

$X + 32,500 = 105,452$	$y - 15,850 = 45,050$	An ant colony contains **56,785** female ants. If the colony contains **75,350** ants, how many male ants are there?
72,950	29,200	
73,950	60,900	18,585
$X + 32,790 = 41,160$	Two ant colonies contain **5,921** ants. Colony (A) contains **3,520** ants. How many ants are there in colony (B)?	$111,040 - X = 107,520$
9,441	3,520	
8,370	2,401	126,053
$X + 125,980 = 159,530$	How many ants live in the Kalahari Desert if there are **123,450** ants foraging and **19,350** defending the colony?	$23,999 + X = 102,054$
104,100	142,800	
33,550	130,200	78,055
The queen ant lays **175,550** eggs in 3 days. If she laid **130,750** eggs in two days, how many eggs did she lay on the third day?	$X + 125,450 = 170,250$	**The End**
44,800	45,200	

Concept 3.1 Metric Measurement

Exercises on Lesson 1

Ant Travel (Units of Length)

1 Choose the best unit for measuring each of the following:

a An insect length: ....

(Kilometers or Meters or Centimeters or Millimeters)

b Pencil length: ....

(Kilometers or Meters or Centimeters or Millimeters)

c Home height: ....

(Kilometers or Meters or Centimeters or Millimeters)

d The distance between Cairo and Tanta: ....

(Kilometers or Meters or Centimeters or Millimeters)

ⓡ **725 dm** = ... **m,** .... **dm.**

ⓢ **108 mm** = ... **cm,** .... **mm.**

ⓣ **155 cm** = ... **dm,** .... **cm.**

5 Choose the correct answer:

a The best unit for measuring the **length** of an eraser is _____ .

(millimeter **or** centimeter **or** meter)

b 70 m = _____ cm.

(7 **or** 700 **or** 7,000)

c 8,000 m = _____ km.

(8 **or** 80 **or** 800)

d 50 km + 20 m = _____ m.

(5,020 **or** 520,000 **or** 50,020)

e 50 m + 5 dm = _____ cm.

(505 **or** 5,050 **or** 550)

f 30,000 dm = _____ m.

(3,000 **or** 300 **or** 30)

g 6,000 cm _____ 600 m.

(< **or** = **or** >)

h 5,000 m _____ 50 km.

(< **or** = **or** >)

i 2 m + 25 cm _____ 22 dm + 5 cm.

(< **or** = **or** >)

When the scientists poured cement in the ant colony and dug inside it, they found that the colony was 8 m deep.
How many centimeters is the depth of the ant colony?

_____

Ants in a colony transported 40 tons of soil while building their house, and this was done in billions of trips. Each ant carried a portion of the soil to the surface. The weight of what an ant carried is 4 times its own weight.
This means that each ant carried what it was carrying up to a kilometer to the surface.
If each ant could move 10 loads of soil in a week, How much is this in kilometers, meters, and centimeters?

km = _____ m = _____ cm.

The height of a school building is 25 m. What is the height of the building in decimeters, centimeters and millimeters?

25 m = _____ Decimeter = _____ centimeter = _____ millimeter.

If one black ant can walk 250 meters in one hour.
How many hours will it take to walk 1 kilometer?

_____

Worksheet 1

1 **Choose the correct answer from the brackets:**

a The best unit for measuring the **length** of a school bus is ....

(meters **or** centimeters **or** kilometers)

b **Dekagram** is a measurement units of ....

(height **or** mass **or** capacity)

c 250 million, 50 thousand and 5 = ...   **(in Standard Form)**

(250,055,000 **or** 250,500,005 **or** 250,050,005)

d 200,000 cm = ...   (2 km **or** 20 m **or** 200 dm)

e 45 + 98 = ... + 100.   (47 **or** 50 **or** 43)

2 **Complete each of the following:**

a 40 km, 25 m = ... m + ... m = ... m.

b 9,570 cm = ... m + ... cm.

c A **liter** is a unit of measurement of ....

d The place value of the digit 8 in the number **8,417,216,234** is ....

e The number 54,625 ≈ ....   (To the nearest 100)

3 **Complete using (< , = or >):**

a 4,589,465   4,958,456   **b** 4,500 cm   450 m

c 50,025 m   5 km, 25 m   **d** 56 + 30   54 + 28

e (5 X 100,000,000) + (2 X 100) + (7 X 1)   500,000,000+ 200 + 7

4 **Arrange the following numbers in an** ascending **order:**

25 m   ,   1,500 cm   ,   2 km   ,   2,000 dm

The order: .... , ... , ... , ...

5 **The distance between Samah's house and her school is** 2 km.
What is the distance in meters, decimeters, **and** centimeters?

2 km = ... m = ... dm = ... cm.

Focus on Lesson 2

Choose the best unit for measuring the mass of each of the following (gram or kilogram):

ⓐ A book. (...)

ⓑ A pen. (...)

ⓒ A rabbit. (...)

ⓓ A car. (...)

ⓔ A ring. (...)

ⓕ A chair. (...)

Complete each of the following tables:

Kilogram	Gram
5	....
70	....
200	....
....	8,000
....	12,000
....	258,000

Gram	Kilogram
9,000	....
30,000	....
500,000	....
....	7
....	34
....	126

Complete the Bar Models to .... between mass units:

ⓐ
.... gram	
5 kg	200 gm

ⓑ
.... gram	
8 kg	7 gm

ⓒ
.... gram	
15 kg	15 gm

ⓓ
....	
20 kg	200 gm

e | 3,250 gram |
| .... kg | .... gm |

f | 60,024 gram |
| .... kg | .... gm |

g | 200,060 gram |
| .... kg | .... gm |

h | 10,006 gram |
| .... kg | .... gm |

4 **Complete each of the following:**

a 4 **kilograms** = ... grams.

b 20 **kilograms** = ... grams.

c 300 **kilograms** = ... grams.

d 680 **kilograms** = ... grams.

e 3,000 **grams** = ... kilograms.

f 90,000 **grams** = ... kilograms.

g 600,000 **grams** = ... kilograms.

h 905,000 **grams** = ... kilograms.

i 3,250 **gm** = ... kg, ... gm.

j 24,120 **gm** = ... kg, ... gm.

k 30,020 **gm** = ... kg, ... gm.

l 300,008 **gm** = ... kg, ... gm.

m 3 **kg**, 245 **gm** = ... gm.   **n** 15 **kg**, 20 **gm** = ... gm.

o 12 **kg**, 150 **gm** = ... gm.   **p** 20 **kg**, 100 **gm** = ... gm.

5 **Choose the correct answer:**

a .... is a unit of mass measurement.   (Gram **or** Meter **or** Liter)

b The **gram** is the best unit for measuring the mass of a ....

(ring **or** child **or** car)

c 40 **kilograms** = ... grams.   (400 **or** 4,000 **or** 40,000)

d 200 **kilograms** = ... grams.   (200,000 **or** 20,000 **or** 2,000)

ⓔ 60,000 grams = ... kg.   (6 or 60 or 600)

ⓕ 3,000 grams = ... kg. .   (3 or 30 or 300)

ⓖ 20 kg, 50 g = ... grams.   (250,000 or 2,050 or 20,050)

ⓗ 10 kg, 300 g = ... grams.   (10,300 or 1,300 or 103,000)

Hassan has a cow that weighs 125 kilograms and 350 grams.
Rewrite the weight in grams.

The total weight of all ants on Earth equals the total weight of
all humans. One ant colony weighs 3,493 grams.
Rewrite this number using kilograms and grams.

Ahmed bought 5 kilograms and 200 grams of oranges, and
Adam bought 5 kilograms of oranges.
Rewrite these weights in grams and then find the sum of the
weight of what Ahmed and Adam bought.

Worksheet 2

1 **Choose the correct answer:**

a .... is a unit of **mass** measurement.

(kiloliter **or** kilometer **or** kilogram)

b The **kilogram** is the best unit for measuring the mass of a ....

(balloon **or** pencil **or** desk)

c 50,000 grams = ... kg. (50 **or** 500 **or** 5,000)

d 30 kg + 125 g = ... gm. (3,125 **or** 31,250 **or** 30,125)

e The value of the digit 5 in the **Ten-thousands** place is ....

(500,000 **or** 50,000 **or** 5,000)

2 **Complete each of the following:**

a The **largest** 7-digit-number is ....

b 5,000 + 0 + 0 + 0 + 4 = ...

c 56,240 grams = ... kg, ... g.

d 310,205 **(in Expanded Notation)** = ...

....

e The number that comes right **after** 999,999 is ....

3 **Complete using (< , = or >):**

a 20 kg .... 2,000 g.

b The mass of a rabbit .... the mass of a car.

c 7,306,820 .... 7,368,200. **d** 2,500 dm .... 250 m.

e 3,000,050,003 .... 3 billion, 50 thousand, 3.

4 **Ahmed bought 4 kilograms and 300 grams of oranges, 3 kilograms of apples and 900 grams of strawberries. Rewrite these weights in grams and then find the sum of the weight of what Ahmed bought.**

....

Exercises on Lesson 3

Fill It Up (Volume/Capacity)

Choose the best unit for measuring the capacity of each of the following (liters or milliliters):

ⓐ A water cup. (_____)

ⓑ A swimming pool. (_____)

ⓒ A spoon filled with medicine. (_____)

ⓓ A car's fuel tank. (_____)

ⓔ A family juice box. (_____)

ⓕ A perfume bottle. (_____)

Complete each of the following tables:

ⓐ

Liter	Milliliter
5	....
70	....
800	....
_____	3,000
	35,000
_____	143,000

ⓑ

Milliliter	Liter
2,000	....
60,000	....
900,000	....
....	7
....	15
....	221

Complete the Bar Models to convert the following volume units:

3	450 ml

.... ml	
12	50 ml

20	8 ..

.... ml	
12 l	500 ml

e 8,056 ml

.... l | .... ml

f 31,500 ml

.... l | .... ml

g 40,003 ml

.... l | .... ml

h 6,070 ml

.... l | .... ml

4 **Complete each of the following:**

a 3 liters = ... milliliters.

b 50 liters = ... milliliters.

c 16 liters = ... milliliters.

d 20 liters = ... milliliters.

e 7,000 milliliters = ... liters.

f 80,000 milliliters = ... liters.

g 15,000 milliliters = ... liters.

h 200,000 milliliters = ... liters.

i 8,020 milliliters = ... liters, ... milliliters.

j 20,050 milliliters = ... liters, ... milliliters.

k 100,009 milliliters = ... liters, ... milliliters.

l 10,016 milliliters = ... liters, ... milliliters.

m 3 liters, 500 milliliters = ... milliliters.

n 20 liters, 40 milliliters = ... milliliters.

o 12 liters, 9 milliliters = ... milliliters.

5 **Choose the correct answer:**

a .... is the best unit for measuring the **capacity** of a **cup of tea.**

(Milliliter **or** Liter **or** Centimeter)

b The **kiloliter** is a unit of measurement of ....

(capacity **or** mass **or** length)

20 liters = _____ **milliliters.** (2,000 @ 20,000 @ 200,000)

100 liters = _____ **milliliters.** (1,000 @ 10,000 @ 100,000)

5,000 milliliters = _____ **liters.** (5 @ 50 @ 500)

300,000 milliliters = _____ **liters.** (3 @ 30 @ 300)

45 liters + 45 milliliters = _____ **milliliters.** (4,545 @ 45,450 @ 45,045)

60 liters + 6 milliliters = _____ **milliliters.** (606 @ 60,006 @ 60,060)

The fish tank can be filled with _____ liters of water. If the tank contains **35** liters and **130** milliliters.

– How much water do we need to fill the tank?

50 liters = ... milliliters.

35 liters, 130 milliliters = ... milliliters.

– Amount of water needed = ...

Essam has _____ liters and _____ milliliters of sunflower oil, and he also has _____ liter and _____ milliliters of corn oil.

– How much oil does Issam have?

4 liters, 250 milliliters = ... milliliters.

Liters, 50 milliliters = ... milliliters.

– Amount of oil = ...

A water tank contains _____ liters of water. A family used _____ liters and _____ milliliters on one day and used **250** liters and **300** milliliters the next day. How much water is left in the tank?

– Use the following **Bar Model** to solve:

500 liters = ... milliliters		
125 l , 500 ml = ... ml	250 l , 600 ml .. ml	. ml

– Amount of water left = ...

Worksheet

1 **Choose the correct answer:**

ⓐ A billion is the **smallest** number formed from .... digits.

(7 **or** 9 **or** 10)

ⓑ 50 liters = ... milliliters.   (5,000 **or** 50,000 **or** 500,000)

ⓒ 14 liters, 14 milliliters = ... milliliters.

(1,414 **or** 14,140 **or** 14,014)

ⓓ 50,000 milliliters .... 5 liters.   (< **or** = **or** >)

ⓔ The number 75,499 is rounded to the nearest **1,000** ≈ ....

(76,000 **or** 75,000 **or** 74,000)

2 **Complete each of the following:**

ⓐ 80,000,000 + 8,000,000 + 8,000 + 8 = ... **(in Standard Form)**

ⓑ 20,250 milliliters = ... liters, ... milliliters.

ⓒ 2,050 milliliters = ... centimeters, ... millimeters.

ⓓ If: $\chi - 45 = 15$, then χ = ...

ⓔ 50 kg, 20 grams = ... grams.

3 **Find the result:**

ⓐ 23,456 + 64,247 = ...   ⓑ 65,754 − 37,244 = ...

ⓒ 45,565 + 54,435 = ...   ⓓ 80,000 − 24,000 = ...

4 **Arrange the following numbers in a descending order:**

500,500 , 5,500,000 , 500,005 , 5,050,000

The order: .... , ... , ... , ...

5 A bottle contains two liters of juice. Adel drank
660 milliliters of it. How much juice is left in the bottle?

....

Exercises on Lesson 4

1 Complete the following table:

meter	meter	ameter	Meter	Decimeter	Centimeter	Millimeter
			5,000			
9						
						2,000,000,000

2 Complete the following table:

gram	gram	gram	Gram	gram	gram	gram
	10					
		800				
					1,000,000	

3 Complete the following table:

liter	liter	liter	Liter	liter	liter	liter
				600,000		
7						
		5,000				

4 Convert between units of measurement using multiplication or division:

a	8 meters	X	centimeters
b	2,000 centimeters	÷	meters
c	50 meters		centimeters
d	20 kilometers		hectometers
e	30 dekameters		hectometers
f	500 decimeters		Meters
g	5,000 millimeters		Centimeters
h	20,000 grams		Decigrams
i	500 grams		Dekagrams
j	500 centigrams		Milligrams
k	200 hectograms		Dekagrams
l	400 hectograms		Kilograms
m	9,000 grams		Kilograms
n	12 liters		milliliters
o	25 liters		Deciliters
p	400 liters		Dekaliters
q	5 kiloliters		Hectoliters
r	500 centiliters		Deciliters
s	200 milliliters		deciliters

5 Complete the following:

a 12 meters = ... decimeters = ... centimeters.

b 1,000 meters = ... dekameters = ... hectometers.

c 3 kilometers = ... hectometers = ... tetrameters.

6. 500 millimeters = _____ centimeters = _____ decimeters.

7. 35 grams = _____ decigrams = _____ centigrams.

8. 2,000 grams = ... dekagrams = _____ hectograms.

9. 7 kg = _____ hectograms = _____ dekagrams.

10. 600 milligrams = _____ centigrams = _____ decigrams.

11. 30 liters = _____ deciliters = _____ centiliters.

12. 9,000 liters = _____ dekaliters = _____ hectoliters.

13. 11 kiloliters = _____ hectoliters = _____ dekaliters.

14. 7,000 milliliters = _____ centiliters = _____ deciliters.

An ant walked ___ meters from its ant house to search for food.
What is the distance travelled in centimeters?

_____

A colony of army ants is known to consume 6 decigrams of food in one day.
How many _____ of food does the colony consume?

_____

_____ ants drink one liter of water.
How many _____ of water do ants drink?

_____

The height of a school building is __ meters.
What is the height of the school building in millimeters?

_____
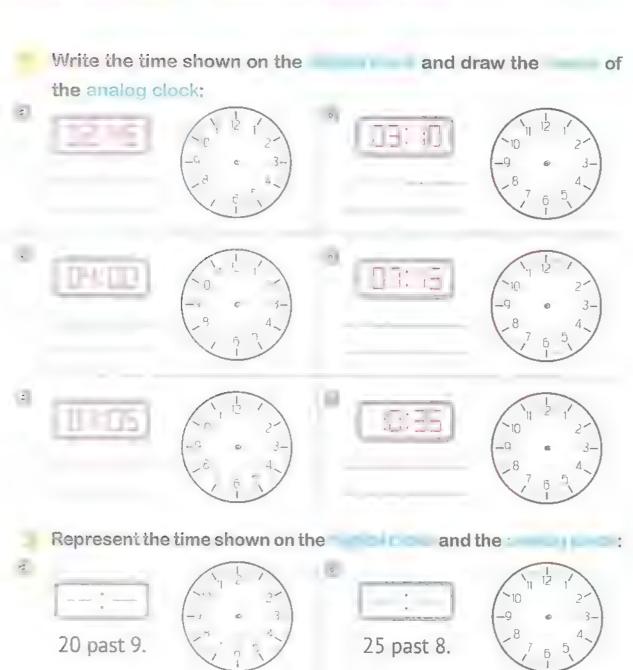

A person needs about 4 liters of water per day.
How many _____ of water a person needs per day?

_____
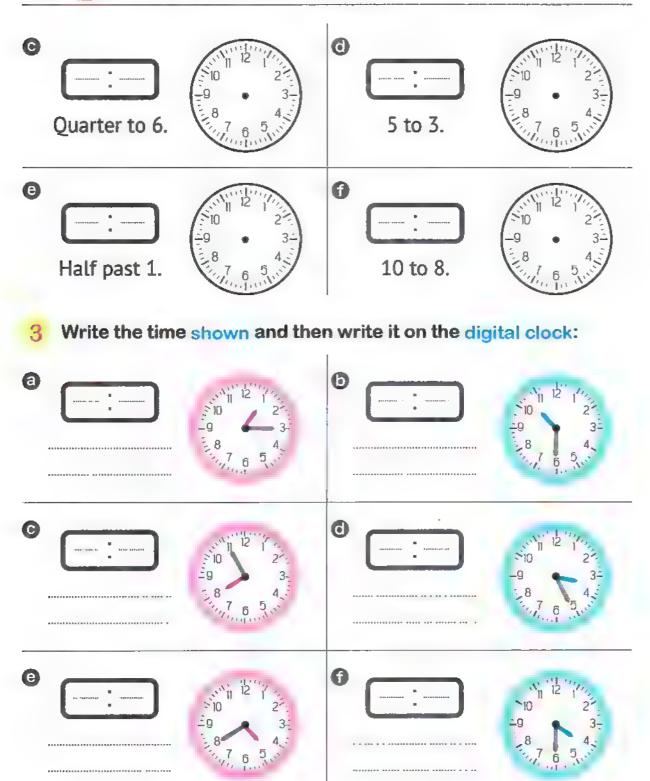

Worksheet

1 **Complete each of the following:**

ⓐ 15 dekaliters = _____ liters.

ⓑ 20,000,000+ 600,000 + 50,000+ 60 + 5   **(in Word Form)**

_____ .

ⓒ The digit in the **Hundred-millions** place in the number: 7,910,684,325 is _____ .

ⓓ 64,079 (rounded to the nearest _____) ≈ 64,000.

ⓔ The number that comes right **before** 9,000,000 is _____ .

2 **Choose the correct answer:**

ⓐ 200,000 meters = _____ hectometers.   (200 or 2,000 or 20,000)

ⓑ (5 X 100,000,000) + (5 X 1,000,000) + (5 X 1,000) + (5 X 1) **(in Standard Form)** = _____ .   (505,005,005 or 50,505,505 or 550,005,005)

ⓒ 4 kiloliters and 200 liters = _____ liters. (400,200 or 40,200 or 4,200)

ⓓ The **largest** number that can be formed from the digits: (5, 3, 4, 7, 0, 6) is _____ .   (764,503 or 305,467 or 765,430)

ⓔ 50 hectograms = _____ dekagrams.   (5 or 50 or 500)

3 **Complete using (< , = or >):**

ⓐ 2,000 centiliters.   20 dekaliters.

ⓑ 100,000 grams.   100 kilograms.

ⓒ 2,000,000 decimeters.   200 hectometers.

ⓓ 2 liters.   2,000 milliliters.

4 **Find the result:**

ⓐ 21,456 + 35,144 = _____ .   ⓑ 41,047 − 20,500 = _____ .

5 **If the weight of Hala is 65 kg and 250 grams.**
What is the weight of Hala in grams?

_____

Concept 3.7 Evaluate Time and Scaled Measurement

Evaluate on Lessons 5 & 6

Write the time shown on the ▬▬▬ and draw the ▬▬ of the **analog clock**:

Represent the time shown on the ▬▬▬ and the ▬▬▬:

20 past 9.

25 past 8.

c [_____:_____] Quarter to 6.

d [_____:_____] 5 to 3.

e [_____:_____] Half past 1.

f [_____:_____] 10 to 8.

3 Write the time shown and then write it on the digital clock:

a [_____:_____]

....

....

b [_____:_____]

....

....

c [_____:_____]

....

....

d [_____:_____]

....

....

e [_____:_____]

....

....

f [_____:_____]

....

....

Complete the following time ratio tables:

Use the life cycle of an ant to answer the following questions:

After a queen ant lays eggs, it can take 7 to 14 days for the eggs to hatch and turn into the larva stage. If it takes 10 days for the eggs of an ant to hatch, how many hours is this?

Adult ants feed larvae with liquids and solid food that helps them grow quickly. Most ants move to the next stage, the pupa (virgin), within to days. If the larval stage took 6 days and 13 hours, how many hours did it take?

The pupa (virgin) is white in color and resembles an adult ant with its legs and antennae folded and covered with a white or brown cocoon. It transforms into an adult ant within 9 to 30 days. If it takes 21 days for the pupa to become an adult, how many weeks will it take?

d Ant workers work on average about 19 hours a day.
How many hours do ants work for three days?

....

....

e Ant workers take 240 naps per day. Each nap lasts one minute.
How many hours do ants take for naps?

....

....

9 Amir's family used their computer for 3 hours on Saturday, 3 hours on Sunday and 5 hours on Monday.
How many minutes have they used the computer?

....

....

10 It takes Dahlia 2 hours and 15 minutes to drive to her grandmother's house. How many minutes does she take to drive?

....

....

11 Farah was training for the marathon. Her goal was to run for 1 hour and 30 minutes. If she starts running at 8:35 a.m, when will she finish running?

....

....

12 The worker ants went out to find food for the colony.
The workers left at 6:30 am and returned at 7:42 am.
How long did the worker ants take to search for food?

....

....

Worksheet

1 **Choose the correct answer:**

a (4 + 5) + 7 = 4 + (5 + 7)   (_____ Property)

(Associative ⊚ Neutral Element ⊚ Commutative)

b The number _____ comes right **before** 3,000,100.

(2,999,999 or 3,000,990 or 3,000,099)

c 2 days and 2 hours = _____ hours.   (26 or 122 or 50)

d The **smallest** odd number formed from 7 different digits is _____ .

(1,000,003 or 6,543,201 or 1,023,465)

e 20 dekameters = _____ meters.   (2 or 200 or 2,000)

2 **Complete the following:**

a 3 : 45 + 2 : 15 = _____ : _____ = _____ .

b 10 minutes and 10 seconds = _____ seconds.

c The value of the digit 5 in the **Ten-thousands** place = _____

times the digit 5 in the **Hundreds place**.

d 325,215 + 125,247 = _____ .

e 39 days = _____ weeks, _____ days.

3 Draw the hands of the analog clock to represent the time shown:

a 10 past 4   b 10 to 8   c Half past 2

4 Salma trains to swim for an hour and 15 minutes.

If she starts training at 6:35, when will Salma finish training?

_____

_____
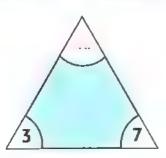

Concept 3.3 Measurement All Around

Exercises *on Lessons* 7, 8&9

Scaled Measurement & Measuring the World Around Me

1 **Complete the triangle of** Division and Multiplication Facts:

a

```
        ...
     3     7
```

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...

b

```
        32
     .....     8
```

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...

c

```
        42
     .....     7
```

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...

d

        .....
     2     8
```

.... × .... = ...

.... × .... = ...

.... ÷ .... = ...

.... ÷ .... = ...
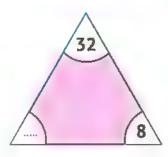

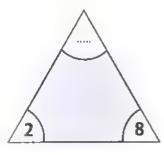

Look at the table that lists the size of a variety of ants around the world. Use it to answer the following questions:

Ant type	Size (mm)	Ant type	Size (mm)
Ghost Ants	1	Army Ants	3
Thief Ants	2	Black Garden Ants	4
Pharaonic Ants	2	Red Harvester Ants	6
Argentine Ants	3	Ant Warrior	7
Fire Ants	4	Wood Ants	9
Sugar Ants	5	The ant with the jaws of the trap	9
Crazy Ants	3	Panda Ants	8
African Ants	10	Dinosaur Ants	10
Sidewalk Ants	3	Leaf-cutter Ants	10

⚬ Draw a Line Plot to show the measurement data.

Remember to include a title and key:

<--->

| | = _____ .

🔟 .... ant is the **smallest** species in size.
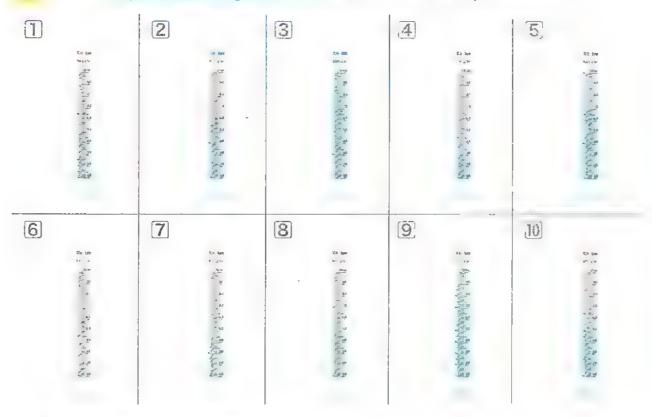

⚬ The **most common** size among ant species is _____ mm.

⚬ The **least common** size among ant species is _____ mm.

⚬ How many types of ants are 10 mm in size? _____ .

3 Look at graduated cylinders then answer the questions:

| ① | ② | ③ | ④ | ⑤ |

| ⑥ | ⑦ | ⑧ | ⑨ | ⑩ |

ⓐ Complete the following table:

Graduated cylinder	1	2	3	4	5	6	7	8	9	10
Volume of Liquid in Milliliters										

ⓑ Draw a Line Plot to show the measurement data.

Remember to include a title and key:
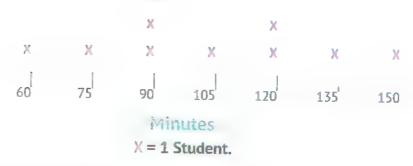

X = ...

ⓒ Answer the following:

1. .... milliliter is the **most frequent** volume.

2. .... milliliter is the **least frequent** volume.

3. The number of graduated cylinders in which the liquid volume is **less than 50 milliliters** is ....

4. The number of graduated cylinders in which the liquid volume is 50 **milliliters or more** is ....

Use the .... to answer the following questions:

Number of Study Minutes

```
                    X                   X
    X       X       X       X       X       X       X
    |       |       |       |       |       |       |
   60      75      90     105     120     135     150
```

Minutes

X = 1 Student.

What is being measured? ....

What is the scale of a number line? ....

What is the **least time** students spend in studying? .... .

What is the **maximum time** students spend in studying? .... .

What is the **most common** amount of time students spend studying?

....

In the colony, the ants collect .... grams of food. If the ants consumed ...... grams of food on Monday and ...... grams of food on Tuesday, how many grams of food are left?

....

Taher's height increased by ...... centimeters in ...... year. He is now 1 meter and 6 centimeters long.

How tall was Taher in .... one year ago?

....

7 An ant from a colony walked two kilometers in one day.

An ant from another colony walked 3,000 meters in one day.

Which of the two ants went the farthest? What is the difference in distance in kilometers?

....

....

8 Ali's cat weighs kg and his dog weighs 17 kg. When Ali took them to the vet, he learned that his cat had gained 450 grams and his dog had gained 20 grams.

What is the total weight of the two Pets now?

....

....

9 Professor Emad bought two-liter bottles of soda for a picnic for the fourth primary grade.

If at the end of the party there are 2 liters and 829 milliliters of soda left, how many milliliters of Soda did the students drink?

....

....

10 The worker ant takes short naps to replenish its energy up to minutes a day and the queen ant can sleep up to 9 hours a day.

Which ant sleeps the longest and what is the difference between them?

....

....

11 Rania measures the length of two rows of ants. The row of ants of the first colony is ____ centimeters long.
The length of the row of ants of the second colony is ____ mm.
How long are the two rows of ants together in centimeters?

12 Dahlia's dog weighs ____ kilograms. When she took him to the vet, she knew that he gained ____ grams.
How many grams does Dahlia's dog need to weigh ____ kilograms?

13 Ms. Basma bought two cartons of milk, each of which weighs two liters.
Her three children drank ____ milliliters on Monday and ____ milliliters on Tuesday. How many milliliters of milk are left?

14 Ziad played video games from ____ to ____, He is only allowed to play video games for ____ minutes. Did he break the rule? If the answer is no, why? If yes, how many extra minutes did he play?

15 Ahmed has a ____ meter long piece of wood. He wants to cut it into ____. How long should each piece be in ____ ?
What is the length of each piece in ____ ?

16 Amany swims. She spends half an hour every day swimming.
How many minutes does she spend swimming in 5 days?

17 Sarah walked 5,000 meters every day for 9 days.
What is the total kilometers she walked?

18 Mary was on a picnic with her family and she counted 10 ants
walking together. If each ant weighs 1 gram and carries a weight of
50 times its body weight. What is the total weight carried the ant?

19 Ants walk about 5,000 meters every day.
How many kilometers do ants walk in 6 days?

20 Samira is studying for the next Math test. If Samira studies for
30 minutes a day.
How many hours will she spend studying in 8 days?

21 In a colony of ant, ants eat approximately 2,000 grams of food
every day. If ants have 10 kg of food stored. How many days do
the ants need to consume this amount of food?

22 An ant can walk up to 5 km per day. If an ant keeps walking for
20 days.
What is the distance will it walk in meters?

Worksheet

Choose the correct answer:

- The number 5,010,000 comes right **after** ....

  (5,010,001   5,999,999   5,009,999)

- The digit in the **Millions** place in the number 201,600,000
  is ....   (6 or 1 or 2)

- 6 hours = ... minutes.   (360 or 144 or 42)

- .... are from the scales of gradation that we see in our daily
  lives.   (Telephone or Tv or Watches)

- Three million, thirty thousand, three hundred = ...

  (in Standard Form) (3,030,300   3,300,300   3,003,300)

- 8 + 12 = 12 + 8.   (................... *Property*)

  (Commutative   Associative   Neutral element)

2 Complete the following:

- 3 days and 3 hours = ... hours.

- 195 minutes = ... hours, ... minutes.

- (6 X 100,000,000) + (7 X 100,000) + (6 X 1,000) + (7 X 100) + (6 X 1)

  = ...   **(in Standard Form)**

- 5 : 12 − 3 : 50 = ... : ....

- The digit 3 in the **Ten-millions Place** = **100 times** the digit 3 in the
  .... place.

3 Match:

- ☐ 2 days , 12 hours.
- ☐ 8 weeks , 4 days.
- ☐ 1 minute.
- 4 1 hour.

- ⓐ 60 days.
- ⓑ 60 minutes.
- ⓒ 60 hours.
- ⓓ 60 seconds.

Arrange the following numbers in an .... order:

5,005,500 , 5,500,005 , 5,050,050 , 5,005,050

The order: .... , ... , ... , ...

Concept 4.1 Exploring Area and Perimeter

Exercises on *Lesson* **1**
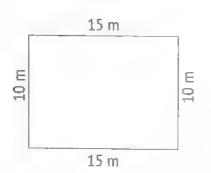

Marching Ants (The Perimeter)

1 Use two different formulas to solve each problem (Show your steps):

a First Formula = ...

....

Second Formula = ...

....

....

8 cm

3 cm   3 cm

8 cm

b First Formula = ...

....

....

Second Formula = ...

30 mm

30 mm

Solve the following perimeter problems: For each problem, draw a rectangle and write the length and width according to the problem:
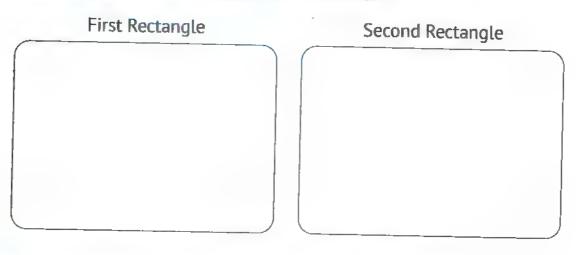

a A window is in the shape of a rectangle, with **60** cm length and **40** cm width. Find the perimeter of the window.

....

....

....

....

....

b A square table with a side length of **2 m**.

What is the perimeter of the table?

....

....

....

....

....

Kamal owns a rectangular farm. It is ⬚ meters long and ⬚ meters wide. What is the perimeter of this farm?

A square picture with a side length of ⬚ cm. What is the perimeter of the frame for this picture?

The football team wants to surround part of the field with ropes to play football. To have enough space, they need a space that is ⬚ meters long and ⬚ meters wide. What is the length of the rope they would need for this part of the field?
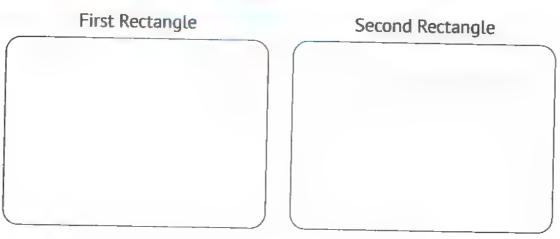

Ahmed practiced walking around a playground. He walked a distance of 120 m.

Draw two different rectangles that can represent his path: (Write the length and width on the drawing).

First Rectangle

Second Rectangle

Saleh owns a rectangular farm. The length of the fence surrounding the farm is 50 m.

Draw two different rectangles that can represent the shape of the farm: (Write the length and width on the drawing).

First Rectangle

Second Rectangle

A square has a side length of ▮▮ cm. Find its perimeter.
Then draw a ▮▮▮▮ with the same perimeter.

A square has a side length of ▮ cm. Find its perimeter.
Then draw a ▮▮▮ with the same perimeter.

Sarah is drawing a line around a square cake. One side of the cake is 30 centimeters long.
How long is the line drawn by Sarah?

8 Complete the following:

ⓐ Perimeter of the **rectangle**: P = ... + ... + ... + ...

ⓑ Perimeter of the **rectangle**: P = (............... + ...) X 2.

ⓒ Perimeter of the **rectangle**: P = (............ X 2) + (............ X 2).

ⓓ Perimeter of the **square**: P = ... X ....

ⓔ A rectangle has a length of 5 cm and a width of 3 cm, its perimeter

is ....

ⓕ A rectangle of 15 m length and 10 m width, its perimeter

is ....

ⓖ A square with side length 6 cm, its perimeter is ....

ⓗ A square with side length 20 mm, its perimeter is ....

9 Choose the correct answer:

ⓐ Perimeter of the rectangle: ....

(P = L + (W X 2) **or** P = (L + W) X (L + W) **or** P = (L + W) X 2)

ⓑ Perimeter of the rectangle: ....

(P = (L X 2) + (W X 2) **or** P = (L + 2) X (W + 2) **or** P = (L X W) X 2)

ⓒ Perimeter of the rectangle: ....

(P = L X W X L X W **or** P = L + W + L + W **or** P = L X W X 2)

ⓓ A rectangle has a length of 7 cm and a width of 5 cm. Its perimeter

is .... cm.   (13 **or** 35 **or** 24)

ⓔ A rectangle has a length of 6 cm and a width of 8 cm, so its perimeter

is .... cm.   (28 **or** 14 **or** 48)

ⓕ A square whose side length is 6 cm, its perimeter is .... cm.

(24 **or** 36 **or** 18)

ⓖ A square whose side length is 10 cm, its perimeter is ....

cm.   (40 or 100 or 20)

Worksheet 1

1 **Choose the correct answer:**

a 2,500 centimeters = _____ meters. (25 **or** 250 **or** 25,000)

b Million is the **smallest** number formed from _____ digits.

(6 **or** 7 **or** 10)

c A rectangle has a length of **8** cm and a width of **6** cm. Its perimeter is _____ . (48 **or** 14 **or** 28)

d Three hundred million and thirty thousand: **(in Standard Form)**:

_____ . (300,030,000 **or** 300,300,000 **or** 300,003,000)

e 198 + 214 = _____ + 212. (190 **or** 200 **or** 214)

2 **Complete the following:**

a A square whose sides are **20** mm, then its perimeter is:

P= _____ .

b (4 X 10,000,000) + (2 X 10,000) + (3 X 10) = _____ .

c The place value of the digit 6 in the number 245,602,714 is _____ .

d 45 + (55 + 19) = (_____ + 55) + _____ . (_____ Property)

e 4,500 deciliters = _____ liters.

Find the product of each of the following:

a 456,258 + 245,051 = _____ .

b 500,120 − 150,058 = _____ .

c 500,000,000 + 2,000,000 + 400 + 70 + 3 = _____ .

d 800,000,000 − 1 = _____ .

Arrange the following numbers in a descending order:

450,000 , 500,400 , 400,500 , 540,000 , 405,000

The order: _____ , _____ , _____ , _____ .

A painting is 6 meters in length and 2 meters in width. Find the perimeter of the necessary frame for this painting.

_____ .

Exercises on *Lesson* **2**

Fill the Space (The Area)

1 Calculate the area of the following rectangles (Show your steps):

ⓐ Area = ...

....

small ant farm in the form of a rectangle. Its dimensions are
centimeters and   centimeters. What is the area of this farm?

Area =

3 Jannat is designing a work of art and she needs two pieces of paper. Each piece must be 6 meters long and 2 meters wide. The two pieces of paper will be glued together at the two short edges. When she's finished with the artwork, she must decide whether to frame it or hang it up and cover it with glass. Jannat needs to know the measurements of the frame and glass to make her decision.

What is the frame size?

Do you have to calculate the area or the perimeter to find this measurement?

....

....

What is the glass size?

Do you have to calculate the area or the perimeter to find this measurement?

....

....

4 You have 36 squares of rugs to be arranged on the floor in a rectangular form. Draw two possible arrangements with measurements of length and width. What is the perimeter of each arrangement? What is the area?

....

....

Draw two rectangles, each with an area of ⬛ cm², then find the perimeter of each of them:

Perimeter = _____   Perimeter = . _____

In a science project, ⬛⬛ students are creating an ant farm enclosure, which is ⬛ meters long and ⬛⬛ meters high. Draw the enclosure with the dimensions. Then find the perimeter and area.

Perimeter = . _____

Area = _____

A rectangular bakery has an area of ⬛ square meters.
What is the perimeter of this bakery?
Draw your answer while writing the dimensions.

Perimeter = _____

8 Draw a square of an area of 25 cm². Then find its perimeter. (Write the dimensions on the drawing).

....

9 Complete the following:

ⓐ Area of the **rectangle**: A = ...

ⓑ Area of the **square**: A = ...

ⓒ A rectangle has a length of 9 cm and a width of 3 cm. Its perimeter is .... cm, and its area is .... cm².

ⓓ A rectangular piece of land with a length of 20 meters and a width of 10 meters, then its area is .... m².

ⓔ In the opposite figure, there are two conjoined rectangles. The sum of their areas:

....
....
....

3 cm   7 cm

3 cm

10 Choose the correct answer from the brackets:

ⓐ Area of the **rectangle**: ....

$(A = L + W$ or $A = L - W$ or $A = L \times W)$

ⓑ Area of the **square**: ....

$(A = L \times 2$ or $A = L - L$ or $A = L + L)$

ⓒ A square with sides of 7 mm, its surface area = ... mm².

(14 or 49 or 28)

ⓓ A rectangle has a length of 8 cm and a width of 4 cm. Its surface area is .... cm².

(32 or 12 or 24)

ⓔ The total area of the opposite figure is 40 cm². The area of rectangle (2) = ...

4 cm

4 cm

(1)   (2)

(24 or 16 or 40)

Worksheet

1 **Choose the correct answer:**

A square with side length ▮ cm, its area is _____ cm².

(32 or 64 or 16)

The value of the digit ▮ in the **Ten-thousands** place = _____ .

(70 or 7,000 or 70,000)

400 Millions + 40 Thousands + 4 = _____ .

(400,400,400 — 400,040,004 — 4,000,404)

A rectangle has a length of ▮ cm and a width of ▮ cm. Its perimeter is _____ .

(18 cm or 18 cm² or 9 cm²)

45 + 34 = _____ . (45 + 3 + 4 or 4 + 5 + 3 + 4 or 45 + 30 + 4)

2 **Complete the following:**

A rectangle is ▮ cm long and ▮ cm wide. A = _____ .

45,218 ≈ _____ . **(Rounded to the nearest ▮▮▮)**

The number 45,100,000 comes right **after** the number _____ .

A square has an area of ▮ cm², the length of its side is _____ .

100,000 meters = _____ kilometers.

3 **Complete using (<, = or >):**

a) 45,025,000 _____ 40,525,000.

b) 4 X 100,000,000 _____ 4 X 1,000,000,000.

c) 4,000 grams _____ 40,000 decigrams.

d) 200 millions _____ 2,000,000.

4 Calculate the perimeter and area of the corresponding figure:

a) Area = _____

b) Perimeter = _____

4 cm   8 cm

4 cm | (1) | (2)

5 In a glass company, a piece of glass is cut to cover the top of a dining table. The table measures ▮ meters by ▮ meters. What is the area of the piece of glass needed for this table?

_____

Exercises on Lesson 3

Something Is Missing!

1 Complete the following table:

	Length	Width	Perimeter	Area
a	8 cm	5 cm		
b		4 m	20 m	
c		7 m	26 m	
d	15 mm		50 mm	
e	20 mm		60 mm	
f		6 cm		42 cm².
g		7 cm		63 cm².
h	6 dm			24 dm².
i	8 dm			40 dm².

2 Complete the following table:

	Side Length	Perimeter	Area
a	4 cm		
b	7 cm		
c		32 m	
d		20 m	
e			36 mm²
			81 mm²

Some fire ants leave the hill to search for food. They went ____ meters east from the hill and then turned around and walked ____ meters north. A big tree got in their way, so they walked around it. When they passed the tree, they went west for another ____ meters and then south for ____ meters to return to the hill.
Look at their path in the diagram.
Determine the ____ measurements.
What is the total number of meters they walked?
What is the area of the shape?

4 Tahani wants to put a square frame around her father's picture.
The area of the picture that she wants to frame is 144 square
centimeters. What is the width and length of the frame?
Draw the frame and show your steps.

5 Soliman works on a farm. The fence around the goats fell off, so
his uncle asked him for more wires to build a new fence.
He told him that the fence is 25 meters wide and that he needed
to get 110 meters of wire to encircle the entire space.
What is the length of the unknown side? Draw the fence and
find the unknown length.

6 A rectangular mirror with an area of 900 square centimeters.
The mirror is 45 cm long. what's its width?

7 Sameh's book is 30 cm long. The cover of Sameh's book has
a perimeter of 100 cm. What is Sameh's book width?

Choose the correct answer from the brackets:

A rectangle has a perimeter of ▓ cm and a length of ▓ cm, then its
width is .... cm.   (3 ▪ 10 ▪ 40)

A rectangle has an area of ▓ cm² and a width of ▓ cm. Its length
is .... cm.   . (6 ▪ 9 ▪ 25)

A square has a perimeter of ▓ cm, the length of its side is . ... cm.

                                             (5 ▪ 4 ▪ 10)

A square has an area of ▓ cm², the length of its side is . ... cm.

                                             (9 ▪ 4 ▪ 6)

A square has a perimeter of ▓ cm, then its area is .... cm².

                                             (9 ▪ 36 ▪ 144)

A square has an area of 25 cm², its perimeter is .... cm.

                                             (5 ▪ 20 ▪ 100)

9   Complete the following:

A rectangle has a perimeter of ▓ cm and a length of ▓ cm, then its
width is .... cm.

A rectangle has an area of ▓ cm² and a width of ▓ cm, so its length is
        cm.

A rectangle has a perimeter of ▓ cm and a length of ▓ cm, then its
area is .... cm².

A rectangle has an area of ▓ cm² and a width of ▓ cm. Its perimeter is
        cm.

A square has a perimeter of ▓ cm, the length of its side is .... cm.

A square has an area of ▓ cm², the length of its side is .... cm.

A square has a perimeter of ▓ cm, then its area is ... . cm².

A square has an area of ▓ cm², its perimeter is . . . cm.

Worksheet

1 **Choose the correct answer:**

ⓐ A square has a perimeter of 12 cm, then its area is _____ cm².

(3 or 9 or 24)

ⓑ The **largest** 8-different-digit-number is _____ .

(10,000,000 or 99,999,999 or 98,765,432)

ⓒ 5 + 0 = 5

(_____ Property)

(Associative or Commutative or Additive Neutral Element)

ⓓ 25,452 ≈ 30,000.   *(Rounded to the nearest _____)*

(1,000 or 10,000 or 100,000)

ⓔ The best unit for measuring the **height** of a school is _____ .

(kilometers or meters or centimeters)

2 **Complete each of the following:**

ⓐ A rectangle has an area of 45 cm² and a width of 5 cm, then its perimeter is _____ .

ⓑ 5,065 cm = _____ m, _____ cm.

ⓒ 300,450 = (3 X _____) + (4 X _____) + (5 X _____).

ⓓ 245 + 218 = _____ + 245.

ⓔ If: χ + 245 = 786, then χ = _____ .

3 **Calculate the** perimeter **and** area **of each of the following shapes:**

ⓐ

20 mm

20 mm

ⓑ

8 cm

4 cm
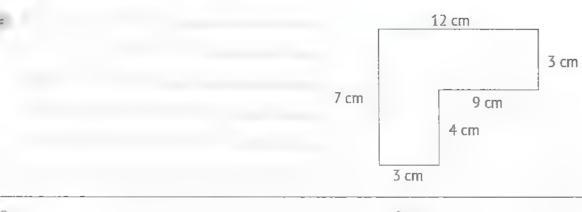

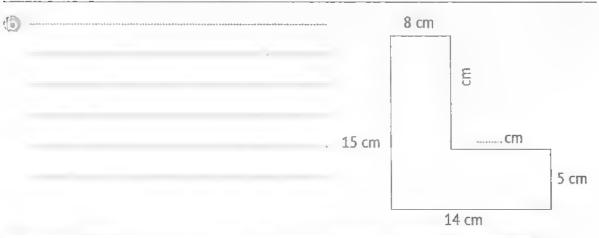

4 **A city in the shape of a rectangle. It is 4 kilometers wide and 8 kilometers long. What is the area of this city?**
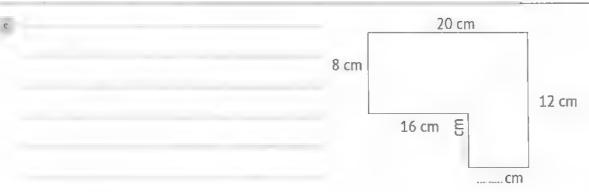

Exercises on Lesson 4
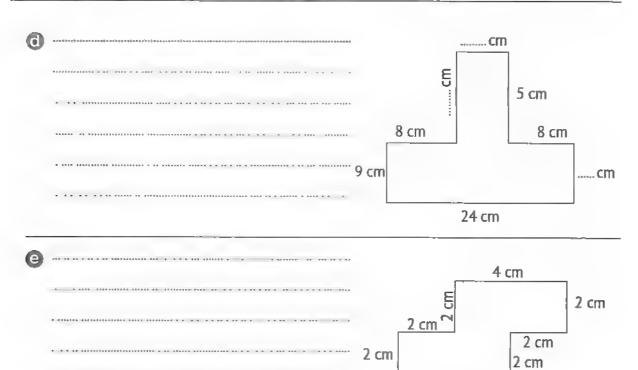

Odd Shapes

1. Divide each of the following shapes into _____ or _____ and then calculate the _____ and _____ of the corresponding figure:

a.

```
        12 cm

Exercises on Lesson **5**

Growing Dimensions
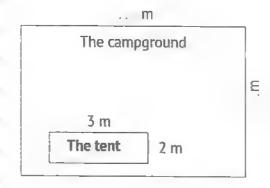

1 A rectangle is 5 centimeters wide. Its length is 4 times its width. Draw the rectangle, write the dimensions and find its area and perimeter.

Area = ...

....

Perimeter = ...

....

2 A rectangle is 12 centimeters long. Its width is one-third of its length. Draw the rectangle, write the dimensions and find its area and perimeter.

Area = ...

....

Perimeter = ...

....

3 Adam's rectangular garden has an area of 20 square meters. The longest side of the garden is 5 meters. Draw Adam's garden. The length and width of Dahlia's garden is three times the length and width of Adam's rectangular garden. What is the perimeter of Dahlia's garden?

....

....

....

....

The area of the sand playground next to Mohamed's house is ___ square meters. The longest side is ___ meters long. Draw this sand playground.

The length and width of the sand playground where Mohamed is playing in the garden is ___ the length and width of the playground next to the house. Find the ___ and ___ for each of the two sand fields.

Ramy and Salah went on a camping trip. The diagram shows their campground. If the length of the camp ground is ___ the length of the tent and the width of the campground is ___ times the width of the tent.

How much space will they leave to set up the rest of their camping gear?

___ m

The campground

3 m

The tent   2 m

___ m

The Maze

Your goal is to complete the game from the "Start" to the "End".

Start the game from the "Start" sign.

To move to the next space in the game, the number in the path must be a solution to the space you are in. Use the arrows to show the path you took. When you reach the end, you have completed the maze. Good Luck!

Start

What is the area of a rectangle? that is 3 units wide and its length is double its width?	A rectangular swimming pool, 3 meters wide. If its length is 3 times its width. What is the area of the swimming pool?	A rectangle is 3 units wide and 4 times as long? What is its length?

9   **12**

18   10   **27**   4   **7**

Ahmed painted a mural 6 meters long and 3 meters wide. His second mural will be of the same length and width as the first one, and 4 times the width of the first one. What is the perimeter of the second mural?	A painting is 6 centimeters wide and its length is 4 times its width. What is the perimeter of the painting?	A rectangular window, 300 cm wide and its length is twice its width. Calculate the length of the window.

60   **24**

36   20   **144**   30   **600**

Using the following diagram, calculate the area if you know that the length of the new rectangle will be the double. 5 4	A rectangular court with a width of 4 meters and a length equal to 3 times its width. What is the perimeter of the rectangle?	The area of a rectangle is 42 square centimeters and its length is 7 cm. A second rectangle has the same length as the first, but its width is 3 times the first rectangle. What is the area of the second rectangle?

40   **12**

28   20   **32**   80   **126**

Calculate the perimeter of a rectangle with a length of 10 cm and a width half its length.	**The End**	Calculate the perimeter of a rectangle with a width of 20 units and a length 4 times its width.

Worksheet

1 **Choose the correct answer:**

The ▨▨▨ 6-digit number that can be formed from the digits (9, 1, 7)
is _____ . (971,971 or 999,971 or 111,179)

75 - 49 = 74 - _____ . (50 or 48 or 98)

50 m + 5 dm = _____ cm. (505 or 5,050 or 550)

▨▨▨ is a unit of measuring _____ .(length – mass – capacity)

The digit _____ in the number 745,215,369 is in the
Hundred-thousands place. (3 or 2 or 7)

2 **Complete the following:**

A rectangle has an area of ▨ cm² and a length of ▨ cm. Then its
perimeter is _____ .

The number 36,000,250: **(in Word Form)**

_____ .

120 hours = _____ days.

The number 7,145 ≈ 7,100. *(Rounded to the nearest* _____ *)*

A square whose sides are **100** mm, its area is _____ cm².

Calculate the ▨▨▨ and ▨▨▨ of following shape:

The area of a rectangle is ▨ square centimeters and its side
length is ▨ centimeters. The second rectangle has the ▨▨
length as the first, but its width is ▨ times that of the first
rectangle. What is the ▨▨▨ of the ▨▨▨ rectangle?

Concept 5.1 Develop Multiplicative Comparisons

Exercises on Lesson 1

Understanding Multiplicative Comparison

1 Complete as in the example:

Ex. If 5 × 3 = 15, then 15 is triple 5.   **or**   15 is 5 times 3.

a If 7 × 6 = 42,

then 42 _____ 6.   **or**   42 _____ 7.

b If 3 × 8 = 24,

then 24 _____ 8.   **or**   24 _____ 3.

c If _____ × _____ = _____,

then 36 is 4 times 9.   **or**   36 _____ 4.

d If _____ × _____ = _____,

then 21 is triple 7.   **or**   21 _____ 3.

e If 2 × 8 = 16,

then _____ is double _____.   **or**   _____, is 8 times _____.

f If 7 × 8 = 56,

then _____ is 8 times _____.   **or**   _____, is 7 times _____.

2 Compare between the following numbers:

a 18 and 9 ⇨ 18 _____ 9.

b 25 and 5 ⇨ 25 _____ 5.

c 27 and 3 ⇨ _____ .

d 28 and 4 ⇨ _____ .

40 and 8: _____ .

63 and 9: _____ .

72 and 8: _____ .

3 Complete:

(a) 9 + 9 + 9 + 9 + 9 + 9 = _____ X _____ = _____ .

(b) 2 + 2 + 2 + 2 + 2 = _____ X _____ = _____ .

(c) 8 + 8 + 8 + 8 = _____ X _____ = _____ .

(d) 3 + 3 + 3 = _____ X _____ = _____ .

(e) 7 + 7 + 7 + 7 + 7 + 7 + 7 + 7 = _____ X _____ = _____ .

(f) 5 + 5 + 5 + 5 + 5 = _____ X _____ = _____ .

(g) 5 X 7 = _____ + _____ + _____ + _____ + _____ .

(h) 6 X 6 = _____ + _____ + _____ + _____ + _____ + _____ .

(i) 4 X 8 = _____ + _____ + _____ + _____ .

(j) 3 X 9 = _____ + _____ + _____ .

(k) 2 X 5 = _____ + _____ + _____ + _____ + _____ .

(l) 3 X 1 = _____ + _____ + _____ .

Complete each of the following using the _____:

(a) _____ is _____ times _____ .

9	9	9	9	9

(b) _____ is _____ times _____ .

4	4

(c) _____ is _____ times _____ .

6	6	6	6	6	6

(d) _____ is _____ times _____ .

8	8	8

(e) _____ is _____ times _____ .

3	3	3	3	3	3	3

(f) _____ is _____ times _____ .

5	5	5	5

(g) _____ is _____ times _____ .

7	7	7	7	7	7	7	7

(h) _____ is _____ times _____ .

2	2	2	2	2	2	2	2	2

5 **Divide the** Strip Diagrams **according to the** numerical sentence:

(a) 28 is **seven** times 4.

(b) 15 is **triple** 5.

(c) 18 is **six** times 3.

(d) 36 is **four** times 9.

(e) 48 is **eight** times 6.

(f) 56 is **eight** times 7.

(g) 20 is **four** times 5.

(h) 12 is **six** times 2.

6 **Choose the correct answer:**

(a) To compare between **12** and **3**: _____ .

(12 is three times 4 or 12 is four times 3 or 12 is three times 3)

(b) If 5 X 6 = 30, then _____ .

(30 is six times 5 or 30 is five times 5 or 30 is six times 6)

(c) "**24 is triple 8**" is a numerical sentence to compare between:

_____ and _____ . (3 and 8 or 24 and 3 or 24 and 8)

(d) 4 + 4 + 4 + 4 + 4 = _____ . (4 X 4 or 4 + 5 or 4 X 5)

(e) 6 + 6 + 6 + 6 = _____ . (3 X 8 or 6 + 4 or 6 X 6)

(f) 5 X 6 = _____ . (6 + 6 + 6 +6 or 10 +10 +10 or 5 + 6)

(g) 3 X 9 = _____ . (9 + 9 + 9 or 20 X 7 or 3 + 9)

(h) The following **Strip Diagram** represents _____ .

8	8	8	8

(32 is four times 8 or 32 is eight times 4 or 32 is eight times 8)

The following **Strip Diagram** represents _____ .

		5	5		

(30 is six times 5 · 30 is five times 6 · 32 is five times 5)

Which of the following **Strip Diagrams** represents "**12 is four times 3**".

	3	3	3

	3	3

	4	4

7 **Complete the following:**

To compare between **6** and **2**: (6 _____ 2).

To compare between **8** and **4**: (8 _____ 4).

"**30 is triple 10**" is a sentence to compare between: _____ and

_____ .

"**36 is four times 9**" is a sentence to compare between: _____ and

_____ .

If 8 X 6 = 48, then " _____ is **six times** _____ ".

If 7 X 3 = 21, then "21 _____ 7".

9 + 9 + 9 + 9 + 9 + 9 = _____ X _____ .

6 + 6 + 6 + 6 + 6 + 6 = 4 X _____ .

5 X 8 = _____ + _____ + _____ + _____ + _____ .

4 X 3 = _____ + _____ + _____ .

The following **Strip Diagram** represents:" _____ is **six times** _____ ".

	4	4	4	4

The following **Strip Diagram** represents:" _____ is **triple** _____ ".

Worksheet 8

1 **Choose the correct answer:**

ⓐ The **greatest** 8-different-digit-number is ....

(99,999,999 **or** 98,765,432 **or** 10,000,000)

ⓑ If 6 x 3 = 18, then 18 is .... 6.   (triple **or** six times **or** double)

ⓒ 85 + 99 = 84 + ...   (98 **or** 100 **or** 85)

ⓓ The length of a rectangle is **double** its width. If the length is **4** cm, then
the area of the rectangle = ... cm². (32 **or** 8 **or** 12)

ⓔ 6 X 3 = ...   (9 + 9 **or** 6 + 3 **or** 6 + 6)

2 **Complete the following:**

ⓐ The value of the digit 7 in the number 45,**7**89,024 is ....

ⓑ If 28 is **seven times** 4, then: .... X .... = 28.

ⓒ 14 + (16 + 35) = (........................ + 16) + ... (........................ *Property*)

ⓓ 7 + 7 + 7 + 7 + 7 +7 = ... X ....

ⓔ 8 X 30 = ... X 10.

3 **Complete using (< , = or >):**

ⓐ 78, 064,002   78,604,002.

ⓑ (7 X 10,000,000) + (6 X 10,000) + (5 X 100)   70,060,500.

ⓒ 9 + 9 + 9 + 9   6 + 6 + 6 + 6 + 6 + 6.

ⓓ 8 X 7   9 X 6.   ⓔ 175 – 99   174 – 100.

4 **Complete each of the following using the Strip Diagrams:**

ⓐ .... is .... **times** ....

2	2	2	2	2

ⓑ .... is .... **times** ....

8	8

ⓒ .... is .... **times** ....

3	3	3	3	3	3	3	3

on 2&3

&

Write _____ for the following comparisons.
(Use a _____ to represent the unknown number):

A number is 5 times 3:   (..)

A number is 7 times 6:   (..)

A number is 3 times 8:   (..)

A number is 4 times 9:   (..)

A number is double 6:   (..)

36 equals 5 times a number: (..)

28 equals 7 times a number: (..)

35 equals 5 times a number: (..)

48 equals 6 times a number: (..)

49 equals .... times 7:   (..)

64 equals .... times 8:   (..)

42 equals .... times 6:   (..)

36 equals .... times 4:   (..)

Write the _____ that represents each of the following
sentences. (Use a _____ to represent the unknown number):

Ahmed's age is _____ Maha's age. If Maha is   years old, what is
Ahmed's age?

ⓑ A square with sides of **3** cm.

Write an equation showing the **perimeter** of the square (P).

_____

_____

ⓒ A rectangle is of **6** cm length and **4** cm width.

Write an equation that shows the **area** of the rectangle (A).

_____

_____

ⓓ Hazem has **five times** the money that Karim has.

If Hazem has **45** pounds, what is the amount of money with Karim?

_____

_____

ⓔ If the price of one pen is **3** pounds, what is the price of **7** pens?

_____

_____

3 Find the value of the **unknown** in each of the following equations (Solve the equations):

ⓐ $x \times 5 = 35$, $x =$ _____

ⓑ $y \times 8 = 48$, $y =$ _____

ⓒ $m \times 9 = 45$, $m =$ _____

ⓓ $6d = 30$, $d =$ _____

ⓔ $7n = 14$, $n =$ _____

ⓕ $9a = 54$, $a =$ _____

ⓖ $e = 8 \times 6$, $e =$ _____

ⓗ $k = 3 \times 6$, $k =$ _____

ⓘ $q = 6 \times 4$, $q =$ _____

ⓙ $s = 5 \times 2$, $s =$ _____

Write _____ for the following comparisons:
(Use _____ to represent the unknown, then find the value of it):

- A number is equal to 6 times 3. **Equation** : _____

  Solution _____

- A number is equal to 7 times 4. **Equation** : _____

  _____

- A number is equal to 3 times 8. **Equation** : _____

  _____ : _____

- A number is equal to 5 times 9. **Equation** : _____

  Solution : _____

- 45 equals 9 times a number. **Equation** _____

  Solution _____

- 40 equals 5 times a number. **Equation** : _____

  Solution : _____

- 12 equals 3 times a number. **Equation** _____

  Solution : _____

- 21 equals 7 times a number. **Equation** _____

  Solution _____

5 **Complete the following:**

The equation that represents "___ equals _____ a number".

is _____

The equation that represents "___ equals ___ times a number".

is _____

The equation that represents "a number equals _____".

is _____

ⓓ The equation that represents "a number equals **seven times 3**".

is ....

ⓔ If 3x = 18 , then x = ...

ⓕ If 6y = 42 , then y = ...

ⓖ If 28 = 4 X m , then m = ...

ⓗ If a = 6 X 9 , then a = ...

6 **Read the word problems and think about the comparisons, then write the multiplication equation that represents each problem:**

(Use a **symbol** to represent the unknown number. Then solve the equations):

ⓐ Rashad's team scored **9** goals in football. This is **3 times** the number of goals scored by Yassin's team.

How many goals did Yassin's team score?

Equation : ....

Solution : ....

ⓑ Wafaa has **18 pounds**. This is equal to **3 times** what Hana has.

How much does Hana have?

Equation : ....

Solution : ....

ⓒ Saleh has **15 apples** and his sister Hala has **5 apples**.

How many times does Saleh have the same number of apples as Hala?

Equation : ....

Solution : ....

The height of one of a residential tower is ⬛ meters and the height of a tree is ⬛ meters. How many times is the height of the residential tower as the height of the tree?

Equation : _____

Solution : _____

Hani is twice as old as his brother.

His brother is 8 years old. How old is Hani?

Equation : _____

Solution : _____

The distance from Samir's house to the bank is ⬛ the distance from his house to the museum. If his house is ⬛ kilometers from the museum, how many kilometers is his house from the bank?

Equation : _____

Solution : _____

Choose the correct answer from the brackets:

Sameh is ⬛ the age of his brother. His brother is ⬛ years old. Which of the following equations is used to know the age of Sameh?

_____ . $(a = 3 + 4$ or $a = 4 - 3$ or $a = 3 \times 4)$

Sarah and her sister peeled some oranges. Sarah peeled ⬛ oranges. Sarah's sister peeled ⬛ as many oranges as Sarah. Which of the following equations can be solved to find the number of oranges that Sarah's sister peeled? _____ . $(n \times 3 = 6$ or $n = 3 \times 6$ or $n = 6 \div 3)$

An aquarium contains ⬛ red fish and ⬛ as many blue fish. How many blue fish are in the tank? _____ . $(15$ or 8 or $2)$

If: $3x = 9$, then $x = $ _____ . $(3$ or 27 or $12)$

If: $6 \times y = 24$, then $y = $ _____ . $(18$ or 30 or $4)$

The equation "$m = 4 \times 2$" represents a number equal to _____ .

(four times 2 or four times 4 or double 2)

Worksheet 2

Choose the correct answer:

(a) Three billion, twenty-five thousand, two hundred: ....

(in Standard Form) (3,025,200 **or** 3,000,025,200 **or** 3,000,000,225)

(b) If 6 x m = 18, then 18 is .... m.

(three times **or** six times **or** two times)

(c) A square with side length L and perimeter P, the equation that represents

the perimeter is: .... (P = L X L **or** P = L + 4 **or** P = 4L)

(d) A square has an area of 36 cm², then its perimeter = ...

(24 **or** 12 **or** 81)

(e) 8 + 8 + 8 + 8 = ... (8 X 8 **or** 8 X 4 **or** 8 + 4)

Complete the following:

(a) The value of the digit 5 in the **Hundred-millions** place is ....

(b) If 24 is **six times** a , then 24 = ...

(c) 16 + 35 = ... + 16. (............... *Property*)

(d) If 45 = 9 X u , then 45 is .... times u.

(e) (7 X 100,000,000) + (2 X 1,000,000) + (8 X 10,000) + (3 X 100)

= .... **(in Standard Form)**

Arrange the following numbers in an ascending order:

450,005 , 850,600 , 200,755 , 360,450

The order: ...., ..., ..., ...

Write an equation to compare each of the following:

(a) 12 and 4: **Equation:** ....

(b) 20 and 5: **Equation:** ....

(c) 8 and 16: **Equation:** ....

(d) 54 and 9: **Equation:** ....

Concept **5.2** Properties and Patterns of Multiplication

on Lessons 4,5&6

Find the result of each of the following:

(a) 5 X 1 = ...

(b) 1 X 6 = ...

(c) 9 X 0 = ...

(d) 0 X 9 = ...

(e) 4 X 10 = ...

(f) 6 X 100 = ...

(g) 7 X 1,000 = ...

(h) 30 X 10 = ...

(i) 12 X 20 = ...

(j) 40 X 100 = ...

(k) 15 X 100 = ...

(l) 60 X 400 = ...

(m) 50 X 600 = ...

(n) 30 X 50 = ...

(o) 300 X 700 = ...

(p) 500 X 2,000 = ...

(q) 500 X 80 = ...

(r) 12 X 10,000 = ...

(s) 150 X 100 = ...

(t) 564 X 1,000 = ...

Complete the following:

(a) 8 X .... = 3 X 8.

(b) 9 X 7 = ... X 9.

(c) .... X 2 = 2 X 6.

(d) 12 X 6 = 6 X ....

(e) .... X 1 = 9.

(f) 1 X .... = 4.

(g) 7 X .... = 0.

(h) .... X 5 = 0.

(i) .... X 10 = 80.

(j) 5 X .... = 500.

(k) .... X 1,000 = 9,000.

(l) .... X 10 = 400.

(m) .... X 30 = 1,200.

(n) 60 X .... = 60,000.

o .... X 100 = 1,700. **p** 40 X .... = 1,200.

q .... X 800 = 40,000. **r** 60 X .... = 24,000.

s 200 X .... = 180,000. **t** 800 X .... = 400,000.

u .... X 50 = 30,000. **v** 48 X .... = 48,000.

w 120 X .... =120,000. **x** .... X 10,000 = 1,450,000.

3 **Complete using (<, = or >):**

a 6 X 1   5 X 1   **b** 9 X 0   8 X 0

c 3 X 1   0 X 7   **d** 40 X 2   4 X 20

e 20 X 40   80 X 10   **f** 300 X 100   30 X 100

g 30 X 100   50 X 60   **h** 400 X 200   800 X 10

i 20 X 900   60 X 30   **j** 10 X 10   50 X 20

k 8,000 X 10   400 X 200   **l** 30 X 10   60 X 50

m 400 X 400   80 X 200   **n** 3 X 600   90 X 20

o 40 X 600   800 X 300   **p** 20 X 500   200 X 50

4 **Match:**

☐1 80 X 50.   **a** 200 X 1,000.

☐2 60 X 300.   **b** 4 X 100.

☐3 400 X 500.   **c** 600 X 400.

☐4 200 X 50.   **d** 180 X 100.

☐5 300 X 800.   **e** 10 X 1,000.

5 **Find the value of the unknown (x) in each of the following:**

a If $x \times 10 = 200$,   then x = ...

b If $30 \times x = 6,000$,   then x = ...

c If $x \times 500 = 20,000$,   then x = ...

d If $x \times 7 = 7 \times 9$,   then x = ...

e If $60 \times 30 = 30 \times x$,   then x = ...

f If $200 \times x = 100,000$,   then x = ...

The length of an ant is about 2 mm. If the length of the turtle is ___ the length of the ant. Find the length of the turtle.

Ahmed saves ___ pounds every month. How much will he save after six months?

The price of one pen is 90 piasters. How much is 20 pens?

The bookcase in a library contains 5 shelves, each shelf has 30 books. How many books are there in the bookcase?

10 Alia has ___ marbles. Write an equation using the Commutative ___ Multiplication to describe two ways in which the marbles can be arranged.

Saleem has ___ erasers. Write an equation using the Commutative ___ Multiplication to describe two ways in which he can arrange the erasers.

Worksheet 9

1 **Choose the correct answer:**

ⓐ 50 X _____ = 2,000. (4 or 40 or 400)

ⓑ If a X 6 = 24, then a = _____ . (4 or 6 or 24)

ⓒ The value of the digit 6 in the **Millions** place = _____ times the value of the digit 6 in the **Thousands** place. (100 or 1,000 or 10,000)

ⓓ The equation that shows "48 is **six times** m" is _____ .

(8 + m = 48 or 8m = 48 or 48m = 6)

ⓔ 80 + 0 + 0 + 0 + 5 = _____ . (800,005 or 805 or 85)

2 **Complete the following:**

ⓐ The **largest** 7-different-digit-number is _____ .

ⓑ 60 X 5,000 = _____ .

ⓒ The number that comes right **after** the number _____ is 450,000,000.

ⓓ _____ X 20 = 10,000. ⓔ 8 X _____ = 8.

3 **Find the result of each of the following:**

ⓐ 45,652 + 44,349 = _____ .

ⓑ 70,208 − 35,026 = _____ .

ⓒ 80 X 50 = _____ .

ⓓ 30 X 1,000 = _____ .

4 **The height of a tree is 2 meters, and the height of one of the residential buildings is 10 times the height of the tree. How tall is the residential building?**

_____

_____

Applying Patterns in Multiplication

1 Find using the :

a) 6 X 2 X 10 = (............ X ....) X .... = ... X .... = ...

b) 5 X 4 X 6 = (............ X ....) X .... = ... X .... = ...

c) 8 X 5 X 5 = (............ X ....) X .... = ... X .... = ...

d) 10 X 6 X 8 = (............ X ....) X .... = ... X .... = ...

e) 8 X 6 X 5 = ... X (............ X ....) = ... X .... = ...

f) 10 X 6 X 9 = ... X (............ X ....) = ... X .... = ...

g) 5 X 2 X 10 = ... X (............ X ....) = ... X .... = ...

h) 8 X 10 X 10 = ... X (............ X ....) = ... X .... = ...

2 Complete the following:

a) (2 X ....) X 8 = ... X (7 X 8).

b) (7 X ....) X 2 = ... X (9 X 2).

c) (............ X 4) X 8 = 2 X (4 X ....).

d) (............ X 3) X 10 = 7 X (3 X ....).

e) (12 X 5) X .... = ... X (5 X 20).

f) (8 X 10) X .... = ... X (10 X 2).

g) (35 X ....) x 9 = ... X (22 x 9).

h) (25 X ....) x 16 = ... X (18 x 16).

3 **Complete the following:**

ⓐ 6 X .... = 600.

ⓑ .... X 5 = 2,000.

ⓒ 8 X .... = 400.

ⓓ .... X 100 = 10,000.

ⓔ 40 X .... = 200.

ⓕ 9 X .... = 36,000.

ⓖ 5,000 = ... **Hundreds.**

ⓗ 200 = ... **Hundreds.**

ⓘ 6,000 = ... **Tens.**

ⓙ .... = 20 **Thousands.**

ⓚ .... = 400 **Hundreds.**

ⓛ .... = 5,000 **Tens.**

4 **Use Decomposing Numbers and the Associative Property of Multiplication to solve each of the following:**

ⓐ 6 X 20　　= 6 X (.......... x ....) = (6 X ....) X ....

　　　　　　= .... X .... = ...

ⓑ 9 X 200　= .... X (2 X ....) = (.......... X ....) X ....

　　　　　　= .... X .... = ...

ⓒ 7 X 3,000　= .... X (.......... X 1,000) = (.......... X ....) X ....

　　　　　　= .... X .... = ...

ⓓ 2 X .... = ... X (8 X 10) = (.......... X ....) X ....

　　　　　　= .... X .... = ...

ⓔ .... X .... = 3 X (5 X 10) = (.......... X ....) X ....

　　　　　　= .... X .... = ...

ⓕ 9 X .... = ... X (.......... X 100) = (.......... X 5) X ....

　　　　　　= 45 X 100 = ...

(a) .... X 2,000 = ... X (............ X 1,000) = (8 X ....) X ....

= 16 X 100 = ...

(b) 5 X 70 =

(c) 9 X 80 =

(d) 6 X 300 =

(e) 8 X 700 =

(f) 9 X 3,000 =

(g) 3 X 2,000 =

5 Complete the following:

(a) 7 X 50 = 35 X ....

(b) 6 X 300 = 18 X ....

(c) .... X 60 = 24 x 10.

(d) .... X 200 = 12 X 100.

(e) 9 X .... = 45 X 10.

(f) 8 X .... = 24 X 100.

(g) 2 X 60 = ... X 10.

h 4 X 8,000 = ... X 1,000.

i (8 X 5) X 6 = ... X 6 = ...

j (3 X 2) X 20 = 6 X .... = ...

k (6 X 20) X 10 = ... X .... = ...

l (............................ X 3) X 9 = 6 X .... = ...

m (............................ X 10) X 4 = 80 X .... = ...

n (5 X 6) X .... = ... X 20 = ...

6 Choose the correct answer:

a 7 X (3 X 5) = (............................ X 3) X 5. (7 or 5 or 3)

b (8 X 2) X 10 = ... X 10. (8 or 2 or 16)

c 5 X 50 = ... X 10. (5 or 25 or 10)

d 30 X 40 = 12 X .... (10 or 100 or 1,000)

e 2 X .... = 18 X 100. (9 or 90 or 900)

f 8 X 20 = ... X 10. (16 or 8 or 2)

g 6 X 300 = 18 X .... (10 or 100 or 1,000)

h .... X 200 = 10 X 100. (5 or 50 or 10)

7 Complete using (< , = or >):

a 8 X 21   8 X 7 X 2   **b** 18 X 5   6 X 3 X 5

c 5 X 12   (5 X 2) X 4   **d** 20 X 90   6 X 300

e 40 X 100   50 X 800   **f** 900 Thousands   90 Millions

g 30 X 100   300 Hundreds

h 240 X 100   600 X 400

i 20 Thousands   500 X 40   **j** 25 X 0   4 X (2 X 0)

k 20 X 100   50 X 400   **l** 10 X 4,000   80 X 50

8 **Match:**

① (2 X 5) X 6.

② 8 X 30.

③ 24 X 100.

④ 800 X 50.

⑤ 3 X (6 X 5).

ⓐ 3 X 800.

ⓑ 10 X 6.

ⓒ 400 X 100.

ⓓ 18 x 5.

ⓔ 24 X 10.

Use the _____ to calculate the number of pens in the picture.

_____

_____

_____

_____

Use the _____ to calculate the number of books in the picture.

_____

_____

_____

_____

11 Emad bought 5 packs of water bottles. Each package contains 4 rows of bottles, each row has 3 bottles. Use the Associative Property of Multiplication to calculate the number of water bottles Emad bought.

12 The library has 10 bookcases, each bookcase has 5 shelves and each shelf has 8 books. Use the Associative Property of Multiplication to calculate the number of books in the library.

Worksheet

1 **Choose the correct answer:**

8 X 300 = 24 X _____ .   (10 or **100** or **1,000**)

Three hundred thirty million, three thousand = _____ .

(in **Standard Form**) (300,030,003 or 330,000,030 or 330,030,000)

40 X 50 = 2 X _____ .   (10 or **100** or **1,000**)

50 X 2 = 10 X _____ .   (10 or **100** or **1,000**)

If 45 = 9*a*, then *a* = _____ .   (45 or **9** or 5)

2 **Complete the following:**

(9 X 2) X 5 = 9 X (_____ X _____).

_____ **Hundreds** = 400 X 50.

The value of the digit 9 in the **Hundred-millions** place is _____ .

(8 X 100,000,000)+ (6 X 100,000)+(3 X 1,000)+ (4 X 100) +(2 X 1)

_____ (in **Standard Form**)

8 X 30 = 8 X (_____ X 10) = (8 X 3) X _____ = _____ X 10 = _____ .

Arrange the following numbers in an ascending order:

450,000,002 , 405,200,000 , 450,200,000 , 405,000,002

The order: _____ , _____ , _____ , _____ .

Use the associative Property of Multiplication to calculate the number of fruits in the pictures:

Concept 6.1 Understanding Factors

Exercises on Lessons 1 & 2

Identifying Factors of Whole Numbers &
Prime and Composite Numbers

1 Find all the factors of each number using the Rainbow and the Factor Diagrams:

ⓐ 10:

The factors of 10 are:

....

....

ⓑ 12:

The factors of 12 are:

....

....

_____ , _____ , _____ , ······· ,

_____ , _____ , ······· , ····· ,

_____ , _____ .

Write the common multiples of ____ and ___ :

_____ , ____ , ____ , _____ , ··· , ····· , ____ , _____ , ····· , ____

Write down _____ of the following numbers. Then write if the number is a prime number or not:

Number	Factors of the Number	Prime Number or Not
6		
19		
22		
31		
14		
30		
25		
23		
11		

5 Complete with a tick (✓) under the factors of the number:

Number	The Factors of the Number				
	2	3	6	9	5
8					
9					
25					
12					
15					
10					
18					
27					
28					
32					
30					
36					
45					
60					
90					

6 Use the opposite table to complete:

Circle the numbers: (2 , 3 , 5 , 7).

Then cross out all the multiples of these numbers.

Circle all the remaining numbers, except one.

The encircled numbers are prime numbers.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Complete by writing the .... between:

a 0	....	10
b 10	....	20
c 20	....	30
d 30	....	40
e 40	....	50
f 50	....	60
g 60	....	70
h 70	....	80
i 80	....	90
j 90	....	100

7 Complete each of the following:

a A prime number between .... whose ...... digit is greater than its Tens digit is ....

b An even number between ...., some of its factors includes the numbers 1, 2, 4, 8 is ....

c An odd number between ...., some of its factors are: 1, 3, 7 is ....

d A prime number that lies between ...., and the digit in the ...... place is greater than the digit in ...... place is ....

e A prime number that lies between ...., and the digit in the ...... place is less than the digit in the ...... place is ....

f All prime numbers are .... numbers, except the number .... is an even number.

g The smallest prime number is ....

h The smallest odd prime number is ....

i An even prime number is ....

j The prime numbers between 40 and 50 are ....

k The number that has only two factors is called the ....

l The **number of factors** of the prime number is ....

m The integer one is not a prime number because it has ....

.... only.

n The number 6 is not a prime number because it has ....

....

9 **Choose the correct answer:**

a .... is a **prime** number.   (15 or 17 or 21)

b The **smallest odd** number is ....   (1 or 2 or 3)

c The **smallest** prime number is ....   (1 or 2 or 3)

d The **smallest odd** prime number is ....   (1 or 2 or 3)

e The **smallest even** prime number is ....   (1 or 2 or 3)

f The prime number has .... only.

(one factor or two factors or three factors)

g The number that has only **two factors** is called a .... number.

(prime or even or odd)

h The integer one is not a prime number because it has ....

(two factors only or one factor only or more than two factors)

i The number 10 is not a prime number because it has ....

(two factors only or one factor only or more than two factors)

j The number 5 is a prime number because it has ....

(two factors only or one factor only or more than two factors)

k The number of factors of 14 is .... factors.   (2 or 4 or 6)

l The number of factors of 16 is .... factors.   (4 or 5 or 6)

m A number whose factors are (1 ,2 ,4 ,5 ,10 ,20) is ....(20 or 10 or 200)

n The number 9 is a .... number.   (prime or even or odd)

Worksheet

1 Find the result:

a) $4,589 + 1,628 = $ _____

b) $9,028 - 4,409 = $ _____

c) $500 \times 80 = $ _____

d) $8 \times 400 = $ _____ $\times 100 = $

2 Choose the correct answer:

All prime numbers are **odd** numbers, except _____ is an **even** number.

(2 or 3 or 0)

45 million, 40 thousand, and 5 = _____ in **Standard Form**.

(45,400,500 or 45,040,005 or 45,040,500)

$4 \times (6 \times 3) = (4 \times 6) \times 3$.   (_____ *Property*)

(Commutative or Associative or Distributive)

A rectangle has a length of 5 cm and a width of 3 cm. Its area

is _____ cm². (15 or 16 or 8)

The number "0" is not a prime number because it has _____ .

(only one factor or only two factors or more than two factors)

3 Complete the following:
a) The **smallest odd** prime number is _____

b) $(8 \times 100,000,000) + (3 \times 100,000) + (2 \times 1,000) + (5 \times 1)$

(in Standard Form) = _____

c) $90 \times 300 = 27 \times $ _____ .

d) The prime numbers between **60 and 70** are _____

e) The number of factors of **25** is _____

4 Find all the factors of each number of the following:

a) Number 40

b) Number 28

The factors of **40** are:

The factors of **28** are:

Exercises on Lesson 3

Greatest Common Factor (G.C.F.)

1 **Find the** greatest common factor **of each of the following numbers:**

The **common factors** are: ....
The **greatest common factor** (G. C. F.) is: ....

2 There are **28** girls and **21** boys in a class. The pupils will be divided into equal groups of girls and equal groups of boys. What is the **largest number of groups** that can be formed so that each group has the **same number of pupils**? How many boys are in each group of boys?

How many girls are in each group of girls?

....

....

....

A teacher is preparing snacks to be distributed among the students. If she has ___ pieces of croissants and 16 pieces of sweets. What is the ___ number of snacks the teacher can make if each meal contains exactly the same number of croissants and exactly the ___ number of sweets? How many croissants are there in each package? How many sweets are there in each package?

_____

_____

_____

_____

Mohab works in flower arrangements, he has 21 red flowers and ___ blue flowers. If Mohab wanted all the arrangements to be ___ and there were no flowers left, what is the greatest ___ of flower arrangements could he have? How many red flowers and blue flowers are there in each arrangement?

_____

_____

_____

_____

Worksheet **2**

1 **Complete the following:**

ⓐ The number that comes right **after** the number 25,999,999 is ....

ⓑ The **greatest common factor** of 9 and 6 is ....

ⓒ 90 x 500 = ...

ⓓ (6 x 5) x 80 = ... x .... = ...

ⓔ 600,000,000 + 400,000 + 20,000 + 300 + 20 = ...

2 **Choose the correct answer:**

ⓐ (3 **Ten-thousands**, 4 **Hundreds**, 5 **Ones**) x 10 = ...

(30,405 **or** 300,405 **or** 304,050)

ⓑ The **greatest common factor** of 8 and 12 is ....   (2 **or** 4 **or** 6)

ⓒ 9 x 500 = 45 x ....   (10 **or** 100 **or** 1,000)

ⓓ A square has an area of 25 cm², its perimeter is .... cm.

(25 **or** 5 **or** 20)

ⓔ 5,000 meters = ... hectometers.   (5 **or** 50 **or** 500)

3 **Find the** greatest common factor **of 30 and 45:**

Factors of the number **30**:   Factors of the number **45**:

....

The common factors are: ....

The greatest common factor (G. C. F.) is: ....

4 **Maryam practices swimming and spends** a third of an hour **swimming every day. What is the total number of minutes she spends swimming in 5 days?**

....

....

Concept 6.2 Understanding Multiples

Exercises on Lessons 4, 5&6

Identifying Multiples of Whole Numbers, Common Multiples & Understanding the Least Common Multiple (LCM)
1 Draw a line connecting each number to the other to show their Counting on the Number Line. Start from 0 each time:

(a) Find the multiples of 2.

1 2 3 4 5 6 7 8 9 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

Multiples of number 2 are: _____

_____

(b) Find the multiples of 3.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

Multiples of number 3 are: ._____

_____

(c) Find the multiples of 4.

1 2 3 4 5 6 7 8 9 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

Multiples of number 4 are: _____

_____

(d) Find the multiples of 5.

1 2 3 4 5 6 7 8 9 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

Multiples of number 5 are: _____

_____

2 **Color** the **multiples** using the following **hundred table** and **Skip Counting:**

ⓐ The multiples of **2** are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

ⓑ The multiples of **3** are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

ⓒ The multiples of **4** are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

ⓓ The multiples of 5 are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

ⓔ The multiples of 6 are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

The multiples of 7 are:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40

81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

h The multiples of 9 are:

....

....

....

....

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

3 Find the multiples of each of the numbers 2 and 3, up to 20. Then find the common multiples between them:

– The multiples of 2 are: ....

– The multiples of 3 are: ....

– The common multiples of the two numbers are: ....

....

4 Find the _____ of each of the numbers _ and _, up to ___. Then
   find the _____ between them:

   – The multiples of 4 are: _____ .

   – The multiples of _ are: _____

   – The _____ of the two numbers are: _____

   _____ .

_ Find the _____ of each of the numbers _ and _, up to __. Then
   find the _____ between them:

   – The multiples of 7 are: _____

   – The multiples of 6 are: _____

   – The common multiples of the two numbers are: _____

   _____ .

_ Find the _____ of each of the numbers _ and _, up to ___. Then
   find the _____ between them:

   – The multiples of 4 are: _____

   – The multiples of 6 are: _____ .

   – The common multiples of the two numbers are: _____

   _____ .

7 Find the _____ of each of the numbers _ and _, up to ___. Then
   find the _____ between them:

   – The multiples of 2 are: _____

   – The multiples of _ are: _____

   – The _____ of the two numbers are: _____

   _____ .

8 Find the multiples of each of the numbers 6 and 8, up to 60. Then find the common multiples between them:

– The multiples of 6 are: ....

– The multiples of 8 are: ....

– The common multiples of the two numbers are: ....

....

9 Complete the following:

ⓐ Write 5 multiples of 8:   (..........., ..., ..., ..., ...)

ⓑ Write 5 multiples of 9:   (..........., ..., ..., ..., ...)

ⓒ Write 5 multiples of 7:   (..........., ..., ..., ..., ...)

ⓓ Write two common multiples of 2 and 6:   (..........., ...)

ⓔ Write two common multiples of 4 and 9:   (..........., ...)

ⓕ Write two common multiples of 8 and 5:   (..........., ...)

ⓖ If 42 = 6 × 7, then .... is a multiple of the two numbers .... and .... Also, ... and .... are factors of the number ....

ⓗ If 45 = ... × ...., then .... is a multiple of the two numbers 5 and 9. Also, ... and .... are factors of the number ....

ⓘ If .... = 8 × 3, then .... is a multiple of the two numbers 8 and 3. Also, ... and .... are factors of the number ....

ⓙ An even number is a multiple of 2, 3, 4 and lies between 20 and 30. The number is ....

ⓚ An even number is a multiple of 3, 5, 10 and lies between 20 and 40. The number is ....

ⓛ An odd number is a multiple of 5 and 9 and lies between 30 and 50. The number is ....

ⓜ An odd number is a multiple of 3 and 7 and lies between 20 and 30. The number is ....

① The relationship between 2, 4, 8 is that ....

⑩ The relationship between 2, 5, 10 is that ....

⑫ The **common multiples** of 4 and 6 are:

0 , 12 , 24 , 36 , 48 , _____ , _____ , _____ .

Choose the correct answer from the brackets:

ⓐ _____ is a **factor** of 8. (2 or 16 or 12)

ⓑ _____ is a **multiple** of 8. (2 or 16 or 12)

ⓒ _____ is a **common multiple** of 4 and 6. (12 or 16 or 18)

ⓓ _____ is a **common multiple** of 8 and 3. (15 or 32 or 24)

ⓔ If 4 X 5 = 20, then 20 is a _____ for 4 and 5.

(multiple or factor or sum)

ⓕ If X = , then and are **factors** of the number _____ .

(7 or 21 or 3)

ⓖ _____ is an **even** number that is a **multiple** of 2, 3, 4

and lies between 20 and 30. (24 or 26 or 28)

ⓗ _____ is an **even** number that is a **multiple** of 2, 4, 5

and lies between 10 and 30. (15 or 20 or 25)

ⓘ _____ is an **odd** number that is a **multiple** of 3 and 5,

and it lies between 10 and 30. (15 or 20 or 25)

ⓙ _____ is a multiple of all numbers. (0 or 1 or 2)

Worksheet

1 **Choose the correct answer:**

     ⓐ Eight million, eighty **(in Standard Form):** ....

                                         (8,000,080 or 8,080,000 or 8,800,000)

     ⓑ The number 12 is a **common multiple** of 3 and .... (5 or 4 or 9)

     ⓒ .... is the best unit for measuring the **length** of an ant.

                                    (Millimeter or Meter or Kilometer)

     ⓓ 50 x .... = 20,000.   (40 or 400 or 4,000)

     ⓔ 40 million x 100 = ...   (400 million or 4 billion or 40 billion)

2 **Complete the following:**

     ⓐ The **place value** of the number 9 in the number 59,258,156 is ....

     ⓑ 45,568 + 54,432 = ...

     ⓒ The number 45,985 rounded to the nearest 100 ≈ ....

     ⓓ A square whose **perimeter** is 20 cm, its side length = ... cm.

     ⓔ A **common multiple** of the numbers 6, 8 and it lies between the numbers 20 and 30: (................).

3 Find the multiples of each of the numbers 4 and 6, up to 30. Then find the common multiples between them:

     – The multiples of 4 are: ....

     – The multiples of 6 are: ....

     – The common multiples of the two numbers are: ....

4 Shaimaa went to the club at 8:45 am and came back at 10 am. How long did she spend in the club?
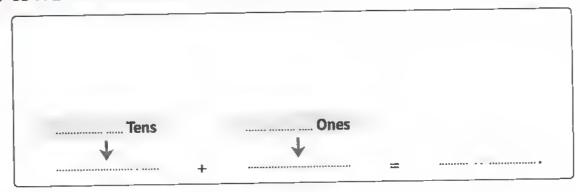

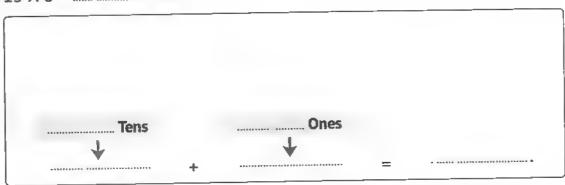

....

....

Concept 7.1 Multiplying by 1-Digit and 2-Digit Factors

Enriched on Lesson 1

The Area Model Strategy

Multiply using the Area Model Strategy:

ⓐ 35 X 3 = _____ .

.... Tens   .... Ones

_____ + _____ = _____ .
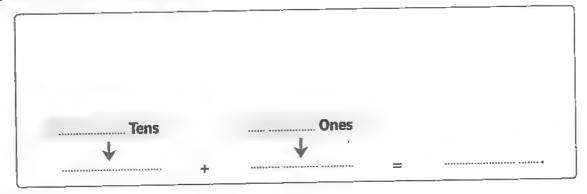

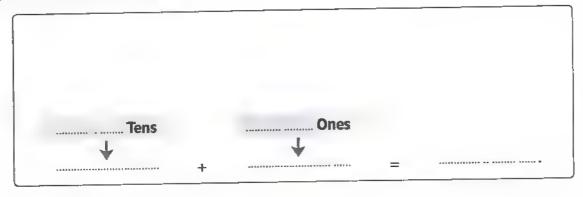

ⓑ 14 X 5 = _____ .

Tens   Ones

_____ + _____ = _____ .

ⓒ 42 X 3 = _____ .

Tens   Ones
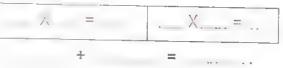

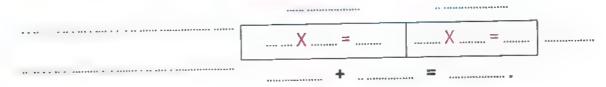

_____ + _____ = _____ .

d 65 X 2 = ...

.... Tens   .... Ones

.... + ... = ...

e 13 X 6 = ...

.... Tens   .... Ones

.... + ... = ...

f 86 X 2 = ...

.... Tens   .... Ones

.... + ... = ...

g 54 X 3 = ...

.... Tens   .... Ones

.... + ... = ...

Use the Rectangle Area Model Strategy to multiply:

82 X 6 =

76 X 3 =

63 X 8 =

92 X 7 =

19 X 8 =

15 X 9 =

57 X 3 =

(h) 99 X 9 = ... ▪

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

(i) 36 X 5 = ... ▪

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

(j) 92 X 3 = ... ▪

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

3 Each bus can accommodate 22 passengers at a time. What is the maximum number of passengers that the bus can carry in 5 trips?   (Use the Rectangle Area Model in your solution).

....

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

4 The length of the bus route is 58 km. How many kilometers would the bus travel if it traveled this route 9 times a day?

(Use the Rectangle Area Model in your solution).

....

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

5 Hossam saves 85 pounds per month. How much does Hossam save in 6 months?   (Use the Rectangle Area Model in your solution).

....

| .... X .... = ... | .... X .... = ... | .... |

.... + ... = ... ▪

Worksheet

1 **Choose the correct answer:**

a) The **largest** 7-even-digit-number is ....

(9,876,534 or 9,999,999 or 9,999,998)

b) The **smallest odd** prime number is .... (1 or 2 or 3)

c) If $5n = 50$, then $n =$ .... (10 or 0 or 5)

d) $80 \times 60 =$ .... $\times 100$. (86 or 80 or 48)

e) $6 + 6 + 6 + 6 + 6 = 3 \times$ .... (5 or 6 or 10)

2 **Complete the following:**

a) The **greatest common factor** of ... and ... is ....

b) $8 \times$ .... $= 40,000$. c) $9,000 - 2,458 =$ ....

d) $8,050,607$ **(in Expanded Notation):** ....

....

e) To compare the numbers ... and ... : (... equals .... the number 9).

3 **Multiply using the** .... **Strategy:**

a)

Tens	.... Ones		.... Tens	.... Ones
X ..... $=$ ..... $+$			.... X .... $=$ .... $+$	
$=$			$=$	

4 **Use the** .... **Strategy to multiply:**

a)

	80	9
7		

X ..... $=$ ..... $+$ ....

$=$ ....

b)

	50	6
8		

..... X ..... $=$ ..... $+$ ....

$=$ ....

Exercises on Lesson 2

The Distributive Property

1 Complete the following:

ⓐ 4 X (8 + 9) = (4 X ....) + (4 x ....).

ⓑ 9 X (............ + ...) = (9 X 3) + (9 X 4).

ⓒ .... X (6 + 5) = (3 X ....) + (3 X ....).

ⓓ 6 X (3 + 4 + 5) = (........ X ....) + (........ X ....) + (........ X ....).

ⓔ 6 X (200 + 90 + 3) = (........ X ....) + (........ X ....) + (........ X ....).

ⓕ 6 X (........ + ... + ...) = (........ X 8) + (........ X 9) + (........ X 3).

ⓖ .... X (........ + ... + ...) = (2 X 700) + (2 X 30) + (2 X 9).

2 Use the Distributive Property to solve the following problems:

ⓐ 4 X 31   = 4 X (............ + ...)

            = (4 X ....) + (4 X ....)

            = ... + ... = ...

ⓑ 6 X 69   = ... X (............ + ... + ...)

            = (............ X ....) + (............ X ....)

            = ... + ... = ...

ⓒ 6 X 485   = ... X (............ + ... + ...)

            = (............ X ....) + (............ X ....) + (............ X ....)

            = ... + ... + ... = ...

(d) 8 X 276 = _____ X (_____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ = _____ .

(e) 4 X 623 = _____ X (_____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ = _____ .

(f) 3 X 2,564 = _____ X (_____ + _____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ + _____ = _____ .

(g) 6 X 4,893 = _____ X (_____ + _____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ + _____ = _____ .

(h) 7 X 3,892 = _____ X (_____ + _____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ + _____ = _____ .

(i) 6 X 3,060 = _____ X (_____ + _____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ + _____ = _____ .

(j) 3 X 8,005 = _____ X (_____ + _____ + _____ + _____)

= (___ X ___) + (___ X ___) + (___ X ___) + (___ X ___)

= _____ + _____ + _____ + _____ = _____ .

3 **Use the** Area Model of a Rectangle **to solve the following problems:**

ⓐ 8 X 125 = ...

ⓑ 6 X 512 = ...

ⓒ 9 X 629 = ...

ⓓ 7 X 706 = ...

5 X 2,365 =

6 X 1,283 =

9 X 1,822 =

7 X 2,005 =

4 The length of a bus is 1,280 centimeters.
How long are 3 buses?   (Use the Distributive Property)

....

....

....

5 Hisham bought 7 kg of oranges, the price of one kilogram was 525 piasters. How much did Hisham pay for the oranges?
(Use the Distributive Property)

....

....

....

6 The distance from Ali's house to the school is 930 meters, and the distance from his house to the club is 5 times the distance between the house and the school. What is the distance between Ali's house and the club?   (Use the Rectangle Area Model)

....

....

....

7 Strips of cardboard in the form of rectangles are 185 cm long and 8 cm wide .Find the area of this bar.
(Use the Rectangle Area Model)

Worksheet

1 **Choose the correct answer:**

a The equation that expresses "n **is equal to three times 8**n" is _____ .

($n = 3 \times 8$ or $3 \times n = 8$ or $8 \times n = 24$)

b A square whose side length is ▨ cm, then its **area** is _____ cm².

(30 or 24 or 36)

c 3 billion, 30 million, 300 ~ _____ **(in Standard Form)**

(3,000,030,300 or 3,030,000,300 or 3,030,300,000)

d $9 \times 60 = 60 \times 9$. (_____ *Property*)

(Commutative or Associative or Distributive)

e 5 Billions = _____ Millions. (50 or 500 or 5,000)

2 **Complete the following:**

a _____ is a **common multiple** of ▨ and ▨ and it lies between ▨ and ▨.

b $60 \times$ _____ = 30,000. c 45 grams = _____ centigrams.

d The number that represents **Ten-millions** in the number: 6,453,289,170

is _____ .

e $6 : 45 + 2 : 55 =$ _____ : _____ .

3 **Use the Distributive Property to find:**

a $9 \times 96 =$ _____ |b $8 \times 245 =$ _____

= _____ | = _____

= _____ | = _____

4 **Complete by using the following Area of Rectangle Model:**

5,000	600	80	9	
▨	$8 \times ... = 4,800$	$8 \times 80 = 560$	$8 \times 9 = 36$	8

$= 8 \times$ ____ $= 8 \times ($ ____ + ____ + ____ + ____ $)$

$= ($ ____ X ____ $) + ($ ____ X ____ $) + ($ ____ X ____ $) + ($ ____ X ____ $)$

$=$ ____ + ____ + ____ + ____ $=$ ____

Exercises on Lessons 3,4&5

The Partial Products Algorithm, The Standard Multiplication Algorithm & Connecting Strategies

1 **Complete the following:**

ⓐ $564 = 500 + 60 + $ ....   ⓑ $500 + 60 + 4 = $ ....

ⓒ $9,000 + 500 + 30 + 2 = $ ....   ⓓ $6,000 + 400 + 80 + 3 = $ ....

ⓔ $9,000 + 50 = $ ....   ⓕ $6,000 + 600 = $ ....

  3,008
X     4
_____
```

Complete the following table of the multiplication processes and then find the result using the given strategy:
Problem	The Estimation of the Product	Solution Using a Strategy
(a) 45 X 3	X	Base-10 Blocks Strategy
(b) 78 X 9	X	Rectangle Area Model
(c) 356 X 6	X	Distributive Property
(d) 3,406 X 8	X	Partial Products Algorithm
(e) 8,014 X 5	X	Standard Multiplication Algorithm

5 Complete using (< , = or >):

a 9 X 26   4 X 56   b 4 X 250   8 X 125

c 431 X 4   624 X 6   d 5 X 294   6 X 245

e 25 X 80   205 X 8   f 30 X 300   3,012 X 3

g 752 X 2   7 X 525   h 365 X 8   600 X 50

i 8 X 2,500   40 X 500

6 Ahmed's family bought 6 kilograms of meat. If the price of one kilogram is 135 pounds, how many pounds did the family pay?

7 An electrical appliance merehant bought 8 television sets, the price of each set is 6,250 pounds.
How much will the merchant pay for these television sets?

8 The day is 24 hours, how many hours are there in a week?

Worksheet 3

1 **Choose the correct answer:**

a A billion is the **smallest** number consisting of _____ digits.

(7 or 9 or 10)

b 5 X (400 + 3 + 70) = 5 X _____ .   (437 or 473 or 374)

c 805 X _____ = 3,220.   (4 or 6 or 7)

d 5,000 + 20 + 3 = _____ .   (523 or 5,023 or 5,000,203)

e If 8 + χ = 3 x 8, then χ = _____ .   (3 or 8 or 16)

2 **Complete the following:**

a _____ is the **greatest common factor** of **12** and **18**.

b 400 X _____ = 16,000.

c Two weeks and three **days** = _____ **days**.

d The **place value** of the digit **6** in the number 53,106,720 is _____ .

e 6 X (2 + 50 + 400) = (6 X _____) + (6 X _____) + (6 X _____).

3 **Complete using (< , = or >):**

a 5 X 502 _____ 5 X 205   b 45 m _____ 4,500 cm

c 20 X 50 _____ 8 X 125

d 456,258 + 543,742 _____ The **greatest** 7-digit-number

e 5 **Millions** _____ 5,000 **Hundreds**

4 Arrange the following numbers in a **descending order:**

45,500,000 , 54,005,000 , 45,000,050 , 54,000,500

The order : _____ , _____ , _____ , _____

5 A train has 8 cars. If the number of seats in one car is **64**. How many seats will the train have?

_____

_____

Exercises on Lesson 6

Two-Digit Multiplication
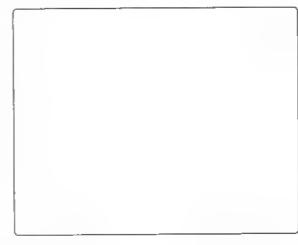

1 Find the product using the **Rectangle Area Model:**
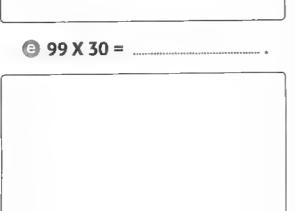

ⓐ 82 X 26 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

ⓑ 30 X 25 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

ⓒ 38 X 60 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

ⓓ 90 X 38 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

ⓔ 60 X 96 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

ⓕ 37 X 40 = ... | .... X .... = ... | .... X .... = ... | ....

.... + ... = ...

Use the _____ **to multiply:**

ⓐ 83 X 90 = _____ .

ⓑ 35 X 60 = _____ .

ⓒ 48 X 20 = _____ .

ⓓ 40 X 17 = _____ .

ⓔ 60 X 86 = _____ .

ⓕ 68 X 50 = _____ .

3 Use the Distributive Property to solve the following problems:

(a) 90 X 15 = ...

(b) 20 X 68 = ...

(c) 80 X 29 = ...

(d) 60 X 63 = ...

(e) 99 X 30 = ...

(f) 88 X 50 = ...

4 Find the product:

a) 12 X 60 = ...   b) 80 X 14 = ...

c) 40 X 25 = ...   d) 90 X 42 = ...

e) 80 X 55 = ...   f) 30 X 96 = ...

g) 95 X 60 = ...   h) 80 X 45 = ...
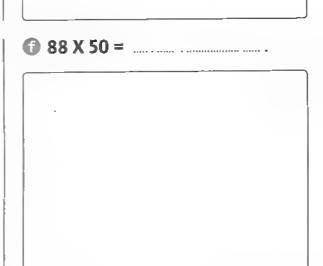

Emad bought ___ pens of the same type. If the price of one pen is ___ piasters, what is the amount of money that Emad will pay?

A merchant has ___ boxes of fruits. If each box contains ___ kilograms, what is the mass of all boxes?

Souad bought ___ meters of a piece cloth. If the price of one meter is ___ pounds, what is the price of the whole piece of cloth?

Worksheet **1**

1 Choose the correct answer:

a A square has a perimeter of **36** cm, then its **area** is .... cm².

(9 **or** 12 **or** 81)

b .... kg = 70,000 grams.   (7 **or** 70 **or** 700)

c 30 X .... = 3,600.   (12 **or** 120 **or** 1,200)

d The property used in: 8 X (3 + 7) = (8 X 3) + (8 X 7) is ....

Property.   (Commutative **or** Associative **or** Distributive)

e (8 **Hundreds** and 6 **Tens**) x 100 = ...

(860,000 **or** 86,000 **or** 8,006,000)

2 Complete the following:

a .... is a **prime** number that lies between **50** and **60** ,and its

Ones digit is greater than its **Tens** digit.

b The factors of **21** are: .... , ... , ... , ... ,

c 60 X .... = 300,000

d 8 + 8 + 8 + 8 + 8 = 5 X ....

e (6 X 1,000,000) + (3 X 10,000) + (4 X 100) + (3 X 1) = ...

3 Find the result:

a 45,268 + 15,832 = ...   **b** 80,600 − 25,087 = ...

c 782 X 4 = ...   **d** 90 X 15 = ...

4 An apartment building has **20** floors. If each floor has **18** apartments, what is the total number of apartments in the building?

....

....

Exercises on Lessons 7&8

Use the Rectangle Area Model to find the product:

ⓐ 36 X 45

= .... + ... + ... + ...

= ....

....

....

Worksheet

1 **Choose the correct answer:**

a) Three hundred and fifty million, three hundred fifty: _____ .
   (in Standard Form).   (350,350 or 350,000,350 or 350,350,000)

b) 45 X 40 _____ 30 X 60.   (> or = or <)

c) The largest number formed from the digits _____
   is _____ .   (986,310 or 103,689 or 986,301)

d) (4 X 5) + (4 X 20) + (30 X 5) + (30 X 20) = _____ X _____ .

                                    (34 X 25 or 42 X 35 or 32 X 45)

e) 500 Ten-thousands = _____ Millions.   (500 50 5)

2 **Complete the following:**

a) _____ is the **smallest odd** prime number

b) The **multiples** of 6 to 20 are: _____ , _____ , _____ , _____ .

c) The **place value** of the number 3 in the number 23,456,028 is _____ .

d) The area of a rectangle is ___ cm² and its length is ___ cm, then its
   perimeter is _____ cm.

e) 9,000,000,000 + 5,000,000 + 6,000 + 2 = _____ .

3 **Complete the following:**

a) 68	b) 45	c) 40,000	d) 45,208
X 50	X 24	− 2,568	+ 35,792
÷			

The day is ___ hours. How many hours are there in _____ ?

Exercises **on** *Lesson* 9

Putting It All Together

1   Aya draws paintings and sells them at art galleries. She charges 56 pounds for the large painting, and 24 pounds for the small painting. Last month, Aya sold six large paintings and three small paintings. How many pounds did Aya get for selling the paintings?

Answer:

2   A fruit merchant sold 98 kilograms of bananas and 80 kilograms of oranges. The price of one kilogram of bananas is 12 pounds, and the price of one kilogram of oranges is 10 pounds. How much pounds did the merchant get for selling the fruits?

Answer:

3   Saleh drives for 2 hours and travels 240 km. Maher drives for 3 hours and travels 300 km. Adam also drives for 3 hours, but he travels 55 kilometers less than Maher. How many kilometers do they all drive?

Answer:

On Earth Day, workers planted 65 seedlings per hour. They worked for hours and then took a break. After the break, they worked for another hours but only planted 55 seedlings per hour. How many seedlings did they plant in 5 hours?

Answer: _____

_____

_____

There are about car accidents per day in Egypt. The United States has about times the number of car accidents per day. How many accidents are there per week in the United States?

Answer: _____

_____

_____

Youssef reads pages every night for a week.
Aya reads page every night for a week.
How many pages do they both read in a week?

Answer: _____

_____

_____

There are tickets available for sale for one of the shows.
 tickets were sold on Monday and 55 tickets on Tuesday.
How many tickets are left for sale?

Answer: _____

_____

_____

8 Samah is planning a bike race. The length of one lap of the track is **126** kilometers. Competitors must do **three** laps around the track and then ride another **12** kilometers to the finish line. What is the race distance that Samah must travel?

Answer: ....

....

....

9 Jasmine bought **12** large sticker books. There were **96** stickers in each book. She gave **300** stickers to her friends.
How many stickers does Jasmine have left?

Answer: ....

....

....

10 How many minutes are there in a day? And how many minutes are there in a week?

Answer: ....

....

....

Worksheet 0

1 **Choose the correct answer:**

a. If .... is rounded to the nearest 10, the result is 5,600.

(5,655 or 5,596 or 5,608)

b. 50 X 60 .... 30 X 100.

(> or = or <)

c. If 45 + a = 45, then a = ...

(0 or 1 or 2)

d. 8 X 900 = ... X 100.

(8 or 9 or 72)

e. A ...., its **mass** is approximately ....

(3 kg or 3 gm or 3 cm)

2 **Complete the following:**

a. A rectangle has a width of 5 cm, and its length is twice its width. Then its **area** is .... cm².

b. The value of the digit 5 in the **Billions** place = ... times the value of the digit 5 in the **Ten-thousands** place.

c. The equation that represents "**45 is 9 times the number a**" is: ....

d. The **G.C.F.** for 48 and 36, is ....

e. (7 X 6) + (7 X 80) + (7 X 300) = 7 X ....

3 **Find the result:**

a. 415 X 5 = ...

b. 96 X 30 = ...

c. 76 X 12 = ...

d. 90 X 450 = ...

Hazem bought 12 pens and 25 notebooks. If the price of one pen is ⚬ pounds and the price of one notebook is 7 pounds. How much did Hazem pay the seller for the pens and notebooks?

....

....

Concept 7.2 Dividing by 1-Digit Divisors

Exercises on Lessons 10&11

Exploring Remainders & Patterns and Place Value in Division

1 Complete the following table:

(g) 27,000 ÷ 9		
(h) 240,000 ÷ 8		
(i) 60,000 ÷ 3		
(j) 18,000 ÷ 6		

3 Find the quotient:

(a) $90 \div 3 =$ _____ .

(b) $64,000 \div 8 =$ _____ .

(c) $600 \div 2 =$ _____ .

(d) $27,000 \div 9 =$ _____ .

(e) $450 \div 5 =$ _____ .

(f) $400,000 \div 5 =$ _____ .

(g) $1,800 \div 5 =$ _____ .

(h) $540,000 \div 6 =$ _____ .

(i) $2,400 \div 6 =$ _____ .

(j) $3,500,000 \div 5 =$ _____ .

4 **Complete using (< , = or >):**

ⓐ 450 ÷ 5   350 ÷ 7   **ⓑ** 4,000 ÷ 5   2,000 ÷ 5

ⓒ 1,000 ÷ 2   400 ÷ 4   **ⓓ** 20,000 ÷ 4   30,000 ÷ 6

ⓔ 20,000 ÷ 5   28,000 ÷ 8   **ⓕ** 8,100 ÷ 9   450 ÷ 5

ⓖ 1,500 ÷ 3   2,400 ÷ 6   **ⓗ** 4,800 ÷ 6   64,000 ÷ 8

ⓘ 400 ÷ 8   300 ÷ 5   **ⓙ** 2,500 ÷ 5   45,000 ÷ 9

5 **Complete the following:**

ⓐ If 5 X 8 = 40 , then   4,000 ÷ 5   = ...

ⓑ If 6 X 7 = 42 , then   42,000 ÷ 6   = ...

ⓒ If 3 X 4 = 12 , then   120 ÷ 3   = ...

ⓓ If 2 X 9 = 18 , then   180,000 ÷ 9 = ...

ⓔ If 5 X 4 = 20 , then   20,000 ÷ 4   = ...

6 **Saleem brought 15 pancakes to give to four of his friends. How can Saleem divide the pancakes evenly?**

....

....

....

7 **A teacher has 21 candy bars and wants to distribute them equally among 5 students. How many candy bars will each student get?**

....

....

....

persons would like to attend a special event in Zamalek District. There are several different ways to go to this event. Participants can only choose one way to allow the whole group to go. Look at the means of transportation in the following table that they can use.

Means of Transportation	The Number of People Allowed in Each Means of Transportation	The Problem	Number of People Left
ⓐ Microbus	9	....	
ⓑ Tuk Tuk	3	....	
ⓒ Car	4	.. . .	
ⓓ Van	7	....	

Issam wants to put ___ cups in boxes and ship them.
Each box holds 6 cups.
How many boxes are needed to ship the cups?

_____

_____

Ahmed distributed _____ pounds _____ among his ___ sons.
What is the share of each son?

_____

_____

Emad spent _____ within six days.
How many pounds did Emad spend in one day?

_____

_____

Worksheet

1 **Choose the correct answer:**

a If 8 X 3 = 24, then 2,400 ÷ 8 = ...   (3 or 30 or 300)

b 3,200 ÷ 4 .... 8,000 ÷ 8.   (> or = or <)

c 3,200 ÷ .... = 400.   (8 or 80 or 800)

d 8 **kg** and 45 **grams** = ... **grams.**   (80,450 or 8,045 or 8,450)

e 5,000 **Ten** = ... **Thousands.**   (5 or 50 or 500)

2 **Complete the following:**

a The perimeter of a square is **12** cm, then its **area** is .... cm².

b 4,256 = ... + ... + ... + ...(in Expanded Form)

c The **factors** of **28** are: .... , ... , ... , ...

d The **remainder** of **32 ÷ 6** is ....

e If 8 X 4 = 32, then 32,000 ÷ 8 = ...

3 **Complete the following table:**

Problem	Dividend	Divisor	Quotient	Remainder
a 45 ÷ 6				
b 32 ÷ 8				
c 14 ÷ 2				
d 23 ÷ 5				
e 68 ÷ 8				

4 **A school has 240 students divided into 8 classes equally. How many students are there in each class?**

....

....

on 12

The Area Model and Division

Find the _____ in each of the following:
(Use the Area of Rectangle Model)

a $70 \div 5$

| ... X ..... = ... | ..... X ...... = ... | .... |

$70 \div 5 = $ ....

b $64 \div 4$

| ... X .. = ... | ..... X ..... = ... | .... |

$64 \div 4 = $ ....

c $98 \div 2$

| ...X . = . | ... X . = ... | ...... |

$98 \div 2 = $ ....

d $56 \div 3$

| . .... X .... = ... | .. ... X .... . = ... | ...... |

$56 \div 3 = $ ....

e $76 \div 6$

| .... X .. = ... | ... X .... = ... | .... |

$76 \div 6 = $ ....

f $68 \div 5$

| ..... X ..... = ... | .. X ... = ... | ...... |

$68 \div 5 = $ ....

g $587 \div 4$

h $876 \div 6$

i $615 \div 5$

j $3,200 \div 4$

k $360 \div 4$

Use the _____ to solve the following, show your steps.

An organization donated ___ books to a school. The books will be divided among ___ classes. How many books will each class take?

_____

_____

_____

[ ]

Rashida saved ___ pounds to buy a car. She was saving ___ pounds every day she worked. How many days did she have to work to save enough money to buy a car?

_____

_____

_____

[ ]

Amir bought a book of stickers. The book contains ___ stickers. Amir wanted to give the stickers to 4 of his friends.
How many stickers will each of his friends get?

_____

_____

_____

[ ]

There are ___ cars that need to use the stadium parking lot.
The stadium contains 4 parking lots.
Each parking lot must contain the ___ number of cars ___.

_____

_____

_____

[ ]
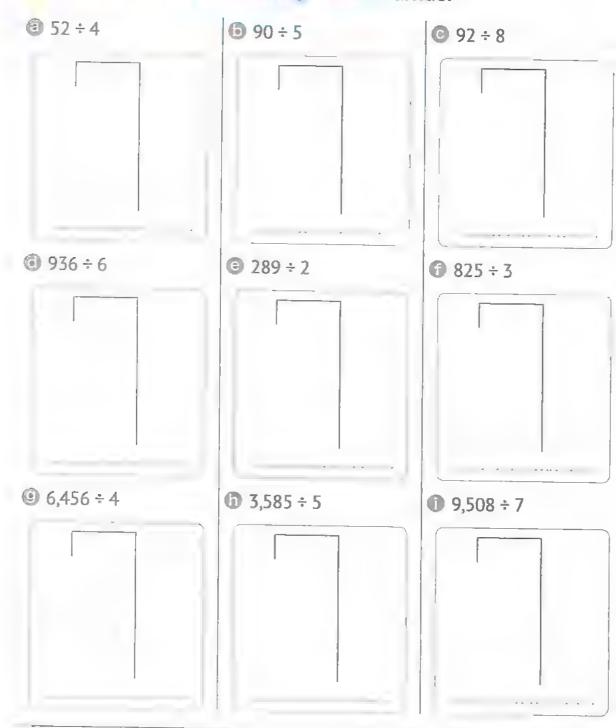

Worksheet 1

1 **Choose the correct answer:**

ⓐ The **Additive Neutral Element** is .... (0 or 1 or 2)

ⓑ The **smallest odd** prime number is .... (1 or 2 or 3)

ⓒ The **largest even** number formed from 7 different digits

is .... (9,876,543 or 9,999,998 or 9,876,534)

ⓓ 4 **liters and** 15 **milliliters** = ... **milliliters.** (4,150 or 4,015 or 40,015)

ⓔ 80 X .... = 1,600. (2 or 20 or 200)

2 **Complete the following:**

ⓐ The **factors** of **16** are: .... , ... , ... , ... , ...

ⓑ The **place value** of the digit **6** in the number 256,125,334 is ....

ⓒ One **week** and two **days** = ... **days.**

ⓓ .... is a **common multiple** of **6** and **10** and it lies between **20** and **40.**

ⓔ 9 million, twenty-five thousand, three **(in Standard Form):** ....

3 **Find the** quotient **and complete the** Rectangle Area Model**:**

ⓐ 76 ÷ 4

| .... X .... = ... | .... X .... = ... | .... X .... = ... |

76 ÷ 4 = ...

ⓑ 144 ÷ 6

| .... X .... = ... | .... X .... = ... |

144 ÷ 6 = ...

4 **Salma wants to divide** 85 **candy bars between** 5 **of her friends** equally. **How many candy bars will each friend get?**
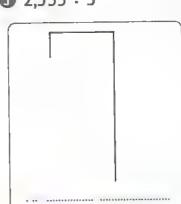

....

....

Exercises on Lesson 13

The Partial Quotients Algorithm

Use the Partial Quotient Algorithm to divide:

a $52 \div 4$

b $90 \div 5$

c $92 \div 8$

d $936 \div 6$

e $289 \div 2$

f $825 \div 3$

g $6,456 \div 4$

h $3,585 \div 5$

i $9,508 \div 7$

j $2,535 \div 5$

k $4,209 \div 6$

l $8,407 \div 7$
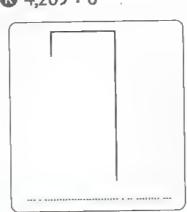

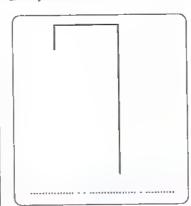

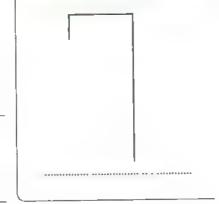

2 Write the **division problem** that matches each **Rectangle Area Model**. Then solve the problem using the **Partial Quotient Algorithm:**

a

Rectangle Area Model:

$4 \times 20 = 80$	$4 \times 3 = 12$	4
20	3	

Division Problem:

Partial Quotient Algorithm:

b

Rectangle Area Model:

$3 \times 10 = 30$	$3 \times 7 = 21$	3
10	7	
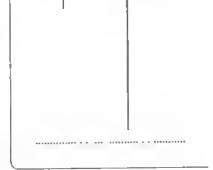

The remainder of the division is 2.

Division Problem:

Partial Quotient Algorithm:

Rectangle Area Model:

6 X 100 = 600	6 X 40 = 400	6 X 3 = 18	6
100	40	3	
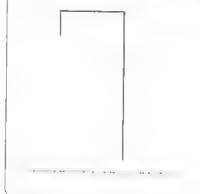

Partial Quotient Algorithm:

Division Problem:

Rectangle Area Model:

5 X 100 = 500	5 X 30 = 150	5 X 6 = 35	5
100	30	7	

The remainder of the division is 3.

Division Problem:

Partial Quotient Algorithm:

Rectangle Area Model:

6 X 400 = 2,400	6 X 60 = 360	6 X 7 = 42	6
400	60	7	

Partial Quotient Algorithm:

Division Problem:

3   A piece of land in the form of a rectangle has an area of 96 square meters. If its width is 8 meters, find its length.

(Use the Partial Quotient Algorithm)

4   Eman wants to distribute 1,548 among 6 persons equally. What is the share of each person?

(Using the Partial Quotient Algorithm)

5   A tourism company has prepared 5 buses to transport 175 tourists to visit the pyramids area. How many tourists will be in each bus?

(Use the Partial Quotient Algorithm)

Worksheet

1 **Choose the correct answer:**

(a) If the **place value** of the digit 5 is the **Ten-thousands**, then its **value** is _____ .

(50 or 50,000 or 50,000,000)

(b) 2,400 ÷ 4 _____ 3,000 ÷ 6.

(> or = or <)

(c) If $5a = 45$, then $a =$ _____ .

(45 or 9 or 40)

(d) The best unit for measuring the **length** of an insect is _____ .

(meter or centimeter or millimeter)

(e) 8 X 500 = 4 X _____ .

(10 or 100 or 1,000)

2 **Complete the following:**
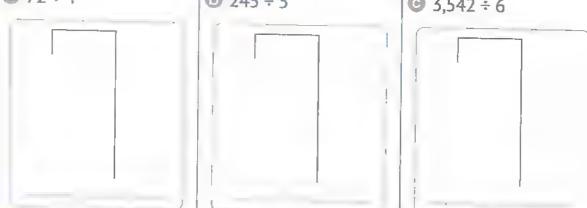

(a) The area of a square is 2? cm², then its **perimeter** is _____ cm.

(b) 45 + 99 = _____ + 100.

(c) The **remainder** of 93 ÷ 6 is _____ .

(d) The G.C.F. for numbers ?? and ?? is _____ .

(e) (5 X 6) + (5 X 20) + (40 X 6) + (40 X 20) = 45 X _____ .

Use the Partial Quotient Algorithm **to divide:**

(a) 72 ÷ 4

(b) 245 ÷ 5

(c) 3,542 ÷ 6

There are ? students on the playground and we need to divide them into ? teams. How many students will be in each team?

_____

_____

Exercises on Lessons 14&15

The Standard Division Algorithm & Division and Multiplication

1 Complete the following table:
	Problem	The dividend is between	The quotient is between
a	$64 \div 2$	.... and	.... and ....
b	$87 \div 3$	.... and	.... and ....
c	$124 \div 4$	.... and	.... and ....
d	$105 \div 5$	.... and	.... and ....
e	$324 \div 3$	.... and	.... and ....
f	$864 \div 7$	.... and	.... and ....
g	$2,472 \div 6$	.... and	.... and ....
h	$3,648 \div 8$	.... and	.... and ....
i	$9,245 \div 5$	.... and	.... and ....
j	$7,206 \div 3$	.... and	.... and ....

2 Divide using the Standard Division Algorithm:

a $65 \div 5 = $ ....

b $96 \div 6 = $ ....

c $94 \div 4 = $ ....

d) $136 \div 4 =$ _____

e) $225 \div 3 =$ _____

f) $248 \div 5 =$ _____

g) $828 \div 6 =$ _____

j) $744 \div 3 =$ _____

i) $954 \div 7 =$ _____

j) $1{,}256 \div 8 =$ _____

k) $2{,}236 \div 9 =$ _____

l) $4{,}025 \div 5 =$ _____

m) $9{,}756 \div 2 =$ _____

n) $4{,}254 \div 6 =$ _____

o) $9{,}024 \div 3 =$ _____
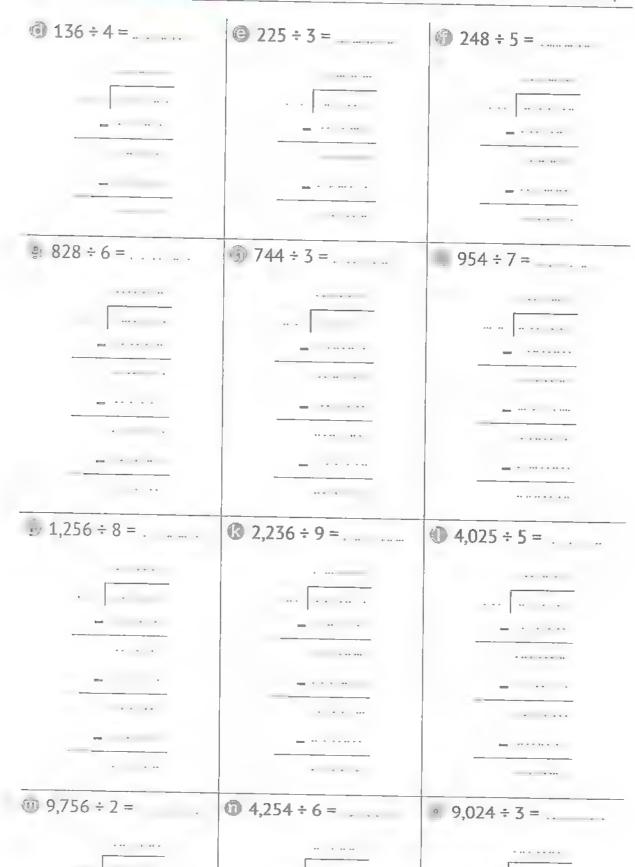

3 **Complete the following table:**

	Problem	The Quotient is between	Number of Digits of the Quotient	Using the Standard Division Algorithm
a	68 ÷ 4 = ...	.... and	....	
b	135 ÷ 5 = ...	.... and	....	
c	868 ÷ 7 = ...	.... and	....	
d	3,570 ÷ 5 = ...	.... and	....	
e	9,827 ÷ 3 = ...	.... and	....	

A train has ___ passenger seats. If the train has 7 cars and each car has the same number of seats. How many passengers can be seated in each car?

(Solve the problem using at least *two different strategies*)

First Strategy:

Second Strategy:

There are ___ books in a library distributed over 3 cupboards. How many books are there in each cupboard?

(Solve the problem using at least *two different strategies*)

First Strategy:

Second Strategy:

A school has ___ boys and 216 girls. They are divided into ___ classes ___. How many students are there in each class?

Worksheet 🔟

1 **Choose the correct answer:**

ⓐ The estimation of 49,286 using the strategy **Front-end Strategy,**
is ....   (50,000 or 49,000 or 40,000)

ⓑ $45 ÷ 3$ .... $56 ÷ 4$.   (> or = or <)

ⓒ The value of the digit **5** in the **Ten-thousands** place = ...
times the value of the digit **5** in the **Tens** place.   (10 or 100 or 1,000)

ⓓ $245 + 110 =$ .... $+ 245$.   (110 or 245 or 355)

ⓔ $45,000 ÷$ .... $= 9,000$.   (500 or 50 or 5)

2 **Complete the following:**

ⓐ **200 minutes** = **3 hours** and .... **minutes.**
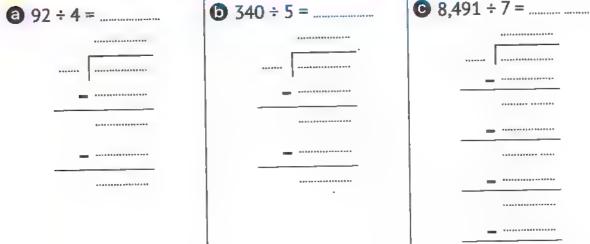

ⓑ $9 X 300 =$ .... $X 100$.   **ⓒ** $9,456 – 2,367 =$ ....

ⓓ The prime number that comes **after** 19 is ....

ⓔ $(45 X 5) + (45 X 60) = 45 X$ ....

3 **Divide using the Standard Division Algorithm:**

ⓐ $92 ÷ 4 =$ ....

ⓑ $340 ÷ 5 =$ ....

ⓒ $8,491 ÷ 7 =$ ....

4 A hotel consists of **215** rooms distributed **equally** among
5 floors. How many rooms are there on each floor?

....

....

on 16

Amira bought _____ of pencils. In each box, there are 28 pencils. She also had _____ of pencils in her house. In each box, there are _____. Amira wanted to bring all the pencils to school and give them to _____ of her friends. How many pencils will each friend have?

What happens in the problem? _____

What are the _____ in the problem? _____

What _____ can be asked in this problem? _____

Answer: _____

Reem wants to read a _____. The first week, she read _____. The second week, she read 195 pages. How many pages are remaining for her to read?

What happens in the problem? _____

What are the _____ in the problem? _____

What _____ can be asked in this problem? _____

Answer: _____

3 Jasmine wants to organize her books from greatest number of pages to the least number of pages.

Jasmine's longest book has 1,400 pages. Her shortest book has 376 fewer pages than the longest.

If the book in the middle of her shelf has three times the number of pages of the shortest book, then how many pages does the book in the middle have?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

4 Ahmed serves ice cream at a local ice cream shop.

He sold 19 ice cream cones on Saturday, 27 ice cream cones on Sunday, and 153 ice cream cones on the remaining days.

How many ice cream cones did Ahmed sell on the weekdays?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

5 There are 1,421 tourists that visit the pyramids every weekend.

How many tourists visit the pyramids in 8 weekends?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

A teacher bought _____ of crayons. Seven of the packs had _____ in them. The other ___ had 10 crayons in each.

How many crayons did the teacher buy in all?

What happens in the problem? _____

What are the values in the problem? _____

What _____ can be asked in this problem? _____

Answer: _____

Aliaa discovered a buried treasure box. She opened it up and found that it contained _____ and 117 rubies. She sold 45 diamonds and bought 130 emeralds.

How many gems does she have now?

What happens in the problem? _____

What are the _____ in the problem? _____

What _____ can be asked in this problem? _____

Answer: _____

Four families went to the zoo. Each family has 2 adults and 2 children. Each child's ticket costs 14 LE and each adult's ticket costs 22 LE.

How much will the zoo tickets cost in total?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

Sarah received 352 LE for her birthday. She found some toys that costed 8 LE each. How many toys could she buy?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

There are 164 persons who play wind instruments and 20 persons who play percussion in a band. If the band instructor puts 8 students in each row. How many rows will there be?

What happens in the problem? ....

What are the values in the problem? ....

What questions can be asked in this problem? ....

Answer: ....

....

Worksheet

1 Choose the correct answer:

a) The number _____ rounded to the nearest 1,000 ≈ _____ .

(20,000 or 24,000 or 25,000)

b) 50 X 600 _____ 300 X 100.   (> or = or <)

Three billion, thirty thousand, three hundred **(in Standard Form):** _____

(3,030,300 or 3,000,030,300 or 3,030,000,300)

The **smallest** two-digit prime number is _____ . (11 or 10 or 3)

e) 360 ÷ _____ = 60.   (6 or 60 or 600)

2 Complete the following:

a) Two **weeks** and three **days** = _____ **days**.

b) The number that comes right **after** 25,999 is _____ .

c) 75,269 + 24,731 = _____ .

d) If 270 ÷ 6 = 45, then the divisor is _____ and the dividend

is _____ .

e) 26 X 53 = (_____ X 3) + (_____ X 50).

Find the result of each of the following:

a) 45,263 + 15,337 = _____ .   b) 90,250 − 24,036 = _____ .

c) 29 X 32 = _____ .   d) 890 ÷ 5 = _____ .

Arrange the following numbers in a _____ order :

352,025 , 523,205 , 253,520 , 352,250

The order : _____ , _____ , _____ , _____ .

A school has _____ , and the number of girls is _____ times the
number of boys. The students are divided into _____ classes.
How many students are there in each class?

= ....

Use numbers and symbols to represent what happens in each problem and then solve it (remember the order of operations):

a There are 194 persons in a concert. After the party, 50 persons left in cars. The rest of them want to go home by microbus. If each microbus has seats for 9 persons, how many microbuses are needed for everyone to get home?

....

....

....

b Bilal bought 6 bags of balloons. Each bag contains 18 balloons. He wants to give balloons to his friends at his birthday party. If he has 8 friends at the party, how many balloons will each friend take?

....

....

....

Guide Answers

Guide Answers

Unit 1

Lesson 1

Digit, Numeral, Number

1

		Digit	Number	numeral
a	369		✓	✓
b	24		✓	✓
c	9	✓	✓	✓
d	Forty six			✓
e	2,000		✓	✓
f	6,330,265		✓	✓
g	Eight			✓
h	7	✓	✓	✓
i	88		✓	✓
j	0	✓	✓	✓
k	Three hundred seventeen			✓
l	Ninety			✓

2 97,540 , 40,579

3 **a** Ten-thousands. **b** Hundred-thousands.
  c Tens. **d** Hundreds.
  e Ones.

4 **a** > **b** > **c** > **d** =

Lesson 2

Really Big Numbers!

1 **a** 27 Millions, 254 Thousands, 985.
  Twenty seven million, two hundred fifty four thousand, nine hundred eighty five.
  b 1 Milliard (Billion), 390 Millions, 402 Thousands, 650.
  One Milliard (Billion), three hundred ninety million,
  four hundred two thousand, six hundred fifty.

2 **a** 45,120,123 **b** 259,024,000
  c 275,000,229 **d** 9,109,056,002
  e 3,000,215,028

3 **a** 9 , 445 , 325 **b** 925 , 23 , 7
  c 24 , 0 , 305 **d** 6 , 25 , 7 , 0
  e 8 , 29 , 0 , 28

4 **a** Hundred-thousands.
  b Tens. **c** Milliards (Billions).
  d Ones. **e** Millions.
  f Hundred-millions.

5 **a** 2,587,924,388 **b** 25,348,975
  c 962,525,252

6 **a** 345,823,622 **b** 9,909,909
  c 253,332

Lesson 3

Changing Values

1 **a** 4 , Ones. **b** 2,000 , Thousands.
  c 7,000,000 , Millions.
  d 500 , Hundreds. **e** 0 , Hundred-thousands.
  f 9,000,000,000 , Billions.

2 **a** 300 **b** 70,000,000
  c 500 **d** 600,000
  e 500 **f** 80

Lesson 4

Comparing Values

1 **a** 500 **b** 6,000
  c 8 **d** 10,000
  e hundred-thousands.
  f hundreds. **g** 100 **h** 100

2 **a** 43 X 10 = 430 **b** 230 X 100 = 23,000
  c 1,000 × 5,600 = 5,600,000
  d 90,805 X 10 = 908,050
  e 900 X 1,000 = 900,000
  f 24,000 X 100 = 2,400,000
  g 25,000,000 X 10 = 250,000,000

3 **a** 10,000,000 **b** 7
  c 9,999,999,999 **d** 9,876,543
  e 50,600 **f** 98,743,210
  g 30,456,789 **h** 9,999,998
  i 600,000 **j** ten-thousands.

Lesson ⑤

Many Ways to Write

1. a. Seventeen million, two hundred thousand, five hundred twenty three.
   b. One hundred million , twenty thousand, forty five.
   c. 20,100,459: Twenty million, one hundred thousand, four hundred fifty nine.
   d. 7,000,050,200: Seven milliard (billion), fifty thousand, two hundred.

2. a. 5,025,203   b. 3,006,004,004
   c. 9,040,080,206   d. 7,000,500,200

3. a. 40,000,000 + 300,000 + 100 + 2
   b. 7,000,000,000 + 80,000+ 6
   c. 7,000,000,000 + 50,000 + 200
   d. 100,000,000 + 50,000,000 + 20,000 + 9,000 + 300 + 10 + 6

4. a. Two hundred three million, five hundred thousand, two hundred.
      200,000,000 + 3,000,000 + 500,000 + 200
   b. 5,004,019,675,
      5,000,000,000 + 4,000,000 + 10,000 + 9,000 + 600 + 70 + 5
   c. 120,090,308
      One hundred twenty million, ninety thousand, three hundred eight.

Lesson ⑥

Composing and Decomposing

1. a. 8,027,050,006.
      (8 X 1,000,000,000) + (2 X 10,000,000) + (7 X 1,000,000) + (5 X 10,000) + (6 X 1).
   b. 6,000,920,590
      6 Milliards (Billions), 0 Millions, 920 Thousands, 590.
   c. (2 X 10,000,000) + (1 X 10,000) + (4 X 1,000) + (2 X 10) + (3 X 1).
      20 Millions , 14 Thousands , 23.

2. a. 80,070,021   b. 2,000,098,500
   c. 900,250,209

3. a. 60,000,000+ 7,000,000 +100,000 + 20,000 + 5,000 + 10 + 2.
   b. 7,000,000 + 20,000 + 4,000 + 600 +50.
   c. 70,000,000+ 5,000,000 + 30,000 + 400 + 60.

4. a. (6 X 1,000,000,000) + (9 X 100,000,000). + (1 X 10,000) + (4 X 1).
   b. (8 X 1,000,000) + (7 X 10,000) + (2 X 100)
   c. (1 X 10,000,000) + (2 X 100,000) + (5 X 100) + (4 X 10) + (8 X 1).
   d. (2 X 1,000,000) + (2 X 100,000) + (5 X 10) + (7 X 1)

Lesson ⑦

Comparing Really Big Numbers

1. a. >   b. >   c. <   d. >   e. =

2. (Many answers can be written).
   a. 600,000   b. 300
   c. 6,000,000   d. 30,000

3. (Many answers can be written).
   a. 200,000 ، 300,000
   b. 300,000 ، 100,000
   c. 72,000,000   d. 7,500,000,000
   e. 100,000,000 ، 200,000,000

Lesson ⑧

Comparing Numbers in Multiple Forms

1. a. =   b. >   c. <   d. <   e. >

2. (Many answers can be written)
   a. 8,000,000   b. 10,000,000

3. (Many answers can be written).
   a. 100,000,000 + 500,000
   b. 10,000,000 + 500,000

4. (Many answers can be written).
   a. (3 X 10,000)   b. (6 X 1,000,000)

5. (Many answers can be written)
   a. Four hundred thousand
   b. One million.

Lesson 9

Descending and Ascending Numbers

1. a. 520,000 ، 502,000 ، 250,000 ، 205,000
   b. 643,205 ، 436,250 ، 364,250 ، 346,205
2. a. 100,000 ، 900,900 ، 999,999 ، 9,000,000
   b. 78,090 ، 78,091 ، 78,999 ، 79,010 ، 79,100
3. a. (3) 3,010,002,050   b. (4) 3,100,020,005
   c. (2) 3,001,200,500   d. (5) 3,100,200,100
   e. (1) 3,001,002,005
4. a. (3) 4,000,060,007   b. (2) 4,000,600,070
   c. (1) 4,000,600,700   d. (4) 4,000,006,700
   e. (5) 4,000,006,070

Lesson 10

Predicting the Unpredictable

1. a. 40,000,000   b. 3,000,000,000
   c. 7,000,000,000   d. 3,000,000
   e. 10,000,000

Lesson 11

Rounding Rules

First: The midpoint strategy·

1. a. Midpoint: 235   → 238 ≈ 240.
   b. Midpoint: 95   → 98 ≈ 100.
2. a. Midpoint: 250   → 278 ≈ 300.
   b. Midpoint: 7,450 → 7,429 ≈ 7,400
3. a. Midpoint: 4,500 → 4,500 ≈ 5,000.
   b. Midpoint: 11,500 → 11,157 ≈ 11,000.
4. a. Midpoint: 9,500,000 → 9,208,504 ≈ 9,000,000
   b. Midpoint: 22,500,000
      22,699,205 ≈ 23,000,000.

Second: The place-value strategy:

1. a. 260   b. 370
   c. 70   d. 100
   e. 12,260 f. 124,000
2. a. 800   b. 6,900

c. 71,900   d. 1,000
e. 30,000   f. 1,500
3. a. 16,000   b. 90,000
   c. 1,000,000   d. 453,000,000
   e. 669,460,000   f. 7,000,000,0
4. a. 70 , 10 + 50 = 60 (✗) ,
      10 + 60 = 70 (✓)
   b. 415 , 100 + 200 = 300 (✗) ,
      200 + 200 = 400 (✓)
   c. 572 , 200 + 200 = 400 (✗) ,
      300 + 300 = 600 (✓)
   d. 5,911 , 3,000 + 2,000 = 5,000 (✗) ,
      3,000 + 3,000 = 6,000 (✓)

Unit 2

Lesson 1

Properties of Addition and Subtraction

1. a. Commutative.   b. Neutral Element.
   c. Associative.   d. Commutative.
   e. Neutral Element.
   f. Associative.
2. a. 3 , Commutative.
   b. 17 ,Commutative
   c. 5 , Neutral Element.
   d. 0 , Neutral Element.
   e. 3 , Associative.   f. 25 , 20 , Associative.
3. a. 48 , 48 , Associative.
   b. 214 , 214 , Neutral Element.
   c. 86 , 86 , Associative.
   d. 35 , 35 , Associative and Neutral Element.

Lesson 2

Mental Math Strategies

1. a. 60 , 80   b. 10 , 20
   c. 230 , 240   d. 300 , 300
   e. 4,000 , 3,000
2. a. 54   b. 101

c 644   **d** 29

e 43   **f** 148

3 a 190   **b** 562

  c 51   **d** 302

4 a 8   **b** 10

  c 95

5 a Compensation , 113.

  b Compensation , 26.

  c Counting Up , 7.

  d Composing and Decomposing , 329.

  e Composing and Decomposing , 609.

  f Compensation , 199

Lesson 3

Addition with Regrouping

1 a 89,900   **b** 9,030,290

  c 10,000,000   **d** 11,110

  e 1,000,005   **f** 1,010,511,000

2 a 14,102 , 14,100 (✓) , 14,100 (✓) , 14,000 (✗).

  b 9,872 , 9,870 (✓) , 9,900 (✗) , 10,000 (✗).

3 Estimation: 140 + 170 = 310.

  Actual Answer: 142 + 165 = 307

4 Estimation: 400 + 500 = 900

  Actual Answer: 383 + 462 = 845.

5 Estimation: 2,000 + 2,000 = 4,000

  Actual Answer: 2,420 + 2,420 = 4,840.

Lesson 4

Subtraction Strategies

1 a 491   **b** 3,845

  c 2,999   **d** 8,950

2 a 262   **b** 4,063

  c 2,899   **d** 8,202

Lesson 5

Subtraction with Regrouping

1 a 1,431   **b** 13,187

2 a 2,142 , 2,000   **b** 28,422 , 30,000

3 15,422,140 − 6,350,300 = 9,071,840

  15,000,000 − 6,000,000 = 9,000,000

4 255,000 − 6,200 = 248,800

5 3,548 − 1,672 = 1,876   **6** 3,452 − 1,267 = 2,185

Lesson 6

Bar Models, Variables and Story Problems

1 a Equation: x = 8,500 − 6,250

  Solution: x = 2,250

8,500	
x	6,250

  b Equation: x = 2,050 − 985

  Solution: x = 1,065

2,050	
x	985

  c Equation: y = 4,200 − 3,350

  Solution: y = 850

4,200	
y	3,350

  d Equation: a = 90,950 + 750,500

  Solution: a = 841,450

a	
90,950	750,500

2 a Solution: x = 7,120 − 5,200

  x = 1,920

7,120	
x	5,200

  b Solution: y = 22,120 + 18,850

  y = 40,970

y	
22,120	18,850

  c Solution: a = 6,000 − 812

  a = 5,188

6,000	
812	a

  d Solution: w = 7,600 − 4,455

  w = 3,145

7,600	
w	4,455

Lesson 7

Solving Multistep Story Problems with Addition and Subtraction

1 1,075 + 1,120 + 1,325 = 3,520

  6,853 − 3,520 = 3,333

2 59,000 + 27,525 + 32,975 = 119,500

  150,000 − 119,500 = 30,500

3 320,000 + 200,000 = 520,000

  520,000 − 420,195 = 99,805

Unit 3

Lesson 1

Ant Travel

1. **a** centimeter. **b** kilometer.
   c millimeter. **d** kilometer.
   e meter

2. **a** 5,000 **b** 2 **c** 9
   6 900 50
   20,000 30 70
   35 40,000 600

3. **a** 840 cm. **b** 5,020 cm.
   c 7,070 m. **d** 15,120 m
   e 3 m , 72 cm. **f** 10 m , 5 cm.
   g 9 km , 300 m. **h** 70 km , 20 m.

4. **a** 625 cm. **b** 9,032 cm
   c 4,138 m. **d** 14,225 m.
   e 4 m , 25 cm. **f** 20 m , 3 cm.
   g 7 km , 529 m. **h** 900 m , 50 cm.

5. 100,000 cm = 1,000 m = 1 km.

6. 15 dm = 1,500 mm.

7. 500 ÷ 50 = 10 minutes.
   50 × 30 = 1,500 m.

Lesson 2

The Weight Can Wait

1. **a** kilogram. **b** gram.
   c gram. **d** kilogram.

2. **a** Gram Kilogram **b** Gram Kilogram
   2,000 2 9,000 9
   15,000 15 5,000 5
   61,000 61 12,000 12

3. **a** 9,105 grams. **b** 32,008 grams.
   c 8 kg , 235 gm. **c** 41 kg, 623 gm.

4. **a** 6,000 gm. **b** 200,000 gm.
   c 90 kg. **d** 200 kg.
   e 3 kg 624 gm. **f** 67 kg 26 gm.
   g 5,583 gm. **h** 50,009 gm.

5. 45,200 gram.

6. 5 kg = 5,000 gm , 7 kg = 7,000 gm.
   The sum = 5,000 + 500 + 7,000 = 12,500 gm.

Lesson 3

Fill It Up

1. **a** 50,000 **b** 8,000
   200 7
   520,000,000 18,000

2. **a** 35,020 mm. **b** 9,252 milliliter.
   c 3 liter 22 milliliter.
   d 200 liter 200 milliliter.

3. **a** 3,000 milliliter. **b** 50,000 milliliter.
   c 700 liter. **d** 15 liter.
   e 7 liter 320 milliliter.
   f 20 liter 8 milliliter.
   g 11,011 milliliter.
   h 10,002 milliliter.

4. 45 liter = 45,000 milliliter.
   30 liter , 250 milliliter = 30,250 milliliter.
   Amount of gasoline = 30,250 – 45,000
   = 14,750 milliliter

5. 2,500 milliliter , 1,250 milliliter.
   Amount of juice = 2,500 + 1,250
   = 3,750 milliliter.

6. 2 liter = 2,000 milliliter.
   The amount of soda water = 2,000 – (320 + 250)
   = 2,000 – 570
   = 1,430 milliliter.

Lesson 4

Measurement and Unit Conversions

1. **a** 3 X 100 = 300 cm.
   b 120 ÷ 10 = 12 dekameters.
   c 50 X 10 = 500 centigrams.
   d 1,200 ÷ 10 = 120 grams.
   e 2,000 ÷ 100 = 20 deciliters.
   f 42 X 100 = 4,200 liters.

2 **a** 200 , 20   **b** 400 , 40
c 250 , 2500   **d** 700 , 70
e 120 , 1,200   **f** 500 , 50

3 400 m = 40,000 cm.

4 4,000 milliliters = 4 liters.

Lesson 5
What time is it?

1 Answer by yourself.

2 **a** 7 , 21 , 35 , 49 , 63
b 24 , 96 , 144 , 192 , 240
c 60 , 120 , 300 , 480 , 600
d 60 , 180 , 360 , 420 , 540

3 **a** 16   **b** 178
c 87   **d** 130
e 335   **f** 650
g 305

4 **a** 2,6   **b** 6,3
c 2,2   **d** 5,10
e 2,30   **f** 5,30
g 1,30   **h** 10,5

5 3 + 4 = 7 days.
7 days = 168 hours.

6 3 + 2 + 4 = 9 hours.
9 hours = 540 minutes

Lesson 6
How long does it take?

1 **a** 9 : 00   **b** 8 : 10
c 6 : 42   **d** 4 : 33
e 9 : 50   **f** 6 : 27

2 8 : 45 + 1 : 25 = 9 : 70
= 10 : 10

3 3 : 30 + 2 : 45 = 5 : 75
= 6 : 15

4 1 : 22 + 2 : 12 + 1 : 57 = 4 : 91
= 5 : 31

Lesson 7
Scaled Measurement

1 **a** 9 x 5 = 45   **b** 3 x 8 = 24
5 x 9 = 45   8 x 3 = 24
45 ÷ 5 = 9   24 ÷ 3 = 8
45 ÷ 9 = 5   24 ÷ 8 = 3

2 **a** 15   **b** 60 minutes.
c 150 minutes.   **d** 135 minutes.
e 105 minutes.   **f** 8 students.
g 18 students.

Lessons 8-9
Measuring the World Around Me

1 Weight of potatoes and onions:
• 2,950 – 1,075 = 1,875 gm.
• 2,950 + 1,875 = 4,825 gm.

2 12 weeks = 84 days.
The difference = 84 – 45 = 39 days.

3 20,000 ml = 20 L.
100 – 20 = 80 L

4 8,000 + 1,000 + 500 + 225 + 275
= 19,000 gm = 19 kg

5 12 ÷ 3 = 4 m = 400 cm.

6 4 X 500 = 2,000 ml
= 2 L
2 X 7 = 14 L

7 5 X 500 = 2,500 gm.
100,000 + 2,500 = 102,500 gm.

Unit 4

Lesson 1
Marching Ants

1 **a** 26 cm.   **b** 78 cm.   **c** 100 cm.

2 **a** 140 cm.   **b** 32 m.   **c** 6 m.

3

70 m

30 m

60 m

40 m

4 P = 20 X 4

= 80 cm.

30 m

10 m

3 P = 40 cm.   A = 70 cm².

4

25 cm

4 cm

20 cm

5 cm

5 $\frac{1}{2}$ P = 60 m.   30 m

L = 60 – 30

= 30 m.
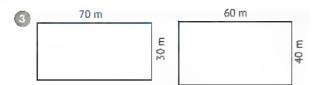

30 m

Lesson ②

Fill the Space

1 ⓐ 40 cm².   ⓑ 250 cm².   ⓒ 400 cm².

2 8 X 6 = 48 m².

3 9 X 9 = 81 cm².

4 Area = 12 X 2 = 24 m².

P = (12 + 2) X 2 = 28m

5 P = (8 + 3) X 2

= 22 cm.

8 cm

3 cm

P = (6 + 4) X 2

= 20 cm.

6 cm

4 cm

6 P = (5 + 2) X 2

= 14 cm.

A = 5 X 2

= 10 cm².

5 cm

2 cm

7 P = (6 + 5) X 2

= 22 cm.

6 cm

5 cm

Lesson ③

Something Is Missing!

1 ⓐ 34 cm , 70 cm².   ⓑ 9 m , 54 m².

ⓒ 8 cm , 96 cm².   ⓓ 9 cm , 26 cm.

ⓔ 6 dm , 28 dm.

2 ⓐ 24 cm , 36 cm².   ⓑ 7 cm , 49 cm².

ⓒ 8 mm , 32 mm.

Lesson ④

Odd Shapes

1 P = 86 cm , A = 280 cm².

2 P = 100 cm , A = 324 cm².

3 P = 52 cm , A = 114 cm².

Lesson ⑤

Growing Dimensions

1 Hussam's Farm:

P = 30 m.

A = 50 m².

10 cm

5 cm

Emad' Farm:

P = 90 m.

A = 450 m².

30 cm

15 cm

2 Length of the house = 40 ÷ 2

= 20 m.

Width of the house = 40 ÷ 4

= 10 m.

Area of the house = 20 X 10

= 200 m²

Area of the land = 40 X 40

= 1,600 m².

Area of the garden = 1,600 - 200

= 1,400 m².

3 Width of the first mural = 24 ÷ 8 = 3 m.

Width of the second mural = 3 X 3 = 9 m

P = 34 m.   A = 72 m².

Unit 5

Lesson 1

Understanding Multiplicative Comparison

1. **a** 5 times. **b** triple.
   c 5 times. **d** triple.
   e 7 times.

2. **a** 6 X 4 = 24 **b** 5 X 3 = 15
   c 7 + 7 + 7 = 21 **d** 6 + 6 + 6 + 6 + 6 = 30

3. **a** 16,4 **b** 14,7,7
   c 8,4,2 **d** 27,9,3

4. **a** | 7 | 7 | 7 | 7 | **b** | 4 | 4 | 4 | 4 | 4 | 4 | 4 |
   c | 8 | 8 | 8 | **d** | 10 | 10 | 10 |

Lesson 2

Creating Multiplicative Comparison Equations

1. **a** $x = 4 \times 7$ **b** $y = 4 \times 3$
   c $m = 2 \times 7$ **d** $18 = 6 x$
   e $24 = 4 y$ **f** $48 = 8 x$
   g $21 = 3 a$ **h** $36 = 9 \times m$

2. **a** $x = 5 \times 4$ **b** $12 = 3 x$
   c $21 = 7 y$ **d** $x = 2 \times 4$
   e $18 = 6 m$

Lesson 3

Solving Multiplicative Comparison Equations

1. **a** $X = 4 \times 8$, $x = 32$
   b $y = 5 \times 6$, $y = 30$
   c $m = 2 \times 9$, $m = 18$
   d $18 = 6 a$, $a = 3$
   e $36 = 4 b$, $b = 9$
   f $42 = 7 n$, $n = 6$

2. **a** $15 = 3a$, $a = 5$
   b $b = 5 \times 3$, $b = 15$
   c $20 = 5a$, $a = 4$
   d $24 = 3y$, $y = 8$

Lesson 4

Commutative Property of Multiplication

1. **a** 7 **b** 6
   c 6 **d** 9

2. **a** 8 **b** 10
   c 6 **d** 8

3. $5 \times 6 = 6 \times 5$

4. $5 \times 8 = 8 \times 5$

Lesson 5

Patterns of Multiplying by 10s

1. **a** 0 **b** 0
   c 1 **d** 9
   e 7 **f** 1

2. **a** 80 **b** 900
   c 6,000 **d** 120
   e 2,000 **f** 30,000

3. **a** 10 **b** 1,000
   c 100 **d** 100
   e 10 **f** 10

Lesson 6

Exploring Pattens in Multiplication

1. **a** 1,200 **b** 1,500
   c 40,000 **d** 10,000
   e 100,000 **f** 400,000

2. **a** 50 **b** 60
   c 500 **d** 20
   e 5000 **f** 100

3. $1,000 \times 2 = 2,000$ mm.

Lesson 7

Exploring More Pattens in Multiplication

1. a) $(5 \times 3) \times 2 = 15 \times 3 = 30$
   b) $(3 \times 4) \times 2 = 12 \times 2 = 24$
   c) $2 \times (5 \times 4) = 2 \times 20 = 40$
   d) $10 \times (6 \times 5) = 10 \times 30 = 300$

2. a) 3, 5   b) 3, 4
   c) 7, 9   d) 7, 2

3. $6 \times 2 \times 3 = 6 \times (2 \times 3)$
   $= 6 \times 6 = 36$ eggs.

4. $4 \times 2 \times 5 = 4 \times (2 \times 5)$
   $= 4 \times 10 = 40$ bottles.

Lesson 8

Applying Patterns in Multiplication

1. a) 10   b) 100
   c) 8   d) 5
   e) 60

2. a) 240   b) 240
   c) 4,000   d) 6,300
   e) 40,000   f) 42,000

Unit 6

Lesson 1

Identifying Factors of Whole Numbers

1. a) 1, 2, 3, 4, 6, 12   b) 1, 2, 4, 5, 8, 10, 20, 40
   c) 1, 2, 3, 4, 6, 9, 12, 18, 36

2. a) 1, 5, 25   b) 1, 2, 3, 4, 6, 8, 12, 16, 24, 48
   c) 1, 19

3. a) 10, 20, 30
   b) 5   2, 5, 10
   2   5   2

Lesson 2

Prime and Composite Numbers

1. a) 3, 5   b) 2, 3, 6, 9
   c) 2, 5   d) 2, 3, 6, 9
   e) 2, 5   f) 3, 9

2. 2, 3, 5, 7, 11, 13, 15, 17, 19, 23, 29, 31, 37, 41, 43,
   47, 53, 59, 61, 67, 71, 73, 79, 83, 89, 97

3. a) 1, 2, 7, 14   (Not a prime number)
   b) 1, 2, 23, 46   (Not a prime number)
   c) 1, 2, 11, 22   (Not a prime number)
   d) 1, 59   (prime number)
   e) 1, 2, 5, 10, 25, 50   (Not a prime number)
   f) 1, 29   (prime number)

4. a) 28   b) 48
   c) 35

Lesson 1

Greatest Common Factor (G.C.F)

1. a) 4   b) 10
   c) 7   d) 1

2. Largest number of groups = (G.C.F) = 9
   Number of boys in each group
   $= 27 \div 9 = 3$ boys.
   Number of girls in each group
   $= 36 \div 9 = 4$ girls.

3. Number of snacks
   (G.C.F) = 12
   Number of apples in each
   package $= 24 \div 12 = 2$ apples.
   Number of candy in each
   package $= 36 \div 12 = 3$ candies

Lesson 4

Identifying Multiples of Whole Numbers

1. 0, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40

2. 0, 5, 10, 15, 20, 25, 30, 35, 40

3. a 4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48, 52, 56, 60, 64, 68, 72, 76, 80, 84, 88, 92, 96, 100.
   b 10, 20, 30, 40, 50, 60, 70, 80, 90, 100.

4. a 0, 16, 32, 40, 56, 64, 72, 80.
   b 0, 6, 12, 18, 24, 30, 36, 42, 48, 54, 60.
   c 0, 7, 14, 21, 28.
   d 27, 54, 99, 36, 45.

Lesson 5

Common Multiples

1. 0, 6, 12, 18
2. 0, 12, 24
3. a 8, 16   b 10, 20
   c 24, 48   d 42, 84
4. a 40, 50, 60, 70   b 48, 60, 72, 84
   c 72, 96, 120

Lesson 6

Relationships Between Factors and Multiples

1. a 35, 5,7, 5,7, 35   b 48 = 6 X 8, 8, 8, 48
   c 24   d 27
   e 2,3 are factors of 6 or 6 is a multiple of 2,3.

Unit 7

Lesson 1

The Area Model Strategy

1. a 64   b 84
   c 170
2. a 120   b 522
   c 268   d 686
3. 702   4. 138

Lesson 2

The Distributive Property

1. a 1,248   b 2,244
   c 47,106   d 10,748
2. a 3,000   b 1,944
   c 19,425   d 39,696
3. 980 cm.

Lesson 3

The Partial Products Algorithm

1. a 2,048   b 23,916
   c 567   d 5,616
   e 500   f 76,185

Lesson 4

The Standard Multiplication Algorithm

1. a 1,200 , 1,422 , 1,422
   b 63,000 , 66,825 , 66,825
2. a 336   b 1,944
   c 29,232   d 216
   e 1,192   f 39,330

Lesson 5

Connecting Strategies

1. a 1,548   b 270
   c 4,298   d 21,375
   e 25,040
2. a 3,192   b 372
   c 1,640   d 372

Lesson 6

Two-Digit Multiplication

1. a 960   b 2,960
2. a 2,800   b 5,740
3. a 7,650   b 810
4. a 450   b 700
   c 840   d 2,400

Lesson 7

Area Models and 2-Digit Multiplication

1 **a** 2,205   **b** 3,827
   c 1,932   **d** 1,813

2 $215 \times 6 = 1,290$

3 $35 \times 38 = 1,330$

Lesson 8

Algorithms and 2-Digit Multiplication

1 **a** 1,000 , 1,484 , 1,484
   b 2,400 , 3,216 , 3,216
   c 2,700 , 3,040 , 3,040

Lesson 9

Putting It All Together

1 $210 \times 2 = 420$ kg.
  $420 - 130 = 290$ kg.

2 $6 + 8 = 14$ km.
  $14 \times 6 = 84$ km.

3 $76 \times 3 = 228$ seats
  $228 - 53 = 175$ seats
  $76 + 228 + 175 = 479$ seats.

4 $65 \times 3 + 55 \times 2 = 305$ km.
  $500 - 305 = 195$ km.

5 $270 - 70 = 200$ km.
  $200 + 270 + 20 = 670$ km.

Lesson 10

Exploring Remainders

1 **a** 25 , 4 , 6 , 1   **b** 30 , 6 , 5 , 0
   c 28 , 5 , 5 , 3   **d** 16 , 3 , 5 , 1
   e 15 , 2 , 7 , 1

2 $60 \div 40 = 1$ R 20
  Number of buses = 2.
  Number of empty seats
  = 40 − 20 = 20

2 $48 \div 5 = 9$ R 3
  Number of boxes = 10 boxes.

Lesson 11

Patterns and Place Value in Division

1 **a** $45 \div 9 = 5$, 500   **b** $15 \div 5 = 3$, 3,000
   c $8 \div 4 = 2$, 200   **d** $8 \div 4 = 2$, 2,000

2 **a** 300   **b** 500
   c 2,000   **d** 500

3 $9 \times 90 = 810.$
  All workers can't ride the same metro.

4 $360 \div 6 = 60$ patties.

5 $540 \div 9 = 60$ boxes.

Lesson 12

The Area Model and Division

1 **a** 14   **b** 22 R2.
   c 152 R1.   **b** 400

2 $868 \div 8 = 108$ R4.

3 $492 \div 4 = 123$ cars.

Lesson 13

The Partial Quotients Algorithm

1 **a** 16 R3   **b** 28
   c 125   **d** 234 R1
   e 2,312   **f** 2,092 R2

2 $480 \div 3 = 160$ cups.

3 $1,026 \times 5 = 5,130$ cans.
  $5,130 \div 2 = 2,565$ cans.

Lesson 14

The Standard Division Algorithm

1 **a** 60 , 90   − 20 , 30
   b 600 , 900 − 200 , 300
   c 200 , 240 − 50 , 60
   d 4,000 , 6,000 − 2,000 , 3,000
   e 4,000 , 8,000 − 1,000 , 2,000

1 **a** 13   **b** 24 R1
   c 152   **d** 139 R3
   e 2,819   **f** 3,269

2 $784 \div 8 = 98$ passengers.

Lesson 15

Division and Multiplication

1. a) 3 – 100 – 200 – 169
   b) 2 – 60 – 70 – 66
   c) 3 – 600 – 700 – 608
   d) 3 – 600 – 700 – 603
2. a) 192 – 3 – 100 – 200
   b) 93 – 2 – 90 – 100
3. 219 ÷ 3 = 73 km.

Lesson 16

Solving Challenging Story Problems

1. 14 × 6 = 84 kg
   84 + 14 = 98 kg.
   98 ÷ 7 = 14 bags.
   Number of bags = 14 bags.
2. 347 × 4 = 1,388 balls
   1,388 – 799 = 589 balls.
3. 21 ÷ 3 = 7 bottles.
4. 814 × 3 = 2,442 pages.
   2,442 + 814 = 3,256 pages.

Unit 8

Lesson 1

Problem-Solving Strategies

1. a) 468   b) 8,774
   c) 1,116   d) 113
2. a) 5,159 , 4,000
   b) 5,556 , 4950
   c) 762 , 1,000
   d) 210 R2 _ 200 , 300
3. a) 51,613   b) 20,715
   c) 1,536   d) 149

Lesson 2

Which Comes First?

1. a) 22   b) 5   c) 15
   d) 15   e) 1   f) 90
   g) 6   h) 12   i) 23
   j) 9   k) 10   l) 18
   m) 1   n) 14   o) 2
   p) 10   q) 6   r) 5

2. a) 34 , △ = 10 , = 6, ▭ = 4
   b) 58 , ⚖ = 6 , △ = 3, $\frac{?}{?}$ = 11
   c) 98 , = 4 , ▸ = 9, = 10
   d) 38 , = 7 , ○ = 3, = 4

Lesson 3

Order of Operations

1. a) 26   b) 21   c) 3
   d) 12   e) 11   f) 28
   g) 27   h) 1   i) 15

Lesson 4

The order of Operations and Story Problems

1. 246 – 24 = 222 bars.
   222 ÷ 6 = 37 bars.
2. 14 × 14 = 169 km.
   196 + 56 = 252 km.
3. 27 + 12 = 39 minutes.
   5 × 39 = 195 minutes.
4. 172 + 8 = 180 persons
   180 ÷ 9 = 20 microbuses.
5. 198 – 18 = 180 berries.
   180 ÷ 6 = 30 pancakes.
6. Answer by yourself.

h) 3,000,300,000

3 a) 400,000,000 + 100,000 + 20,000 + 600 + 3

b) 5,000,000,000 + 200,000,000 + 90,000 + 50

c) 20,000,000 + 700,000 + 50,000 + 600

d) 200,000,000 + 50,000,000 + 500 + 20 + 4

e) 6,000,000,000 + 800,000,000 + 10,000,000 + 5,000,000 + 400,000 + 30

f) 9,000,000,000 + 30,000,000 + 5,000,000 + 900,000 + 5,000 + 300 + 6

g) 100,000,000 + 90,000,000 + 600,000 + 20,000 + 4,000 + 10 + 7

h) 60,000,000 + 3,000,000 + 500 + 90 + 7

4 a) • Four milliard (billion), eighty million, one hundred seven thousand, two hundred fifty.

• 4,000,000,000 + 80,000,000 + 100,000 + 7,000 + 200 + 50

b) • Four milliard (billion), one hundred twenty five thousand, six hundred ninety five.

• 4,000,000,000 + 100,000 + 20,000 + 5,000 + 600 + 90 + 5

c) • 350,905,255

• 300,000,000 + 50,000,000 + 900,000 + 5,000 + 200 + 50 + 5

d) • 3,600,070,015

• 3,000,000,000 + 600,000,000 + 70,000 + 10 + 5

e) • 700,054,325

• Seven hundred million, fifty four thousand, three hundred twenty five.

f) • 7,204,030,293

• Seven milliard (billion), two hundred million, four, thirty thousand, two hundred ninety three.

5 a) (3 x 100,000,000) + (2 x 100,000) + (5 x 10,000) + (1 x 100) + (2 x 1).

b) (7 x 1,000,000,000) + (5 x 10,000,000) + (8 x 100) + (6 x 10) + (5 X 1)

c) (3 x 1,000,000,000) + (6 x 1,000,000) + (8 x 10,000) + (5 x 100)

d) 2,090,807,376

e) 3,600,053,080

f) 256,009,483

6 **a** • 8,007,206,059
- Eight milliard (billion), seven million, two hundred six thousand, fifty nine.
- 8,000,000,000 + 7,000,000 + 200,000 + 6,000 + 50 + 9
- (8 x 1,000,000,000) + (7 x 1,000,000) + (2 x 100,000) + (6 x 1,000) + (5 x 10) + (9 x 1)

b • 920,702,800
- 900,000,000 + 20,000,000 + 700,000 + 2,000 + 800
- (9 x 100,000,000) + (2 x 10,000,000) + (7 x 100,000) + (2 x 1,000) + (8 x 100)

c • 39,800,202
- Thirty nine million, eight hundred thousand, two hundred two.

d • 2,890,105
- Two million, eight hundred ninety thousand, one hundred five.
- (2 x 1,000,000) + (8 x 100,000) + (9 x 10,000) + (1 x 100) + (5 x 1).

7 **a** Thirty five million, two hundred thousand, eight hundred ten.

b Eight hundred seven million, fifty thousand, three hundred two

c 650,013,526   **d** 7,400,002,030

5 950 – (25 + 37) = 888 gm.

6 106 – 10 = 96 cm.

7 3,000 – 2,000 = 1,000 m = 1 km.

8 7,450 + 17,120 = 24,570 gm.

9 8,000 – 2,829 = 5,171 ml.

10 540 – 250 = 290 min.

11 300 + 500 = 800 mm = 80 cm.

12 20,000 – 17,000 = 3,000 gm.

13 4,000 – (1,200 + 950) = 1,8,50 ml.

14 5 : 10 - 3 : 45 = 1 : 25 = 85 min.
Yes, he broke the rule.
85 – 80 = 5 min

15 12 + 3 = 4 m = 400 cm.

16 30 x 5 = 150 min.

17 5,000 x 9 = 45,000 m = 45 km.

18 10 x 50 = 500 gm.

19 6 x 5,000 = 30,000 m = 30 km

20 8 x 30 = 240 min = 4 hours.

21 10,000 + 2,000 = 5 days.

22 5 x 20 = 100 km = 100,000 m.

- **h** 81 cm².

2 A = 8 x 20 = 160 cm².

3 P = 6 + 6 + 2 + 6 + 6 + 2 = 28 m.
A = 12 x 2 = 24 m².

4

12 | 3
P = 12 + 3 + 12 + 3 = 30
A = 12 x 3 = 36

9 | 4
P = 9 + 4 + 9 + 4 = 26
A = 9 x 4 = 36

5

9 cm | 2 cm
P = (9 + 2) x 2 = 22 cm

6 cm | 3 cm
P = (3 + 6) x 2 = 18 cm

6 P = (5 + 2) x 2 = 7 x 2
= 14 m.
A = 5 x 2 = 10 m².

5 m | 2 m

7 P = (6 + 5) x 2 = 11 x 2
= 22 m.

6 m | 5 m

8 $P = 5 \times 4$

    $= 20$ cm.

(square with sides 5, 5, 5, 5)

9 **a** L x W   **b** L x L

     c 24 ، 27   **d** 200

     e $A = 3 \times 3 = 9$ cm².

        $A = 3 \times 7 = 21$ cm².

        $A = 9 + 21 = 30$ cm².

10 **a** A = L x W   **b** A = L x L

     c 49   **d** 32

     e 24

Worksheet

1 **a** 64   **b** 70,000

     c 400,040,004   **d** 18 cm.

     e 45 + 30 + 4

2 **a** 50 cm².   **b** 50,000

     c 45,099,999   **d** 5

     e 100

3 **a** >   **b** <

     c =   **d** >

4 **a** $A = 16 + 32 = 48$ cm².

     b $P = (4 + 12) \times 2 = 16 \times 2 = 32$ cm.

5 $A = 6 \times 8 = 48$ m².

Lesson 3

1 **a** 26 cm ، 40 cm².   **b** 6 m ، 24 m².

     c 6 m ، 42 cm².

     d 10 mm ، 150 mm².

     e 10 mm ، 200 mm².

     f 7 cm ، 26 cm².   **g** 9 cm ، 32 cm.

     h 4 dm ، 20 dm.   **i** 5 dm ، 26 dm.

2 **a** 16 cm ، 16 cm².   **b** 28 cm ، 49 cm².

     c 8 cm ، 64 cm².   **d** 5 m ، 25 m².

     e 6 mm ، 24 mm.   **f** 9 mm ، 36 cm

3 8 + 8 + 4 + 5 + 4 + 3 = 32 meters.

     $A = 12 + 32 = 44$ m².
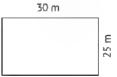

4 $12 \times 12 = 144$

     So, the side length = 12 cm.

(square labeled 12 m, 12 cm)

5 $110 \div 2 = 55$ m

     $55 - 25 = 30$ m.

(rectangle labeled 30 m, 25 m)

6 $W = 900 \div 45 = 20$ cm.

7 $100 \div 2 = 50$ cm. $W = 50 - 30 = 20$ cm.

     c 100,000 ، 100 ، 10   **d** 218

     e 541

3 **a** $P = 20 \times 4 = 80$ cm ، $A = 20 \times 20 = 400$ cm².

     b $P = (8 + 4) \times 2 = 12 \times 2 = 24$ cm ،

        $A = 8 \times 4 = 32$ cm².

4 $A = 8 \times 4 = 32$ km².

Lesson 4

1 **a** $P = 38$ cm , $A = 48$ cm².

     b $P = 58$ cm , $A = 150$ cm².

     c $P = 64$ cm , $A = 176$ cm².

     d $P = 76$ cm , $A = 256$ cm².

     e $P = 20$ cm , $A = 16$ cm².

2 $P = 40$ cm ، $A = 60$ cm².

3 $P = 30$ cm ، $A = 32$ cm².

4 **Table (1):** $A = 2 \times 1 = 2$ m².

     Table (2): $A = 4 \times 1 = 4$ m².

Table (3):   A = 2 x 1 = 2 m².

A = 2 + 4 + 2 = 8 m².

Lesson 5

1 A = 20 x 5 = 100 cm² ،

P = (20 x 2) + (5 x 2) = 50 cm.

2 A = 12 x 4 = 48 cm² ،

P = (12 + 4) x 2 = 32 cm.

3 W = 20 ÷ 5 = 4 m.

P = (12 x 2) + (15 x 2) = 24 + 30 = 54 m.

4 P = (5 + 3) x 2 = 16 m.

P = (10 x 2) + (6 x 2) = 32 m.

A = 10 x 6 = 60 m².

5 A = 18 x 6 = 108 m² ،

A = 3 x 2 = 6 m²

108 – 6 = 102 m².

5 16 X 95 = 1,520 piasters.
6 55 X 45 = 2,475 pounds.
7 12 X 45 = 540 pounds.

Worksheet 5

1. a) 350,000,350 b) = c) 986,310
   d) 34 X 25 e) 5

2. a) 3 b) 0 , 6 , 12 , 18
   c) Millions
   d) 22 e) 9,005,006,002

3. a) 3,400 b) 1,080 c) 3,7432
   d) 81,000

4. 24 X 30 = 720 hours.

Lesson 1

1. 56 X 6 = 336 pounds, 24 X 3 = 72 pounds
   336 + 72 = 408 pounds.

2. 98 X 12 = 1,176 pounds, 80 X 10 = 800 pounds.
   1.176 + 800 = 1,976 pounds.

3. 300 – 55 = 245 km, 240 + 300 + 245 = 785 km.

4. 65 X 3 = 195 seedlings , 55 X 2 = 110 seedlings
   195 + 110 = 305 seedlings.

5. 27 X 62 = 1674 accidents, 1674 X 7 = 11718 accidents.

6. 27 X 7 = 189 pages, 62 X 7 = 434 pages.
   198 + 434 = 623 pages.

7. 65 + 55 = 120 tickets, 500 – 120 = 380 tickets.

8. 126 X 3 = 378 km, 378 + 12 = 390 km.

9. 96 X 12 = 1,152 stickers, 1,152 – 300 = 852 stickers.

10. 60 X 24 = 1,440 minutes, 1,440 X 7 = 10,080 minutes

Worksheet 6

1. a) 5,596 b) = c) 0
   d) 72 e) 3 gm

2. a) 50 b) 100,000 c) 45 = 9a
   d) 12 e) 386

3. a) 2,075 b) 2,880 c) 912
   d) 40,500

4. 12 X 3 = 36 pounds, 25 X 7 = 175 pounds.
   36 + 175 = 211 pounds.

e 3,275 R 2 , 3,000 and 4,000 , 4 , 3,275 R 2.

4 784 ÷ 7 = 112 passengers.

5 567 ÷ 3 = 189 books.

6 144 + 216 = 360   ,   360 ÷ 8 = 45 students.

Worksheet

1 **a** 40,000   **b** >   **c** 1,000

d 110   **e** 5

2 **a** 20   **b** 27   **c** 7,089

d 23   **e** 65

3 **a** 23   **b** 68   **c** 1,213

4 215 ÷ 5 = 43 rooms.

Lesson 16

1 3 X 12 = 36 pencils.   , 4 X 28 = 112 pencils.

112 + 36 = 148 pencils. , 148 ÷ 4 = 73 pencils.

2 135 + 195 = 330 pages. , 500 – 330 = 170 pages.

3 3 X 376 = 1,128 pages.

(4) 19 + 27 + 155 = 199 cones.

(5) 8 X 1,421 = 11,368 tourists.

(6) 7 X 9 = 63 , 5 X 10 = 50 , 63 + 50 = 113

(7) 682 + 117 = 799 gems , 799 – 45 = 754 gems.
754 + 130 = 884 gems.

(8) 2 X 14 = 28 LE. , 2 X 22 = 44 LE.
28 + 44 = 72 LE. , 4 X 72 = 288 LE.

(9) 352 ÷ 8 = 44 toys.

(10) 164 + 20 = 184 persons. , 184 ÷ 8 = 23 persons.

Worksheet 11

g 18 **h** 3

(7) **a** 194 – 50 = 144 persons , 144 ÷ 9 = 16 microbuses.
b 18 X 6 = 108 balloons , 108 ÷ 8 = 13 R 4 balloons.
c 8 X 6 = 48 eggs , 48 – 38 = 10 eggs.
d 12 + 28 + 40 = 80 m , 80 ÷ 4 = 20 m
e 42 ÷ 3 = 14 , 14 – 4 = 10 biscuits.
f **Model (A):** 15 X 48 = 720 nails,
15 X 24 = 360 metal rings,
15 X 21 = 315 pieces of wood.
Model (B): 7 X 52 = 364 nails,
7 X 32 = 224 metal rings,
7 X 26 = 182 pieces of wood.
Total: 720 + 364 = 1,084 nails,
360 + 224 = 584 metal rings,
315 + 182 = 497 pieces of wood.
